Sukhrob Khalilov

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

In contrast to January's record-breaking 6.3% gain, passenger traffic fell 0.7% in February. Domestic traffic dropped 1.2% and international was nearly flat as it grew only 0.3%. Two factors contributed to February traffic decline: winter storm Nemo and the fact that last February was a leap year month. Winter storm Nemo prompted several carriers to cancel thousands of flights in advance of the storm. Without these adverse impacts, traffic would have risen by at least 3.5%. Cargo had been weak throughout last year, Nemo and leap year month simply made it worse and as a result, cargo fell 6.6% in February. We are in the process of revising the cargo forecast downward.
