Cindy, Jae- as we discussed on the last call, we wanted to get together before some of the upcoming travel to discuss and move this matter further along.

Looking at schedules on our side, it seems Wednesday, September 26 between 3 and 5 p.m. or Friday, September 28 between 10 a.m. and 12 noon might work best (Mike- I pulled this from Outlook, so if there are issues, please let me know).

We are happy to host- please let us know what works best or if there are other preferred times, please advise.

Thanks!

Jae,

Wednesday morning at 9:00AM works best for me. We'll meet in front of 7 World Trade. Do you have all of the safety gear or shall I bring some?

Sorry for not getting back to you sooner - I've been out of the office for the past two days.

Dear Tom,
In my earlier email with Nick (see below), we like to have a schedule to see existing field conditions (see bubbled area in my attachment) in the building.
It turned out that the best times for us (CCNY and PE) next week are Wed - Friday, as early as possible (8am - 10am).
Once we are there, we like to see 64 to 67 if possible. Then it will take about 1 hour as my assumption.
Please let me know for any possibilities.
Thanks you so much for your corporation.

Jae

Thanks Jae. While I may have potential conflicts on some of these days, I have added Tom Hoar, Chief Engineer from Royal 1WTC Management/ Durst to this email. Since your site tour is of technical nature, having someone from Tom's group assist will be more productive for your team.

While I would be asked to be added as a optional attendee for this site visit, Tom and Jae please feel free to coordinate what works best for your teams.

Thanks!

Looking at my team's schedule, the following dates and time slots would work well:

Wednesday, February 20 between 1:30 and 3:00 p.m. (potentially to 3:30)
Thursday, February 21 between 11:30 a.m. and 3:00 p.m.

Please let me know what works best for both of you.

Thanks!

Good Afternoon Cindy;

Please ask the PANYNJ representatives on your project their expectation/requirements for NYC DEP calculations relative to the grease trap sizing; whether they require them or not.

Whatever their response, please obtain written verification.

Please advise as soon as possible.

Thank you in advance.
