Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Aviation Department

Passenger traffic at our airports was down just 0.2% in October, the second-best monthly performance since last summer. Although disappointing after we saw passenger levels grow 1.4% in September, the latest data is consistent with an overall trend of stabilization in the air travel market at our region's airports.
