The Questions and Answers numbering sequence will be continued sequentially in any forthcoming Addenda that may be issued.

Question #1	Does the Authority want the bead storage tank referenced on p2, item 3, line 6 in the spec?
Answer # 1	See above.
Question #2	Bid specs call for the power pack (p4, item 6) to be mounted under the platform and forward on the passenger side, and the lift gate (p5, item 8) to be mounted curbside. In addition, the chassis design is such that there is no room under deck on the street side for one of these components. This creates a design issue since both of the components cannot occupy the same space. please review and advise how we should proceed?
Answer #2	See above.

This communication should be initialed by you and annexed to your Bid upon submission. In case any Bidder fails to conform to these instructions, its Bid will nevertheless be construed as though this communication had been so physically annexed and initialed.
