Aviation Department - Traffic Statistics

JoJo Quayson
Juan Clar
Jean Debrosse
Daniel Gafurson

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized."Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Aviation Department

This year began just as last with poor weather dominating the news. However, there were two significant differences: An improving economy created positive momentum, and weather was not as severe at the start of 2015 as it was in 2014. Passenger traffic continued growing and posted a 2% increase despite 7% capacity attrition by our carriers. Domestic and international traffic increased 1.9% and 2.1% respectively, although growth was disproportionately attributable to two airports-JFK and ACY. Positive sentiment that dominated the cargo industry all of last year carried over as the cargo sector began the new year with a 3.2% increase. This is the 7th consecutive month of freight growth and is a good sign for the future of cargo in our region.
