Answer 2: See item 2) above.

Answer 5: Proposers should see the RFP letter, Section III, item N, entitled “Federal Submission Requirements” for information about which certifications and forms must be submitted with the proposals, and by whom.

Exhibits IA, IB & IC contain more detailed information.

In addition to the forms that need to be submitted by both Consultants and their subconsultants/subcontractors, several of the certifications require Consultants to include provisions in their subcontracts, and obtain certifications from their contractors, and in that case the Proposer should submit such forms/certifications from their known subconsultants/subcontractors at the time of proposal submission.

Question 6: Considering that a number of RFPs have been recently issued by the Authority and the upcoming Thanksgiving holiday, we respectfully request an extension until December 14, so that we may better respond to the information requested.

Answer 6: See item 1) above.

Question 7: The subject RFP has a minimum Proposal Requirement for 10 Geotechnical Engineers from the Prime. Please consider allowing the geotechnical requirement to be met through utilizing subconsultants.

Answer 7: The Authority will allow subconsultants to be proposed as the Geotechnical lead(s). See item 2) above.
