Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Regional March Traffic grew 2.3%, reacting to \$120 a barrel crude oil and the dampening effect that has on consumer spending. Passenger growth here continues to compare favorably to the March US flag airline national average decline of (2.1%) in revenue passenger miles. Freight, suffering from fuel add-ons and a less than robust economic environment, declined (6.3%).
