THE PORT AUTHORITY OF NY & NJ

THE PORT AUTHORITY OF NY & NJ

MEMORANDUM

AVIATION DEPARTMENT

From: Susan M. Baer
Date: May 20, 2009
Subject: **2008 ANNUAL TRAFFIC REPORT**

Attached is the 2008 Annual Traffic report, which provides important statistics on air traffic at our regional aviation facilities, including comparative data on airports worldwide and the vast number of destinations our airports offer our customers.

Last year was challenging for our airports. The region's four commercial airports handled 107 million passengers in 2008 – three million fewer than the previous year. This translates to a decline of 2.7 percent compared to 2007.

Our region's declining traffic performance was caused by two intertwining shocks: unprecedented and unrelenting increases in jet fuel prices in the first half of 2008, and a housing-induced financial crisis. The spike in fuel prices made several markets unprofitable, forcing carriers to reduce the region's 4Q08 capacity by 5.4 percent, and prompting increased ticket prices and new baggage charges. Meanwhile, the housing crisis led to a faltering U.S. economy, which in turn pulled most of our major trading partners into a recession. This economic downturn is on track to be one of the deepest we've experienced since World War II.

Our airports' 2008 statistical highlights:

- Despite the downward trend, our region's passenger traffic outperformed the nation, as overall national traffic dropped 4.7 percent in 2008, compared to our region's 2.7 percent decline.
- JFK was the only facility in our airport system that realized growth in 2008. The airport handled 47.8 million passengers, a growth of 0.18 percent.
- LaGuardia handled 23.1 million passengers, representing a 7.8 percent decrease since last year. LaGuardia is the only airport in our system to experience three consecutive years of declining passenger totals, and it is the first time an airport in our system has had passenger traffic decline for three straight years since 1973-1975.
- In 2008, Newark Liberty handled 35.4 million passengers, a decline of 2.8 percent. This represents the first time the airport's passenger traffic has declined since a 6.1 percent drop in 2002.

- Stewart International Airport, the newest addition to our airport system, handled 789,307 passengers, a 13.6 percent decline from 2007.

The overarching concern of both the nation and global carriers remains the intensity and duration of the global economic recession. Weak passenger demand resulting from the recession, job losses and economic insecurity is expected to drag down passenger traffic at our region's airports by 3.9 percent in 2009, to 103 million.

We've seen in the past that our region and airport facilities are resilient. We have weathered countless crises, including past recessions, SARS, and the precipitous downturn in traffic following the 9/11 terrorist attacks, and traffic always has rebounded. However, because this current recession is deep and the anticipated economic recovery is expected to lack the usual vigor, passenger levels attained in 2008 will not be reached again until 2012. JFK and Newark are expected to hit 2008 levels in 2011, while LaGuardia and Stewart should reach those levels in 2013.

In the interim, the Aviation Department is strategizing to maintain pertinent capital programs that will position us to take full advantage of future traffic growth. As demonstrated by these statistics, the Aviation Department is committed to achieving regional prosperity through a unified system of airport facilities that offer unsurpassed capacity and quality, a safe and secure environment, an excellent customer experience, and environmentally sustainable and community friendly services delivered by a first-rate staff.

JOHN F. KENNEDY INTERNATIONAL AIRPORT

OPERATED BY

The Port Authority of New York and New Jersey, under a lease with the City of New York since June 1, 1947. In 2004 the Port Authority and the City of New York concluded an agreement that ensures the agency's continued operation of JFK and LaGuardia airports through 2050.

LOCATION

On Jamaica Bay in the southeastern section of Queens County, New York City – 15 miles by highway from midtown Manhattan.

SIZE

JFK covers 4,930 acres, including 880 acres in the Central Terminal Area (CTA). The airport has more than 30 miles of roadway.

HISTORY

Construction began in April 1942 under a New York City contract on the site of Idlewild golf course. Commercial flights began July 1, 1948. The airport was rededicated on December 24, 1963 as John F. Kennedy International Airport in memory of the nation's thirty-fifth president.

JFK is the United States' leading international gateway. Almost 80 airlines operate out of JFK.

The airport made aviation history when on March 19, 2007 the A380, the world's largest passenger plane, touched down on United States' soil at JFK for the first time in a route-proving test, and again on August 1, 2008 when an Emirates Airline A380 landed at JFK on the first regularly-scheduled arrival of the A380 into the U.S.

INVESTMENT

About \$150 million was expended by the City of New York on original construction. The Port Authority has invested more than \$6.1 billion in the airport.

EMPLOYMENT AND ECONOMIC IMPACT

JFK contributes about \$30 billion in economic activity to the NY/NJ region, generating approximately 230,000 jobs and about \$9.8 billion in wages and salaries. About 35,000 people are employed at the airport.

REDEVELOPMENT PROGRAM

The redevelopment program consists of several major projects undertaken by the Port Authority and its airline and airport partners. Completed projects include: Terminals 1, 4, the new American Airlines' Terminal 8, upgrades to Delta's Terminals 2 and 3, and British Airways' Terminal 7; plus a quadrant roadway system, new parking garages, and a light rail network (AirTrain JFK), which opened in December 2003. A 1,940-space parking garage adjacent to American Airlines' new terminal opened in November 2006. In December 2005, construction began on a new JetBlue 26-gate terminal behind the landmark TWA

Flight Center. A 1,500-space parking garage is being built adjacent to the new terminal. These facilities opened in the fall of 2008.

CENTRAL TERMINAL AREA (CTA)

JFK has seven operating airline terminals, surrounded by a dual ring of peripheral taxiways. The original 655 acres in the CTA were enlarged to 880 acres by relocating taxiways to provide needed space for expanding the passenger terminals. There are over 125 aircraft gates serving the terminals. The CTA also includes a central heating and air-conditioning plant.

Terminals

- A consortium of airlines – Air France, Japan Airlines, Korean Air and Lufthansa – built the 11-gate international **Terminal 1**, opened in May 1998 on the site of the old Eastern Airlines Terminal.
- Delta Air Lines operates **Terminals 2** and **3**. Delta invested about \$150 million to renovate the terminals which consists of redesigned first and business class lounges, new ticket counters, lighting and flooring and new baggage facilities. New food, beverage and retail outlets opened in 2007 and 2008.
- **Terminal 4** opened in May 2001. The 1.5 million square-foot common-use facility improves passenger service through the use of separate levels for departing and arriving passengers, consolidated ticketing and baggage operations, improved customer facilities, duty free and a wide array of retail shops and eateries.
- The original **Terminal 5**, formerly operated by TWA, is closed. JetBlue used to operate out of **Terminal 6** and made \$12 million in interim improvements. A new **Terminal 5** was built by the Port Authority and JetBlue. The joint \$875 million construction project also includes a parking garage (see above).
- **Terminal 7**, operated by British Airways, opened in 1970. A \$251 million redevelopment project included expansion and reconfiguration of the terminal, new ticketing and check-in areas, new retail outlets, lounges and a new departure and arrival roadway system. United Airlines also operates out of this terminal.
- American Airlines created one new facility (the new **Terminal 8**), which fully opened in 2007 and serves both domestic and international passengers on three concourses and includes expanded check-in areas, top name-brand shops and eateries, plus numerous services. A 1,940 parking-space garage adjacent to the new terminal opened in November 2006.

AirTrain JFK

This light-rail service links the airport to New York City and beyond. Opened in

December 2003, AirTrain connects to the Long Island Rail Road (LIRR) and the New York City subway and bus lines. On airport, AirTrain provides fast, free connections between terminals, rental car facilities, hotel shuttle areas and parking lots.

AIR TRAFFIC CONTROL TOWER

The 321-foot Air Traffic Control Tower, which opened in 1994, includes state-of-the-art communications, radar and windshear alert systems.

ROADWAY ACCESS

A new roadway configuration in the Central Terminal Area divides the roadway network into five terminal areas so motorists can make direct connections between terminals, parking lots and airport expressways.

PARKING

The airport offers customers more than 17,000 parking spaces. E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, is available in all parking lots and garages, except for the overflow lot.

A Central Taxi Hold was opened in 1995.

CARGO

JFK is one of the world's leading international air cargo centers. Two cargo facilities totaling 430,000 square feet of warehouse and office space opened in 2003 and offer the latest in cargo-facility design. The airport has more than one million square feet of office and warehouse space dedicated to broker, freight forwarder and container freight station operators who do business within the NY/NJ region.

RUNWAYS/TAXIWAYS

The runway system consists of two pairs of parallel runways (4L-22R, 4R-22L and 13L-31R, 13R-31L) aligned at right angles. Total runway length is nine miles. All runways have high intensity runway edge lighting, centerline and taxiway exit lighting and are grooved to improve skid resistance and minimize hydroplaning. A 500' by 150' aircraft arrestor bed has been installed at the end of Runway 4R, the first such arrestor bed in the world.

Taxiways total 25 miles in length. Standard width is 75 feet with 25-foot heavy-duty shoulders and 25-foot erosion control pavement on each side. Other features include the taxiway centerline light system and a sign system, illuminated at night to provide directional information for taxiing aircraft.

The Port Authority invested \$200 million into JFK for taxiway and airside rehabilitation to prepare for the new A380 aircraft. \$150 billion is being dedicated to fund technical and customer-service initiatives identified by the Flight-Delay Task Force, convened by the Port Authority, to study airport delays.

NEWARK LIBERTY INTERNATIONAL AIRPORT

.....

OPERATED BY

The Port Authority of New York and New Jersey, under a lease with the City of Newark, since March 22, 1948. In 2002 the Port Authority and the City of Newark entered into an agreement to extend the lease through 2065.

LOCATION

In Essex and Union Counties between the New Jersey Turnpike (accessible from Exits 13A and 14), U.S. Routes 1 and 9 and I-78. The airport is about 16 miles from midtown Manhattan.

SIZE

2,027 acres. 880 acres of this total were acquired by the Port Authority after it began operating the airport in 1948.

HISTORY

Opened October 1, 1928, the metropolitan region's first major airport was built by the City of Newark on 68 acres of marshland and quickly became the world's busiest commercial airport. During World War II, the airport was operated by the Army Air Corps. After the Port Authority assumed responsibility for its operation, the agency added an instrument runway, a terminal building, a control tower and an air cargo center. The Central Terminal Area was constructed and opened in 1973. Other construction during the early 1970s included the Port Authority Administration Building, the Central Heating and Refrigeration Plant, and taxiways and roadways. In 1989, a two-building maintenance complex opened.

The International Arrivals Facility opened in Terminal B in 1996, the Monorail (now AirTrain Newark) began operation in 1996 and a 325-foot control tower was commissioned in 2003 – the fourth in the airport's history.

Approximately 50 scheduled airlines operate out of Newark Liberty.

INVESTMENT

The City of Newark spent over \$8.2 million on construction and development of the airport. The U.S. Government spent over \$15.1 million prior to 1948. The Port Authority has invested nearly \$4.3 billion at the airport.

EMPLOYMENT AND ECONOMIC IMPACT

About 24,000 people are employed at the airport. EWR contributes more than \$18.5 billion in economic activity to the NY/NJ metropolitan region including over \$6.7 billion in wages and salaries. About 157,000 jobs are derived from airport activity.

REDEVELOPMENT PROGRAM

EWR's capital program combines some \$3.8 billion in Port Authority, federal and private funds and has delivered numerous improvements, including AirTrain Newark,

new restrooms, ticket counters, signage, parking garages and runway and taxiway improvements. A \$2 million study for modernizing Terminal A has been approved. Terminal B is benefiting from a \$280 million modernization program. A \$22.4 million 325-foot control tower was commissioned in May 2003.

PORT AUTHORITY ADMINISTRATION BUILDING

In 2002, reconstruction of the landmark Newark Liberty International Airport's Administration Building #1 was completed. The 100,000 square-foot building incorporates a new emergency response facility with the airport's original 1935 central terminal building, a National Historic Landmark. The facility houses much of the Port Authority's airport staff.

CENTRAL TERMINAL AREA

The 425-acre oval Central Terminal Area was built as part of a large-scale airport redevelopment program in the 1960s and early 1970s. It consists of three passenger terminals – A, B and C.

Passenger Terminals

- Construction of **Terminal A** began in October 1967, and it opened for operation in August 1973. With 27 gates, the terminal branches out into three circular satellite buildings. The satellites contain flight departure lounges and airline and passenger service facilities. The main terminal building measures approximately 800 by 165 feet. Redevelopment plans include a \$20 million study to modernize the terminal.
- In **Terminal B**, Delta completed a \$5.5 million modernization of its gate area shared with Northwest, and Northwest upgraded its boarding and baggage areas. The \$117 million International Arrivals Facility located in Terminal B opened in January 1996. This facility has 15 international arrivals gates. In 2002, a multi-million dollar project that included the replacement of escalators, installation of new revolving doors, and three freight-sized elevators was completed. When a \$318 million dollar modernization of Terminal B is completed, there will be a third floor, new ticket counters, a domestic baggage claim and in-line baggage screening areas.

At **Terminal C**, Continental's Global Gateway project includes the C3 concourse, which opened in December 2001. With an additional 600,000 square feet of space, the facility was converted into a three-level terminal with two levels for departures. The concourse has 19 gates, a huge retail space and Customs facilities. Continental also completed its state-of-the-art International

Arrivals Facility adding another 1,500 passenger-per-hour arrival capacity to the airport.

AIRTRAIN NEWARK

In the fall of 2001 AirTrain Newark began service to the Newark Liberty International Airport Train Station where passengers can connect to NJ Transit and Amtrak rail lines for links between the airport and New York City, Philadelphia, points across New Jersey and destinations beyond.

ROADWAYS

To reduce congestion and improve airport access, roadways were widened and reconfigured in the passenger terminal area and airport entrances giving vehicles the option to bypass the terminals and proceed directly to parking.

PARKING

The airport provides more than 19,000 parking spaces. Two parking garages were completed within the last few years. One is located at AirTrain Station P4 with six parking levels. The other parking garage is across from Terminal C. E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, is accepted at all parking lots.

CARGO

EWR is the overnight small package center for the NY/NJ region, offering a full range of short-, medium- and long-haul services to domestic and international destinations. The airport expanded its cargo capacity in 2004 with the opening of a 142,000 square-foot facility, which combined with United and Continental's cargo buildings, increases cargo space at the airport to 1.3 million square feet.

RUNWAYS/TAXIWAYS

The airport has two parallel runways (4R-22L and 4L-22R) and a third runway (11-29), which is primarily used for commuter traffic. Runway 4R-22L is 9,980 feet long by 150 feet wide, and Runway 4L-22R is 11,000 feet long by 150 feet wide. Both runways have displaced thresholds to minimize noise effects. Visual aids include high intensity edge and centerline and high-speed exit taxiway centerline lighting. Over 12 miles of 75-foot wide taxiways link the three runways with the central terminal and cargo areas.

\$150 million is being dedicated to fund technical and customer-service initiatives identified by the Flight Delay Task Force, convened by the Port Authority, to study airport delays.

LAGUARDIA AIRPORT

OPERATED BY

The Port Authority of New York and New Jersey, under a lease with the City of New York, since June 1, 1947. In 2004 the Port Authority and the City of New York concluded an agreement that ensures the agency's continued operation of LaGuardia and JFK International through 2050.

LOCATION

In the Borough of Queens, New York City, bordering on Flushing Bay and Bowery Bay. The airport is eight miles from midtown Manhattan.

SIZE

LGA consists of 680 acres and has about 72 aircraft gates.

HISTORY

The airport site was first occupied by Gala Amusement Park, and in 1929 it was transformed into a 105-acre private flying field. It was first named Glenn H. Curtiss Airport and later North Beach Airport. Taken over by New York City, the airport was enlarged by the purchase of adjoining land and by filling in 357 acres of waterfront along the east side. On September 9, 1937 ground was broken for a new airport, and on October 15, 1939 it was dedicated as New York City Municipal Airport. The name was changed to New York Municipal Airport-LaGuardia Field on November 2, 1939. The airport was opened to commercial traffic on December 2 of that year. The airport was leased to the Port Authority in 1947.

Approximately 25 scheduled airlines operate out of LaGuardia.

INVESTMENT

Original construction by the City of New York cost \$40 million. The Port Authority's total capital investment in the airport is \$1.4 billion.

EMPLOYMENT AND ECONOMIC IMPACT

About 8,000 people are employed at the airport. LaGuardia contributes nearly \$11 billion in economic activity to the NY/NJ metropolitan region, generating about 100,000 jobs and \$4 billion in annual wages and salaries.

REDEVELOPMENT PROGRAM

The total combined Port Authority and airport partnership investment for the

airport's redevelopment program is estimated at \$1.2 billion. To meet future air travel demand the Port Authority had undertaken a \$15 million feasibility study to redevelop the Central Terminal Building and other facilities. The cornerstone of the study is a business/financial plan for infrastructure improvements to support growth in the coming decades.

PASSENGER TERMINALS

Central Terminal Building (CTB)

Dedicated on April 17, 1964, this terminal serves most of the airport's scheduled domestic airlines. It is 1,300 feet long and 180 feet wide, with approximately 750,000 square feet of floor space. Originally constructed at a cost of \$36 million, the six-block long terminal consists of a four-story central section, two three-story wings and four concourses that can accommodate up to 40 aircraft gate positions. The CTB completed a \$340 million expansion and modernization project in the 1990s. Its centerpiece is a \$47 million project that redeveloped the center section, including new elevators and escalators to accommodate persons with reduced mobility, plus modern restrooms. This redesigned center section has created a large concession space for shops and eateries. The CTB underwent a host of improvements in 2007 and 2008 while the Port Authority continues its feasibility study for further upgrades.

US Airways Terminal

US Airways' \$200 million terminal opened in September 1992. This 12-gate terminal is connected to the airline's Shuttle Terminal and features approximately 300,000 square feet of floor space and a food and retail concessions court. The US Airways Shuttle Terminal serves passengers hourly with shuttle flights to Boston and Washington, D.C.

Delta Air Lines Terminal

Constructed by Delta Air Lines at the east end of the airport, the terminal opened in June 1983. It has ten aircraft gate positions. Northwest Airlines also operates out of this terminal.

Marine Air Terminal (MAT)

Once called the Overseas Terminal, the MAT was the original airport terminal building, serving international flights on flying boats through the

1940s. In 1995 the Marine Air Terminal was designated a historic landmark. In 1980, the Port Authority rededicated the James Brooks mural, "Flight," first painted in 1942. On September 1, 1991, Delta began shuttle operations to Boston and Washington, D.C. General aviation also operates from the terminal through a fixed based operator. The terminal also houses a private weather service. A \$7 million restoration of this historic terminal was completed for the airport's sixty-fifth anniversary of commercial flight on December 2, 2004.

PARKING

The airport provides more than 11,000 parking spaces. This includes employee parking and approximately 9,600 public spaces – including hourly, metered and parking garage spaces. Completed at the end of 1976 at a cost of \$30 million, the five-level parking garage accommodates approximately 3,000 cars. On October 4, 1998, Lot 3, with 930 spaces, was designated as a long-term lot. E-ZPass Plus is accepted at all parking lots.

RUNWAYS

There are two main runways, 4-22 and 13-31. Each is 7,000 feet long by 150 feet wide. In a \$40 million project, completed in 1967 by the Port Authority, both runways were extended over water to their present length and width. The extensions were built on a 50-acre L-shaped pile-supported concrete structure. The runways have high intensity runway edge lighting, centerline and taxiway exit lighting. Runways are grooved for added traction during wet weather. In the summer of 2005 the airport began installing touch down zone lighting (TDA) as part of the Runway 13-31 rehabilitation program.

STEWART INTERNATIONAL AIRPORT

OPERATED BY

The Port Authority of New York and New Jersey since November 1, 2007. In 2007 the Port Authority purchased the remaining 93 years of a 99-year operating lease for \$87.5 million.

LOCATION

Newburgh/New Windsor, New York at the intersection of the New York State Thruway (I-87) and Interstate 84. The airport is 60 miles north of New York City and within a 250-mile radius of Philadelphia, Baltimore, Washington, D.C., Buffalo, Boston, Toronto and Montreal.

SIZE

SWF covers 2,400 acres.

HISTORY

In 1930, Archie Stewart, an aviation buff and descendant of a prominent local dairy farmer, Lachlan Stewart, donated 220 acres of land to the City of Newburgh to be used as an airport. In 1934, the City of Newburgh transferred the land to the U.S. Government for \$1. In 1939 the U.S. Military Academy at West Point built the first airfield at Stewart for cadet aviation training. In 1948 the airfield became Stewart Air Force Base. It was acquired by the State of New York in 1970. The operating responsibility of the airport was later transferred to the New York State Department of Transportation (DOT). In the 1980s, several business enterprises began operations at SWF after the DOT and the Urban Development Corporation began planning for the development of the airport under Stewart Properties. On March 31, 2000 SWF became the nation's first privatized commercial airport under a 99-year lease agreement with National Express.

In 2007 the Port Authority purchased the remaining 93 years of this lease.

DEVELOPMENT

In 1991, SWF became the first facility to receive \$5 million in funding under the Federal Aviation Administration's (FAA) Military Airport Program for capital improvement to airports that were

formerly military facilities or military/civil aircraft-use facilities. The FAA that same year awarded the airport a \$900,000 grant to fund a master plan update, conduct an environmental review and prepare a noise capability study. SWF also received \$13 million in federal funding for infrastructure rehabilitation. In 1992, the airport received another \$3 million from the FAA's Military Airport Program for terminal expansion. SWF initiated a passenger facility charge in 1995 to help fund capital projects. The airport opened a 50,000-square-foot air cargo building in 1990.

The Port Authority in 2007 committed several million dollars for short-term projects, including taxiway improvements, parking lot expansion and 200 additional new seats in the passenger terminal. A new access road to the airport opened in late 2007. The Port Authority's 2000-2016 capital plan allocates \$500 million in capital improvement and expansion projects to bring SWF into the next decade.

PASSENGER TERMINAL AND FACILITIES

SWF's passenger terminal concourse opened in 1997, featuring seven jet-boarding bridges, ticket counters, spacious gate areas and an electronic Flight Information Display System. The terminal was redesigned in 1998 to include concession space, car rental agencies and other enhancements. Its latest upgrades include an expansive new lobby, 38 check-in stations, an additional checkpoint lane and a wider entranceway. The terminal accommodates seven passenger gates. SWF added three new Explosive Detection System (EDS) baggage screening systems to enhance airport security. The terminal provides high-speed broadband wireless connectivity via Wi-Fi service located throughout the terminal. An ATM is located near the baggage claim area.

CARGO

The airport handles a variety of cargo from oversize freight, to express packages to livestock and is home to the

New York Animal Import Center. DHL, Fed Ex and UPS operate daily on the airport. The U.S. Postal Service's mail facility for the mid-Hudson region and a USDA inspection facility are nearby.

ROADWAY ACCESS/GROUND TRANSPORTATION

SWF is located at the intersections of I-84 and I-87. A new I-84 exit was completed in the fourth quarter of 2007.

The Newburgh-Beacon-Stewart Link served by Leprechaun Bus Line provides service over the Newburgh Beacon Bridge for connections between Metro North's train station in Beacon, the Park & Ride lots and the airport. Shortline Bus provides service between the airport and the Newburgh Terminal. The Metro North-Port Jervis line offers a direct link to Hoboken, NJ from the Salisbury Mills station. The Hudson Line provides a direct link to Grand Central Terminal from the Beacon station. Amtrak service is provided from Poughkeepsie, Croton-Harmon.

Some area hotels offer free shuttle service to and from the airport's terminal. Taxi and limousine service is provided by Visconti Ground Transport Service. Car rental agencies are located in the passenger terminal.

PARKING

The airport offers short-term, daily and economy-long-term parking, all within a short distance from the passenger terminal.

AIR TRAFFIC CONTROL TOWER

A state-of-the-art control tower was commissioned by the FAA in 2006. Open 24 hours a day, the tower is staffed by FAA-certified air-traffic controllers.

RUNWAYS

SWF has two pairs of runways: one is 11,818 feet (3,602m) long and the other is 6,006 feet (1,831m) long. Both runways are 150 feet (46m) wide.

DOWNTOWN MANHATTAN HELIPORT

OPERATED BY

The Port Authority of New York and New Jersey on a site leased from the City of New York from December 8, 1960 through the end of 2008.

LOCATION

Just above the Battery on Pier 6, East River, between the north side of Pier 5 and the south side of Pier 8. The heliport is convenient to the major air traffic-generating center of the downtown Manhattan/Wall Street area. Direct highway access is available via the FDR Drive on the east side of Manhattan and the West Side Highway on the west side. The entrance to the heliport is just south of where the FDR Drive begins, directly opposite the Vietnam Veteran Plaza. The facility is only seven minutes by copter to Newark International and LaGuardia airports, eight minutes to JFK and 15 minutes to the Morristown (N.J.) Airport.

SIZE

Total square footage = 84,000; Pier = 550 ft. x 85 ft.; Barge – 90 ft. x 300 ft.; Parking = 12 helicopters, 18 cars.

HISTORY

Built and operated by The Port Authority on a site leased from the City of New York. Opened December 8, 1960, it was the second commercial heliport in Manhattan and was the first in the U.S. to be certified for scheduled passenger helicopter service by the FAA. The Downtown Heliport was reconstructed in 1987 and is one of four FAA-designated national demonstration projects for the latest developments in equipment to enhance helicopter operations.

FACILITIES

The heliport has parking for helicopters up to 50,000 pounds. It is the first public heliport with a semi-automatic fire protection foam system, and the first to use a barge for aircraft parking. The facility's terminal building is one of the most advanced in the industry, offering administrative office space, superior package and breakdown areas for courier operations, and a passenger-waiting lounge with the comforts of a modern airport terminal. It also houses the Port Authority's heliport operations center and a pilot lounge. The terminal features year-round heating, air-conditioning, soundproofing, ventilation and lighting for maximum comfort and convenience.

The Port Authority has invested over \$14.2 million in the facility.

TETERBORO AIRPORT

OPERATED BY

Teterboro Airport (TEB) is owned and operated by the Port Authority of New York and New Jersey.

LOCATION

Located in the boroughs of Teterboro and Moonachie in Bergen County, NJ, it is twelve miles by highway from midtown Manhattan via the George Washington Bridge or Lincoln Tunnel.

SIZE

Total = 827 acres: 90 acres for aircraft hangers, maintenance and office facilities; 408 acres for aeronautical use and 329 undeveloped acres.

HISTORY

TEB is the oldest operating airport in the NY/NJ Port district. In 1917, Walter C. Teter acquired the property. During World War I, North American Aviation operated a manufacturing plant on the site. After the war, the airport served as a base of operations for Dutch aircraft designer Anthony Fokker. The first flight from the present airport site was made in 1919. During World War I, the airport was operated by the Army Air Force. It was purchased by the Port Authority on April 1, 1949 from Fred L.

Wehran, a private owner. The airport was leased to Pan Am World Airways and then to Johnson Controls for 30 years. On December 1, 2000, the Port Authority assumed full responsibility for its operation, together with American Port Services, Inc., which manages the daily operations and maintenance of the facility.

INVESTMENT

Since 1970, the Port Authority has invested more than \$223 million to upgrade the airport's facilities and open new areas of service to the aviation community.

EMPLOYMENT AND ECONOMIC IMPACT

TEB continues to contribute to the economic activity of the Bergen County community by generating more than 4,400 jobs and \$223 million in wages.

AVIATION ROLE

TEB is designated a "reliever" airport, according to the National Plan of Integrated Airport Systems that serves general aviation requirements for the greater New York area. The facility has two runway configurations.

Runway 1-19 (North/South) is 7,000 feet long. Runway 6-24 (NE/SW orientation) is 6,012 feet long. The airport is a 24-hour public-use facility, offering both visual non-precision and "all weather" precision landing capabilities.

The Port Authority continues to work with the Teterboro Industry Working Group, a voluntary organization of airport industry leaders, working to bridge the interests of the industry and airport neighbors.

It is important to note that, as a general aviation reliever airport, TEB does not accommodate scheduled carrier operations. The airport also imposes weight restrictions, prohibiting the use of aircraft with operating weights in excess of 100,000 pounds. TEB's utilization is comprised of a broad range of general aviation aircraft. The airport bans Stage 1 aircraft and has installed the newest safety technologies with its Engineered Materials Arresting System (EMAS) at the end of Runway 6/24, a technology pioneered by the Port Authority and the FAA.

Airline

This table is derived from the **United States DOT 10% sample Origin & Destination Survey**. This table reflects a factor of 10 adjustment to the raw sample. The airline codes shown for the top two airlines in each market are industry standard IATA codes which are used for publishing airline schedules. B6 for example, is JetBlue, NK is Spirit, CO Continental, AA American, etc...

Note on "Pure" domestic O&D: DOT domestic O&D data includes the domestic portion of international journeys (called DPIJ's). Pure domestic O&D data excludes DPIJ's. Note also that in comparisons of O&D traffic to domestic enplanements plus deplanements, that the latter will always be higher. This is due to the non-O&D traffic that connects at Port Authority airports, but is neither originated or destined in the NYNJ region.

Ranked
Airline

This table is derived from the **United States DOT 10% sample Origin & Destination Survey**. This table reflects a factor of 10 adjustment to the raw sample. The airline codes shown for the top two airlines in each market are industry standard IATA codes which are used for publishing airline schedules. B6 for example, is JetBlue, NK is Spirit, CO Continental, AA American, etc...

Note on "Pure" domestic O&D: DOT domestic O&D data includes the domestic portion of international journeys (called DPIJ's). Pure domestic O&D data excludes DPIJ's. Note also that in comparisons of O&D traffic to domestic enplanements plus deplanements, that the latter will always be higher. This is due to the non-O&D traffic that connects at Port Authority airports, but is neither originated or destined in the NYNJ region.

EWR

Olympia Trails - currently serves Bryant Park and GCT, formerly served lower Manhattan and Penn Station

Express #300 bus - currently serves PABT

NJT Rail Services & AirTrain - currently serves Manhattan and various points in New Jersey

Airlink/302 bus - formerly linked Newark Penn Station with EWR but ceased operations with opening of AirTrain

JFK

New York Airport Service - currently serves GCT and the PABT in Manhattan (formerly known as Carey bus)

Subway, LIRR & AirTrain - currently serves various points in the City of New York and Long Island

LGA

New York Airport Service - currently serves GCT and the PABT in Manhattan (formerly known as Carey bus)

SWF

Leprechaun Bus - currently serves Beacon Metro-North commuter rail station

2000	n/a	n/a	n/a		n/a
2001	n/a	n/a	n/a		n/a
2002**	20,000	29,500	9,400		58,900
2003	n/a	n/a	n/a		n/a
2004	18,352	29,519	7,874		55,745
2005	n/a	30,988	9,110		n/a
2006	n/a	32,350	9,172		n/a
2007***	20,900	34,576	8,796	n/a	64,272
2008	22,124	35,527	9,689	n/a	67,340

Note*: n/a = Airport not surveyed for this year.

Note:** In 2002 and afterwards, the numbers shown are derived from a different method from that used prior. The earlier period figures were based on surveys of employers at the airports. The current method counts registered employees having either access to the ramp or airfield and others not having access to the ramp, such as those working in concessions, janitorial, check-in or customer service service employees.

Note*:** At Newark, in August 2007 there were 18,277 employees with ramp access. Those not having access were estimated based on a June 2008 count.
