

The Port of New York & New Jersey

America's Front Door

Terminal Services Guide 2013

Welcome to the Port of New York and New Jersey, America's Front Door. Our facilities grant access to the most densely populated and affluent consumer market in North America.

With over 40 ocean carriers, we offer more first-in and last-out vessel calls than any other East Coast port. That means your inbound cargo is available sooner, while your outbound shipments have more time to get to their vessels.

Our extensive network of highways, truck support, and three Class I rail service providers can speed your products to more than 21 million consumers locally, plus another 100 million throughout the Midwest and Canada.

Each year, our container terminals handle more than 5 million TEUs. Innovative technology, flexible gate hours, paperless processing, a highly skilled ILA labor force, and over 60 weekly ocean carrier vessel services contribute to expediting your shipments.

For cargo with special climate requirements, our marine terminals offer more than 4,400 refrigerated container (reefers) plugs, with more coming online soon. Comprehensive web-based monitoring systems track and maintain reefers from vessel loading and discharge to gate in and out, while highly skilled ILA mechanics make around-the-clock temperature and humidity checks.

Our warehouse operators provide bonded, rack, and bulk storage while leveraging heavy container capabilities to facilitate ease of export, multiply import options, maximize container space, and reduce transportation costs. These capabilities apply to both dry and reefer cargo.

Over the last decade, The Port Authority of New York and New Jersey and its terminal partners have made significant investments that transformed the entire port – including building a new rail system. But it's just the beginning. We continue to deepen our channels, augment our roadways, upgrade/expand our rail system, and add container terminal acreage. Plus, work is under way to raise the Bayonne Bridge to accommodate Super Post-Panamax vessels.

For these reasons, and so many more, it's easy to see why more than \$175 billion in cargo moves through the Port of New York and New Jersey each year. Why take the back road to success? Ship your goods through America's Front Door: The Port of New York and New Jersey.
