

2024 Air Emissions Inventory

Compared with 2006 baseline

2024 Emissions Efficiency

Compared with 2006 baseline

Overall operations at the Port of New York & New Jersey are more efficient resulting in lower emissions for cargo units (MTEU*) moved. The emissions efficiency are due to larger vessels calling the Port of New York & New Jersey and cleaner equipment, vehicles and vessels.

*MTEU: million twenty-foot equivalent units
