- EZP Off-Peak rates for each class will be calculated as 0.8 times the E-ZPass Peak rate in each year
- TbM toll rates for each class will be calculated as 1.45 times the E-ZPass Peak rate in each year, or if lower, the prevailing truck rate for the corresponding axles
- After 2034, bus tolls will be adjusted for inflationary increases on annual calculations of Consumer Price Index (CPI) growth

MODIFICATION OF BUS FEES AT THE PORT AUTHORITY BUS TERMINAL (FUTURE NEW MIDTOWN BUS TERMINAL (MBT))

1. Implementation of a new fee to be paid on each revenue arrival operated at the bus terminals in addition to the fee currently paid for each revenue departure effective July 5, 2026 as follows:
 - Short-haul bus arrival and departure fees set at \$2, increasing by \$2 annually, then increases by \$5 when the new MBT opens
 - Long-haul bus arrival and departure fees set at \$30, increasing by \$2 annually until the interim operation period (where they remain \$30). Once the new MBT opens long-haul fees will be calculated as 2.5 times the short-haul bus rate in each corresponding year
 - Arrival and departure fees for minibuses calculated as 0.75 times the arrival and departure rates paid by short-haul buses in each corresponding year
 - In the new MBT fees will be adjusted annually increasing by a minimum rate of 3% per year, with a true-up mechanism to allow for revisions to the fees to align revenue growth with expense growth
2. Replacement of the existing escalation mechanism for gates fees and bus parking rates from the growth in the Consumer Price Index to a flat 5% escalation rate
3. Establishment of a new parking fee at the new MBT of \$3.4M per month (compared to the current rate of \$1.3M per month), to be escalated by a 5% flat rate
