Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized."Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

THE PORT AUTHORITY OF NY & NJ FEBRUARY 2016 TRAFFIC REPORT

Month		Year-to-date		12 Months Ending	
Current	%	Current	%	Current	%

Thanks in part to gaining an additional day for leap year, the region's passenger traffic achieved a 10.5 percent increase - a new February record. The last time the region experienced monthly double-digit growth was in October 2013. Our airports served a record 8.7 million passengers, or 831,000 more than we handled in February 2015. International traffic set the pace with an 11.6 percent increase and set a new record level for the month of February. Domestic traffic, too, set a new monthly mark as it posted a 10 percent growth. The last time our domestic and international passenger traffic achieved double-digit growth was in November 2015 and April 2014 respectively. The region's traffic growth also benefitted from an 8 percent seat capacity expansion and higher aircraft load factors. Cargo performance continued to underperform, registering a 3.8 percent drop. International freight, which accounts for 65 percent of the region's cargo activity, fell 3.7 percent.
