Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily- each-way average flights which can be thought of as 1 directional departing or arriving flights.

THE PORT AUTHORITY OF NY & NJ JANUARY 2014 TRAFFIC REPORT

Month		Year-to-date		12 Months Ending	
Current	%	Current	%	Current	%

The news in January was all weather, all the time. Not surprisingly, adverse weather conditions took a toll on our traffic as thousands of flights were canceled or delayed. As a result, the region's traffic fell 1%, the first monthly decline since February 2013. Domestic traffic, down 3.1%, suffered most from multiple heavy snow days in the region and around the country. Although international travel was up 3%, it was insufficient to lift traffic at our facilities. In contrast to our region's traffic, the nation's airlines, as represented by A4A, carried 1.3% more passengers, with the international sector up 5.4% and domestic gaining a tepid 0.6%. Negative sentiment that dominated the cargo industry all of last year carried over as the cargo sector started the year with a 5% decline this month.
