EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2004. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERCLIS site within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>T&J LF</i>	<i>70 PORT STREET</i>	<i>SSW 1/8 - 1/4 (0.175 mi.)</i>	<i>H72</i>	<i>138</i>

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2 CERC-NFRAP sites within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
FIORE DEMOLITION	152 RUTHERFORD STREET	NE 1/8 - 1/4 (0.174 mi.)	I70	136

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-SQG site within approximately 0.189 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 2 RCRA-CESQG sites within approximately 0.189 miles of the target property.

SHWS: Known contaminated sites in New Jersey except those associated with Bureau of Underground Storage Sites (BUST)

A review of the SHWS list, as provided by EDR, and dated 07/01/2011 has revealed that there are 3

EXECUTIVE SUMMARY

SHWS sites within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AVIS RENT A CAR SYSTEMS INC Status: ACTIVE	NEWARK INT'L AIRPORT	0 - 1/8 (0.000 mi.)	A7	15
EMERY WORLDWIDE Status: CLOSED	100 PORT ST	SSW 1/8 - 1/4 (0.173 mi.)	H56	114
T FIORE DEMOLITION CONTRACTORS Status: PENDING	152 RUTHERFORD ST	NE 1/8 - 1/4 (0.176 mi.)	I79	148

HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there is 1 HWS RE-EVAL site within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
T FIORE DEMOLITION CONTRACTORS	152 RUTHERFORD ST	NE 1/8 - 1/4 (0.176 mi.)	I79	148

HIST HWS: The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

A review of the HIST HWS list, as provided by EDR, and dated 05/09/2008 has revealed that there are 3 HIST HWS sites within approximately 0.189 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-NonGen sites within approximately 0.189 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Environmental Interest/Information System

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).
 The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HWS RE-EVAL: Site Re-Evaluation Report

The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

Date of Government Version: 09/20/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 10/12/2007	Telephone: 609-984-3081

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Center Listings

Source: Department of Human Services
Telephone: 609-292-1018

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Longitude (West):	74.1568 - 74° 9' 24.5"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	571225.6
UTM Y (Meters):	4506795.5
State Plane X (Feet):	587263.0
State Plane Y (Feet):	684062.1
Elevation:	10 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40074-F2 ELIZABETH, NJ
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood <u>Electronic Data</u>
ESSEX, NJ	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 34013C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic <u>Data Coverage</u>
ELIZABETH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	Engelhard Corp. Specialty Ch
Site EPA ID Number:	NJD064274657
Surficial Aquifer Flow Dir.:	RADIALLY AWAY FROM A MOUNDED GROUND WATER HIGH ON THE SOUTH-CENTRAL PORTION OF THE SITE TOWARD PERSO
Measured Depth to Water:	3 feet to 7.5 feet.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) at the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	material	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.6
2	11 inches	16 inches	gravelly sand	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.6
3	16 inches	25 inches	gravelly sand	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.6
4	25 inches	37 inches	loamy sand	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.6
5	37 inches	59 inches	gravelly loamy sand	Not reported	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

STV Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/09/2011 has revealed that there is 1 CORRACTS site within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AMERICAN BANK NOTE CO BRONX PL	TIFFANY ST GARRISON A	NE 0 - 1/8 (0.122 mi.)	AC307	904

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-TSDF site within approximately 0.189 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AMERICAN BANK NOTE CO BRONX PL	TIFFANY ST GARRISON A	NE 0 - 1/8 (0.122 mi.)	AC307	904

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 8 RCRA-SQG sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 10 RCRA-CESQG sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 07/11/2011 has revealed that there are 6 SWF/LF sites within approximately 0.189 miles of the target property.

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 07/05/2011 has revealed that there are 32 LTANKS sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 29 HIST LTANKS sites within approximately 0.189 miles of the target property.

State and tribal registered storage tank lists

TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the TANKS list, as provided by EDR, and dated 07/05/2011 has revealed that there are 3 TANKS sites within approximately 0.189 miles of the target property.

MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 MOSF UST site within approximately 0.189 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 CBS AST sites within approximately 0.189 miles of the target property.

MOSF AST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 MOSF AST site within approximately 0.189 miles of the target property.

State and tribal institutional control / engineering control registries

RES DECL: A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

A review of the RES DECL list, as provided by EDR, and dated 11/18/2010 has revealed that there are 2 RES DECL sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 07/05/2011 has revealed that there are 142 NY Spills sites within approximately 0.189 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 63 NY Hist Spills sites within approximately 0.189 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 32 RCRA-NonGen sites within approximately 0.189 miles of the target property.

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 TRIS site within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 3 HIST FTTS sites within approximately 0.189 miles of the target property.

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 01/07/2011 has revealed that there are 9 ICIS sites within approximately 0.189 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA

EXECUTIVE SUMMARY

Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there are 81 FINDS sites within approximately 0.189 miles of the target property.

NPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

A review of the NPDES list, as provided by EDR, and dated 07/19/2011 has revealed that there is 1 NPDES site within approximately 0.189 miles of the target property.

MAN HOLE 22114 (Continued)

S106018677

Transferred from Foley to O'Connell. (KMF) 03-OCT-2003 20:19 Lab
 Sequence Number: 03-08229-001 Total PCB <1 PPM 31-Mar-2004 01:30 hrs
 UG Operating Supervisor Chris Blaich inspected M-22114 and did not
 find a D-FAULT condition in structure. The leaky joint has been
 wrapped. Recommendation is to have the joint removed and cable
 replaced and then have duct "Jet-Rodded" from clean manhole into
 already tagged manhole and then clean MH-22114. 31-Mar.-2004 @ 13:35
 hrs. Underground Environmental Mechanic Esham Gafur, #19528 reports
 that the CFS tanker took 60 gallons of liquid and the flush took 300
 lbs. solids. The sump has a cement bottom and no sewer connection.
 Environmental tag number 36328 was removed. The structure was double
 washed with 760 soap and rinsed. Clean up completed. 31-Mar-2004
 18:00 hrs Feeder 4x46 is scheduled to have the leaky primary joint
 cut out and replaced by underground splicing. 31-Mar-2004 23:00 hrs
 The source of the oil is defective joint and cable associated with
 feeder 4x46. Both have been replaced by Underground crews.

Remarks: CALLER STATES APPROX 3 QUARTS IN THE MAN HOLE - SPILL IS CONTINUED -
 CONTINUED #150591 - SPILL WILL BE CLEANED UP PENDING SAMPLE RESULTS

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"O'CONNELL" e2mis no. 147-192: 15-Feb-2003 09:05hrs. While a Private contractor (Cook & Sons) were clearing a blockage in the Oil/Water Seperator in the CFS. Transportation garage they had a blockage that spilled ~ 8 gallons of oil/water mix onto soil. No sewers or waterways involved. Transportation Dept's EH&S Specialist has been notified and is in route to direct the cleanup. Cleanup in progress. 2/15/03 Cleanup completed. Cook and Sons repaired the blockage and removed ~200 Lbs of non hazardous contaminated soil in 1- 55 gallon drum. This cleanup was supervised by Con Edison Commercial Service Rep. M. Harte and Transportation Department's EH&S Specialist J. Martas.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

Piper responded to the site on Friday April 16th. Inspection revealed ribbon spill along tracks to where the train car parked. The refrigerated car then ran out of fuel there. The tank had 250 gal of diesel yesterday in Selkirk, NY. No spill up there though. Area under train is blue stone ballast where a stain approx 8 inches in diameter was discovered. Whatever fuel was left in tank drained at that point. Since spill is in several tracks and on them, no digout can be completed. Contractor proposed to inject ORC type chemical to aid natural attenuation. Closed.

Remarks:

LEak of less than 10 gallons diesel from refrideration unit on box car spilled onto ground, clean up crew is enrout. UPDATE 04/16/10-0940HRS- UPON FURTHER INVESTIGATION IT HAS BEEN DETERMINED THAT THE SPILL QUANTITY IS MORE THAN ORIGINALLY ESTIMATED, ABOUT 240 GALLONS MAY HAVE LEAKED FROM THE SELKIRK NY YARD ALONG THE TRACKS TO THE BRONX YARD. INVESTIGATION IS UNDERWAY.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

10/1/04 Spoke to Steve Malanowski, CA Rich Consultants (516-576-8844), working for the owner's attorney. Owner is Leggett Land. Steve explained that the operator was digging for (2) waste oil tanks listed on PBS registration but didn't find the tanks. However, CA Rich representative read 400ppm on PID during trenching activities. EPA Mr. Leonard Voo was on site during upgrade. Steve will send me a letter documenting their activities. 10/1/04 Spoke to Dr. Norman Munroe, ASTEM Labs(917-497-0190, 305-348-3556). Completed a total of 11 borings on the property, including former diesel tank area. Lab results not yet received but contamination was detected by PID near the pump islands and on one side of the property. Report should be here next week. ASTEM to do GPR this weekend to look for (2) waste oil tanks which are registered. 10/6/04 Site Assessment prepared by ASTEM received. 11 borings completed(4 hit refusal). Six soil samples collected(BH-1,2,3,4,5, 10), three GW samples collected(BH-4,5,10). BTEX at 150,200ppb and MTBE at 3200ppb in soil in BH-1. Lower amounts of MTBE detected in soil in other samples. Max total BTEX in GW 851ppb(BH-10) and max MTBE 3500ppb(BH-10). No GW sample collected from hot spot(BH-1). Groundwater at 20-21'bgs. Flow is southeasterly. No permanent wells installed. Only one boring log submitted. 10/14/04 Sent email to N. Munroe requesting additional information. Groundwater sample could not be obtained from BH-1 due to a compacted clay belt 20-26'bgs(could not develop temporary well). PID readings in BH-11 were low for soil before they hit refusal. Munroe to forward revised diagram with north arrow and copies of the other boring logs. N. Munroe will proceed with arrangements to excavate the contaminated soil and the installation of at least three MWs to determine GW flow direction. Will also forward a proposal for remediation of media on-site and off-site. 11/3/04 Update from N. Munroe. On Friday, November 5, 2004, four 4-inch monitoring/recovery wells will be installed on-site. In addition, will be excavating contaminated soil from the previously delineated hot spot. Once the wells are developed, the groundwater elevation will be determined and groundwater analyzed prior to recommending further remedial activities. All contaminated soils are to be removed during excavation. Floors and sidewalls are to be examined for evidence of contamination and field screened. Post-ex samples will taken every 30 linear feet or every 900 sq ft of bottom area, and analyzed by 8260/8270. 1/20/05 Email from N. Munroe, ASTEM Labs. Four monitoring wells were installed on 11/8/04. They were gauged and sampled 11/11/04. The Remedial Action Plan is being prepared and expected to be submitted by 1/28/05. 1/29/05 Received electronic copy of RAP. Hardcopy has been mailed. 2/1/05 Received hardcopy of RAP. 6/10/05 Email to N. Munroe. Requested more info on recovery well locations and pilot data. 6/22/05 Received passing tightness test results performed by Advanced Tank Services on 4/18/05. 8/9/05 Response from N. Munroe (email)- "I propose to install two (2) additional wells for a total of six (6) on the site. Although the Modflow projections indicated a reversal in the direction of the plume movement with four wells, each at a pumping rate of 44 m3/day in an effort to keep the plume on the subject property, we will utilize five (5) recovery wells at a total flow rate of 40 GPM. The two recovery wells will be designed similar to those presently on site, i.e. each well was constructed of 25 feet of 0.010" slotted screen and 5 feet of 4 inch schedule 40 PVC riser. Three of the existing monitoring wells (MW-2, MW-3 and MW-4) will serve as recovery wells. RW-5 and RW-6 will extend down to 40 feet with 35 feet of screen since they are closer

S106000129

to the plume. Attached is a schematic diagram of an ASTEM designed recovery well, which allows the attachment to the SVE as well as connection to the Pump & Treat system. The top of the three existing monitoring wells will be modified to accomplish the function of recovery wells that can be sampled. The locations of the recovery wells are shown on the schematic diagram of the Remediation Plan 1-26-05 as well as in the Addendum to the Remediation plan, which depicts the MODFLOW projections of groundwater water flow direction. The SVE pilot testing has been completed. I will forward the results this weekend." 9/14/05 Email from N. Munroe, ASTEM. ASTEM reported to 1081 Leggett Ave. to conduct the pilot study and found three of the monitoring wells covered with blacktop. The owner, Veeru Dhillon, called him today and instructed him that he could commence working on the pilot study. He indicated that he would have the blacktop material removed from above the monitoring wells by Friday of this week. ASTEM plans to conduct the pilot on Saturday. 9/29/05 Received Remediation Action Plan addendum 3, SVE pilot test report prepared by ASTEM Labs. Used blower with max flow of 127scfm and max vacuum of 59" water. Test run over 8-12 hours. The blower was connected to MW-4, 3, 2 and vacuum recorded in each well. Proposes to use recovery wells MW-3,4, RW-5, RW-6. 10/3/05 Mailed stipulation agreement to Mr. Dhillon. Approved RAP. STIP due 11/1/05. 10/31/05 Spoke to Mr. Dhillon. He is currently negotiating with landlord and will be sending in a formal request for an extension. 11/1/05 STIP due 2/1/06. 1/31/06 Stip signed effective by L. Oliva. RAP to be implemented within 45 days, by 3/17/06. Faxed and mailed copy to T.S. Khela on 2/7/06. Received call from Jeff Simonson, MIG. Owner switched consultants. Requesting extension until 4/7/06. Will send letter with formal request. Plan to propose ORC or HRC injection. 3/9/06 Approved modified RAP with conditions for baseline and effectiveness monitoring. Will sample for DO, pH, redox potential, sp conductance, ferrous iron daily for first week and then every week for 2 months. VOCs will be sampled quarterly. 4/3/06 Spoke to Vincent Pucciarello, MIG. Jeff Simonsen is no longer with the company. Discussed site status with Vincent and the need for downgradient monitoring pre and post injection. 4/28/06 Spoke to IP Singh, MIG Environmental (302-999-1888). Drilling will take place by air rotary on 5/8-5/9. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 7/26/06 Don Ochs called to give an update. They injected percarbonate today and will sample possibly Fri 8/4. Another round of percarbonate injection is tentatively scheduled for the week of Aug 15. So far the data shows good BTEX reduction (as per the analytical results forwarded to me via email from Joe Sun). - JAM 8/25/06 Spoke to Don Ochs from MIG Environmental (856-829-9288). Sodium percarbonate and calcium peroxide were injected yesterday. To recap: the first injections occurred in May and approx 3000-3500 lbs of oxidant was injected (about 60-70% of proposed chemical mass). The injections have to be spread out over a couple of weeks because the soil cannot take all the chemicals at once. Chemicals are injected in 4 re-injectable wells and in a number of one-time geoprobe locations. There are 4 groundwater monitoring wells (not used for injection) in the area of concern that are monitored after every injection and tested for the agreed upon parameters as per K. Foley's letter dated March 9, 2006. To date there have been 6 monitoring events. I have asked Mr. Ochs to provide me with an updated map showing the well locations and the one time injection point locations. He will also be preparing a progress report summarising the monitoring events. - JAM

S106000129

9/19/06 Received a call from Deborah Shapiro from CA Rich Consultants, Inc (consultant working for the property owner. MIG Env. was hired by the operator of the active station). Two waste oil tanks were located on the site, one on both sides of the main building. Geoprobe borings found contamination around the one tank to the west of the building. I advised Ms. Shapiro to call in another spill. A comprehensive plan must be made to address contamination on the whole site. - JAM 5/22/08 I spoke with Don Ochs today (cell: 609-410-6237 email: donochs@verizon.net). I have not received any reports for this spill since the first round of injections. Don said, that groundwater samples have been collected and analyzed and the MTBE and Benzene levels have reduced slightly. He said that another round of injections will be conducted and another round of groundwater samples will be collected in the near future. I requested that a summary report with all groundwater data/site info be submitted as soon as possible. Groundwater sampling should be conducted and reports should be submitted quarterly from now on. I sent an email to Mr. Ochs with these requests. - JAM 11/10/10: This spill case transferred from J. Maisonave to J. Kolleeny. Sent email to Don Ochs: "I work for NYSDEC in Region 2 and was supervising Joseph Maisonave, who has now left Department on an extended leave of absence. I am in process of evaluating Mr. Maisonave's active petroleum spill cases for purposes of reassignment to new project managers. In course of reviewing Mr. Maisonave's notes for this spill case, I noted that he was last in contact with you in May 2008. At that time, you indicated that another round of remedial injections would be performed at site, and Mr. Maisonave requested remedial summary rpt for 1st round of injections, plus ongoing quarterly GW monitoring and submission of quarterly monitoring rpts. However, since that time we have not received any rpts or data regarding this site. Please contact me ASAP to provide update on current status of this project. My notes also indicate that RP for this spill is Mr. Veeru Dhillon. Please forward this email to Mr. Dhillon, and provide me with his contact information such as email address and phone no." - J. Kolleeny 11/12/10: On 11/11/12, received email from IP Singh: "I got your email from Don Ochs. We did 2 injection events (May and June, 2006) for this site, and allocated funds from our client were exhausted. I believe we have to do couple of rounds of injections. After we review file we will let you know." I sent email reply: "Thanks for getting back to me. If possible, could you provide name and contact info for your client? I would like to advise your client that this spill is still open and will require add'l work in order to be closed out." Mr. Singh sent reply: "Sam Habib of our NJ office will be in touch with you re: this project." Received email from Sam Habib: "Thanks for following up on this case and your efforts to put it on right track. Our client's information are indicated below. Please copy us on your correspondences at MIG Environmental, address indicated below. Spill #0310812 Client info: Mr. Veerhu Dhillon Hunts Point Enterprises 1081 Leggett Ave, Bronx, NY 10474" - JK 11/17/10: Sent letter (in eDocs) via certified mail to Mr. Veerhu Dhillon (RP) stating he is in violation of January 2006 Stipulation Agreement, since Remediation Summary Rpt required by Stip's CAP and monthly progress rpts required by Kerry Foley in letter dated 3/9/06 were never submitted. Noted also that separate spill 0607041 was reported for soil contam found near 1 of 2 waste oil tanks at site, and that J. Maisonave had requested comprehensive plan to address all site impacts, which was not done. Set deadline of 12/10/10 for submission

of site status update rpt for both spills, with recommendation for further action. - J. Kolleeny 12/09/10: On 12/8/10, received phone call from Sam Habib of MIG Env't'l, who said RP had contacted them and wanted to move forward to comply, but that they would like to request 90-day extension of 12/10/10 deadline for submission of site status update rpt. I said 90 days was too long, but I would consider a 45-day extension, and to submit request by email. Received email from Sam: "Pursuant to our telephone conversation this afternoon, and based upon your letter dated Nov. 17, 2010, please accept this e-mail as formal request for 45-day extension, till Jan. 27, 2011, from December 10, 2010 deadline. This extension will allow MIG to submit required site status rpt and conduct GW sampling event to identify current contaminant concentrations at site. Our client is copied on this e-mail as indicated above [jtkpetroleum@aol.com]. If you have any questions, please contact us." On 12/9/10, I sent email to Mr. Veerhu Dillon (?) at jtkpetroleum@aol.com, cc's to Sam Habib & IP Singh at MIG Env't'l: "I have reviewed request from your consultant to extend deadline for submission of status update rpt for open spill cases at above-referenced site. My letter dated Nov. 17, 2010 set deadline of Dec. 10, 2010 for submission of rpt. Your consultant now requests 45-day extension of this deadline, until Jan. 27, 2010. Deadline extension request is approved. Please be advised that if comprehensive site status update rpt summarizing investigative and/or remedial actions taken to address both open spills, and providing up-to-date GW quality data, is not submitted by Jan. 27, 2010, this case may be referred to our Office of General Counsel for enforcement. Feel free to contact me if you have any questions." - JK 05/20/11: Received email from Roland Ramirez of MIG Env't'l with attached pdf files of Remedial Investigation Progress Rpt dated May 2011 (in eDocs). Will review. - J. Kolleeny

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

 DEC Memo: 03/24/10 - LZ Reviewed Roux Associates' letter (eDoc), concerning NYSDEC's comments on Investigation Work Plan (IWP). Approved Roux Associates' suggestion to install one monitoring well in addition to six wells proposed in the IWP and reiterated that soil and groundwater samples be analyzed for the TAGM 4046 list. The request for an extension to submit an Investigation Summary Report has been granted until September 3, 2010. 02/08/10 - LZ DEC has received the January 29, 2010 Investigation Work Plan (eDocs) prepared by Roux Associates, Inc. NYSDEC approves the plan modified as follows: - At least two wells, one downgradient and one upgradient to MW-20, must be installed to delineate contamination found at AOC # 2. Samples from these wells must be analyzed the same as the samples from AOC # 3. - Soil and groundwater samples must be tested for the presence of VOCs, SVOCs, and MTBE. Analytical results should be compared with TAGM 4046 - Recommended Soil Cleanup Objectives. - An Investigation Summary Report must be submitted within 90 days of NYSDEC's final written approval of the IWP. 11/12/09 - LZ The STIP (eDocs) was signed

S109374431

by RD. It requires that by December 12, 2009, Stuyvesant Fuel Terminal submit and Investigation Work Plan to fully delineate soil and groundwater contamination. 10/23/09 - A STIP was sent off to be signed by Stuyvesant Fuel Terminal Co. LLC. 09-14-09 - LZ E-mailed Joe Burnes of EnviroTrac asking for information about an additional subsurface investigation to delineate the extent of contamination as the March 9, 2009, EnviroTrac Environmental Report indicated. 04/27/09 - LZ After Stuyvesant Fuel Terminal, MOSF # 2-1120, had been purchased by Hess, the present owner retained EnviroTrac to perform environmental assessment. The March 9, EnviroTrac Environmental Report indicates three areas where contamination was identified-and that prompted the spill call. Free product was discovered in two out of ten new installed wells. Elevated concentrations of SVOCs-benzo(a)anthracene, benzo(a)pyrene, chrysene, indeno(1, 2, 3) pyrene-- were found in all soil and groundwater at seven locations. EnviroTrac will perform an additional subsurface investigation to delineate the extent of contamination. 12/17/08 - LZ Spoke with Joe Burnes and e-mailed him requesting updates and reports concerning the spill. His contact info: Joe Byrnes, PG, CGWP, LEP President / CEO EnviroTrac Ltd. 5 Old Dock Rd. Yaphank, NY 11980 Office: 631. 924.3001 Mobile: 516.807.8976 12/09/08-Zhune called Joe Burnes from Styvesant Fuel Terminal (631) 924-3001 left message. Site is a MOSF facility with a spills history - Krimgold assigned it to Les Z.

Remarks: CALLER STATES THAT THEY WERE DOING SOIL BORINGS AND FOUND CONTAMINATED SOIL. CLEAN UP IS PENDING.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL" 10/18/04 Reassigned from Rommel to Sun. 02/03/05 File Update by Sun: On 02/02/05, Sun sent a letter to Thomas Fasini of Mendon Truck Leasing Corporation informing him thatThe Department has received and reviewed the Soil Analytical Results, which were submitted to the Department by your consultant, EnviroTrac.,dated May 28,1999 for the above referenced site. (See Reference 1). The report indicated that the soil samples which were screened on all four soil boring locations, SB-1 through SB-4 using a photo-ionization detector (PID) showed that the PID readings were extremely high exceeding 2,000 parts per million (ppm). Furthermore, the laboratory analysis of the subsurface soil end-point samples from SB-1 through SB-3 showed that all soil samples had VOCs and SVOCs concentrations in excess of NYS DEC Standards. The high VOC and SVOC concentrations and high PID readings indicates that the soil had been highly contaminated and may have impacted the groundwater. Based on the above report, the Department requires the following as per DER-10 Technical Guidance for Site Investigation and Remediation (document available at <http://www.dec.state.ny.us/website/der/index.html>): 1. Delineation of Soil and Groundwater Contamination: A subsurface investigation to adequately characterize site hydrogeology and to completely delineate the full extent of petroleum contamination to soil and groundwater both on-site and off-site must be performed. The soil will be sampled continuously with a PID. The deepest dry soil sample and the sample with the highest PID reading in each boring/well will be sent for EPA Method 8260/8270 analyses and the results will be sent to the Department. A water sample will be obtained at each boring location and submitted for EPA Method 8260/8270 analyses. Note that MTBE must be included on all future soil and groundwater analyses. If contaminated groundwater is encountered, at least three monitoring wells will be installed and groundwater flow direction will be determined. Prior to installation all utilities will be located and marked out. A report summarizing the findings of the subsurface investigation including boring logs, well installation logs, sample analyticals, site plan, conclusions and recommendations must be submitted to the Department. Additional borings/monitoring wells may

MAP FINDINGS

MENDON LEASING CORP (Continued)

S103941122

be required by the Department upon review of the investigation report. 2. Surrounding Property Sketch: A surrounding property sketch including property layout and usage must be submitted to the Department. North arrow and scale must also be included on the Site Plan. 3. Locations of Remote Fills and Dispenser Islands: The locations of former remote fills and dispenser islands must be included on the site plan. Also note as per DER-10 Section 3.7.1 "Pump islands and associated piping greater than 25 feet from the tank field should be considered separate areas of concern and should require a separate groundwater sample location". North arrow and scale must also be included on the Site Plan. 4. Petroleum Bulk Storage (PBS) Registration: According to Petroleum Bulk Storage Regulations 6 NYCRR 612.2 (a) "the owner of any petroleum storage facility having a capacity of over eleven hundred (1,100) gallons must register the facility with the Department. This shall include any out-of-service facility which has not been permanently closed". Reference 1 indicated that four (4) 4000-gallon USTs were stored in-place in 1999. But, our PBS record shows that these tanks were closed-removed. A PBS registration must be submitted immediately reflecting the former tanks and their subsequent decommissioning. The letter requires complete delineation of soil and groundwater contamination, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of February 23, 2005 for signing the Stipulation Agreement. -10/17/2005: Project management assigned to S. Andersen. -10/17/2005: Reviewed and approved RAP. Required additional biweekly testing of SVE system during the second month of remediation. Awaiting monthly and quarterly reports of SVE remediation system. (S.Andersen) 3/11/06: Reviewed initial testing of system without air treatment. Benzene emission is below air quality standards. Startup will continue without air treatment. 6/20/06: Received System Startup Report. SVE air effluent emissions are below stip limits without treatment. SVE use will continue as planned. 10/23/06: Emailed Ron Tramosch to followup on the status of an overdue update report. Received email from Ron Tramosch: "I will send out (the report) this week. The system has been running fine. VOC's have been reduced substantially." 11/15/06: Received report dated 11/13/06. SVE in use. Benzene effluent concentrations within acceptable limits. 3/15/07: Emailed Ron Tramosch to followup on the status of the next quarterly report. 3/21/07: Reviewed update report. Benzene ND in the SVE air effluent. Sent email to Ron Tramosch requesting biannual sampling of groundwater. 7/6/07: Reviewed update report. Groundwater sampled on 4/18/07. VOC's and SVOC's ND in all three wells. SVE in operation. Benzene air effluent below TAGM. 10/22/07: Emailed Ron Tramosch to followup on quarterly report submittal. 10/26/07: Reviewed update report. SVE in operation. Effluent air sample collected on 7/11/07. Total VOC as toluene : 1120 ug/m3, benzene ND. 3/19/08: Reviewed August 2007 - October 2007 update report. SVE system in operation. Effluent air samples collected monthly. In compliance. 5/19/08 - Carlson: Reviewed update report February - April 2008 update report dated May 15, 2008. Approval for shutdown of SVE system requested. Groundwater was sampled on 1/30/08. VOCs ND. PW-4 was not accessible. The laboratory analytical report for groundwater sampling was not included. Sent email to Ron Tramosch (rpt@coreenv.com) to submit laboratory analytical report for groundwater samples. 5/27/08 - Carlson: Sent letter approving shutdown of SVE system and requiring completion of two soil borings in formerly impacted area, and two

quarterly groundwater monitoring events. Review for closure following confirmatory soil and gw sampling. 9/3/08 - Carlson: Received email from Ron Tramosch. Soil borings scheduled to be completed tomorrow, 9/4/08. 12/18/08 - Carlson: Received closure petition. Two soil borings were completed in areas of historic soil impact. No VOC or SVOC exceedances. Groundwater samples collected from three monitoring wells. No VOC exceedances. Monitoring wells are not located within areas of historic groundwater contamination. Requested confirmatory groundwater samples be collected in areas of historic soil contamination. 5/27/09 - Carlson: Spoke to Ronald Tramosch. He will schedule date to collect additional groundwater sample. 6/22/09 - Carlson: Received confirmatory groundwater sampling. Groundwater sample collected from SVE5. No VOCs detected. Issued no further action letter.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Last Date: 19940728
DEC Remarks: Ed Linkewich 908)668-7777, Whitestone Associates, 776 Mountain Blvd., Watchung, N.J. 07060 - Called DEC Sigona) On August 11, 1999 relayed the following information- Separate contractor- A P, Passaic County Complex, 90 Delaware Avenue, Paterson, N.J. 07509 - Frank Leonard, 201)505-3373 Bruce Beck performed an underground storage tank removal 5 x 4,000 gallon diesel tanks. PBS No. 2-287458. Bruce Beck was hired by Island Tank Pump as environmental Consultant. Island was hired A P. DEC Sigona) checked the PBS data base found that 4-4000 gallon gasoline tanks were removed on 12/98. Ed indicates there 5-4,000 gallon diesel tanks were removed on June 2nd and June 8th, 1999. Ed Linkewich indictaed that he will file an information with the DEC indicating the corrcrt information. On June 7, 1999, Removed the tanks found sheen, notified DEC, and backfilled the excavation. On June 17, 1999, commenced a site investigation by National Environmental with TRC Vector which consisted of geo-probe borings total of 7 borings) 8-10 feet below grade. Samples were collected for volatile /semi-volatile MTBE - 7 soil and 2 groundwater. Analy ed the results June 24th, 1999, by NYSDOH lab, found some excedences, ranged from 100 s to 3-5 thousand ppb for VOCs, semi-volatiles ranged from 3,000 to 60,000 ppb soil contamination). Groundwater ranged from 4-5 feet below grade tidal influences. On July 14-15, 1999, Whitestone Associates installed 22 geoprobe borings, collected 14 soil and 10 groundwater- Analy ed by NYSDOH lab for VOCs SVOCs, MTBE STARS). Soils concentrations from VOCs low 100 s ppb, selected 3,000 ppb range. High levels semi-volatiles. GW samples outside area came back below standard. White stone Associates will write up report on results of investigations and submit proposal for remediation. DEC Sigona) discussed removal of all contaminated soils and collect endpoint samples. Install GW wells and monitor for 2 quarters. DEC SIGONA RECEIVED REPORT FROM tomU o Whitestone) on 8/23/1999. Set up site visit for 9/2/1999 at 2 P.M. DEC Sigona sent letter dated September 7, 1999 approving work plan for excavation of contaminated soil under health and safety plan.
Spill Cause: Soil contamination encountered during investigation.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL" 8/6/2001 Sangesland received a report from Brendan Broderick (631-419-0913) showing soil sample results from the site. Samples from Boring #1 & #4 were mixed - Composite sample(why?) results show semi volitiles (8270) were all below 150 ug/kg (why not more detailed?) Samples from Boring #2 & #3 were also mixed. Composite sample was slightly high for BTEX (150 to 466 ug/kg), clean for MTBE, 8270 parameters were all over 1,000 ug/kg.... Naphthalene=1,759, Pyrene=2,143 Chrysene= 1,832 Sample #5 8021 all under 5 ug/kg,

all 8270 under 40 ug/L (don't understand why this last group is in units of ug/L for a soil sample. Sangesland called Mr. Broderick and left a message requesting a work plan to further delineate the site and propose remediation. 8/29/2001 Site historically was a gas station in 1940's (per Sanborne Maps) 9/6/2001 Sangesland made a site visit. Building appeared to be a "Gas Station" type building with a small office and 3 garage bays. The present owner's real estate agent (Mr. Scott Reiss 718-358-7021) was present along with the potential purchaser Mr. David Lewin (718-991-0600). The excavation team from Broderick Associates (631-419-0913) was opening the parking lot area tracing the vent line piping back to the buried tank location. It appears that the tanks were abandoned back in the 1970's??? The excavator will open the tank tops and inspect if they are filled with sand, cement or water. If water, they were instructed to register and decommission the tanks via PBS regulations. The excavator was probably going to pull the tanks, but this was not sure. If the tanks are pulled, end point samples will need to be taken. Sangesland told the excavator that if the tanks were encased in cement, he could take 4 borings around the tanks and test them for 8021 & 8270. If it comes back clean, he could avoid digging the tanks up. Either way, the areas around the original borings (discussed above) would need to be delineated and then either excavated or remediated. 12/2/2003 Transferred from Sangesland to Rommel 09/12/2005 - Lee - An evaluation of the July 6, 2001 soil boring sampling results revealed detectable levels of some BTEX compounds, but did not indicate any gross contamination. Therefore, this spill was closed on 9/12/05.

Remarks: CALLER HIRED BY PROSPECTIVE BUYER OF PROPERTY AT ABOVE LOCATION TO PERFORM SOIL SAMPLES. SAMPLES REVEAL CONTAMINATION. FOR FURTHER INFORMATION CONTACT CALLER AT ABOVE #.

DEC Region: 2
DER Facility ID: 285542
DEC Memo: CSL sent to Property Owner: Mr. Troy Perez Le Club Car Wash 729
Bruckner Blvd Bronx, NY 10455 08/27/09 The site is used as car wash
and auto repair facility.USTs were located at the center of the car
wash. GPR survey did not identify any anomalies indicative of
USTs.Five soil probes were installed at close proximity of the UST.No
olfactory evidence of petroleum constituents were observed in any of
the soil samples.Three ground water samples were taken.VOCs detected
in ground water.Need to identify location of tanks,pump island and
ground water flow direction with quarterly monitoring data.(sr)
10/02/09 Site meeting on 10/01/09.Property owner Mr.Troy Perez told
me that he has been doing business for last ten years and before that
the site was vacant.He believes the formers USTs were located where
the oil change center is, now. He also believes all contaminated
soil, if were any, removed that time as the oil change center was dug
down 20 ft below the grade. However, he agrees to do the additional
on site and off site investigation to get the spill closed.(sr)
10/05/09 STIP was sent to LE CLUB CAR WASH & OIL CHANGE CENTER 729
Bruckner Blvd. Bronx, NY 10455 Attn: Troy Perez(sr) 02/04/10 As per
request of HydroTech. a letter was written to expedite DOT sidewalk
excavation permit.(sr) 05/18/10 Hydro Tech performed ground water
investigation at the site as per DEC's requirements. Four monitoring
wells were installed during this investigation.No VOCs were detected
in soil samples.All MWs(new and existing surveyed).VOCs were detected
in ground water, Benzene 6.1 ug/l,Isopropyl Benzene-60
ug/l,Chlorobenzene 200 ug/l, Total VOCs 931 ug/l.Ground water flows
towards south.Rec'd Remedial Action Plan(RAP).RAP consists of direct
application of ORC into the saturated zone beneath the site.Monthly
monitoring and quarterly sampling after ORC injection is proposed.
ORC design data in the RAP.(sr) 02/10/11 Status report in edocs.A
total of 200 lbs ORC Advanced was injected into the saturated zone to
the south and south east of former tank area.VOCs are still present
in the ground water, but concentration decreased by 28% after ORC
injection.The next ground water sampling will be in March 2011.(sr)
Remarks: LOW LEVEL VOC'S IN GROUNDWATER AND SOIL. CLEAN UP PENDING.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

procedure" before the oil can be cleaned. Environmental tag (35100) was placed in manhole. Samples for PCB and oil ID were taken (DD-06556). Clean up pending sample results and air monitoring. 02-OCT-2003 18:18 Lab Sequence Number: 03-08200-001 Total PCB <1 PPM 02-OCT-2003 18:26 Lab Sequence Number: 03-08201-001 Analysis indicates the presence of a substance similar to a dielectric fluid. 02-Jan-2004 13:20 hrs Environmental Flush Mechanic E. Gafur 19528 reports that the manhole was double washed and rinsed with the Flush Truck and they also removed 2 Cu. Yds. of solid waste. The source of oil was an abandoned cable on the floor of the manhole which was removed and deposited in the temporary non-hazardous waste area at Van Nest Service Center. The crew removed the Environmental tag # 35100. Cleanup complete, crew on location 04-JAN-2003 12:12 Environmental Flush Mechanic E. Gafur 19528 reports the 2 feet of asbestos arc proofing was bagged separately from the other debris and disposed of at the Van Nest Service Center Temp asbestos waste storage area.

Remarks: 2QTS OIL IN MANHOLE. CON ED # 150571. TWO LINERAL FT OF TAPING TO BE REMOVED BEFORE CLEANUP.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2
DER Facility ID: 73723
DEC Memo:

On March 18, 2005 about 5 PM, a two million gallon AST storing Asphalt was found leaking from its tank bottom. In the notification, the RP noted that the spill was contained within the secondary containment steel walls that surround the tank. I responded to the scene with Sharif Rahman, and arrived at 7 PM. We met with the facility manager, Ernie Cooney, and then proceeded to inspect the tank and secondary containment in question. The facility manager had contacted barge companies for immediate removal of the spilled asphalt. However, there has no other barge company available that could carry the product except for Citgo, and the earliest the Citgo barge could arrive at this MOSF on the East River in the Bronx was 02:00 AM Monday morning March 21, 2005. He also explained that the FDNY had been on scene, but had departed earlier. The spill was contained in the secondary containment area. The subject tank rests on a concrete pad, and it has concrete floor of secondary containment. The facility had been inspected on October 29, 2004. The secondary containment for this tank was found to be quite sound during inspection. There is a drain sump in the secondary containment area, but this is connected to a oil water separator, and there is also a valve that is on the drain line. The valve was closed at the time of the spill, and there was no evidence that the oil had

S102148851

traveled past that point to the separator or the river. Due to the special product and the condition of secondary containment, DEC instructed the facility supervisor (Ernie Cooney) to monitor and control/report any leakage during the waiting period. There are three monitoring wells outside the subject tank which have been monitored every hour. The East River adjoining the facility was regularly checked for petroleum, as well. Meanwhile, the facility contacted its contracted environmental company (Miller Environmental) for emergency response if any sign of release to water body discovered. There was about 100,000 gallon product released to the containment next morning (Saturday morning). The facility added about 3 feet water to dike on Saturday to cool down the dike area asphalt (315F inside the tank, although heater had been shut off, the insulation system has retained the residual heat). The leak rate had slowed down, after the water was added, from over 4,000 gal/hr Saturday morning to 2300 gal/hr Sunday morning. The total volume released to the secondary containment was close to 500,000 gallons, about 7 feet high. The barge came at 4:30 AM this morning. The 1.5 million gallons of asphalt that remains in the tank is being pumped out at this time. No product has escaped. However, further subsurface contamination investigation will be conducted. The initial investigation found that tank bottom was rusted due to corrosion. The tank is exempt, by Law, from testing or inspection due to the product stored. 3/21/2005 4:40 PM: Ernie Cooney has notified DEC that tank has been emptied to low draw point (about 4 inch to bottom). Leaking has been completely stopped. Atlantic Lab will take samples of water in dike and analyze for discharging it to Oil/Water separate system. 12/14/2005 - jz: Tank bottom was replaced and re-inspected in September. Clean up was completed at the time of inspection. Investigation results has been reviewed.

Remarks: leaking out of the bottom leak is contained by steel walls corrosion hole in tank or crack unknown cause has not been cleaned up it is hardened

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "BREEN" Weld on three inch steel pipe broke while truck underway. Tanker stopped on E.149 St at entrance to Stuyvesant terminal after driver loaded 6000 gallons at Castle, left that terminal and became aware of leaking product while underway. Outstanding response by Stuyvesant crew. They leapt into action and saved the day. Ernie Cooney, terminal manager, with Victor Takojeff, Steve Morrieson, and Jose Mirambra stopped the release of product, reported the spill, saw to it that Sibrizzi management was notified and deployed sweeps and pads to prevent product from reaching the East River. Eastmond responded quickly with a Vac truck. They were almost finished when FDNY and then USCG arrived. -DEC REP ON SITE.

Remarks: 3 inch line on truck snapped while filling truck spill to ground spill contained cleanup crew enroute

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

US Facility Response Plan (FRP) contains plans for responding, to the maximum extent practical, to worst case discharges of oil.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

DEC Region: 2
DER Facility ID: 201692
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL" Con Ed e2mis #142023: 29-Mar-2002 @ 02:37 Underground Environmental Mechanic 'A' Orlando Negron, #18400 while completing a clean up from the secondary cable found a new leak from the primary cable approximately 1 pint of oil in the dirt on the floor of the manhole. The cable was wrapped and the feeder needs to be scheduled for perminant repair. Sample taken to the lab. Environmental tag #20546 left in the manhole. No sewers, waterways or private property affected. No smoke or fire involved. 29-Mar-2002 @ 03:06 Reported to CIG Andrew Morris, #85791 29-Mar-2002 @ 04:47 Hrs. Note: There was also a small quantity of asbestos found in this manhole. VOIDED by Con Edison. Being tracked under e2mis #142008. 29-Mar-2002 06:30 Update: 05:50 Derasmo #86558 reported that the Manhole had asbestos arch proofing on the floor, and there was oil found on the other side of the manhole. That was the reason for resampling. 06:00 Called ATC no response left message. 06:11 Called ATC no response. 06:12 Called ATC no response left message. 06:15 Called Testwell they will have someone on location at 07:15. 06:30 Spoke with O.S. L Fischer #55784 that sample results and air monitor are on there way. McGeever # 12536

=====
===== 29-Mar-2002 06:42 Spoke with ERT Ray Lo #84317 and told him a small amount of Asbestos arch proofing was discovered in the structure, and we were getting air monitoring, and cleaning it as housekeeping. 29-Mar-2002 07:30 Flush crew on location. 08:20 Test well Air Tech on location. 29-Mar-2002 10:10 Flush Mech. E. Gafur #19528 reports that clean up is complete at this time. 300 gallons of wash was used, and removed by flush truck along with one half yard of solid waste. All non-Haz. The asbestos arch proofing was ~ 5 ' in length, and was also removed by flush crew and will be transported back to Van Nest Yards temp storage area for asbestos. Environmental tag #20546. Clean up complete. TOTAL PCB 2 ppm

Remarks: CABLE LEAKED CAUSING 1 PT OF UNKNOWN OIL ON THE FLOOR OF THE MANHOLE. UNKNOWN WHEN CLEAN UP WILL BEGIN. CON ED #142023.

DEC Region: 2
DER Facility ID: 96537
DEC Memo: 18-Sept.-2003 @ 05:03 hrs. Underground O.S. Vincent Santucci, #20044 reports finding 1 pt. dielectric fluid on floor of a dry manhole. No sewers, waterways or private property affected. No smoke or fire is/was involved. No injuries reported at this location. The weather did not contribute to the hazard of the spill. A sample was taken and environmental tag #24085 was installed in the manhole. Jerry McCarthy, #79359 18-September-2003 05:47 Hrs Mr. Santucci clarified his report to state oil is leaking from primary duct and has spilled on to secondary cable and floor of manhole. Because leak is from a source in the duct and not contained in the manhole, the spill is reportable. Per Shift Managers request, the spill cleanup is being expedited to complete the cleanup before hurricane conditions reach the tristate area and is being performed as a 50-499 PPM PCB cleanup. J.Siesfeld 84253 September-200 05: Hrs CIG Sean McKeever, 15523, notified at 05:53 hrs. Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

not currently leaking but the joint needs to be bagged to protect the location until permanent repairs can be made. No sewers, waterways or private property affected. No smoke or fire involved. There were no personal injuries at this location. The emergency supervisor is assigning a crew to bag the joint and clean the spots.
07-September-2002 @ 12:05 hrs. CIG Andrew Morris, #85791 notified.
07-September-2002 @ 17:10 hrs. Underground Environmental Outplant Mechanic 'B' Mike Derasmo, #86558 reports that while he was in the process of cleaning the spots from the sidewalk area he observed a private vehicle near the pole that appears to have oil spots on the hood. The vehicle is a Ford Windstar NY Lic. AGV-8787. A photographer has been assigned to the location to take photos before the vehicle is cleaned. 07-September-2002 21:09 Hrs. UG Envi. Mech. B - Mike Derasmo, #86558, reports: cleanup complete; 1-drum of 50-499PPM PCB waste was generated and transported to Van Nest Service Center per 1-trip rule for storage prior to off-site disposal; a 4 foot by 12 foot area of sidewalk was double washed and rinsed and impacted debris was drummed for removal; impacted vehicle was photographed; impacted area on vehicle was double washed and rinsed; and spilled oil appears to have affected the paint on the vehicle. Temporary EPA ID No. NYP 004 102 356 was assigned by ERT. 1/14/04 Repairs completed on 5/13/03.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL" 2/22/99. Left second message for John Ernst at Aaron Environmental 203-753-2554 ext. 3012 to find out status of spill. See also 8707113. On 6/20/05, J Peck attempted to contact John Ernst at 203-753-2554. Telephone No. was no longer in service. Also on 6/20/05, J. Peck attempted to contact Anthony Dicarmine at 718 292-3900. The business at this telephone No. is now Colonial Steel. On 9/2/05, J Peck left a message at John Ernst's private residence (203-266-6158) in Connecticut. J. Peck attempted to use property shark to determine owner of property at 977 East 149TH ST. Property Spark could not find address. 4/1/09 - Austin - Transferred from Needs Reassignment to Zhune for further work to remediate and close - end

Remarks: LOOKS LIKE A LEAK FROM THE DISPENSOR FILTER - POSSIBLY A COUPLE OF YARDS OF CONTAMINATED SOIL - EXCAVATING THE SOIL

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 07/22/09-Hiralkumar Patel. visited site (at 8 PM on 07/21/09). met OEM Blake. site has total of eight silos. four of the silos (# 1, 2, 5 & 6) were empty at the time of the incident. explosion happend in silo #3 while crew was emptying it. about 1% material left in silo when silo roof blew up due to explosion. roof then fall into silo itself with few metal pieces falled on parking lot. nobody injured. remaining three silos (# 4, 7 & 8) had 35% product in it. each silo has capacity of 700 tons. according to plant incharge, temp. inside silo #3 reached upto 300 degrees when explosion happened. remaining three silos had temp of 70 degrees. met Mark from DEC Solid Waste. Mark spoke with plant incharge and discussed about further actions. nitrogen flow was on in remaining three silos. as top of the silo was damaged, they can't use automated temp. measuring system, so night supervisor was instructed to measure temp. in remaining three silos using laser guns, every half an hour. case referred to DEC solid waste unit. case closed.
Remarks: organic fertilizer - explosion. Would like a call back.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2
DER Facility ID: 309597
DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO" This spill was reported by Castle Terminals who originally occupied the site at 300 Tiffany Street and operated an MOSF which was decommissioned and property sold to NYOFCO which was transferred to Waste Management and then to Synagro who is taking responsibility for the cleanup. See Spill No. 8700046. 11/16/94: SITE REMEDIATION SYSTEM INSTALLED, TANKS REMOVED, SLUDGE PELLETIZATION PLANT CONSTRUCTED, ENVIROGROW ASSUMED RESPONSIBILITY. DEC (Sigona) provided oversight on installation of groundwater collection and remediation system. There are site monitoring wells. DEC has not provided formal closure on the cleanup. Initial remediation was negligible, since the majority of the cleanup occurred during the demolition, excavation of soil and installation of trenches for cleanup system. DEC Sigona sent letter dated October 29, 1999 to NYOFCO requesting information on

spill. DEC signona sent letter to Synagro on July 12,2002 with requirements for further remedial actions. 1/8/2004-Vought-See closed spill #0110663 and 0106269 for sheen discovered in adjacent off site well. 4/22/2004 - This project is reassigned to Zhao. 2/8/06 - Spoke to Ernie Rusano? of ERM, 631-756-8917. He said the last three rounds of well gauging see no free phase product. Was going to sample GW for dissolved phase and petition for closure. However, product was observed last year again and GW sampling was put off. I told Mr. Rusano? that this is a low priority (P3) site, and DEC can not provide oversight at this time. He can work with the RPs to remove free product and sample GW. When he think closure is reached, he can petition DEC for closure. He can call DEC project managers from-time-to-time for advise and opinions. - KST 10/18/06 - reviewed request for closure report. Recovery system is no longer recovering any product since April 2006. Analytical results of GW show no impact to GW quality since this is # 6 oil spill. Spill closed. - KST
PRODUCT FOUND IN MONITORING WELL (OLD SITE),ONGOING PROBLEM.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Universal Waste - Small Quantity Handlers
Date violation determined: 08/31/2009
Date achieved compliance: 10/07/2009

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Region: 2
DER Facility ID: 402715
DEC Memo: NOV was issued during the inspection on 4/14/11. PBS settlement conference scheduled for 4/27/11. Photos of spill are available in e-docs of PBS facility (2-600818).

Remarks: The spill was found during a PBS inspection. The ground around two waste oil tanks was stained with petroleum. Also, the secondary containment of each tank contained approximately 6 inches of product. Product was also found in one fill port catch basin.

DEC Memo:

03/02/06 - On 11/18/05, the NYSDEC sent a letter to the property owner requesting information on the spill cleanup. The certified letter came back undeliverable. Calls to the consultant (Island Environmental Tank) that called in the spill were also unsuccessful in obtaining documentation of the cleanup. Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL C" 03/26/04 Transferred from Saccacio to Rommel 4/2/09 - Austin - Transferred from Needs Reassignment to Patel for further work to remediate and close - end 04/30/09-Hiralkumar Patel. visited site. warehouse kind structure on property. found vent pipe along building foundation wall along southern blvd. fill port found in middle of the sidewalk along southern blvd, approx. 40 ft from the intersection of southern blvd and E 156th street. 05/18/09-Hiralkumar Patel. spoke with Demetrios Spaliaras, property owner. he bought property in 2000 after previous owner removed tanks in Aug. 2000. asked Mr. Spaliaras to submit documents for tanks removal or to perform soil investigation in previous tank location area. sent email to Mr. Spaliaras (at Jimmy's email address) to submit previous owner's contact info so letter can be sent out with list of requirements. Demetrios Spaliaras **property owner** Spaliaras Realty Corp 748 Southern Blvd Bronx NY 10455-2106 Ph. (718) 328-9500 Jimmy Spaliaras Ph. (718) 328-9500 email: olegna@earthlink.net alternate addresses: 746-754 Southern Blvd, 1026-1058 E 156 St no other spill reports/PBS record found.

<----- 05/21/09-Hiralkumar Patel. received email from Mr. Spaliaras with previous property owner's info who removed tanks from the site. John Salvato **previous property owner and tank owner** 81 carl street Valley Stream, N.Y. 11580-4034 Ph. (516) 872-9753 06/03/09-Hiralkumar Patel. 9:02 AM:- left message for Mr. Salvato. 9:03 AM:- left message for Vinny. according to caller's remark during spill notification, it was unknown if there was any spill or not. caller collected samples after removing two 550 gal gasoline USTs. 9:12 AM:- received call from Vinny. he mentioned that he removed tanks for new owner (current owner) and he found #2 oil in those tanks when he removed it. he also mentioned that those tanks were initially used to store diesel by previous owner. Vinny will look for documents and will send it by end of June 2009, if finds anything. 06/04/09-Hiralkumar Patel. received old documents from Vinny.

03/09/2000: Environmental Island Tank Maintenance Corp. sent proposal to property owner John Salvato to remove two 550 USTs. proposed to collect soil samples from tank bottom (prior to removal) to characterize the soil. based on disposal manifests, 1100 gal of gasoline mixed water removed from tanks and 15 yards of soil removed. based on chain of custody for samples, total of six soil samples collected as follows: - one soil sample from north and south bottom of tank-1 for 8021 collected on 08/31/2000 - one soil sample from north and south end of tank-1 for 8021 collected on 08/31/2000 - one soil sample from north and south bottom of tank-2 for 8021 collected on 08/31/2000 - one soil sample from north and south end of tank-2 for 8021 collected on 08/31/2000 - one soil sample from bottom of tank-1 for TCLP Benzene and Lead collected on 08/07/2000 - one soil sample from bottom of tank-2 for TPH collected on 08/07/2000 high TPH (1,220 ppm) found in soil sample from area below tank-2 no VOC contamination found in any samples

based on submitted documents, case closed.

DEC Memo: 160868. 03-Sep-2005 11:05hrs. U/G Q/A insp. J. Croughan 51129 reports

finding 1 pt. oil from leaking dead feeder cable (assumed dead feeder 9755) at duct edge and 1/2 foot up duct at crack in cable jacket to muddy floor in MH 29107 (e/s Southern Blvd 55' n/o Leggit Ave). Cable needs to be removed from duct to eliminate source of leaking dielectric fluid. No smoke or fire is/was involved. No sewers, waterways or private property affected. MH is located in the traffic lane of Southern Blvd adjacent to a bus stop. C. Blaich 87348. Closed. 10-20-05. see eDocs. GB
Remarks: 1 qt dielectri fluid into the manhole from unused feeder line-no o/s contact. 160868

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

"RODRIGUEZ" E2MIS 148799 20-June-2003 10:40 Oper Superv R.Ammermuller 10996 reports that Splicer R.Peralta 07981 while on location for low voltage discovered 1 pint of cable oil leaking from unknown cable ends in MH-13147. No smoke or fire is/was involved. No sewers, waterways, or private property affected. The cable ends will be checked dead and sealed and a pcb sample will taken be on a CC 18350 and Env tag 37184 placed. NY Lab ID No: 10380 Lab Sequence Number: 03-05115-001 Date Approved: 6/20/2003 E2 Incident Number: 148799 Date Received: 6/20/2003 Chain of Custody ID: CC18350 Date Sampled: 6/20/2003 NOTE: The Submitter shall post and/or provide these results to all employees working with or in the vicinity of this substance. This report shall not be reproduced, except in full, without the written consent of EH&S. Test results are representative only of submitted samples. MATRIX: OIL GRAB LOCATION: F/O 740 SOUTHERN BLVD STRUCTURE: MANHOLE 13147 FEEDER ID: QC ID: 01-200306200218 TEST DESCRIPTION RESULT UNIT METHOD Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 Approval Status: APPROVED Approved By: Yulini Lochan Title: TECHNICIAN --End of Report-- Search for Results at: <http://q137lims/lims> -----Original Message----- From: Siesfeld, James Sent: Saturday, June 21, 2003 4:48 AM To: dl - BX/West EH&S C.C. Cc: Homyk, W. Alan Subject: 24 Hr Spill Changed to Reportable: Incident 148799 Importance: High Please note, while crews were performing an oil cleanup in Manhole 13147 approx. 17.5 hours after oil was first discovered in the structure, an additional 1.5 gallons of untested dielectric fluid spilled in the manhole from a different source, and what appears to be an older, previously wrapped and bagged, cut cable end. To prevent possibly contaminating an under 50 PPM PCB CFS Tanker, the cleanup was suspended pending PCB results from laboratory analysis of the newly spilled "untested" oil. Due to the time required to process the sample (approx. 4+ hours), the cleanup can not be completed within 24 hours and the spill has been changed to reportable. 21-June-2003 04:55 Hrs CIG Andrew Morris, 85791, notified at 04:55 Hrs. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 21-June-2003 22:00 Hrs. Flush Mechanic Mike Derasmo and Tom Hoferichter report cleanup complete, leaking cut cable ends has been capped and sealed and is no longer leaking, manhole was double washed and rinsed using 760, environmental tag 37184 has been removed, and Flush truck removed 250 pounds of flush debris and CFS tanker removed 50 gallons of non-hazardous oily water for transport and disposal at Astoria WWTF.

Remarks: no sewer/waterways no fire/smoke con ed # 148799

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 157455. 03-Mar-2005 12:59hrs. Engineering Insp. R. Prezioso 77054 reports that "big apple Recking" Cat excavator blew a hydraulic line spilling 3-4 gallons of hydraulic fluid onto soil during demolition work at the new Mott Haven S/S. No smoke or fire is/was involved. No sewers, waterways or private property affected. Oil absorbant is down, excavator has been moved onto plastic sheeting and 55 gallon drums are being filled with the effected oil soaked soil (note: there is an underlying concrete pad that was the foundation of the previous Faberware building. EH&S S/S Sr. Spec. Craig little being notified of spill. C. Blaich 87348 03-Mar-2005 15:55hrs. Engineering Insp. R. Prezioso 77054 reports that cleanup is complete. 1 55-gallon drum of soil/ oily debris was generated for contractor removal to a designated facility. Excavator is still on plastic with leak stopped and mechanics are continuing to work on the equipment. 07/11/05 - As per Brian Bellows - Project Specialist, CM the equipment was repaired on 3/4/05, and clean up was completed as stated above.

islands 4) delineation of soil and groundwater contamination northeast of BH5, northwest of BH5, northwest of BH6, southwest of BH6, northeast of BH4 and southeast of BH4. 5) PBS Registration. Stipulation due date of 8/9/04. Vought called Reid and left message of STIP. 7/26/04-Vought-Spoke with Jean Warshaw 212-722-2240, attorney for building owner. Vought agreed to receiving an initial investigation within 60 days due to request by consultant. Vought adjusted CAP for installation of system for 60 days. Vought emailed Warshaw copy of STIP and CAP so she could send it back with correct respondent and adjusted CAP timeframe. 8/16/04-Vought-Stipulation received on 8/13/04, signed on 8/10/04 and implemented on 8/16/04. Vought sent and faxed STIP to Barr. 10/29/04-Vought-Limited And Focused Subsurface Soil and Groundwater Investigation dated 10/14/04. Ten borings and eight monitoring wells were installed to approximate depth of 13' below grade. Groundwater at depths of 11-13' below grade. Soil analyticals show 1880ppb xylene(BH7 6-8'), 66ppb benzene(BH12 6-8'), 2510ppb xylene(BH12 6-8'), 102ppb benzene(BH9 0-4'), 1250ppb xylene(BH8 6-8'). Groundwater analyticals show (7930ppb benzene, 17900ppb toluene, 2330ppb ethylbenzene, 3790ppb xylene in MW1), (36ppb benzene, 1080ppb toluene, 421ppb ethylbenzene, 540ppb xylene in MW2), (15ppb benzene, 10ppb xylene in MW4), (576ppb benzene, 1610ppb toluene, 503ppb ethylbenzene, 1750ppb xylene in MW5), (233ppb benzene, 35ppb toluene, 497ppb ethylbenzene, 706ppb xylene in MW6), (8ppb isopropylbenzene, 9ppb npropylbenzene in MW7). Report concludes that "it appears further investigation is warranted to determine the extent of the impacted soil and groundwater. Most if not all of the additional study will require access into the onsite structures. As no significant SVOCs were detected within the soils or groundwater tested, it does not appear necessary to continue analyzing all samples for SVOCs". Vought called Doug Reid (LCS 18004746802) and left message to return call. 10/29/04-Vought-Spoke to Doug Reid. DEC will receive delineations results by 12/31/04. 12/2/2004-Vought-Received call from Doug Reid that adjacent property owner not being cooperative with respect to granting access to consultants. Vought sent letter to owner: Donald Beck Scaccione Inc. 1165 Burnett Place Bronx, NY ph 718-991-4462 fax 718-991-0154 12/3/04-Vought-Received message from Beck. Vought returned call and Beck. Beck stated he was contacted by owner of 840 Barry Street and requested further information on spill and Vought sent him copy of spills database report and FOIL Request. 12/14/04-Vought-Received message from Doug Reid that Beck contacted attorney. Vought called Beck and left message to return call to DEC. FOIL application submitted by Vought. 12/15/04-Vought-Received call from Beck who requested that access be withheld until file reviewed via FOIL. Request approved by Vought. 2/4/05-Vought-Received copy of letter from Jean Warshaw Esq (attorney for 840 Barry Street) dated 1/31/05. "We request access to your property to conduct an environmental investigation and possibly remedial activity". "The current concept for the investigation included advancement of 2-3 inch diameter test borings and installation of small diameter groundwater monitoring wells in the building". "Please contact either Mr. Reid or me to arrange access...". Vought called Beck for status of access and attorneys wife passed away and will prepare response and Mr Beck indicated that "he will try to work it out". DEC will receive response by 3/1/05. 2/9/05-Vought-Received call from Beck with his attorney's info: Paul Schietroma (718-515-5700). 3/11/05-Vought-Received message from Doug Reid that access is still

FORMER WAREHOUSE (Continued)

S106471554

not granted as of yet. Vought called Beck and approx two weeks ago Becks attorney proposed that LCS would come in for preliminary site visit to review locations. RP does not want to sign a hold harmless agreement. Beck available for meeting 4/21 thru 4/24 after 3pm. Vought called Reid and left message to return call with meeting date. 3/14/05-Vought-Reid left message of 3/23 at 3pm. Vought called Beck and not available on 3/23. Vought sent email to Reid, Beck and DEC Urda to schedule meeting. 3/15/05-Vought-Received message from Doug Reid for 4/5/04 at 3pm. Vought spoke to Beck and he approved of meeting time. 4/5/05-Vought-Received message from Beck that his consultant is not available for meeting today. Vought called Beck for three meeting dates and left message of same. Vought called Reid and informed him that Vought will call him back with dates. Vought received email from that's owner of 840 Barry Street's attorney not available on 5/2. 4/19/05-Vought-Received memo from Reid regarding status of meeting. Vought called Beck and he proposed date of 5/11 and is awaiting to hear from his contractor for availability. Vought sent email to Reid and DEC Urda of proposed 5/11 date. 5/12/05-Vought-Meeting held at DEC with Barr, Beck, Reid, Warshaw and Schietroma. Meeting resulted in no well installation will be required at Becks property due to 2)relatively low concentrations of dissolved BTEX in front of Becks property 2)installation of wells on the far sidewalk of Becks property 3)feasibility of avoiding possible impact to candy operations on Beck's site (health and safety concerns). 6/15/05-Vought-Sent out sidewalk permit letter for one well located on Tiffany Street between Barry Street and Burnett Place. Vought called Reid and informed him of fax. 7/19/05-Vought-Received message from LCS Reid that drilling is scheduled to begin tomorrow. Vought called and spoke to Reid and samples will be run for VOCs. 7/22/05-Vought-Recieved message from Beck that sidewalk well is not flush to grade. Vought called Reid to check on status of well installation. Vought spoke to secretary who called Dough Reid who will call drilling company to repair sidewalk. Vought called Bradford Barr and left message to return call. Vought called John Lamprek (Land, Air and Water 631-874-2112) and spoke with Carl who will send out night crew to inspect drilling location. 7/25/05-Vought-Received message from Doug Reid that driller went back out to location on 7/22 and found no problems with sidewalk (well was not installed and concrete was cored but cone was placed over location). Vought called Reid and pictures were taken. Reid spoke to Beck on morning of 7/25. Drilling is scheduled to be completed 7/28. SPILL TRANSFERRED FROM VOUGHT TO OBLIGADO 10/11/05 - Obligado - Email from Doug Reid, monitoring wells scheduled to be surveyed Friday 10/14, and a summary report will be submitted. 1/27/06 - Obligado - Phone call from Doug Reid. He will email summary report. 3/8/06 - Obligado - PHone call from Doug Reid. Wondering if I had a chance to read Summary Report. I told him I didn't recall receiving the summary report. HE said he will email report. 3/9/06 - Obligado - received Summary Report. Six borings and six wells (MW9-MW15) were installed. Below 5 ft of fill, soil is gravelly silty sand, silty sand and sand. Ground water encountered between 7.5 and 9 ft bgs. Ground water appears to flow to the south. Notable ground water impacts at MW11 -(Benzene 34 ppb, toluene 1100, ethylbenzene 1900, xylene 3800, napthalene 340) and at MW13 (napthalene 76 ppb) and at MW14 (benzene 30 ppb). MW15 was dry. Soil results showed a xylene exceedences (3700 ppb) at BH19 (MW11) between 6 and 8 ft. Report recomends no further investigation. Recommends submittal of a RAP for the remediation of the driveway

FORMER WAREHOUSE (Continued)

S106471554

areas and not within structures. 3/10/06 - Obligado - called Doug Reid to discuss site, left message to call back DEC. 3/27/06 - Obligado - Spoke to Doug Reid, proposes RAP of combination of source removal via excavation and air sparge for gw. Will send a RAP in next couple weeks. 3/29/06 - Obligado - Sent ISR approval letter to RP and email to Doug Reid. Set RAP due date for 5/29/06. 5/31/06 - Obligado - Phone call from Reid, he will send RAP letter today. He will also 7/7/06 - Obligado - Review letter submitted on 5/31/06 via email. Letter is from LCS, Inc to Mr. Barr. The letter proposes AS/SVE as a remedial technology. Proposal to do a pilot test and then submit remedial designs. Called Douglas Reid to inquire about Pilot test. 8/4/06 - Obligado - Email from Douglas Reid: "Our client has asked us to prepare a proposal for excavation of the most impacted soil followed by application of contaminant specific microbes and ORC followed by groundwater monitoring. We are in the process of preparing the estimate and once we have their approval we will forward a Remedial Action Plan to you." 8/22/06 - Obligado - Received emailed RAP. 8/28/06 - Obligado - Reviewed RAP. According to RAP, the SVE/AS pilot test was unsuccessful due to shallow ground water and short circuiting as a result of surface drains. This RAP proposes combination of excavation (~120 tons) in heavily impacted areas (BH4 and BH6), and biotreatment with ORC. Proposes to apply combination of Waste Stream Technology Bioblend M-4 and ORC to bottom of excavation to enhance bioremediation. Called Jim Harrington at technical support to discuss this product. 8/30/06 - Obligado - Phone conversation with Douglas Reid. Sent email requiring RAP addendum with: 1) In addition to application in the excavation, application of ORC and Bioblend M-4 to area of contaminated ground water upgradient to excavation in vicinity of TPMW5, TPMW1, and TPMW2. ORC and Bioblend should be injected in a grid pattern into affected area via a Geoprobe. A map showing proposed injection points should be submitted. 2) Provide estimation of Total Petroleum Hydrocarbon (TPH) mass and distribution and provide calculations for determination of quantities ORC to be added to treat soil and ground water. 3) OM&M for ground water: In addition to VOCs, ground water should be analyzed for Ferrous Fe and dissolved Mn, ORP, DO (must be measured in-situ), and pH. 4) Post-remediation confirmatory soil sampling. 9/20/06 - Obligado - Email from Douglas Reid - They are still waiting for revised ORC volumes. They will submit additional requirements shortly. 9/29/06 - Obligado - Phone message from Douglas Reid. They got additional ORC information from vendors. He will submit the Revised RAP soon. Tentatively scheduled work for October 10-17. 10/2/06 - Obligado - Received RAP Addendum email. Proposes 275 lbs of ORC Advanced to be sprayed into excavation. Proposed excavation area is 400 square feet. Proposes 18 injection points in a 10 x 10 grid to treat a 1800 square foot area of concern. Will inject 1009 lbs of ORC advanced. Will monitor for Ferrous Fe, dissolved MN, ORP < DO, ph, and VOCs. Will collect post excavation confirmatory endpoint samples. Will inject 5 gallons of liquid Bioblend M4 per injection hole. 10/31/06 - Obligado - Email from Doug Reid - "We are scheduled to perform the soil excavation at the above-referenced site tomorrow, November 1, 2006. We plan on backfilling the excavation on November 2, 2006. Dan Love will be our manager on-site and can be reached at 845-406-0433." 9/13/07 - Obligado - Review Summary of Remedial Work - ORC injected October 10 through 13, 2006. and a contaminant specific microbial product (Bioblend M4). 2 additional monitoring wells were installed. A total of 3 monitoring wells are present at the site located at the

S106471554

areas of maximum ground water contamination. 185 tons of impacted soil removed from the site. Additionally, 1 550 gallon UST and piping was discovered and removed. The UST had no holes. 3 of the 7 endpoint soil samples had significant impacts - (north sidewall, north bottom, and west sidewall) One recovery well placed in center of the excavation. Site will be monitored on a quarterly basis. Review 1st quarterly monitoring report. BTEX - 32 ppb (MW5) to 9871 ppb (MW2), MTBE - ND. TPMW1 and TPMW5 show decreasing trend but TPMW2 increased significantly. No DO or ORP analysis performed. Emailed Douglas Reid to remind him that DO and ORP were required. 6/22/08 - Obligado Received email from Eric Warren with pdf letter from Doug Reid. The letter stated that they had completed the monitoring as per the RAP. I emailed him back that I had not received the 3rd or 4th monitoring reports. 6/23/08 - Obligado - Received email from Doug saying he didn't know why the reports weren't sent. Email contained 3 and 4 quarter monitoring reports. 7/24/08 - Obligado - Reviewed the 4th monitoring report. 3 monitoring wells were sampled for 4 quarters, last sampled in December 2007. All 3 wells were in the northern area where the ORC injections were performed. No wells located down gradient in tank excavation area. Monitoring results do not show much decrease in MW1 or MW2. Very high benzene concentrations remain - over 2000 ppb in both wells. Also DO did not show much increase in MW2. I called LCS to discuss this project. Doug Reid not in the office but he will be back Monday. 8/11/08 - Obligado - I called Douglas Reid again. We discussed the site. Still very high benzene numbers. I asked him about the condition of the monitoring well network on site. He said there are only 4 monitoring wells with manhole covers. The rest were temp wells with just caps. I told him I wanted continued monitoring and replacement of temp wells with permanent 2" monitoring wells with manhole covers to expand the monitoring network. 8/13/08 - Obligado - Sent a letter, with cc to D.Reid, requiring additional well installation, monthly monitoring, quarterly sampling and reporting, and submission of a Well Installation Workplan within 30 days of receipt of letter. 8/25/08 - Obligado - Letter returned undelivered. Resent to different address: Bradford Barr Bradford N. Swett Management, LLC 1536 Third Avenue New York, New York 10028 8/26/08 - Obligado - Delivery confirmation. Due date for report is 9/25/08. 11/20/08 - Deadline has passed. No work plan has been received. I called Doug Reid to inquire about the work plan. I got an email from Doug that they already completed the work. I advised him in the future that work plans should be approved by the Department prior to commencing work. I then spoke to Shawn for LCS who said he would email me the proposal that was submitted to Mr. Barr. 8/12/09 - Obligado - Reviewed Monitoring Well installation Report and January 2009 sampling report. Total VOCs up to 16,000 ug/L. Plume is not defined north of MW2 and east of MW11. Sent letter requiring additional wells. Also there were discrepancies in gauging data and contour maps that should be corrected in future reports. Also required hydrographs. Required workplan within 30 days. 12/2/09 - Obligado - Reviewed and approved work plan. The plan proposes 2 additional wells and continued quarterly monitoring monitor the effectiveness of enhanced bioremediation efforts. I sent an approval letter to Mr. Barr and cc to LCS. 4/7/11 - Obligado - Quarterly update report for January 2011. Total VOCs were as high as 14000 ug/L in two wells, MW2 and MW16. Benzene concentrations as high as 1130 ug/L. The report proposes additional sampling in April.

Remarks: an old tank was left in the ground. they got back lab results

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY" e2mis notes: 1/2 pint of insulatum was found dried on the wall of manhole 22081. Conduit plate 5G indicates a sewer connection. Manhole was dry. No swer or waterway was affected. Operating supervisor took samples and placed environmental tag in manhole chimneys, there are two entrances. He stated that insulatum was from an old joint failure. Sample results came back as 8ppm PCB. Cleanup was completed by double washing manhole. Tanker removed 50 gallons of water and insulatum. There was no tag faound in manhole to remove.

DER Facility ID: 337828
DEC Memo: 01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. 164113. 05-May-2006 09:39. Proj Specialist B. Bellows 86888 reported while on location for an inspection discovered 3rd Party Contractor D'Onofrio spill 2 pints of lubricating oil on bluestone from a pipe threading machine. No smoke or fire is/was involved. No sewers, waterways, or private property affected. Cleanup is progress and SSO will follow up with this incident as necessary. D. Rohrer 12788 Hi, George, I reviewed spill 164113. This spill was caused when the containment vessel located beneath a thread cutting machine being knocked over when the threading machine was moved. The bluestone was located in the area which is now the switchgear room and was the base material for the building floor. The affected bluestone was removed and is currently identified as "Closed - submitted for NYDEC approval" in our system. Let me know if additional information is needed. Thanks Brian >

> From: Bellows, Brian > Sent: Thursday, May 24, 2007 1:37 PM > To: 'gdbreen@gw.dec.state.ny.us' > Cc: Little, Craig; Eiband, Gregory B; Lund, Richard > Subject: Spill Closeouts- Mott Haven > See eDocs for 2007 Substation Inspection Findings and for response from Con Edison relative to this spill.

Remarks: pipe fitting, clean up in process and no to 5 questions: coned # 164113

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 161068. 15-Sep-2005 15:00 hrs. Engineering inspector, John Lynn (42731) while inspecting MottHaven Substation project, located at 415 Bruckner Blvd, Bronx, NY reports finding ~ 1 pint of hydraulic fluid leaked from a Contractor (D'Onofrio) forklift onto SOIL. No fire/smoke is/was involved. No sewers/waterways were affected. Absorbant diapers were placed under the vehicle to contain the leak. Additional crews are on scene to help in clean up. L Fischer 55784 15-Sep-2005 15:45 hrs. John Lynn (42731, Engineering Inspector, reports clean up of affected area completed. Vehicle was wiped down with absorbant diapers. One bag of non hazardous debris was generated and will be disposed of by the Contractor. Contractor has stopped using forklift to make permanant repairs. Clean up is complete. L Fischer 55784 Closed. 9-16-05. GB
Remarks: 1 PINT WAS SPILLED ONTO THE SOIL FROM A FORKLIFT. CLEAN UP IS IN PROCESS AND DIAPERS WERE PLACED UNDER THE FORKLIFT. CON ED#161068. NO TO FIVE QUESTIONS

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 96515
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "AUSTIN" 2/11/98, 0955 hrs: Glenn Newell, Con Ed ERT - oil seeping into transformer manhole TM-826 in 2 places, also into adjacent manhole (MH-857). Samples were collected for PCB analysis, but not for ID. 2/11/98, 1815 hrs - Glenn Newell called with PCB results. Both samples showed a flashpoint of <160 degrees F. Sample from TM-826 had PCB count of <1 ppm. Sample from MH-857 - 35 ppm Aroclor 1242. 2/13/98, from Mike Cesare, Con Ed CIG - sample ID indicates "light fuel oil". PCB results 96 ppm. 2/17/98: Checked PBS database - apartment building directly adjacent to manhole is not registered. One location is registered in vicinity - 2000 gallon vaulted tank. Spoke with Angel Chang, Con Ed EH&S Field Services - he said that manhole had been cleaned as of today. The manhole will be left tagged to alert future workers of possible PCB contamination in the manhole. It is his opinion that the high PCB count can be attributed to the oil and water coming into contact with the wrapped cables and leaching PCBs from them. This would explain the earlier, lower PCB results when the water/oil mixture had not reached the level of the cables in the manhole. Spill transferred from O'Connell to Mulqueen. E2MIS Orlando Negron #18400 Flush tank operator was sent to loc. to check if tag was pulled. He reports oil was back in structure. I dispatched Supervisor A. Tortora # 39689 to investigate. The report we received is as follows. Oil in the sump, visible signs of oil coming through walls. Tony took a sample from the sump and a wipe sample from the floor. Tag 09683 was hung. pending results. I tried to empty the material history three times but got an error F 45 RUN CAUSED A GENERAL PROTECTION FAULT IN MODULE ORA71 WIN. DELL AT 0005:8D61. I WILL PUT THE INFO HERE. Approximately 2 PT of oil in sump 100 % contained no release to outside. Flash Point >210 Deg. F Total Halogens <200 PPM 12-FEB-1998 1130 HRS ENV A.CHANG REPORTS THAT THE LOCATION WAS VISITED BY THE DEC TODAY. HE MET THEM. NO RE-SAMPLING REQUIRED. E. DE LA HOZ RESAMPLE SAMPLE RESULTS RECEIVED 2/12/98...127 PPM 1242 AROCLOR P SCHMID 58060 2/13/98, CIG CESARE NOTIFIED 0815 HRS 2/13/98 SCHMID The JOB has been resolved. Corp. Transportation was notified to pick up 1 barrel containing solid debris. The tag will be left in the MH. The reason for this has not been told to me. So the job will remain resolved pending notification to the control center to close out completely. 03-AUG-1998 CLEANUP AND REVALT WORK SCHEDULED FOR TOMORROW. TEMP EPA NUMBER ASSIGNED NYP004026134. EFFECTIVE 8/3/98. A.NADALIN 78175 REVALT CONDUCTED SEALING WORK IN THIS STRUCTURE. OIL IS STILL ENTERING TM FROM THIRD PARTY SOURCE. INCIDENT REFERRED TO DEC JANE O'CONNELL ON 8/18/98. O'CONNELL INFORMED A.CHANG THAT THE INCIDENT HAS ALREADY BEEN REFERRED TO OUR PRIMARY SPILL RESPONSE STAFF. THE INCIDENT WILL BE STOPPED AS OF 8/18/98 BUT LEFT UNRESOLVED UNTIL GUIDANCE FROM THE DEC IS RECEIVED. NOTE THE RESOLVED DATE WAS INCORRECTLY OCCUPIED. I HAVE REMOVED THE DATE FROM THE RESOLVED FIELD. MAY 13, 1998 10:30AM L. FISCHER REPORTS

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN" 12/04/2003 Reassigned from Sangesland to Sun. Also refer to Spill # 94-00355 and #02-08305 for this site. 10/31/05: Project reassigned from Sun to Andersen. Spill has been monitored since 2002. Needs stipulation and remediation plan. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and GSC/Kleinfelder: An RAP with ORC socks will be investigated, another well downgradient of MW-1 will be investigated. 5/19/06: Sent Gail Russo and email to followup on overdue quarterly report. 6/16/06: Reviewed quarterly report dated June 7, 2006. Three wells sampled on 3/7/06. ORC socks installed in MW1 and MW2. Max BTEX 1,623ppb in MW2, max MTBE 76 ppb in MW2. "After two sampling events, prepare an exposure assessment for Site Closure". 6/30/06: Meeting on 6/28/06 with Hess, NYSDEC, Quantum, EnviroTrac and GSC. EFR from MW-2 was discussed. A more aggressive remedial method than ORC socks is recommended. 8/4/06: Received update report dated 7/28/06. Wells sampled on 6/20/06. Max BTEX 77ppb (MW1), max MTBE 10.5ppb (MW1). Large decrease in contaminant concentrations in MW1 and 2. Report states: "after the next sampling event, prepare an exposure assessment for site closure". 12/6/06: Reviewed update report dated 11/22/06. Max BTEX 90ppb (MW1). Max MTBE 12.5 ppb (MW1). Max benzene 85ppb (MW1). "An exposure assessment will be prepared and submitted under separate cover during the fourth quarter 2006." 1/17/07: Meeting on 1/16/07. A SRS was submitted. Quarterly sampling suspended. Closure request denied, continued sampling required. 5/1/07: Sent email to John Schenkewitz, cc Aaron Lapine, to followup on report submission. 5/24/07: Emailed Hess/Delta to followup on site status. Received email from Aaron Lapine: "Hess Station 32531 was sampled in March. Per the regular schedule (at least as far as we know), we are finalizing the report for a May submittal." 5/30/07: Reviewed the site status report. Wells sampled on 3/23/07. MW1 not sampled because inaccessible. Max BTEX 106 ppb (MW2), max MTBE 46 ppb (MW2). Increase in benzene in MW2 from 1.3 ppb to 78 ppb. MNA. 8/29/07: Reviewed site status report. Monitoring wells sampled on 6/27/07. Max BTEX 471 ppb in MW2. Max MTBE 34 ppb in MW1. 160 ppb benzene in MW1 - 12 ft depth to water. 150 ppb benzene in MW2 - depth to water 4 ft. 2/11/08: Reviewed August 2007 - October 2007 Site Status Report. One of three wells not sampled because inaccessible. Max BTEX 710 ppb in MW3. Max MTBE 100 ppb (MW3). Site under quarterly

sampling. 2/14/08: Reviewed November 2007 - January 2008 Site Status Report. Wells sampled on December 7, 2007. Max BTEX 190 ppb in MW2. Max MTBE 10 ppb (MW2). Large benzene / BTEX ratio. Site under quarterly sampling. 5/6/08 - Carlson: Reviewed first quarter 2008 update report dated April 30, 2008. Wells sampled on 3/21/08. Maximum BTEX concentration 705 ppb (MW2). Maximum MTBE concentration 28 ppb (MW7). MNA. 10/22/08 - Carlson: Meeting with Hess, Envirotrac. Delineation workplan due in January 2009. 12/1/08 - Carlson: Reviewed November 2008 update report. Low dissolved concentrations. 1/16/09 - Carlson: Received proposed confirmatory soil boring locations. Installation scheduled for 1/26/09. 3/11/09 - Carlson: Reviewed update report. Confirmatory boring data will be in the next report. 3/18/09 - Carlson: Meeting with Hess. Quarterly gauging requested. 6/25/09 - Carlson: Reviewed May 2009 Update Report. Three borings/wells installed. Impact found in MW-2A. Sent email to Hess/Envirotrac. Where was product line failure that was cause of 98 spill number, and sample three new wells. 8/12/2009 - Carlson: Reviewed August 2009 Update Report. Low dissolved concentrations. New wells will be included in next quarterly sampling event. 8/19/09 - Carlson: Meeting with Hess. New wells do not extend to groundwater. They do not know product line location. 9/16/09 - Carlson: Issued letter requiring delineation work plan for installation of two additional soil borings. Work plan due in 30 days. 11/4/09 - Carlson: Approved work plan for installation of two additional confirmatory borings. 1/21/10 - Carlson: Received email from Joseph Rennie - they are experiencing bonding issues - can't get DOT permit for delineation in sidewalk (?). 1/22/2010 - Carlson: Meeting with Hess. Confirmatory boring installation delayed for permit. 3/11/2010 - Carlson: Reviewed quarterly report. 4/8/2010 - Carlson: Drilling scheduled for 4/27/2010. 6/11/2010 - Carlson: Reviewed update report. Two borings/wells installed. Soil impact in B-4/AS-1. B-5/MW-4 is clean. Spike in groundwater concentration in MW2. 6/18/2010 - Carlson: Issued letter requiring RAWP to treat remaining impact. RAWP due 7/19/2010. 8/31/2010 - Carlson: Approved RAWP for installation of three SVE wells and STRE. 10/1/2010 - Carlson: Reviewed August 2010 update report. AS1 and MW4 installed. Soil impact in AS1. Proposed SVE wells were not installed yet. 5/10/11 - Obligado - I reviewed the 4Q10 update report. 4 SVE Wells were installed. Free product detected in 2 wells, SVE-02 (0.02 ft) and SVE-3 (0.13 ft). Very high soil concentrations in SVE2 and SVE3 above standards. Fingerprint analysis conducted by Torkelson. According to report, the product is a regular grade gasoline estimated to have been manufactured/released between 1983 and 1993. Hess will evaluate data to evaluate remedial options. Additional delineation is needed to the south of SVE-3. 6/5/11 - Obligado - I reviewed an investigation work plan submitted by Envirotrack. 1 monitoring well is proposed to the south. I sent an email approval for the plan. Work is scheduled for June 9. Results will be included in the subsequent update report.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: e2mis no 159611 Bx/West Engineering Q/A J. Croughan # 51129 reported discovering ~ 6 ounces of dielectric fluid from improperly sealed cable ends and an apparent collapsed duct while inspecting manhole # 13155 f/o 770 Southern Blvd. in the Bronx. There was/is no sewers, waterways or private property affected. The crew hung an Environmental tag # 46608 and took an oil sample for PCB for the leaking cable ends and a sample for PCB and an ID for the oil under the duct (COC# DD15210) Cleanup pending lab results. 18-JUL-2005 13:45 Lab Sequence Number: 05-06587-001 TOTAL PCB 7 ppm Lab Sequence Number: 05-06587-002 Date Approved: 7/08/2005 Total PCB <1 PPM Lab Sequence Number: 05-06587-003 Date Approved: 7/08/2005 TOTAL PCB 5 ppm Lab Sequence Number: 05-06587-004 Date Approved: 7/08/2005 Total PCB <1 PPM 16-Aug-2005 23:00 hrs Flush mechanic, Ed Henn (14210) reports CFS tanker took 100 gallons of waste water from the manhole. The vacor truck removed 500 lbs of Lead Hazardous solid debris. The entire structure was double washed with Bio-Gen 760 detergent. The source of the oil was uncapped dead feeder cable which was wrapped. Environmental tag # 46608 was removed. Job is complete. 17-Aug-2005 09:23hrs. Op. Sup. G. Meiers reports wrapped dead cable ends permanently sealed with shrink caps.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: 159093. 10-June-2005 13:56 Hrs. Q&A Sr Engineering Inspector Joe Graci, 42890, reported while performing a manhole inspection for future feeder work in manhole 17685 on the north side of Longwood Avenue 102 feet east of Southern Boulevard in the Bronx, found a d-fault on what appears to be Feeder 4x49K where the cable was damaged at the duct edge and leaked and spill dielectric fluid that is contained in the manhole. No fire or smoke is/was involved. No sewers, waterways, or private property affected. No injuries involved. Environmental tag applied, No. 46601. Access is in Police Department parking area for local Police Precinct house. Due to d-fault, access can for cleanup is pending deenergizing feeder which will not occur within 24 hours. CIG Tom Marcineck 87549 notified. J. Siesfeld 84253. 19-Jun-2005 02:30 hrs. Lab Sequence Number: 05-05597-001. < 1.0 ppm 19-Jun-2005 21:20 hrs. Operating Supervisor, Darren Scarimbolo (87659) reports oily spot area (1' x 1') of concrete floor of manhole was diapered up and double washed with Simple Green. One bag of Non-Hazardous debris was generated and will

Relative: Higher	FINDS: Registry ID: 110018922656 Environmental Interest/Information System ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL" e2mis no. 131223: approx. (10) gallons of possible transformer oil on approx. (30) gallons of water in transformer vault # 968. Conduit plate 9-K indicates no sewer connection in this vault. Clean up being handled as 50-499 ppm PCB. Historical data indicates PCB as 42 PPM dated 10/18/1994. I&A Mechanic reports that there is a sheen on the water in the adjacent transformer vaults #V-1127 and V-1294 The sump in V-1294 was disconnectd. Operating supervisor T. Guion Repoets that there is not a sheen in the adjacent transformer

S104652463

vaults, but a dusty film. Mr. guion reported that the transformer was pressure tested and that it held pressure. the oil came from a loose waterbury fitting on the transformer, which was repaired. Lab Sequence Number: 00-04445 PCB 42 ppm 5/6/00 Flush operator reports that the clean up in the 3 transformer vaults are complete. The corporate tanker removed approx. (10) gallons of oil and (500) gallons of water from the three vaults. The lab results indicate 42 PPM PCB. Clean up was completed as less than 50 ppm. The three vaults were power washed twice and the wash water was removed by the tanker. The sump that was unplugged was re-energized and it had an oil minder device installed on the pump, there was no sign of oil in the sump pit.

Remarks: CLEANUP WILL BE PERFORMED USING 50-499PPM PCB CLEANUP PROCEEDURE SAMPLE TAKEN - HISTORICAL PCB VALUE 42PPM

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Construction Mgmt. Rep. R. Linton # 86533 reported discovering 1/2 gallon of unknown liquid in a test pit @ f/o 1165 Longwood Ave. Bx. There was/is no smoke, fire or injuries involved. There was/is no sewers, waterways or private property affected. The crew will be refilling the test pit and a lab tech. will be taking samples. This incident will be updated by Maintenance Construction. R. Browne # 21646 13 Mar 2006 14:00 hrs. Correction to the initial report, this incident was incorrectly reported as a 3rd Party spill, but was discovered by working company forces. The report has been changed to reflect this. Construction Mgmt. Rep. R. Linton # 86533 reported that a Con Edison Lab. Tech has taken samples to the Astoria Chemlab for analysis. R. Browne # 21646

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 333690
DEC Memo: 7/13/07 - Raphael Ketani. The spill was caused by the discovery of contaminated soil while doing soil borings. The site is block and lot 02739/0015. The owners are Blauers LLC, 890 Garrison Avenue, Bronx, NY, 10474-5354. A CSL was sent today to Sam Blauner. 07/25/07-Vought-Received call from and spoke to Mary Manto (Fleming Lee Shue 212-675-3225 fax:212-675-3224) who received soil contamination letter. Mary working for property purchaser and detected soil contamination. Mary will submit an investigation workplan by 9/30 and she has been retained by buyer and seller. Site will may be redeveloped as commerical space. Preliminary DEC Requirements include: 1)delineation of soil and groundwater

contamination 2)PBS registration 3)vapor barrier and possibly SSDS
8/3/07 - Austin - Transferred from Vought to Rahman for further
review and action - end 01/29/08 Rec'd RAP/Investigation Report
prepared by Fleming Lee Shue. 06/06/08 Rec'd closure report from
Fleming-Lee Shue,Inc.The site contained three industrial
buildings.Nine USTs existed on the site in five distinct areas of
which eight were removed.FLS performed site assessment by installing
eight soil gas points and seven soil borings.Four of the eight soil
gas point showed VOC concentration >10 ppm. Two of the seven soil
borings indicated petroleum impacts.Borings were in the vicinity of
the two 15,000 gallon fuel oil USTs.Four UST location area, names
A,B,C and D were excavated to remove the tanks.A 550 gallon roller
wash UST and a 550 gallon #25 oil UST were removed from UST area A
along with 488 gallon petroleum contaminated water.Contaminated soil
was removed after tank removal until bedrock was exposed along all
sidewalls.Impacted soil was also removed from 550 gallon roller wash
UST, end point sample was also taken from 6' below the surface.Three
USTs sat on bedrock, were removed from area B.Two end point samples
were taken after removal of contaminated soil.Two 15,000 gallon No 2
oil tanks were removed from area D. Associated piping were also
removed from the area.End point samples were taken from the
sidewalls. Disposal manifest and a photo log were provided. All VOCs
were below their respective RSCOs and some SVCOs(Benzo
group,Chrysene) are moderately higher than RSCOs, which FLS
attributed to fill material.FLS claimed a total of 1,226 tons of
petroleum-impacted soil has been removed from the four excavations.
Based on the fact that the tank and contaminated soil has been
removed, no vocs above TAGM exists at the site,NFA required.(sr)
FOUND CONTAMINATED SOIL WHILE DOING SOIL BORINGS

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO" Sent contaminated soil letter 9/8/2003 - Zhao spoke with Yvette Wilson, (516)485-0000, YellowStone Industries. There were two 550 gal tanks found and removed, and removed three truck load contaminated soil. Lab results just came back today. Final report will be sent to the DEC. Soil contaminated letter re-send to: Selwyn Miller (the owner), 539 Bleeker Avenue, Mamaroneck, NY 10543. 11/3/2003 - Site assessment report was received on 10/09/2003. The report has been reviewed which stated proper action has been taken and the endpoint samples results are under TAGM guidance. No further action is required.
 Remarks: caller on site digging a test pit and found contaminated soil

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
 US Geographic Names Information System (GNIS) is the official vehicle for geographic names used by the federal government and the source for applying geographic names to federal maps and other printed and electronic documents.

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 160853. 02-Speter-2005 10:19 Hrs. Sr. Engineering Tech Joe Graci, 42890, reports while inspecting manholes for a future run of feeder 3M53 found in former transmission manhole no. 22, located on the west side of Southern Boulevard 72 feet north of Saint Mary's Street, a "large" retired pirelli joint that was cut and left in the manhole, and the two cut ends of the joint leaked 1 pint of dielectric fluid that spilled in the manhole where it is contained. No fire or smoke is/was involved. No sewers, waterways, or private properties affected. No injuries involved. Environmental Tag 46604 applied. Samples taken (PCB), chain-of-custody No. DD15214. Cleanup pending Transmission Operations removing the old equipment and test results. Spill being tracked as reportable because source of spill will not be removed within 72 hours. The manhole is located on the sidewalk and there is sure access. CIG notified. J. Siesfeld 84253.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: e2mis no 157945 05-April-2005 15:59 Hrs Third Party Spill - Construction Management Engineering Inspector Bob Prezioso, 77054, reports from the Mott Haven Substation Construction project located at 360 Bruckner Boulevard, in the Bronx, that a Big Apple Construction excavator was parked on plastic while a hose was being changed and hydraulic fluid leaked out of the hose and spilled out of the plastic secondary containment on concrete where it is being contained with absorbent materials. However because some of the oil seep under the excavator and the excavator can not be moved until a vendor supplied new part is delivered tomorrow morning, the spill can not be cleaned up in two hours thus it is being reported. No sewers, waterways, or private properties affected. Cleanup will be performed after the excavator is repaired and moved. 07/11/05 @ 13:15 - The bulk of the spill cleanup was completed by contractor Big Apple at 15:30 on 4/05/05 and confirmed by Robert Prezioso 77054. Equipment repair was completed by 4/06/05. Cleanup of remaining residual hydraulic fluid was completed on 4/06/05 by 12:00. Approximately 2

SSOC Eng Inspector J. Lynn 42731 reported while 3rd party contractor D'Onofrio was working to remove debris an excavator spilled 1 quart of hydraulic fluid on soil from a blown hose. No smoke fire is/was involved. No sewers, waterways, or private property affected. The spill was contained and cleanup completed removing the affected area of non-hazardous oily soil and an 1/8 of a 55 gallon drum of waste was generated. The waste will be placed in a proper storage area until it is removed the site. The excavator was removed from the location. D. Rohrer 12788

DEC Memo: 01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. e2mis no 160608 John Lynn (42731) while inspecting new Mott Haven Sub Station construction site, located at 360 Southern Blvd, Bronx, NY, reports finding ~ 1 qt hydraulic fluid leaked onto soil from a Big Apple Contractor Front End Loader. No sewers, waterways or private property were affected. The crew has placed plastic down first and then absorbant pads to contain the spill. The site will be monitored until the Contractor can supply manpower to perform the cleanup. 20-Aug-2005 11:50 hrs Engineering Inspector, John Lynn (42731) reports 2' x 2' x 6" area of non hazardous soil was dug up and placed in a plastic bag for disposal. Containment plastic and absorbant pads were placed down under the vehicle. The leak is still active (1 drip per minute) , but it is being captured on the pads and plactic. The Contractor (Big Apple) has been contacted and will respond to make permanant repairs to the vehicle.
Remarks: 1 quart of hydraulic fluid leaked from front end loader, onto soil. Absorbant pads have been placed. Awaiting contractor company to handle cleanup.

 DEC Region: 2
 DER Facility ID: 292393
 DEC Memo: e2mis no 158628 Engineering Inspector Robert A. Prezioso, 77054, reported while Big Apple Demolition was excavating formerly unknown underground storage tanks, at the Mott Haven Substation construction site (360 Southern Blvd), an abandoned 55-gallon drum was discovered and unearthed, and while being handled 8 ounces of an unknown oil leaked from the drum and spilled to soil. Mr. Prezioso reports there is approximately 10 gallons of unknown oil in the drum, the drum has been placed on plastic for containment, and the Chem Lab has been assigned to sample the drum to determine proper disposal method. No sewers, waterways, or private property has been affected. The impacted soil is being excavated and contained pending test results and determination of disposal methods.

Remarks: WHILE HANDLING A DRUM SOME PRODUCT LEAKED OUT: SAMPLES ARE BEING TAKEN AT THIS TIME: CONED # 158628: no tothe 5 questions

 DEC Memo: 05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 160967. 09-Sep-2005 14:35 hrs. Bx/West Sr. Engineering Tech. G. Graci # 42890 reports that while attempting to conduct a manhole inspection in Mh 13135 at 658 Southern Blvd in the Bx. he discovered 2 pints of unknown oil from a leaking joint. There was/is no smoke, fire or injuries involved. There was/is no sewers, waterways or private property affected. The crew hung a "D-Fault Tag # 02840 for the defective joint and Environmental tag # 46751, they also took an oil sample for PCB. & ID. (COC# EE20903). Massive Co. is required to maintain accessibility. R. Browne # 21646 09-Sep-2005 14:55 hrs. Due to feeder scheduling the 72 hour time criteria will not be met and this report has been changed to a reportable spill. R. Browne # 21646

and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/05/2011	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/05/2011	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/05/2011
Number of Days to Update: 30	Next Scheduled EDR Contact: 10/17/2011
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 07/12/2011	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/13/2011	Telephone: 518-402-9622
Date Made Active in Reports: 08/09/2011	Last EDR Contact: 08/25/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/05/2011
	Data Release Frequency: Annually

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 09/14/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/24/2010	Telephone: 518-402-9814
Date Made Active in Reports: 12/17/2010	Last EDR Contact: 08/26/2011
Number of Days to Update: 23	Next Scheduled EDR Contact: 12/05/2011
	Data Release Frequency: Varies

State and tribal landfill and/or solid waste disposal site lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 07/11/2011
Date Data Arrived at EDR: 07/11/2011

State and tribal leaking storage tank lists

LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 07/05/2011
Date Data Arrived at EDR: 07/05/2011

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

Number of Days to Update: 41	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

UTM Y (Meters):	4518227.0
Elevation:	8 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Middle Ordovician (Mohawkian)
Code: O2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.
