Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

The region's passenger traffic grew 3.1% in the first quarter of 2013, on track with the forecast and faster than the nation's 1.3% growth. 1st quarter growth benefited significantly from three factors: A milder January compared to last year's; the occurrence of 2013's Easter in March versus April 2012; and a strong underlying demand. Cargo continued to be weak. It declined 4% and the year end cargo has been revised downward to -3.8%.
