Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

For the first time this year monthly passenger traffic dipped below the 5% monthly average, as May traffic grew a tepid 1.1%. Domestic traffic was up 1.6% but international traffic experienced virtually no growth. However, YTD May passenger growth is 4.9% and we are on track to achieve or exceed the 3% forecast for this year. Cargo continues to remain weak though the 4.5% decline in May is a vast improvement over the average monthly decline of 9%, thus far this year. Due to the continued weakness, we anticipate that the magnitude of the 2012 cargo decline will probably be larger than the 4% decline predicted for this year.
