Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Steady gains in Mar (+3.1%) and June (+4.5%) help maintain the region's budding passenger recovery, putting YTD June passenger traffic growth at 1.8%. That the gains were achieved in spite of the 4% decline in seats and significant increases in domestic and international ticket prices, portends a resilient recovery. The region's traffic is also performing relatively better as the nation's YTD June traffic is down 0.1%. With a 20.2% gain in June, the region maintained its vigorous cargo recovery.
