

NextGen Now

An antiquated air traffic control system that is dependent on ground-based radar technology is threatening the safety and efficiency of our airports and stifling the economy of the entire nation. The Federal Aviation Administration's Next Generation Air Transportation System – called NextGen – will alleviate delays at the nation's most congested and delay-prone airports.

**For the health of our nation's economy and future air traffic growth,
we must act now to bring NextGen technology to our airports.**

My organization supports the
National Alliance to Advance NextGen

in its efforts to advocate for the passage of Federal Aviation Administration Reauthorization legislation that includes NextGen initiatives. We support a long-term, multi-year commitment from Congress and the Administration to implement NextGen at our nation's airports.
