EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERC-NFRAP sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 11 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/12/2013 has revealed that there are 2 NY SWF/LF sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NY CROSS HARBOR RAILROAD TERMINAL	1ST AVE AND 43RD ST	SW 1/8 - 1/4 (0.201 mi.)	AU427	1024

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2014 has revealed that there are 18 NY LTANKS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS UST site within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 03/27/2014 has revealed that there is 1 NY ERP site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/17/2014 has revealed that there are 152 NY Spills sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 57 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 5 FTTS sites within approximately 0.25 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 5 HIST FTTS sites within approximately 0.25 miles of the target property.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2009 has revealed that there are 2 SSTS sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 3 NY HSWDS sites within approximately 0.25 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 02/28/2014 has revealed that there are 83 NY MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY SPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

A review of the NY SPDES list, as provided by EDR, and dated 02/25/2014 has revealed that there is 1 NY SPDES site within approximately 0.25 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/23/2013 has revealed that there are 19 US AIRS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 39 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 4 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NY RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Conservation in New York.

A review of the NY RGA LF list, as provided by EDR, has revealed that there are 2 NY RGA LF sites within approximately 0.25 miles of the target property.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "KOLLEENY" TRANSFERRED TO I. ISLAM4/27/05- The site is under remediation by O'Brien-Kreitzberg (OBK). Reviewed the quarterly monitoring report (Oct.-Dec./04). There are only 2 groundwater monitoring wells (MW-B-04 & MW-D-05) under quarterly sampling. Sampling results from well MW-B-04 exhibited no exceedances of VOCs and SVOCs in three consecutive events and as such will be dropped from monitoring. The other monitoring well was not accessible during last two sampling events due to construction materials being stored over the well. However, effort is being made for sampling this well in the forthcoming quarterly event. No Free Product was observed in any of the monitoring wells.- 11/7/05- Reviewed the monitoring report dt. May 24, 2005 where URS has presented the latest (Mar./05) GW sampling compliant results from the lone monitoring well

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID:

110000323515

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information

on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 10/23/06 - See e-docs for Con Ed report detailing cleanup and closure.e2mis no. 157414:3-1-05 10:40HRS W. PHILLIPS 15240 (FOD) REPORTS, FOUND ONE GALLON OF DIELECTRIC OIL ON TOP OF VAULT AND ONE GALLON ON WALL IN STRUCTURE. OIL WAS DISCOVERED WHILE ON A OPEN AUTO THAT BLEW IN UNIT. AT THIS TIME OIL APPEARS TO BE CONTAINED AND NO SEWERS OR WATERWAYS WERE AFFECTED. THIS VAULT WILL NOT HAVE TO BE PRESSURE TESTED SINCE WE KNOW THAT OIL IS A RESULT OF VAULT THAT OPENED AUTO. THIS VAULT IS A CON EDISON ABOVE GROUND SELF CONTAINED VAULT ON BUSH TERMINAL PROPERTY. ENV STOP TAG 42187 WAS PLACED. HISTORICAL RESULTS INDICATE 1 PPM 11/9/04 NO WATER IN STRUCTURE AND NO SEWER CONNECTIONS OR SUMPS PRESENT. WIPE SAMPLES WERE TAKEN ON A E PRIORITY AND CLEANUP PENDING LAB RESULTS.

Remarks: BUSCH TERMINAL BUILDING #26: HISTORICAL PCB COUNT IS LESS THEN 1PPM: DUE TO TRANSFORMER THAT FAILED: CONED # 157414:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was
"O'CONNELL"8/31/96 (Katz notes): called MEG - on way to perform clean
up. S&D on-scene - placed boom around. As per Jim Gregory, barge
master (pager# 917-616-1400) fuel to/from surge tank is gravity fed
to G.T. barges. Came out through overflow very pipe into Gowanus
Canal.Puxxled fuel back through foam mixing system (?). Barge has 6 -
8" containment rail and permanent containment boom around it. 25-35
psi pressure vessel with fill line and return line, feed line.
Remarks: tank expansion spilled less than 1 gal of the oil/kerosene mix in the
canal

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

On 10/31, 0351 hrs, pumped 1000 gallons into 3 catch basins:1. NE corner Surf Ave/West 12 St.2.N side West 12th St, 10' north of Surf Ave.3. N side Surf Ave, 10' west of West 12th St.Took samples of water in flush truck, yard pit and 3 catch basins. Contact Steve Romero, Con Ed CIG Supervisor (212) 580-6763.7/27/04: Con Ed submitted copy of 11/17/95 notification letter to DEP, which states: "No visible oil sheen was seen on top of water which almost completely filled Manhole 60739 located at West 12th Street and Surf Avenue. Therefore, approximately a total of 1,000 gallons of water/sludge was pumped out from this manhole on 10/31/95 into flush trucks. This water/sludge was brought back to Con Edison's Third Avenue Yard Flush Truck Facility for dewatering. An estimate of 3,000 gallons of water was discharged from the Flush Truck Facility into the New York City sewer system. After pumping of this manhole, a section of the manholewall was found to have a tar-like substance on

Remarks: it. A sample of this substance was taken and sent to Con Edison's Chemical Laboratory for PCB analysis. At approximately 10:00 p.m. on 10/31/95, the laboratory result shows 91 ppm PCBs was detected in this substance. As soon as the laboratory result was received, the Flush Truck Facility was closed, sewer connection was plugged, and the flush trucks were quarantined. The sedimentation basin, drying area, dumping area, and discharge manhole of the Flush Truck Facility were all decontaminated by double washed with detergent and rinsed with water. The flush trucks were triple rinsed and washed. On November 5, 1995, cleanup was completed." Close out. (JHO)
CON ED CREW FLUSHED MAN HOLE AT W 12TH ST. & SURF AVE. BROOKLYN FLUSH TRUCK WAS EMPTIED AT 06:30 ON 10-31-95. AFTER FLUSHING MAN HOLE, INSPECTION SHOWED TAR LIKE SUBSTANCE ON CABLES AND WALLS. ANALYSE OF SUBSTANCE SHOWS 91 PARTS PER MILLION PCB. SOME OF THE 1000 GALS OF WATER EMPTIED FROM FLUSH TRUCK MAY HAVE GONE INTO CITY SEWER SYSTEM FROM HOLDING AREA. MAN HOLE NUMBER 60446. COMPLAINANT STATES MAN HOLE IS FILLED BY SEA WATER AT HIGH TIDE.

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Spill on the deck of a barge which is docked at the US Power Gen site on 2nd Ave. Spill from a diesel tank on the ship deck spilled into New York Harbor. Coast Guard was called. They are trying to determine how big the spill really is. They originally thought the spill was contained, but now unsure. Ken's Marine responded to the site same day and cleaned up with a sweep. Sweep left in the water over night.

DEC Memo: 9/4/12-Vought-Primary off hours responder. Called and spoke to Dan Lachman (US Power Gen Ph:516-790-0417) and he noted that a pier containing a fuel line collapsed resulting in a release of fuel oil to Gowanus Canal. Dan noted that fuel line was only used during winter and that the line was not grossly leaking and that slight bend in line was initially causing a spray of diesel fuel to be released. Dan noted that line was isolated from tank thus limiting source and that product was present on gravel adjacent to a bulkhead on the canal. Dan noted that the facility had permanent boom in place and had also called and mobilized Clean Harbors to deploy additional boom. Dan noted also that that spill affected a 5'x 5' area of gravel adjacent to the bulkhead and that they will begin recovery of impacted gravel and expect the cleanup to be completed by nighttime. Dan also noted that at no time had any sheen or product had exceeded boom limits. Dan also noted that no free product was observable. Vought called RSE who gave notice to have secondary responder (DEC Zhune) perform site visit. Vought called and spoke to DEC Zhune and informed her of same. Later during the day Vought received a phone call from DEC Zhune and Vought spoke to onsite representative who was looking for DEC approval to begin emergency removal of impacted pier. Removal of pier was necessary to inspect for possible diesel impacts along shoreline adjacent to bulkhead. Vought provided authority for emergency removal (and also received concurrence from RSE on same) however also noted to representative that DEC Cryan must be immediately notified Tuesday (9/4) to ensure compliance upon that time with DEC Permit requirements. Vought also instructed DEC Zhune to call and notify RSE of same.09/04/12-Zhune spoke to Natalia Hernandez Environmental Engineer at US Power Gen. She said cleanup was completed.09/04/12- Natalia sent the following email. The Gowanus Generating Station (GGS) fuel oil pier incurred structural damaged on Friday, August 31, 2012. Immediately, the Gowanus operators initiated the site's Facility Response Plan, which includes securing the generating units, isolation of fuel lines and reporting to the pertinent environmental agencies. During this event, a minor amount of fuel oil, Ultra Low Sulfur Diesel, was released into the waterway but contained by permanent boom, in place to secure any accidental releases from reaching the Gowanus Bay. Notifications were also made to the Company's Oil Spill Response Organizations (OSROs), Kens Marine, Miller Environmental Group and the Clean Harbors Cooperative. These contractors supported the removal of loose floating debris in the waterway, the cleanup of impacted blue stone and the evacuation of fuel oil from the submerged fuel oil header. A marine construction contractor retrieved the submerged section of fuel piping eliminating any safety and environmental concerns. Records of waste disposal generated during the response, will be provided to the Department no later than September 14, 2012.GGS will perform the necessary repairs to the damaged pier and associated structures before resuming normal operations.

Remarks: Unknown amount of Ultra Low Sulfur diesel spilled from a leaking cargo line. Cleanup crew is enroute. Crosses of 29th/2nd

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Spiller Contact: HARRY GELB
Spiller Phone: (718) 788-2600
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 344636
DEC Memo: 4/1/08 bf: Called Harry Gelb (718)788-2600. He is not sure of why tank failed. he believes it may have been caused when the driveway was repaved. I confirmed mailing contact and address. Mr. Damast is owner of the building. Told him he can register both tanks for 2-608583 and 2-608582 under one registration since they are on same property. Address for site location for 2-608582 is incorrect and is the mailing address. I told him this needs to be corrected. Sent ttf letter to:Abraham Damast3913 2nd Ave. Realty LLC4312 2nd AvenueBrooklyn, NY 1123209/05/08-Hiralkumar Patel. received call from Isaac from Eastmond. he mentioned that they did isolation test and found tank, fill line and supply/return lines tight. they found problem in vent pipe. asked Isaac to submit isolation test result.9/8/2008 Isaac submitted a writeup listing the work done and there was no contamination found. Tank was closed in place. See attached eDocs report.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"CALLBACK AT 10:59 AND LOCATION CHANGED TO NARROWS GAS TURBINES.Con ed e2mis notes:Air compressor which was being used by M&C was spilling compressor lube oil onto the deck of the barge. About 10 gallons was contained on the deck of the barge. The operator shut the compressor down and informed Supervisor Gerard Toto who organized a clean crew. Oil did not enter the waterways or sewers.At 0950 hours clean up started. At 1105 hours cleanup has been completed.
Not reported
Remarks: compressor on barge was leaking - spill contained con ed #122982

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL" This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. 06/05/2001 Zhao contacted Rick Spadalik at 1:45pm. 6 (550 gal) gasoline tanks and 1 (550 gal) waste oil tank were pulled out yesterday and found contamination soil which has been stock piled. Tanks were encased in concrete with concrete pad at bottom of tanks. American Environmental will possibly perform site assessment and will clean up site. At this time, DEC did not receive tank removal notification. 09/20/2001 Tank closure report from AEAC was received on 08/31. 10/15/2005 Called Russel Cararo (718-499-2121) but did not receive callback. Talked with Dan Hershberger at American Env'tl - he said that no further work was done at site by American Env'tl after tank removal. - Bishop 10/30/06 Reassigned from Bishop to Sun. (MS) 12/18/06 Sun sent letter to Russel Cascardo (4001 2nd Ave Inc.) at 4001 2nd Ave, Brooklyn, on 12/14/06 requiring that the following be submitted to the NYSDEC by 1/14/07: "To rectify this problem, a letter report asserting a cause of the release and summarizing the cleanup activities, observations, post-excavation sampling results (if necessary), and also including contaminated material disposal manifests or any other documentation (i.e. invoices, bills, etc.) of cleanup activities must be submitted to this office by January 14th, 2007, referencing the spill case number (see above) and the site address." (JS/MS) 3/1/07: Second letter sent (same as above) to be submitted by 4/2/07. (JS/MS) 8/6/07: All letters are being returned. Will try ACRIS to identify RP and address and if not successful, will visit the site. (JS/MS) 8/14/07: Sun/Sellberg sent another letter to Russel Cascardo (4001 2nd Ave Inc.) at P.O. Box 200825, Brooklyn, on 8/13/07 requiring the same as above be submitted to the NYSDEC by 9/17/07. This address was found on public property documents found on ACRIS website as well as Property Shark. (JS/MS) 9/18/07: Mr. Cascardo hand delivered TCR. Slight exceedences in soil samples however, no GW sample was collected even though it was noted to have a slight petrol-like odor. Will require collection of GW sample from within middle of former tank excavation area. (JS/MS) 9/28/07: Mr Cascardo believes that a sample had been collected during a separate field inspection. MS said he had 2 weeks to submit documentation proving this. If he cannot locate report, he understands he will have to conduct another sampling event. (JS/MS) 04/07/08: 2nd SIR letter send. Due 5/2/308. (JS/MM) 05/05/08: Zeb Youngman from PW Grosser called to notify the Department that PWG would be the consultant. Waiting for signed proposal and payment from Cascardo. (JS/MM) 06/18/08: Reviewing Subsurface Investigation/Spill Closure report. 3 MTBE hot spots (JS/MM) 07/02/08: Install 3 additional MW, implement groundwater monitoring program for a minimum of at least one year. (JS/MM) 08/05/08: Transferred to Kolleeny/Mandac. - JK 10/15/08: PWGrosser was not given permission to install additional wells by owner (JK/MM) 01/06/09: Spoke with Z. Youngman (PWGC), no work conducted on-site. Still needs permission from RP to move forward. Will need to send RP a letter. (JK/KG) 01/07/09: Letter sent to Russell Cascardo requesting work

plan for supplemental subsurface investigation (3 wells to be installed and quarterly GW monitoring program implemented). SSIWP due 02/06/09. Letter sent via certified/return receipt mail. Return receipt rec'd (letter signed for on 1/12/09). (JK/KG)01/12/09: Rec'd phone call from Zeb Youngman stating he had been given permission from RP to proceed with work. PWGC will submit the work plan. Four monitoring wells will be installed; 2 in the former UST area, 1 upgradient and 1 downgradient of the former USTs. (JK/KG)01/20/09: Rec'd Monitoring Well Installation / Groundwater Monitoring Work Plan dated 01/19/09 from PWGC - under review. (JK/KG)01/21/09: Work Plan reviewed. The scope of work includes installation of four monitoring wells, a groundwater elevation survey, collection of groundwater samples quarterly for one year, and submission of quarterly groundwater monitoring reports to NYSDEC. The work plan was approved with one modification; soil samples from each well location must be collected and submitted for analysis of VOCs. Approval letter mailed to RP and emailed to PWGC. The first QMR is due 3/27/09.(JK/KG) 02/23/09: On 1/27/09 rec'd phone call from Youngman stating well installation was scheduled for 2/4/09. (JK/KG)03/11/09: Rec'd Monitoring Well Installation/First Quarter Groundwater Monitoring Report dated 03/10/09 prepared by PWGC. Under review. (JK/KG)03/12/09: Four monitoring wells were installed on 2/4/09. Groundwater samples were collected on 2/27/09. Monitoring well MW-2 revealed soil and groundwater contamination. Letter sent to Russell Cascardo approving PWGC's recommendation to continue with quarterly monitoring and reporting. If contamination levels do not decline significantly after 2 additional monitoring events a proposal for an active remedial approach will be necessary. Soil:MW-1, MW-3, MW-4: All VOCs non-detect or below RSCOsMW-2: 1,2,4-Trimethylbenzene 24,300 ug/kg, 1,3,5-Trimethylbenzene 6,970 ug/kg, m&p xylene 9,400 ug/kg, n-propylbenzene 2,230 ug/kgGroundwater:MW-1: MTBE (33.2 ug/L)MW-2: Total VOCs (6,465.5 ug/L), Benzene (96.3 ug/L), Ethylbenzene (1,190 ug/L), m&p-Xylene (4,000 ug/L), MW-3: MTBE (30.2 ug/L) MW-4: MTBE (1.17 ug/L)(JK/KG)05/19/09: Rec'd a message from Zeb Youngman stating that the next quarterly monitoring event will be performed next week. (JK/KG)06/15/09: Rec'd Second Quarter Groundwater Monitoring Report dated 6/15/09 from PW Grosser. MW-1, 2, 3, and 4 were sampled on 5/26/09. Groundwater flow direction is to the west. Text states it is easterly, although the site plan and contours indicated it is to the west. Notified PWGC of discrepancy.Groundwater:MW-1: Total VOCs (46.5 ug/L), MTBE (21.2 ug/L), Benzene (1 ug/L), m&p-Xylene (24.3 ug/L)MW-2: Total VOCs (5,057 ug/L), Benzene (165 ug/L), Ethylbenzene (1,629 ug/L), m&p-Xylene (2,340 ug/L) MW-3: MTBE 40.5 ug/L MW-4: All VOCs non-detect(JK/KG)06/17/09: Rec'd hard copy of QMR as well as pdf of report with correction to the groundwater flow direction on page 2. Groundwater flow is westerly. (JK/KG)08/27/09: Rec'd Third Quarter Groundwater Monitoring Report dated 8/26/09 from PW Grosser. MW-1, 2, 3, and 4 were sampled on 8/21/09. PW Grosser recommends continued quarterly monitoring and reporting. Groundwater:MW-1: Total VOCs (28.8 ug/L), MTBE (28 ug/L) MW-2: Total VOCs (2,259 ug/L), Benzene (111 ug/L), Ethylbenzene (1,020 ug/L), m&p-Xylene (642 ug/L) MW-3: MTBE 140 ug/L MW-4: 1,2,4-Trimethylbenzene (1.01 ug/L)This site should be re-evaluated for closure or further action after next QMR is submitted. Work plan submitted in 01/2009 approved quarterly monitoring for one year. (JK/KG) 11/3/09 Spill case transferred from J. Kolleeny to J.A. Maisonave. - JAM 11/4/09 Spoke to Zeb Youngman. He will submit latest GW monitoring results. - JAM 12/15/09 Reviewed

SHOW AUTO SALES -MTBE (Continued)

S105057879

Fourth Quarter Groundwater Monitoring Rpt submitted by P.W Grosser Consulting (PWGC) dated December 3, 2009. Four on-site monitoring wells were sampled on Nov. 23, 2009. Sample results show total VOC concentration of 1,250 ug/L in MW-2 (decrease in Total VOCs in well MW-2 for 4th round in a row), MTBE concentrations of 18ug/L and 170ug/L in wells MW-1 and MW-3, respectively, and VOCs were below the detection limit in well MW-4 for the fourth round in a row. MW-4 is the most downgradient well, directly downgradient from well MW-2. PWGC states that the contamination seems to be localized to the former UST area around MW-2 and is not migrating off-site. The area is primarily industrial and there is very little exposure risk. They requested spill closure. Report uploaded to eDocs. I issued a letter today stating that the spill cannot be closed at this time and that one more round of groundwater sampling should be conducted. If contaminant levels continue to decline, PWGC should perform a sensitive receptor survey to demonstrate that the residual contamination poses no threat to human health or the environment. If contaminant levels increase, then additional remedial action may be required. Letter uploaded to eDocs. - JAM2/23/10 Received a call from Zeb Youngman yesterday. He emailed me the lab data for the last monitoring event, which showed an increase in VOC concentrations (double) in well MW-2. I issued an email and suggested that groundwater monitoring continue and a remedy should be proposed to expedite spill closure. A groundwater monitoring report will be submitted. - JAM6/9/10 Reviewed the 1st and 2nd Quarter Groundwater Monitoring Reports submitted by P.W Grosser Consulting (PWGC) dated Feb 22, 2010 and May 28, 2010, respectively. Groundwater monitoring was conducted on February 16, 2010 and May 21, 2010. Total VOCs in well MW-2 increased from 1250ug/L in November 2009 to 2523ug/L in February 2010 to 3319ug/L in May 2010. Wells MW-1 and MW-3 have MTBE with concentrations of 5ug/L and 55ug/L, respectively. Well MW-4, which is located directly down-gradient of well MW-2, had ND levels of VOCs. PWG recommend performing one more round of groundwater sampling and if VOC concentrations increase, then the will propose either chemical oxidation or enhanced bioremediation by injecting ORC. Reports are uploaded to eDocs. - JAM8/26/10 Reviewed 3rd Quarter Groundwater Monitoring Rpt submitted by P.W Grosser Consulting (PWGC) dated Aug 23, 2010. Groundwater monitoring was conducted on Aug 20, 2010. Total VOCs in well MW-2 decreased slightly from 3,319 ug/L in May 2010 to 3,027 ug/L in Aug 2010. Wells MW-1 and MW-3 showed increase in MTBE with concentrations of 35 ug/L and 373 ug/L, resp. Well MW-4, which is located directly down-gradient of well MW-2, had ND levels of VOCs. PWG recommend continuing groundwater sampling. Reports are uploaded to eDocs. - JAM12/03/10: This spill case transferred from J. Maisonave to J. Kolleeny. Changed spill priority rank to P2, since GW monitoring is being performed. Received hard copy of 4th Quarter 2010 GW Mon Rpt by PW Grosser, dated 11/30/10; sent an email to Zeb Youngman of PWG requesting pdf file of rpt; he sent pdf file by email same day, in eDocs. Will review. - JK01/04/11: Reviewed GW Monitoring Rpt - Fourth Quarter 2010 by PW Grosser Consulting, dated 11/30/10, received 12/3/10 (in eDocs). Rpt presents results of Nov. 2010 GW sampling event showing decreases in contam in several wells: MW-2 had total VOCs of 1,203 ug/L, down from 3,027 ug/L in Aug. 2010; MW-3 had 286 ug/L tVOCs, down from 373 ug/L in Aug. 2010; MW-1 had 25 ug/L tVOCs, down from 35 ug/L in Aug. 2010. Well down-gradient of worst well (MW-2), MW-4, had only minor exceedance for xylene (6 ug/L). PW Grosser recommends spill closure.

I sent letter (in eDocs) to Mr. Russell Cascardo (Fleetrecovery@yahoo.com), cc to Zeb Youngman of PW Grosser, saying spill cannot be closed yet, requesting one or two more sampling events of wells MW-2 and MW-4 to confirm downward trend toward levels acceptable for closure. - JK03/01/11: Reviewed GW Monitoring Rpt - 1st Quarter 2011 by PW Grosser Consulting, dated 2/22/11 (in eDocs). Rpt presents results of GW samples collected on 2/16/11 from wells MW-2 and MW-4, as requested in my 1/4/11 letter. Data show MW-2 had 1,193 ug/L total VOCs, down slightly from 1,203 ug/L in Nov. 2010; MW-4 was ND. PW Grosser notes that contam is not migrating off-site, and requests spill closure. I sent email (in eDocs) to Mr. Russell Cascardo, cc to Zeb Youngman of PW Grosser, stating that although contam levels appear stable and not migrating, overall levels are too high for spill closure; said DEC requires that GW monitoring (i.e., sampling of MW-2 & MW-4, gauging of all wells) continue until contam levels decrease toward concentrations appropriate for spill closure, and said if contam does not decline further by natural attenuation, some remedial action may be needed. - J. Kolleeny06/01/11: Received & reviewed GW Monitoring Rpt - 2nd Quarter 2011 by PW Grosser Consulting, dated 5/31/11 (in eDocs). Rpt presents results of GW gauging/sampling on 5/23/11, showing increases in contam in wells MW-2 and MW-3: MW-2 had 2,462 ug/L total VOCs (up from 1,193 ug/L in Feb. 2011) and MW-3 had 769 ug/L tVOCs (up from 286 ug/L when last sampled in Nov. 2010). PW Grosser recommended continued quarterly monitoring of wells MW-2 & MW-4 to document decreasing trend in VOC concentrations and obtain spill closure. I sent email (in eDocs) to RP, Russell Cascardo, stating that quarterly gauging of all 4 site wells and quarterly sampling of MW-2, MW-3 and MW-4, should continue, noting that fluctuating VOC levels may indicate presence of residual soil contam acting as ongoing source, and that if VOC levels remain elevated or increase, remedial action may be needed to move spill toward closure. - JK12/09/11: Sent email to Zeb Youngman of PW Grosser: "Hi Zeb, I was wondering if you have any updated information regarding this spill site? Was 3rd quarter 2011 GW sampling performed? Please let me know." Zeb sent reply: "3rd quarter was not performed. I had spoken to property owner in July about potential chemox/ORC injections to close spill file. He told me to hold off on everything." I then sent email to Mr. Russell Cascardo of Fleet Recovery (RP), cc to Zeb Youngman: "Dear Mr. Cascardo: In reviewing my files, I realized that I have not received a monitoring rpt for 3rd quarter of 2011 for this spill site. I contacted consultant who had been working on this project (P.W. Grosser) and was informed that all work at site has been discontinued, at your direction. As I explained in email below, sent on June 1, 2011, latest available GW data for site show levels of dissolved contamination that are too high for spill closure, and data over last several sampling events do not demonstrate a clear downward trend in contaminant levels indicative of ongoing natural attenuation processes that might bring about timely spill closure. Addt'l GW monitoring is required, and if contaminant levels do not decrease, remedial actions may be necessary to expedite cleanup of spill case. DEC requires that GW monitoring (sampling and gauging of wells) resume immediately and that a rpt with up-to-date GW quality data be submitted by no later than Jan. 13, 2012. Rpt should include recommendations for further action as appropriate, based on data. Failure to comply with this requirement may result in referral of this spill case to our Office of General Counsel to initiate an enforcement action. Please confirm your

receipt of this email, and feel free to contact me if you have any questions." Later that day, received email from RP, Russell Cascardo: "Thank you for update, there must be a mix up, I never told anyone at that company to stop testing, I will notify them on Monday to start testing again, thank you. - JK12/13/11: Received email from Zeb Youngman of P.W. Grosser: "Jon, I have spoke with Mr. Cascardo and there had been some miscommunication on my end. We will resume monitoring program immediately." - J. Kolleeny01/09/12: On 1/3/12, received email from Derek Ersbak of P.W. Grosser with attached pdf file of GW Monitoring Rpt for December 2011 (in eDocs). December 2011 GW data show total VOCs in well MW-2 decreased from 2,462 ug/L in May 2011 to 1,246 ug/L. GW flow map shows more northerly flow direction than previous rpts, which showed GW flow to NW. Rpt recommends spill closure. I sent email to Zeb Youngman of P.W. Grosser, cc's to Russell Cascardo of Fleet Recovery (RP) and Derek Ersbak of P.W. Grosser: "I've looked over GW Monitoring Rpt for Dec. 2011 for this site. Rpt notes that total VOCs in well MW-2 (only well with significant residual GW impacts) decreased from 2,462 ug/L in May 2011 to 1,246 ug/L in Dec. 2011. Rpt says that based on "continuing downward trend" of VOCs in MW-2 and fact that there are no impacts in down-gradient well MW-4, P.W. Grosser recommends spill closure. I am glad to see decrease in well MW-2, but I don't agree that this represents "continuing downward trend." It's true that Dec. 2011 result was lower than May 2011 result, but samples for two events before May 2011 event, collected in Nov. 2010 and Feb. 2011, both had total VOCs of ~1,200 ug/L. In fact, latest result of 1,246 ug/L (Dec. 2011) can be seen as return to levels seen in Nov. 2009, when total VOCs in MW-2 were 1,250 ug/L. In other words, it seems to me that contamination in MW-2 has "plateau-ed" at ~1,200 ug/L, with occasional spikes up to 2,000-3,000 ug/L. I consider total VOCs of 1,200 ug/L to be too high to consider spill closure, especially in absence of clear downward trend. Also, GW flow contours for latest sampling event do not show MW-4 as being directly down-gradient of MW-2, but suggest potential gap in down-gradient well coverage, since MW-4 is northwest of MW-2 but latest contours indicate GW flow more directly to north. I have following suggestions for helping to move this spill case toward closure: 1. For next sampling event, re-develop well MW-2 before collecting samples and see if result is lower. 2. Apply chemical oxidant to area of MW-2 using several temporary injection points advanced immediately up-gradient of well, and continue GW monitoring to see if there is improvement. 3. Excavate well MW-2 and soil in its immediate vicinity (with collection of post-ex end-point soil samples), to remove potential residual soil contam which is keeping VOC levels in that well elevated, then backfill area, replace well and conduct follow-up monitoring to see if there is improvement. It's my understanding that, although significant amount of contam soil was dug out at time of UST removal at site, GW contam was observed during tank pull (sheen and odors), but no actual GW remediation has been performed to date. Therefore, it may be appropriate to consider implementing suggestion 2 or 3. Of course, I am open to other remedial recommendations you might have. Feel free to contact me with any questions or comments." - J. Kolleeny03/26/12: On 3/20/12, received CD with GW Mon Rpt for March 2012 by P.W. Grosser Consulting, Inc., dated 3/19/12 (in eDocs). Rpt presents GW data for 3/2/12 sampling event, plus historical data. March 2012 results show contaminant levels in worst well, MW-2, decreased significantly, with 254 ug/L

total VOCs (down from 1,246 ug/L in Dec. 2011). Well MW-3 had 173 ug/L tVOCs (up from ND in Dec. 2011, but below 769 ug/L in May 2011 and 286 ug/L in Nov. 2010. Down-gradient well MW-4 was ND, consistent with earlier rounds showing ND or only traces of VOCs. PW Grosser concludes that GW contam is not migrating off-site and will naturally degrade over time. They recommend one more round of GW sampling in June 2012 to confirm that contaminant levels are remaining stable and confined to site, and suggest that request for spill closure be reconsidered based on results of June 2012 sampling. On 3/26/12, I sent email (in eDocs) to RP, Russell Cascardo, cc's to Derek Ersbak, James Rhodes and Bryan Devaux of PW Grosser, agreeing with this recommendation. - J. Kolleeny06/20/12: Reviewed GW Monitoring Rpt - June 2012 by P.W. Grosser Consulting, Inc., dated 6/18/12 (in eDocs). Rpt presents results of GW sampling performed on 6/5/12, plus historical GW sampling data. Worst well, MW-2, had 1,230 ug/L total VOCs, up from 245 ug/L in March 2012 but consistent with Dec. 2011 result of 1,246 ug/L tVOCs. Well MW-3 had 14 ug/L MTBE, down from 173 ug/L MTBE in March 2012. Down-gradient well MW-4 was ND. PW Grosser concludes that residual contam is not migrating off site, contam has decreased from higher levels found when wells were first installed & sampled, and residual contam will naturally degrade over time. In addition, down-gradient properties are manufacturing-industrial, not residential - no schools, hospitals, day care ctrs, etc. Based on all these factors, PW Grosser recommends spill closure. I discussed with my supervisor Vadim Brevdo, and decided to close spill case. Issued spill closure letter (in eDocs) to RP Russell Cascardo, with cc's to Derek Ersbak, James Rhodes and Bryan Devaux of PW Grosser. - J. Kolleeny

Remarks: CALLER STATES THERE IS A FORMER GASOLINE STATION AND NOW IT IS DISCOVERED THAT THERE IS GAS LEAK FROM ONE OF THE TANKS. 20 YDS OF SOIL HAVE BEEN STOCK PILED SO FAR. ALL SOIL IS GOING TO BE REMOVED

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"reference spill #0111289E2MIS NO. 139-268:M. ROSA # 58652 SSO GOWANUS S.S. 27 ST & 3 AVE REPORTS WHILE MAKING INSPECTION OF C.P. (COOLING PLANT # 4 ON HI-FDR. 42) HE FOUND APPROX 4 OZ UNKNOWN OIL (IT IS POSSIBLE OIL COULD HAVE COME FROM THE COOLING PLANT SYSTEM) ON 150 GALLONS WATER. OIL AND WATER IS CONTAINED TO MOAT ON SOIL & BLUE STONE IN STATION. THERE WAS NO SIGNS OF FIRE OR SMOKE. NO PRIVATE PROPERTY AFFECTED. LIQUID IS CONTAINED, NO SEWERS OR WATERWAYS AFFECTED. SINCE THEY DID NOT SEE WHERE OIL CAME FROM AT THIS TIME, THEY CALL FOR CHEM LAB TO COME TO LOCATION AND TAKE A LIQUID SAMPLE AND REQUEST A EMERG PRIORITY FOR PCB SAMPLE RESULTS. CHEM LAB WILL GIVE US A CHAIN OF CUSTODY NUMBER. CLEANUP PENDING SAMPLE RESULTS. HE PLACED E.S.TAG # 048-0199.UPDATE - 05-SEP-2001 09:52 HRS. LSN# 01-08790, SAMPLE TYPE: OIL, AROCLOR: 1260, RESULT: < 1. PPM.10/22/01 17:52As per the clean up supervisor P. Vieira # 16791, clean harbors came in on 09/04/01 from 07:10 to 23:00 and removed/recovered any liquid/solids, also removed all traces of visible oils. The solid/liquid waste was vacuumed out, cleaned and any additional liquid was removed again. The waste generated was solid and approximately 150 gallons. The operator noticed approximately 4 oz of oil in 150 gallons of water which was contained in the moat.04/23/02Under maximo work order 0000126713 the source of the, the water leak, was repaired by replacing the float device. This also covers incident # 139228 which was called in on aug 31,2002 and pertains to the same incident. The incident may be closed.17-JUN-2002.Mary Moran, Area Planner, reports during inspection, historic contamination was found at C4. The flooring consists of a welded metal plate over a sub floor-however. Soiled bluestone was recently removed, however marriage roll is in place on bluestone and 2 small pools are in place underneath pumps. This plant is not known to have a concrete moat. The substance is unknown, however it is likely to be identified as dielectric fluid. The source of contamination is unknown. The cause of contamination is unknown. A station remediation plan will be prepared to determine the priority order for addressing this and other historic incidents as per SSO's letter to NYSDEC region II dated February 20, 2002. Housekeeping and maintenance activities, as required, will be documented.8/26/02The June 17, 2002 update above will be transferred to e2mis incident # 141551 - due to the fact that the DEC officially closed this incident

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "ZHITOMIRSKY" Former Valid site. PBS # 2-604841. SPILL CASE TRANSFERRED TO I. ISLAM6/1/05- SSIP and Addendum to SSIP were submitted by Ballard Engg. back in 1998. Soil samples from soil borings (mostly within 4' bgs) exceeded NYSDEC guidance values for VOCs, SVOCs and some TCLP metals, and Ballard Engg. recommended for installing three GW monitoring wells around the tank field as well. Subsequently, Shaw Env'tl. & PMS Costn. Mgmt. took over the site and reviewed the DDC files under FOIL request in Jan/05. In a letter, dt. May 25/05 Shaw Env'tl. stated the site history from FOIL review, requested DDC for a copy of SSIP prepared by Ballard Engg. and concluded for a site inspection, installation of monitoring wells, gauging the wells, monitoring for free-phase and sampling for the TAGM 4046 target list of VOCs and SVOCs. In fact, Shaw Env'tl. & PMS so far did nothing physically at this site. However, talked to Mr. Jerry Aliberti, Proj. Mgr. at NYCDDC and advised for resuming further investigation at the site for both soil and GW in the light of Ballard's recommendation asap.- II.07/31/06: Transferred to S.Kraszewski. - SK10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. - JAM11-10-2010 The spill was transferred from J. Maisonave to Alex Zhitomirsky, as per V. Brevdo/J. Kolleeny. AZ10-20-2011 Reviewed Site Specific Investigation Plan submitted in Septemebr 2011. The plan suggested installation of 3 monitoring wells and 3 monitoring norings. The following e-mail was sent to S. Frank, V. Brevdo and F. Ashkan: "Dear Steve,I have reviewed the Site Specific Investigation Plan (SSIP) for this site submitted in September 2011. The following changes should be made in the plan:1. All borings should be finished as wells.2. Borings should be advanced near fuel dispensers, fill ports and lines.3. Existing tank inventory should match the existing PBS records. If there are any discrepancies they should be corrected. Correct information should be submitted to the DEC PBS Section.3. If contamination is found, LiRo should study the feasibility of the tanks removal.Modified SSIP should be implemented without delay.The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work."3-20-2013 The following e-mail was sent to S. Frank/V. Brevdo/F. Ashkan:"Dear Steve,I have reviewed an investigation summary report dated November 29, 2012. The report stated that six soil borings were completed as wells at the site. Soil sample results indicated no exceedances. One of the six groundwater samples reported p-Isopropyltoluene of 28 ppb, above the criteria of 5 ppb for this compound. Based on results of the soil and groundwater sampling, LiRo recommended closure of this spill number.Based on this information, spill number 9701133 is closed. All wells associated with these spills should be properly abandoned. Prior to the abandonment all wells should be checked for presence of free phase product.The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or

remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval. III. Information received, in whole or in part, after the Department's spill case closure, which indicates that the corrective action was not sufficiently protective of human health for the reasonably anticipated use(s) of the site; or IV. Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department's files regarding this release may not be maintained indefinitely. Sincerely, Alexander Zhitomirsky

Remarks: FOUND CONTAMINATED SOIL WHEN REMOVING A TANK. 20 YDS OF SOIL HAS BEEN REMOVED SO FAR.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 05/24/06-Hiralkumar Patel. Visited site on 05/23/06. Spoke to Nick. they have three large barge which in use to store fuel oil and have capacity of one million gal each. and during winter time, to prevent clogging they run oil into recirculating lines and since 2003 these lines were not being used. somehow one of this recirculating line got oil in it and leaked outside. site has permanent boom in water covring boundries. they put another boom outside of this permanent boom for precaution as this event happened. all contained. observed little sheen on water. as per Nick, initial there was 2'* 8' sheen on water. spoke to emergency responder, who put boom around area. he hasn't noticed any sheen or free product in other part of area or outside the preliminary boom.Received email from DEC Jane H. O'Connell. he got email from James Gregory from Gowanus Bay.

-----Gowanus
& Narrows Generating Stations29th Street and 2nd AvenueP.O. Box 658Brooklyn, NY 11232Phone: (718) 499-1301Fax: (718) 499-6537Initial Incident Report, Gowanus Generating StationThis morning, we were performing the annual hydrostatic testing at Gowanus Generating Station. The testing started at approx 9:30 A.M. At 10:40 AM, a leak developed on the 8 inch recirculation piping segment that is directly in front of power barge GOWANUS BAY #3, near the gangway. This line is approximately 40 ft long and was out of service. The leak is located midway on the bottom of the piping that goes under the dock. This leak was timed, and approximately 3-5 gallons of distillate that could have entered the water. (It was reported as such.)A vacuum truck was ordered to evacuate the line. Absorbent materials were placed in the area adjacent to the leak. This is inside the permanent perimeter boom that is installed around the entire site. The evidence of the leak was contained and removed from the area inside the absorbent material that was immediately placed on the water. There was no evidence that any oil left the site.At this time, this piping section is being blanked off and removed. It is no longer being used for operations. It will not be replaced. Oil migrated into the line

since the last test. Nitrogen used to charge the line induced the leak. The single isolation valves on both ends did not hold. This line was inspected and vacuumed free of oil in 2003. All agencies have been notified. We are working with Andy Oliver to notify the Insurance carrier. This event was reported as a Category 1 event. Agency response as of 3:00 PM: Call from USCG Sector NY Response Section. PO Callejas requested an incident report. Response sent via FAX at 3:20 PM. Representative from the NYSDEC Region 2 arrived on site about 3:05 PM. Environmental Engineer Hiralkumar Patel inspected the area of concern. He said he was well satisfied and left about 3:15 PM. Submitted, Joseph Vazquez Operations Manager Office 718 499 6368 Fax 718 499 6537 -----no

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name: DOROTHY
Contact Phone: Not reported
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was
"TIBBE"12-14" PIECE OF PIPE. WATER SEEPS INTO BUILDING WHEN IT RAINS.
APPARENTLY TIED INTO SEWER LINE.DOROTHY IS REQUESTING A
CALL-BACKFAXED TO DEP.FROM DEP FAR DIRECTION ON WHAT SHE SHOULD
DO.NOT A SPILL.
Remarks: CALLER DISCOVERED WATER COMING UP THRU GROUND NEAR BUILDING - THEY
RENTED SOME SORT OF APPARATUS TO DIG AND FOUND A LARGE PIPE SHE
BELIEVES TO BE SEWER - BUT SHE HAS NO INTENTION OF CALLING A PLUMBER
TO FIX LEAK.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Phone: (516) 221-7500
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 147618
DEC Memo: 8/15/05 - Haggerty - spoke with Kathy from Soil Mechanics (516)-221-7500 on 7/15/05. She is trying to locate the file and will call back when and if she does. All other contact info is outdated. ----requires additional info, site visit11/22/05, SA: No PBS record found. Can not find the property records in the property shark. Address found on google. Talked to Kathy, she told me that as far she remember this spill has been closed by DEC. She will fax me a copy if found.12/19/2005: No record found in remediation database. Spill remains open. Need to find the owner. (Sadique) 01/04/2006: As per property shark present owner is Costco Wholesale Corp. The property have multiple alternate address. (Sadique)02/15/06 - DEC lead changed to Grathwol. Performed site visit. Davidson Pipe Supply is no longer at this address. Tenant spoke to me on the phone and gave me permission to inspect the basement of his new business. No oil fumes, basement refinished. Business is on gas heat. New slab floor, no oil stains on walls or floor. Floor drain had water in it, no oil product or sheen. New business: K.C. Products, Ltd. (Kitchen counters, moulding, etc.)

Remarks: COMPLAINANTS COMPANY WAS CONTRACTED TO REMOVED THREE TANKS OUT OF THE GROUND AND TWO TANKS WERE DISCOVERED TO HAVE BEEN LEAKING FOR AN UNDETERMINED AMOUNT OF TIME,BOTH TANKS HELD 4,000 GALS - TANKS HAVE BEEN REMOVED FROM THE GROUND AND CLEAN UP WILL BEGIN TOMORROW

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con Ed e2mis Notes:7/10/00 On location to remove transformer. 1gal unknown oil on 150gal water. Historical records from 4/24/99 show 46ppm PCB. Pressure testing. Transformer does not hold pressure and is below minimum. Cleanup to be done as 50-499ppm. Transformer reads 445gal. Tanker pumped 455gal.Water is entering V2905 from adjacent vault V3471 from a hole at bottom of structure which had been capped but came off.Sample returned 66ppm PCB. Found a drain in structure. No signs of oil in drain. Cemented drain.Cleanup completed by double washing with slix. Liquids removed by tanker, solids by barrels. Leaking transformer was removed.

Remarks: CALLER REPORTING A SPILL OF MATERIAL FROM AN UNK SOURCE CONED#132283 SAMPLES TAKEN CLEAN UP PENDING LAB RESULTS NO CALLBACK NECESSARY ON 150 GAL OF WATER

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

COSTCO WHOLESALE #318 (Continued)

1001124762

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075
Waste name: NICOTINE, & SALTS

Violation Status: No violations found

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110000763521

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name: Not reported
Contact Phone: Not reported
DEC Memo: also know as 850 3rd Ave. see also 93-12153 & 94-07229. unable to reach a GSA contact. Possible remediation under 94-07229. Previous note by RDDECAND on 3/15/06 Spill transferred back to R-23/5/08 - Austin - Assigned to Ketani for further investigation - end 3/13/08 - Raphael Ketani. I began working on the case. Spill number 93-12153 was monitored by a former spills worker, Kerri O'Dowd. She didn't put in any case notes into the database. The spill was a 200 gal. overfill. It happened because someone had the wrong tank size. DEP was contacted at 10:30AM and GSA arrived at 2:15PM. Sand and Speedi Dri were applied to the spill. The case was closed on 1/15/94. The site address is 850 3rd Avenue, Brklyn. (29 St. & 3rd Ave.). Case 94-07229 was managed by Kerri O'Dowd. There were no case notes. Contaminated soil was discovered and was being removed as it was being excavated. She closed the case on 3/29/95. 3/17/08 - Raphael Ketani. A copy of the original August 1993 Site Characterization Report was found in the file cabinet. It was produced by Woodward-Clyde Consultants, Inc. It was prepared for Rose, Beaton & Rose, Architects and Engineers, 81 Main Street, Brooklyn (212) 926-2878/(212) 594-2118. According to the soil analytical tables in the report, there was no significant contamination. Table 4-2 for the groundwater samples didn't list any significant contamination, either. There was a fold out site map which showed the locations of the six formerly active tanks. The PBS case is #2-601672. It shows that six tanks were closed in place on either 8/1/94 or 9/1/94. Four other tanks were installed on 9/1/94. Tank #7 is in service and tanks #8 to #10 are temporarily out of service. A note in the file that I did find said that there were records in the open file section of the storage area downstairs. I checked the file storage room, but found nothing. I also asked around in the Division of Environmental Remediation, but no one had heard of the case for the site. I checked the E-docs and found the following: The E-docs contained a transmittal letter dated 8/10/93 stating that this was the second revision of the Site Characterization Report. An estimated 2050 cu. yds of soil will be excavated and an additional 450 cu. yds. of oil contaminated soil. Tanks #3 and #4 are scheduled to be removed, along with an 1100 gal. tank. Two 20,000 gal. tanks will be abandoned in place. Groundwater remediation is not necessary based upon the analytical results. A second round of groundwater sampling will take place August 1993. The parties involved are: Woodward-Clyde Consultants (212) 594-2118 Roy Feinzig (914) 682-4895, Rose, Beaton & Rose, Architects and Engineers, 81 Main Street, White Plains, NY, 10601 Charles Evans (718) 330-7474, Federal Building Manager, General Services Administration, Public Buildings Service, Contract Section, 26 Federal Plaza, rm. 1611, NY, 10278; GSOWP94CUC0055 A 10/4/93 E-doc note from Ms. O'Dowd states that they will install 3 new USTs. There are 6 USTs on site: 5 fuel oil (4 20,000 gal. tanks, 1 1100 gal. tank); 1 20,000 gal. gas tank. Groundwater is at 5.5' to 8.5' below grade. Nine soil borings will be done and 5 monitoring wells will be installed. MW-3G is in the area for the new UST. Groundwater is at 6' and dewatering will have to take place in order to install the new tank. USTs #3 and #4 are impacted. Fuel contaminated soil will have to be removed. A 8/9/93 E-doc note from Ms. O'Dowd states that MW-1 has no VOC hits MW-2 has less than 5 ppb MW-3G has hexane 5.8 ppb, ethylbenzene <50 ppb, xylene ,50 ppb MW-6 has 3 ppb of hexane MW-9 has no VOCs There was a 10/18/94 letter from Environmental Data

U001842028

Consultants to the GSA requesting well installation locations and regarding the NYCFD and NYC Building Department violations. Environmental Data Consultants, Inc., 55 Alder Street, Ste 2, South Yonkers, NY, 10701, (914) 968-1508. Dewatering took place to install the new tanks, but a SPDES permit wasn't needed as the discharge rate was below the permit lower limit and the water wasn't contaminated. Soil samples need to be taken at all of the closed tanks and the PBS record needs to be updated. The 9/6/94 E-doc note states that there is 2" to 3" of oil in MW-3G. USTs #3 to #5 are to be removed. Wells MW-3 and MW-6 need to be replaced as they were destroyed. Many of the hits in Table 1 of the analyses summary table also appear in the blanks. So these analytes can be negated. I tried to contact Charles Evans, but the phone number was not in service. I tried to reach Environmental Data Consultants, but the phone number was not in service. I tried to reach Rose, Beaton & Rose, but the phone number belonged to another company. I tried to reach Woodward-Clyde, but the phone number belonged to another company. 3/18/08 - Raphael Ketani. I found a later case from 1999 for the same site - #9908767. It involves the test failure of three 30,000 gal. tanks. Contact people were listed on the spill report. They are: Steve Ferman (718) 340-5268, at the site; John Harris (718) 965-5147 of the General Services Administration; and Tom Burke (212) 264-0800 of the General Services Administration, Technical Services, 26 Federal Plaza, rm. 1611, NY. I tried to contact Mr. Burke, but could only leave a message. I tried to contact Mr. Harris, but no one picked up. I tried to contact Mr. Ferman, but the number was no longer in service. William (Bill) De Nyse (de-nice), Senior Industrial Hygienist, (212) 264-0506 called to ask what DEC had in the way of reports and documentation for the spill case. I told him we had the August 1993 Site Characterization Report that was produced by Woodward-Clyde, a Second Revision SCR and some small letters. He asked that DEC provide him the reports as he doesn't have them. He added that he was the contact person at the GSA and that he will try to help get the case closed. Mr. De Nyse asked what should happen if he can't find the closure reports. I told him that DEC will ask that a new investigation take place. I made copies of the reports and sent them to him. 4/11/08 - Raphael Ketani. I tried to contact Mr. De Nyse, but could only leave a message. His phone greeting said that he will be out until 4/21/08. I will try him then. 6/10/08 - Raphael Ketani. I tried to contact Mr. De Nyse, but could only leave a message. I got ahold of Mr. Burke. He said that right now they are putting the contract out for bid. He said it will take some time in order to get a contractor lined up and get the investigation started. I told him to keep me updated. He added that Mr. De Nyse is the point of contact. 6/12/08 - Raphael Ketani. Mr. De Nyse called back. He said he is the regional engineer and the project is now being handled by a field (local) engineer at the site. The person is Rashid Mattoo (718) 254-7141 at 10 Metro Tech, Brklyn. Mr. De Nyse said that Mr. Mattoo is the contact person from now on. He added that right now they are trying to get funding to do the investigation. They have a scope of work, also. 8/12/08 - Raphael Ketani. I tried to contact Mr. Mattoo regarding the site investigation, but could only leave a message. Mr. Burke called me back. He said that the contractor has been chosen and they expect to go to contract next week. He added that they will start in a week or two. 8/18/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. The new case manager should probably call Mr. Mattoo or Mr. De Nyse in a

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TO STRUCTURE. TOOK SAMPLE. CLEANUP PENDING RESULTS. PLACED
ENVIROMENTAL STOP TAG # 40669. THIS IS ON THE COMPANY'S 24 HOUR
DIMINIMIS PROGRAM. CHAIN OF CUSTODY # IS DD18520.Update. THE
TRANSFORMER FAILED THE PRESSURE TEST AND IS LEAKING FROM THE BOTTOM .
THE OIL IN THE STRUCTURE CAME FROM THE TRANSFORMER. ROSADO WILL KEEP
THE CREW ON LOCATION UNTIL THE TANKER ARRIVES TO DRAIN THE STRUCTURE
AND THE UNIT. TRANSFORMER TO BE REPLACED BEFORE THE FINAL CLEANUP.
ALSO DUE TO TRANSFORMER BEING REPLACED, THIS INCIDENT WILL BE TAKEN
OFF THE 24 HOUR PROGRAM DUE TO TIME CONSTRAINTS.Lab Sequence Number:
04-07334-001: TOTAL PCB 20 ppmUPDATE 9/16/04 02:33 HRS ENV OPS A.
GLODOWSKI REPORTS AN UNDER 50 TANKER REMOVED 500 GAL OF LIQUID, THE
STRUCTURE WAS DOUBLE WASHED WITH BULLDOG, ALL DEBRIS PICKED UP WITH
THE VACTOR, NO SUMPS WERE FOUND, ENV TAG LEFT IN PLACE PENDING
REMOVAL OF UNIT. UPDATE 16-SEP-2004 09:45 HRS.BQ&E SPLICER
W.THORNGREN EMP# 14916 REPORTS: ASTORIA TANKER REMOVED 685 GAL'S OF
LIQUID FROM UNIT. UNIT CAPACITY IS LISTED AS 575 GAL'S THEREFORE 110
GAL'S OVER UNIT CAPACITY WAS REMOVED FROM UNIT. MR.THORNGREN BELIEVES
THE UNIT-CONTAINED WATER DUE TO THE HOLE IN THE UNIT.UPDATE
16-SEP-2004 17:05 HRS.ENVIR. OPER J.DELAROSA EMP# 19655 REPORTS:
NETWORKS REMOVED UNIT FROM STRUCTURE. DBL. WASHED STRUCTURE WITH
BIO-GEN 760 & BLUE SOAP. NO SUMP IN STRUCTURE. ENVIR. TAG# 40669
REMOVED. CLEANUP COMPLETE 100%.
Remarks: 1 GALLON LEAKING FROM TRANSFORMER INVULT. CLEAN UP PENDING. NO
WATERWAYS AFFECTED. e2MIS # 155376.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 08/15/06 - See e-docs for Con Ed report detailing cleanup and closure. Secondary incident to sp 0602005 feeder leak. Contractor tanker truck with load of cable oil from feeder leak went to Gowanus Substation to pump out sheen and water from manhole. Driver accidentally hit backpressure lever while hose was in manhole, releasing contents of tanker into manhole. Contained in manhole. Even though there is generator knowledge that there are no PCBs in the cable oil, they will test anyway since the condition of the tanker is unknown. See e-docs for additional info. (JHO)

Remarks: CLEAN UP IS PENDING SAMPLE RESULTS. CONTAINED TO MANHOLE. NO TO FIVE QUESTIONS. 200209

Contact telephone: (212) 460-3770

Contact email: Not reported

EPA Region: 02

Classification: Non-Generator

Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No

Mixed waste (haz. and radioactive): No

Recycler of hazardous waste: No

Transporter of hazardous waste: No

Treater, storer or disposer of HW: No

Underground injection activity: No

On-site burner exemption: No

Furnace exemption: No

Used oil fuel burner: No

Used oil processor: No

User oil refiner: No

Used oil fuel marketer to burner: No

Used oil Specification marketer: No

Used oil transfer facility: No

Used oil transporter: No

Historical Generators:

Date form received by agency: 02/27/1998

Facility name: CON ED - TM 846

Classification: Not a generator, verified

Date form received by agency: 02/26/1998

Facility name: CON ED - TM 846

Classification: Large Quantity Generator

"FOLEY"~~~~~e2mis no. 138131:7-10-01 16:45HRS G.
GIARRA (SSO) REPORTS, FOUND APPROX 50 GALLONS OF TRANSFORMER OIL ON
PAD AND BLUESTONE FROM IN THE INSIDE OF OF A NITRO CABINET OF
TRANSFORMER #2. THIS SEEMS TO BE A ON GOING PROBLEM FROM THE PAST
EVERY TIME IT GETS HOT. SAMPLE WILL BE TAKEN BY CHEMIST AND WILL CALL
BACK WITH THAT INFORMATION AND TAG INFORMATION ON NEXT UPDATE. AT
THIS TIME DIAPERSARE PLACED AND IS STILL BAGGED UP FROM LAST
INCIDENT, WHICH HAS A HOLE IN IT. CLEANUP PENDING LAB SAMPLES.UPDATE
@ 1812 HRS 7/10/01 RECEIVED LATEST SAMPLE TEST SEQ# 00-09143 CAME
BACK AT <1PPM PCB & HISTORICAL SEQ396-06271 @ <1ppm.7/27/01 13:41 As
per T. Hunter repairs were done by moving the nitro line from the
vacuum brace to the top of selector compartment. The incident may be
closed.4-30-02 Information obtained from the station drum log
indicates that 7 drums of oily bluestone was removed as part of the
cleanup. Cleanup was conducted and completed the same day of the
spill by M Samanka # 10479 & O. Benjamin 87168 they removed all
visible traces of oil, washed stained areas and excavated
contaminated soil/bluestone.6/26/02 13:52 As per maximo work order #
0000120284, TR2 OIL LEAKING FROM N2 CABINET ,N2 LINE. After this leak
the nitro line was reconfigured and the nitro cabinet was rebuilt to
avoid anymore leaks of this nature. The clean up process was as
follows. Drums were generated and removed. The pad inside and out
side of the transformer shell was pressure washed by Allstate
Environmental.

DEC Memo: 10/15/08 A. Nagi received message from Nicholas of USPG.
(516)790-0323. He requested call back regarding the spill. I called him back this morning. He wants to email spill clean-up documents to A. Nagi as he already had his email, but wanted to be sure it was the correct place to send. I told him that would be ok and that the spill may be reassigned. bf 12/19/08 - Austin - Received final EMIS, and spill reported as contained and cleaned up - closed - end

Remarks: CALLER STATES THAT 20 GALLONS OF DIELECTRIC FLUID WAS SPILLED AND CONTAINED TO A MANHOLE, DUE TO A FEEDER MALFUNCTION. CLEAN UP IS PENDING.

inspection, equipment was found wrapped in pads and bagged. Pete Sudol(Substation Operations EH&S) indicated that it is in for repair. Foley requested a Maximo tag be placed on the valve. Foley also asked that the valve be monitored. Sudol indicated that the valve was found with one drip hanging off valve. Bluestone appeared clean. Foley told Joe Susco (EH&S Manager of SSO) that DEC would close this spill if Con Ed would monitor valve until permanent repairs were made.

Remarks: PACKING GLAND LEAKED - BLUESTONE ONLY

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"03/16/1999 mmm: INSPECTED STATION AS A RESULT OF CALL. FOUND NO EVIDENCE OF OIL DISCHARGE ONTO GROUND DUE TO POOR HOUSEKEEPING. SITE HAD 12x550 MOTOR FUEL TANKS REMOVED IN 95. WILL ASK FOR SITE ASSESSMENT. CURRENT CONTROLS ON TANKS, HIGH LEVEL ALARM AND LEAK DETECTOR WERE OFF AND NOT FUNCTIONING DAY OF INSPECTION. 3/17/1999 mmm: CALLED CHEEMA RESIDENCE - LEFT MESSAGE. CHEEMA CALLED BACK - TOLD HIM LEAK DETECTOR, HIGH LEVEL AND STAGE II NOT WORKING AND ASKED HIM TO SEND ME A REPORT FOR TANK CLOSURES. CHEEMA STATED HE WOULD HAVE MAINTENANCE CO. TAKE CARE OF TANK PROBLEMS. COPY OF PBS INSPECTION GIVEN TO P. HUANG.1/2/2004 Reassigned from Mulqueen to Sun.12/16/2005 - Feng - Reassigned from Sun to Feng as per Sun. (RJF)10/30/06 Reassigned from Tang to Sun. (JS/MS)11/17/06 Sun sent Tank Closure Request letter certified mail to Gurpal Cheema (916 Lawrence Court) registered owner of station at 889 Third Ave, Brooklyn on 11/17/06, requiring the following to be received by December 17, 2006:1. Tank closure assessment report.2. Locations of tank and/or line test failure.3. Subsurface investigation report, including current and historical soil and groundwater analysis. 4. Surrounding property sketch: A surrounding property sketch including property layout and usage must be submitted to NYSDEC. (JS/MS) 2/8/07: As above letter was returned as unclaimed, a second letter was sent to site address, attention Mr. Lal Singh, requiring that the same as above be submitted by 3/23/07. (JS/MS) 6/4/07: Site visit by JS and MS done on 5/31/07. Above letter was hand delivered to gas attendant, and signature confirming receipt was obtained. On 6/4/07 contact was made with Gurpal Cheema (516)474-6030 (wife's name is Kora). Mr Cheema said that Gordon Supply performed tank closure and site assessment activities, including soil analysis. He will contact company and have them send report to DEC by 6/15/07. (JS/MS) 7/25/07: Contact established. Owner does not speak English and wife is currently looking for TCR documents. (JS/MS)8/29/07: MS called Kora, left message asking why documents had not been submitted and to call back DEC ASAP or legal action would be taken. (JS/MS)11/19/07: Gordon Supply supposedly visited site and will need additional visit before preparing a work plan. Cheema's cell# is 516.474.6030. (JS/MS)12/14/07: Gordon Supply supposedly just folded. MS faxed list

of recommended consultants to Cheema today at Fax# 516.782.0125.
(JS/MS)12/20/07: Tried faxing on 12/18,19,20/07. Fax number given is not working. MS left message with Cheema to call back asap.
(JS/MS)4/11/08: Called Kora, has list from MS, knows to let consultant know to contact DEC for details (JS/MM)7/7/08: No report received as of yet. 2nd TCR letter or refer to legal (JS/MM)08/05/08: Transferred to Kolleeny/Mandac. - JK10/15/08: Still no response. SIWP or SIR is overdue. Refer to OGC (JK/MM)01/07/09: Final letter for TCR or site assessment sent to Lal Singh via certified/return receipt mail. Refer to legal if documents are not received by 03/09/09.
(JK/KG)1/12/09: Return receipt for 1/7/09 letter rec'd (letter signed for on 1/9/09). (JK/KG)04/16/09: No documents rec'd. Called and spoke to Kora Cheema (516-474-6030). I told her the spill was still open and we have not received any documents. She thought the spill was closed. I told her we need a tank closure assessment report or a work plan for a subsurface investigation with soil and groundwater samples. She said the company that performed the tank closure is out of business and she would hire a company to do the investigation. I told her I would re-send the letter that was sent in January with the requirements. (JK/KG)4/20/09: Letter sent to Gurpal Cheema requiring a tank closure assessment report or subsurface investigation report be submitted. If such reports were not previously prepared a work plan for a soil and groundwater investigation must be submitted by 5/22/09. (JK/KG)05/11/09: Rec'd phone message from Kal Gil of EG&R Environmental on 5/8/09 (732-226-3201). Left message for him on 5/11/09. (JK/KG)05/20/09: Spoke to Kal Gil and he said he can't find any records indicating the location of the former tank grave. The owner has an idea of the location, but is not sure. He was sure that the current tanks are not in the same location as the tanks removed in 1995. I told him to conduct soil borings where they believe the former tanks were and at the perimeter of the property. Also, if the location of remote fill ports (if there were any) and dispenser islands is known, soil borings should be conducted in those locations as well. Kal Gil requested a two week extension to submit the work plan. The extension was granted and the new deadline is June 5, 2009.
(JK/KG) 06/16/09: Spoke to Gurpal Cheema and informed him that the work plan has not been submitted. He said he would call the consultant. (JK/KG)06/17/09: Kal Gil called and said the work plan would be submitted by 6/23/09. (JK/KG)07/02/09: Kal Gil called and said the work plan will be submitted today. (JK/KG)07/07/09: Rec'd pdf of Soil and Groundwater Investigation Work Plan dated 7/6/09. Under review. (JK/KG)07/13/09: Work Plan proposes installation of soil borings and temporary monitoring wells, collection of soil and groundwater samples, and submission of a summary report to NYSDEC. The work plan was approved with the following modifications. A groundwater sample should be collected at SB-7 and soil must be sampled continuously and screened with a PID. The soil sample with the highest PID reading and deepest dry sample should be submitted for laboratory analysis. An investigation summary report is due 9/18/09. (JK/KG)08/10/09: Kal Gil called and said site work had not been scheduled and was waiting for the RP to contact him to perform the investigation. Called Gurpal Cheema to remind him that the report was due next month and the work plan needs to be implemented. (JK/KG)09/03/09: Spoke to Kal Gil. He said he spoke to Cheema recently and is still waiting for the proposal to be signed before initiating any site work. (JK/KG)09/23/09: Spoke to Kal Gil and he said Cheema has signed the proposal and he needs to schedule the site

work. (JK/KG)09/30/09: Follow up with RP and Gil. The investigation report is past due. A request for an extension of the deadline should be submitted. (JK/KG)10/16/09: On 10/7/09, spoke with consultant Kal Gill, asked why investigation has not been performed yet, pointing out that summary rpt is long past due. He said he had to get approval from client, and then had difficulty getting driller. I asked him to send email explaining this and requesting deadline extension for summary rpt. On 10/8/09, received email from Kal: "As per our discussions yesterday, we have been trying to expedite field work at 889 3rd Ave., Brooklyn. We received approval from our client on Sept. 3, '09 to proceed with work. Immediately, we contacted drilling companies to arrange for soil borings. Because of highly urban nature of surroundings and presence of numerous subsurface utility lines and over hanging electricals, many drillers refused to conduct drilling. Finally, we have lined up a driller to proceed with soil borings. We have scheduled drilling for Oct. 9th, to conduct soil borings and GW sampling as per approved work plan. At this time, we anticipate that we will be able to submit RI report on or before Nov. 15th. As we discussed this morning, soil and GW samples will be analyzed for NYStars list gasoline and fuel oil including MTBE. Thank you for your cooperation." On 10/16/09, I sent email to RP Mr. Gurpal Cheema: "On Oct. 7, '09 I received an email from your consultant, EG & R Env'tl, explaining reasons why approved investig work plan for site has not yet been implemented and why required investig summary rpt was not submitted to NYSDEC by deadline of Sept. 18, '09. Your consultant Mr. Kal Gil requests an extension of deadline for submission of rpt until Nov, 15, '09. Request to extend deadline for submission of investig summary rpt is approved. New deadline is Nov. 15, '09. Please be advised that failure to comply with this deadline may result of referral of this spill case to our Office of General Counsel to initiate formal enforcement proceedings against you. Feel free to contact me if you have any questions." - J. Kolleeny11/03/2009: This spill case was transferred to A. Doronova. - AD12/17/2009: Summary report is due. Called and left a message to Mr. Gill. AD12/18/2009: Received a phone call from Mr. Gill. He told me that investigation was performed at the site, and that a summary report was prepared. The site owner did not review the report yet. Mr. Gill will call back on Tuesday December 22, 2009 regarding the report submission date. AD01/22/2010: Received an e-copy of the Soil and Groundwater Investigation report. DL to eDocs. AD02/02/2010: Received a hard copy of the report. Will review. AD04/14/2010: Reviewed the report. It states that investigation was performed at the site on October 9, 2009. EG&R advanced a total of seven soil borings around the former USTs field, followed by collection of soil samples. Fields PID readings were ND, so soil samples were collected just before the water table in each soil boring. None of the VOCs or SVOCs compounds analyzed were detected in any of the soil samples. Also, three GW samples were collected from the locations: SB-1, SB-4 and SB-7. Only Benzene was detected in SB-7 at a concentration of - 7 ppb. Because of very low concentration of Benzene on one sample and its biodegradability, EG&R recommend no further actions for this spill case. AD04/22/2010: Discussed closure of this spill with J. Kolleeny of DEC. Based on the data, in was decided that case should be closed. AD04/27/2010: Spill case is closed. AD
CALLER STATES GAS STATION IS VERY DIRTY - ALWAYS HAS OPEN BARRELLS OF OIL AND OIL IS ALWAYS SPILL ON PAVEMENT AND LEFT THERE. CALLER STATES WHEN IT RAINS, ITS VERY SLIPPERY DUE TO THE SPILLAGE BEING LEFT THERE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

8/11/06 - Bill Raven re-sampled the soil at the suspected contaminated area and the results show no TCLP Lead failure. Spill closed. - KST5/25/06 - Reviewed the sampling results from Hygenetics who is working for Mr. Bill Raven of Grainger (847)535-0661. According to the soil borings and analytical results, there is no petroleum release. However, there were 2 TCLP Lead failure. Told Mr. Raven that he needs to resample the 2 spots with the Lead failure, and hot spot removal might be needed. Mr. Raven said that Grainger has plan to expand the building to area of concern. They will be sampling the area again for TCLP Lead in the next month or two, and will be digging up the area within 3 months. Told him that if the next sample confirms Lead failure, he needs to consider the soil as haz. waste for excavation and disposal. - KST3/10/06, Dyber: Oversaw endpoint sampling at site. Next Step: Review Report when it

arrives.1/11/06, Dyber: Received work plan for endpoint samples from Hygienetics. Left message with Brendan Quealy (630-353-4480) to talk about TCLP test.11/2/05, Dyber: Bill Raven (847-535-0661) has asked Hygienetics to prepare a scope of work for taking endpoint samples.9/13/05, Dyber: Reviewed documentation from Grainger and spoke with Bill Raven. There was no documentation on endpoint sampling for the UST removal. Also, the other excavations may not have been deep enough to remove all of the contaminated soil.8/31/05, Dyber: Bill Raven called and said I will receive records next week.8/10/05, Dyber: Received message from Bill Raven at Grainger headquarters (847-535-0661). Left message for him.7/28/05, Dyber: Phil Laterza, Branch Manager, will try to find reports and get back to me.Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL C"3/11/03 - SAMUEL- File available in active unassigned spill files.04/12/04TRANSFERRED FROM ODOWD TO ROMMEL
500 yards of contaminated soil removed

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 02/20/08 - See eDocs for Con Ed report detailing cleanup and closure.9/26/07: e-mail to Con Ed (Pete Sudol): "Have you collected any samples to ID the material? What was the location of the trench (i.e., relative to what equipment, etc.)?" (JHO)10/2/07: Sudol called to give update/clarification. Crew was excavating to install a siamese connection and encountered stained soil with odor (no free product). They dug down about 4 to 5 feet to clean soil, but no post-excavation samples were collected. Sudol said excavation was still open - told him to collect post-exc samples. He will submit results with revised emis report. (JHO)10/15/07: Spill submitted for closure by Con Edison with no sample results. Request rejected, with following comment: "Final entry in Corrective Action section states 'As per request by J O'Connell of NYSDEC, post excavation samples for TPH will be taken of soil in open excavation where any discoloration of soil is present.' Were any samples collected? Results? (JHO)

MANHOLE 67422 (Continued)

S105235756

Remarks: the source at this time. Astoria tanker removed 1500gal liquids from structure. Clean Harbors cleaned structure by double washing. Liquids and solids were removed. PCB count 15ppm. Leak update: USi leak detection system showed 7.5gph on 10/30/01. USi contacted to review data and confirm. Flow meter and tank level readings being taken. USi called S&TE and confirmed that there was no leak. There was a modeling error due to the fact that fdr 26 was out of service on the weekend. The leak search was called off.

5 gals of product on 1500 gals water - sample taken clean up pending availability of tanker - con ed 140024 - no fire or smoke no sewers or waterways

DEC Memo:

10/11/11-Vought-Primary off-hours responder. This spill assigned to DEC Feroze as part of routine Con Edison minor spill portfolio review and possible closure. Initial EMIS #227683 deleted from proxy and downloaded into E-docs and entered into Cross Reference Field. EMIS noted that "oil leaked from a CCPD Unit wich was being demolished and was presumed to be empty...the unit is being bagged and the cleanup will begin".1/12/12 - Austin - 4 gals. of dielectric fluid leaked from unit - Other such units were drained to avoid further spillage, as the result of this demolition work - Con Ed contained and cleaned up the spill - See eDocs files for further details - Spill closed -

information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Memo: 06/29/07-Hiralkumar Patel. spoke with Mr. Stewart. asked him to send analytical data and site map with sampling locations. Mr. Stewart mentioned that bank hired them to do Phase II investigation as owner applied for refinance. during GPR survey they found concrete patch on site, but no underground anomalies. Mr. Stewart collected water sample from borings, but no monitoring wells installed at site. PBS #: 2-608193. site has one 250 gal waste oil AST. Paul P. Stewart, President Advanced Cleaniup Technologies, Inc. Ph, (631) 293-4992 Ext. 12 Fax (631) 293-4986 email: PaulStewart@advancedcleanuptech.com received soil/groundwater analytical data with site map from Mr. Stewart. they took four soil and four groundwater sample from four borings. some of high values in soil analyticals:-----SB-3-----SB-4 5 - 7 ft 9 ft Naphthalene-----50,200 Xylene-----360, 000-----2,612 1,2,4-Trimethylbenzen-----309, 000 Ethylbenzene-----55,500 Toluene-----50, 700 some of high values in groundwater analyticals:-----TW-01-----TW-02-----TW-03-----TW-04 Benzene-----1,620-----14, 400-----451 Xylene-----1,440-----29,960-----2, 336 1,2,4-Trimethylbenzene-----673-----6, 900-----782 Naphthalene-----187-----1, 720 Ethylbenzene-----5, 920-----522 Toluene-----51,300-----1, 650 analytical results shows high contamination in soil at boring SB-3 and in groundwater at TW-3 and TW-4. these both borings done close to waste oil tank and concrete patch observed on site. 07/02/07-Hiralkumar Patel. spoke with Mr. Mar at auto shop. Mr. Mar owns this property since 1992 and have no knowledge of any USTs at site. Timothy L. Mar LL Auto Repair Inc. 129 34th Street Brooklyn NY 11232 Ph. (718) 369-2311 Fax (718) 369-2310 email: timothy.mar@verizon.net alternate addresses: 129-133 34th Street, 909 3rd Avenue 07/03/07-Hiralkumar Patel. visited site on 07/02/07. met Peter at site. site has five hydraulic lifts. four of these lifts are aboveground and one lift is underground. Peter is running auto repair shop at the site for about 15 years and never used underground hydraulic lift. as per Peter, there is underground hydraulic oil tank near lift. Peter also mentioned that they had heating oil AST in basement, but was removed when they started business and currently building is running on gas heating system. this site is in

industrial/residential neighbourhood. based on general observations and site location, groundwater flow could be in west direction.important sites near subject site (129 34th Street):1. Playground across 34th street on southwest side2. 170 34th Street: NYC School Construction Site. this site is next to playground and in south to subject site. currently school site has been excavated to 16 ft bg and preparing for building footings. during construction activities, found benzene (58 ppb) in groundwater at school site. based on general observations, school site is about 50 ft crossgradient.3. 143 34th Street. Spiro's Auto Repair Shop. this auto shop is on east side of subject site (upgradient from LL Auto repair with assumed groundwater flow direction) spoke with Mr. Spiro (718-369-0558). he has one underground waste oil tank (no PBS record found). this auto repair shop is exactly in front of school site. Mr. Spiro mentioned that building owner installed existing waste oil tank about five years ago and Mr. Spiro running business for three years now. no PBS registration found at site. sent email to Jacob and Brian regarding unregistered waste oil tank at repair shop.4. 149 34th Street. Blue Diamond Fuel Co. site is on east side of subject site (east of Spiro's auto shop also). fuel company is in front of school site. spoke with manager at fuel company and as per him, there are no oil tanks at site.5. 891 3rd Ave. A-One Car & Truck Repair. site is on north side of subject site (cross gradient) (PBS #: 2-610159)6. 889 3rd Ave. Getty station across 33rd Street across A-One Car repair shop (north of subject site) (PBS #: 2-600483). found one open spill (9814914). spill reported as found oil on concrete due to poor housekeeping.07/05/07-Hiralkumar Patel. sent letter to Mr. Mar requiring tightness test, phase I investigation, soil and groundwater delineation and endpoint samples. letter emailed to Mr. Mar and Mr. Stewart.07/10/07-Hiralkumar Patel. received message from Scott (908-296-2696) from Safety clean, who been hired by site owner. spoke with Scott. he will call back with owner to discuss what needs to be done.07/12/07-Hiralkumar Patel. received call from Scott. he asked what needs to be done. explained to Scott that the Department requires immediate testing of underground tank and soil/groundwater delineation.spoke with Mr. Mar and informed him to do tank test immediately and asked to submit tank test result by end of July 13, 2007. if tank fails a test, then tank has to be emptied out by end of July 14, 2007. Mr. Mar will call Safety Clean for tank test.07/13/07-Hiralkumar Patel. received call from Mr. Munroe. he has been hired by Mr. Mar for required investigation and remediation work. Mr. Munroe asked to extend deadline for tank test. explained to Mr. Munroe site has heavy soil and groundwater contamination and it has underground tank, which was not in use for about 15 years (as per owner), the department required immediately testing. the department can approve his request to test tank system on July 16, only if oil be removed from tank by end of today.Dr. Norman MunroeAstem Labotaries Inc.PH. (305) 348-3556 (O) (917) 497-0190 (C)Fax (305) 388-1469email: munroen@fiu.eduspoke with Mr. Mar. asked him to either empty out tank or do tank test by end of today. he agreed and will contact his consultant.07/19/07-Hiralkumar Patel. spoke with Mr. Mar. they have tested tank and is waiting for result from consultant. asked Mr. Mar to submit tank test result with copy of contract for required investigation/remediation work.07/23/07-Hiralkumar Patel. received fax from Dry As a Bone INc. they did hydraulic oil tank test and found tank system tight.08/14/07-Hiralkumar Patel. received message from Mr. Mar (on 07/31/07). spoke with Mr. Mar. he hired

contractor and has removed some contaminated soil. Mr. Mar will contact his contractor and ask him to call. received call from Mr. Munroe. they started excavation and found two tanks in ground. and suspecting third one also. they found little oil in first tank and second tank was filled with concrete. currently they have excavated to 10 ft bg and found no groundwater. no odor complaints. asked Mr. Munroe to monitor excavation for any vapor issue. 08/20/07-Hiralkumar Patel. visited site. met Mr. Mar. observed excavated pit in area where hydraulic oil tank was. no odors noticed at site. till now no work has started regarding groundwater delineation. 08/24/07-Hiralkumar Patel. sent email to Mr. Munroe to send updates on investigation. spoke with Mark (718-926-8809), Mr. Munroe's assistant at site. Mark mentioned that they are installing wells and doing further excavation in tank area. 10/09/07-Hiralkumar Patel. left message for Mark. spoke with Mr. Mar. Mr. Mar will ask Mr. Munroe to call with updates. received call from Mr. Munroe. he is preparing tank closure report and will submit soon. they haven't took any groundwater samples from well that they installed. they will take groundwater sample on 10/11/07. 10/31/07-Hiralkumar Patel. spoke with Mr. Munroe. he is preparing report and will submit by end of Nov. 9, 2007. 11/29/07-Hiralkumar Patel. spoke with Mr. Munroe. he was out of office and will submit report by Dec. 7, 2007. 01/17/08-Hiralkumar Patel. spoke with Mr. Mar. asked him to submit report by Jan. 25, 2008. 01/29/08-Hiralkumar Patel. received report from Mr. Munroe. abstract:- removed two 550 gal USTs that were previously filled with concrete and one 25 gal hydraulic fluid UST- soil from entire tank field (164.24 tons and 30 cubic yard of concrete) was excavated until no detectable odor was obtained- excavated area back-filled with clean soil- haven't excavated soil from fill box area as it was located on the sidewalk- three 2 inch wells (25 ft deep with 20 ft screened section) were installed- depth of groundwater at site ranged from 13.2 to 13.75 ft bg <----- groundwater was determined to be flowing in westerly direction <----- five endpoint soil samples were taken from tank field excavation area (sidewall samples taken from depth 8-10 ft bg)- six soil samples were taken from borings for monitoring wells (two soil samples from each boring)- three groundwater samples collected- no contaminated found in any soil samples- only one groundwater sample from well MW-3 found contaminated- monitoring well (MW-3) located in the vicinity of the tank field and directly around the fill box area on the sidewalk found mostly contaminated; soil samples from this well area found non-contaminated- no floating product found in any monitoring wells- sheen was observed in water sample from MW-3. 01/30/08-Hiralkumar Patel. spoke with Mr. Munroe. excavation bottom was about 12 ft bg. no groundwater encountered in excavation. asked Mr. Munroe for groundwater samples from previous excavation area and one from area inside building across overhead gate; on downgradient side of previous tank field. also asked to vacuum out MW-3. sent email to Mr. Munroe and Mr. Mar with same requirements. 02/08/08-Hiralkumar Patel. received email from Mr. Munroe with proposed well location map. MW-4 will be installed in previous tank field area. Mr. Munroe proposed to install MW-5 near overhead door close to office inside building. sent email to Munroe asking to move MW-5 location close to foundation wall along excavation area and close to mechanic bays area. left message for Mr. Munroe. asked to resubmit updated map. spoke with Mr. Mar and asked him to move MW-5. he will ask Mr. Munroe to call. received call from Mr. Munroe. asked him to move MW-5 location close to foundation

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con Ed e2mis Notes:1/18/00 Found pothead and cable on high feeder 41T leaked 3 pints cable oil. 3 drops hit blacktop in substation and rest stayed on porcelain pothead. Repairs could not be done until feeder is taken off. 1/27/00 Mary Moran indicates that the cleanup was completed on 1/18/00. Absorbant pads were used to removed visible traces of oil and cleanup stained areas. Contaminated bluestones were excavated and placed in 5gal pail. Corrective actions requires that the equipment be de-energized.7/27/01 On visual inspection pothead is not leaking. All connections were tightened.
Remarks: CALLER REPORTED 3PT SPILL FROM POTHEAD CABLE. CON ED #129645.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"Reference #0103823.Con Ed e2mis Notes:7/25/01 Found 10gal transformer oil leaked onto cement pad under transformer #2 in the sample line in the nitro cabinet. 7/27/01 As per Terrence Hunter, drip pan was placed, leak was sealed, liquids and solids were removed, absorbants were used to remove residual fluids, any visible traces of oil were removed, stained areas were washed, and contaminated bluestone was removed. The nitro line for the selector compartment was valved off. The waste generated was placed in 2 drums.DEC Inspector Notes:7/31/01 As per conversation with Brooklyn Area Manager Ralph Lasardo, the repair made may be temporary. However, it has not yet be determined if the nitro line for the selector compartment will be set back to its own reservoir.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By: JHOCONE
Site Description:

Location: The site is located in an urban area. The site borders an access road referred to as Marginal Street (which parallels 1st Avenue), between 47th and 52nd Street. Site Features: The 17.3-acre site is along the Upper New York Bay, in the Sunset Park Section of Brooklyn, in the western part of Kings County, New York. It includes approximately 14 acres of urban land that was created by landfilling between four piers that were part of the former Bush Terminal warehouse complex. Partial filling between two piers (Piers 3 and 4) has resulted in the presence of two ponded areas in the northeastern portion of the site. While most of the landfilled areas are covered with grasses or barren soils, the westernmost fill area between Piers 2 and 3 supports an area of mature trees (referred to as the existing wooded area). The site is currently fenced to prevent public access. Current Zoning/Use(s): The land immediately adjacent to the site is used for commercial and industrial purposes. Residential areas are located approximately 1,500 to 2,000 feet east of the site. Historical Uses: Prior to 1974, the site was an active port facility, with vessels that docked at the piers. In 1974, the City of New York Department of Ports and Terminals contracted with a private company to fill in the areas between the four piers with clean construction-related fill. In 1978, the private fill contractor was cited for violations related to the quality of the construction-related fill, in particular, the presence of wood that was not authorized for disposal. Filling operations at the landfill were halted at the request of New York City. During testimony presented before the New York State Legislature in 1982, the City learned of alleged illegal disposal of liquid wastes at the landfill including oils, oil sludges, and wastewaters. The City subsequently secured the property with perimeter fencing, cooperated with NYSDEC in its investigations to confirm the contamination and, in 1997, applied for Clean Water/Clean Air Bond Act funds to further characterize and delineate the site's contamination. The Site Investigation (SI) was conducted between May 1999 and May 2001. The field activities and findings of the investigation are described in the SI report dated November 2001. Additional studies were conducted

between March and July 2002 to support the evaluation of remedial alternatives and are described in the Remedial Alternatives Report (RAR). The Record of Decision presenting selected remedy was finalized in March 2004. The State Assistance Contract between NYSDEC and NYCEDC was executed on November 9, 2001 and was amended on May 6, 2004 and on August 11, 2005 and again in late 2012. The NYC Economic Development Corporation prepared a detailed design, plans and specifications for the proposed remedy which were approved in January 2009. Remedial construction commenced in August 2009. Landscaping activities under a separate contract with the eventual end use comprising both active and passive recreation for residents of the surrounding Sunset Park community. Site Geology and Hydrogeology: Subsurface investigations indicated that three stratigraphic units exist beneath the site. The uppermost unit consists of fill material which ranges in thickness from 30 feet in the northern portion of the site to 60 feet in the southern portion. The fill material consists of fine to coarse sand and cobbles, brick, concrete rubble, ash, and wood debris. The fill material contains many void spaces, consistent with the characteristics of a construction and demolition (C&D) landfill. Brown or black staining that exhibited a petroleum odor was observed at some locations at depths of greater than five feet. A brown silt unit, believed to be native material, underlies the fill layer and is approximately 30 feet thick. The silt is not present in the southern portion of the site. Beneath the silt unit, fine sand was found at depths of greater than 60 feet. The sand is believed to be the beginning of the Upper Glacial aquifer and is thought to be about 40 feet thick beneath the site. In the southern portion of the site, the sand unit is in direct contact with the fill layer. Horizontal groundwater flow direction at low tide in all three zones is generally westward, toward the Bay.

Env Problem:

Nature and Extent of Contamination: The primary categories of contaminants of concern at the site (in groundwater, soils and sediments) that exceed their respective Standards, Criteria and Guidance are semivolatile organic compounds (SVOCs) and inorganics (metals). VOCs, the pesticide 4,4-DDT, and PCBs were also detected at levels exceeding SCGs, but to a much lesser extent than the SVOCs and metals. Surface Soil - SVOCs and metals are the main contaminants of concern in surface soil. SVOCs and iron are present at elevated levels throughout the site surface soils, with arsenic, cadmium, and/or lead also present at elevated levels at select locations. Subsurface Soil - SVOCs and metals are the main contaminants of concern in both the unsaturated and saturated soils. PAHs are present at elevated levels throughout the subsurface soils, with arsenic and/or lead also present at elevated levels at select locations. Individual SVOCs were detected at levels as high as 140 ppm (fluoranthene in a saturated soil sample). The detection of 31,900 ppm lead at a soil boring prompted the subsequent installation of three additional borings, which did not confirm the presence of a lead hot spot at that location. In general, higher levels of contamination were detected in the saturated subsurface soils than in the unsaturated subsurface soils. Other metals commonly detected at elevated levels in the subsurface soils but not identified as constituents of concern include beryllium, cadmium, chromium, copper, iron, mercury, nickel and zinc. Sediments - SVOCs and metals were the main contaminants of concern in the sediments. Groundwater - VOCs, SVOCs and metals are the main contaminants of concern in shallow,

Health Problem: intermediate and deep groundwater when compared to the GA criteria. Surface Water - Zinc was the only constituent present in the surface water samples at a level exceeding SCGs. Soil Gas - Methane, a common landfill gas component, was detected in on-site soil gas samples. The detection of explosive soil gases at levels exceeding 25% of the LEL in site soil gas samples indicates a potential for future exceedances of these criteria once the site is covered and developed for future use.

The area is served by public water, therefore, exposure to contaminated groundwater is unlikely. There is a potential for direct contact exposure with contaminated surface soil. However, a clean soil cover over the site and landfill gas control measures will minimize the potential for exposures to future park users. Site access is currently restricted by a fence minimizing the potential for exposure.

DEC Memo:

200184. Significant Spill Event Notification sent to Lou Oliva, Dan Walsh and Randy Austin: "This morning at approximately 1:10 AM a NYCDOT contractor conducting a paving job on Third Avenue in Brooklyn caused a leak from Con Edison's high pressure 345 kV feeder B-26. The leak occurred at the intersection of 30th St. Initial estimate of leak amount was 2000 gallons, most of which came up through the pavement onto the street. Crews on site bermed the area and the spill is under control, however the leak is still continuing at a high flow rate. This is due to the fact that there is no redundant feeder in this area, therefore the pressure on the feeder has to be maintained. Oil is being directed into a nearby Con Ed manhole, where it is collected and being pumped out by tankers. Thus far approximately 3000 to 4000 gallons has been recovered. Agencies responding to the incident include NYPD, DEP and OEM, and no initial response was made by DEC during the off-hour period. This morning at approximately 9:00 AM, DER staff [Sam Arakhan] responded to the incident scene and is currently on-scene. Feeder pipe has been excavated and exposed, and Con Ed is trying to figure how to apply a clamp to stop the leak. This incident was reported on local TV and radio." (JHO) Update: 5/24/06 The feeder was punctured by a 2-inch pipe of unknown function. Feeder oil is flowing under pressure through the 2-inch pipe and is being collected by a tanker vacuum hose. An excavation approximately 8 feet by 8 feet has been made to a depth of approximately 5 feet. The feeder line has been exposed at the leak and crews are awaiting construction material to shore the excavation. The repair crew plans to freeze the line with liquid nitrogen in order to install a clamp over the leak. It is anticipated that the leak will be clamped by 1 PM today. PCBs content of the spilled oil was less than 1 ppm. (SKA) Update: 5/25/06 Sam Arakhan visited scene for second time at 1:30 PM on 5/24. The vertical pipe that was leaking was plugged with a broom handle and the valve to the pipe was turned off at the substation; surface cleanup was ongoing. Oil soaked sand, absorbent material and asphalt were being swept and vacuumed into roll-off containers. The 5-inch pipe that was ruptured was a redundant line. Con Edison plans to drain and clean the pipe; it will then be abandoned in place. Con Ed personnel were instructed to take five post-excavation samples in the pit at the point of rupture - samples to be tested for TPH and benzene. (Pictures in eDocs) SKA See eDocs Update: 6/5/06 The following e-mail was received from Mike Pillig on 6/5/06: Sam, I understand you were at the subject leak site on 5/24/06. You had requested that 5 samples be taken (1 on each wall and 1 on the floor) and analyzed for TPH modified 8100. Also, one sample was to be taken and analyzed for total and TCLP benzene. This was completed and the results are attached. In addition, subsequent to your visit, I discovered that DF had migrated into "holes" in the roadway and spread beneath the base concrete in several locations under the BQE. As such, I excavated two areas to a depth of approx. 12-18". One excavation was 35' long and tapered in such a way that it was 8' wide at its widest point. I took floor samples down the center of the excavation every 5'. The second excavation was much smaller (2' X 8"). I took one floor sample about in the middle. Photos of the excavations you did not see are attached. Based on these results, we should be able to close this spill. Please confirm. Thanks for your help. Mike (Post excavation results are satisfactory - analytical results and pictures in eDocs) SKA

DEC Memo: 9/30/13-Vought-Duty desk officer. Called TRC Jennifer Miranda (Ph:212-221-7822) and left message to return call to Vought. Vought received callback from and spoke to TRC Miranda and she noted that property was owned by NYC EDC and spill was by two tenants and spill was on asphalt and concrete that had cracks but she did not know extent of cracking. TRC hired by EDC who will be overseeing work. Problem is chronic problem from housekeeping as KNL has been onsite since 2002 and possibly PJS (the other tenants). Vought received email from Miranda that "Jeffrey, The following is the requested contact information:Property Owner: NYC EDC110 William StreetNew York, NY 10038Contact: Tracey Bell Ph:(212)312-3752Spiller:K&L Beverages4302 1st Avenue, Bldg 45Brooklyn, NY 11232Ph:(718)499-8818Ms. Lee Spiller: PJS Contracting916 Old Nepperhan Ave.Yonkers, NY 10703Ph:(914) 623-9200 email:eshewtahal@pauljscariano.comVought sent letter requiring either soil borings or submission of endpoint samples with one month due date to all three above addresses and also added letter to E-docs.10/16/13-Vought-Received call from Laura Eisenhardt (Ph:914-623-9200) and she works yard tenant. She wanted to know next steps and Vought noted that excavation or investigation was required and that she should hire a contractor. Vought suggested she call TRC Miranda or her fuel oil supplier for a recommendation for a company.10/29/13-Vought-Received email from TRC Miranda that "Mr. Vought,The New York City Economic Development Corporation (NYCEDC) received your letter dated September 30, 2013 regarding Spill number 1306669 (Spill No. 1306670 was consolidated into this spill). Since receiving the letter, the NYCEDC communicated with the Leasers (K&L Beverages and PJS Contracting). The Leasers have removed the oily staining and several yards of soil from both areas. The NYCEDC inspected the areas on October 23, 2013. Based on the inspection it appears that one of the two areas (PJS Contracting) is ready for confirmation sampling while the other area (K&L Beverages) requires additional soil removal followed by confirmation sampling. The NYCEDC requested the soil disposal manifests from the Leasers. While progress has been made, we request additional time to complete the cleanup, confirmation sampling and report preparation to close out these spills." Vought replied that "Jennifer, The NYSDEC has no objections to your request of additional time to complete the cleanup, confirmation sampling and report preparation. When approximately do you think we can expect to see the report?Thanks." DEC Requires:1)Soil borings and/or excavation at spill area11/22/13 - Austin - Received call from Mike Baldwin of PAL Environmental (cell-516-779-5234). He indicated that he was representing K & L Beverages, and that he was starting the the cleanup on Monday (11/25/13). He wanted the DEC project manager for this spill so I

MOTOR OIL SPILLS AT EDC NORTH CONTRACTORS YARD (Continued)

S114560166

Remarks:

gave him Jeff Vought's desk phone #, and asked him to call Jeff on Monday, to discuss the work. - end11/22/13-Vought-Received call from Mike Baldwin and he will be out at site collecting endpoint samples and there are ten bags of contaminated soil that will be drummed and further excavated (10'x10') and he collect a total of two endpoint samples. Vought required submission of a spill summary, site plan and endpoint soil analyticals.
Caller advised unknown amount of oil but showing a 25ft by 25ft area of staining onto pavement due to poor housekeeping of the vehicle. Clean up is pending.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 169153
DEC Memo: 3/4/2003: CLOSED DUE TO LACK OF ANY RECENT INFO - DOES NOT MEET ANY CLEANUP REQUIREMENTS.5/18/06: Case reopened because high naphthalene found in downgradient MW8 on Verizon property. Assessment required letter sent, due back 7/18/06. PBS # 2-6035975/31/06: Spoke to Commodore Manufacturing. He will send documents regarding legal closure of tanks three years ago.6/5/06: Received letter with documentation that Action Environmental closed in place a 35,000 gallon heating oil tank that was previously abandoned in place. The tank was noted to have been "properly abandoned" in the late 1940's.8/11/06: Spoke with Kevin O'Connor. Two 35,000 gallon USTs were abandoned in place. A third tank was found to be formerly abandoned in place with sand. All three tanks were in parrallel. Soil testing may have been completed by a different company. Contact owner for additional information. Called Abraham Damast (718-788-2600), he was not in the office.8/21/06: Called Abraham Damast, the line was busy.8/25/06: Left message with Abraham Damast's secretary to see if he has additional information regarding the tank removal/abandonment. 9/27/06: Sent letter to Abraham Damast requiring sampling results from the abandonment which occurred in September 2004.10/11/06: Downgradient Verizon site Spill 9108899, located directly downgradient of Commodore manufacturing, was closed, although their upgradient well MW8 still shows high naphthalene contamination from an unknown upgradient source. Include Verizon's well MW8 in possible future sampling of this plume.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was
"ENGELHARDT"DEC Inspector Notes:Foley inspected equipment on 7/31/01.
Appeared that repairs were completed by applying epoxy. No visible
leaks.Con Ed e2mis Notes:11/9/98 4oz dielectric fluid leaked from
reactor R18 onto concrete pad. To be cleaned as 50-499ppm PCB. PCB
count is 1ppm ,as per Mary Moran.1/22/99 During field visit, Mary
Moran reported that cleanup was completed on 1/6/99. Sample results
indicate PCB count of 2ppm.7/27/01 As per visual inspection , CT Pod
looks repaired and there is no leak.

Remarks: CON ED #121129 REACTOR R18 LEAKING CLEAN UP TODAY BEING TREATED AS
50-499 PPM PCB.

DEC Memo: 7/22/05: Closed out 9614390. Will clean up under this spill number. Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" PRIOR SPILL NUMBERS HERE - 9416269 96143906/7/2001 - Sangesland visited the site: Anton Junicic Ent. inc. (junk yard) with ECO Anthony Panipinto. The ground around the car dismantling area showed signs of petroleum pooling and saturation into the soil. Owners (brothers) Bernardo and Anton Jr. Junicic - 718-768-8884 Mr. Junicic presented drawings showing an oil/water separator which had been installed on the site in 1999. It is a buried unit with 2 stormwater drains leading into it. The water discharge goes into the NYC DEP sewer system. Oil is periodically pumped out of this unit and disposed of. Because the surface of the yard is soil (owner says it is cement 1' to 2' down) the rainwater had never been properly directed into the 2 drains. DEC wrote a DO WORK letter (6/8/2001) directing Mr. Junicic to: 1) Excavate the site (soil/gravel) down to

Map ID

ANTON JUNICIC ENTERPRISES INC (Continued)

S105057939

either clean soil or a solid barrier (old cement floor). Contact DEC for a site inspection.2) If DEC inspection goes well, regrade the property and pour a new cement floor. Contour this floor so rainwater from the whole property flows to the proper drains.3) Reconfirm that the water discharge from the oil/water separator is properly hooked up to the city sewer system in accordance with the regulations of the NYCDEP.4) Design the property layout to allow access to the "Blue Cover" on the separator unit.5) Maintain a log book for the drainage of the oil out of the separator unit. On future inspections, this information will be requested to provide that the separator system has been maintained.Submit a written plan and schedule of how this work will be performed. This plan is due to DEC by July 31, 2001.7/11/2001 Sangesland went back to the site. Mr. Junicic is completing the required work in phases. Today the north 1/3 of the site had been cleared and excavated. Sangesland saw one "hot spot" which was removed while there. After today's inspection, an 8" to 10" reinforced cement slab was going to be poured and contoured over the full north 1/3 of the property.8/14/2001 Sangesland (from the street) could see that the north 1/3 of the lot had been cemented and Mr. Junicic had redeployed much of his equipment over this area. It appears that he is clearing out the south west 1/3 of the site. I assume this will be done soon. 4/15/2002 Sangesland could see that 2/3 of the site had been paved over. Mr. Junicic said he would move the container boxes (used for storage) and would pave the remainder of the site soon. 3/30/2006 Requires a site visit to confirm that the whole lot has been paved over with cement.8/26/08 - Raphael Ketani. I made a site visit at the request of Steve Sangesland, case manager. I met one of the workers who told me that the boss and the supervisor were both away from the shop. The worker called his boss who told him that it would be alright for me to look around. The shop is very overcrowded with car parts. I inspected the northern part of the site first. There was a small pile of soil and fill under a few cars. A spot of bare concrete was visible next to the pile of material and I had the impression that there actually was concrete under the material. Next, I viewed the back of the site. There was concrete everywhere in plain sight. Lastly, I viewed the southern part of the site. Here there was a depressed area with a sharp border, but which had a historical fill base. The entrance to this part of the shop had bare historical fill and comprised an area of about 800 to 1000 square feet. The worker I had met told me that they ordered the concrete, but they are waiting on a contractor to install it. After this, I left.8/21/2013 Someone from spills needs to make a final visit to this site. It's a junk yard on Third Ave under the elevated hwy. It's an open lot between 2 buildings. Steve worked with the owners back in the 2001-2004 time frame to scrape up most of the lot and pour a cement base. They did 1 quarter of the lot at a time. They have completed 3/4 of the work. I never saw the rear/southern quarter completed. They have been inspected several times, but this final quarter has not been done.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"10/10/95: This is additional information about material spilled from the translation of the old spill file: YARDS.Transferred from Tang.09/23/2003Transferred from Tibbe to Sun.10/03/2003- Sun- File Review by Sun:-Quarterly Report Jan 2003 thru March 2003 by EnviroTrac (Jeff Bohlen, 631-471-1500) -On Jan 28, 2003, Verizon's consultant performed the injection of oxygen releasing material (ORM) into the groundwater at the site. A total of 440 pounds of calcium peroxide (IXPER 75C) was injected through a network of 10 boring locations. At each boring, Geoprobe equipment was utilized to disperse approximately 40 to 50 pounds of ORM and a half of a pound

of food grade sugar across the uppermost 12-feet of saturated soils. The results of this first quarter groundwater monitoring event indicate a decline in total dissolved BTEX/MTBE concentrations in Monitoring wells MW-2, MW-3, MW-5, MW-8 and MW-B. But, it show a significant increase in total BTEX & total VOCs in MW-4, and did not produce the desired downward trend of dissolved VOCs in groundwater. -Quarterly Report April 2003 thru June 2003 by EnviroTRac Ltd (Jeff Bohlen, 631-471-1500)- The results of this quarter indicate a decline in total dissolved BTEX/MTBE concentrations in Monitoring Wells MW-1, MW-3, MW-5, MW-7 and MW-B. But, it shows a significant increase in total dissolved BTEX and total VOCs in MW-2, MW-4 and MW-8. The bio remediation using ORM injection into the groundwater is not producing the intended results. DEC intends to ask Verizon to investigate the soil around the 2x2000 gallon gasoline USTs (closed-in-place), and to confirm the groundwater flow direction. 10/07/2003- Sun & Vought visited the Verizon's site and met with John Quatralo of Verizon and Jeff Bohlen of Envirotrac. Based on our discussion, Verizon/Envirotrac will confirm the ground water flow direction in the next quarterly report. 10/17/2003-Sun sent an e-mail to John Quatralo of Verizon (516-292-8166), requesting the following actions be taken: 1) Correct the North arrow direction on Figure 1 of the Quarterly Report, 2) Re-survey the wells and determine the groundwater flow direction, 3) Provide the most recent quarterly report-covering July 2003 through September 2003. 10/30/2003-Sun- File Review by Sun: -Updated Report-July 2003 through September 2003: The results of the third quarter 2003 groundwater monitoring event indicated a decline in total dissolved VOC concentrations in MW-2 and MW-4, however, the total dissolved VOC concentrations increased in MW-5, MW-8, and MW-B. The hottest spot is on MW-4, which has 28,111 ppb of BTEX (max), and 30,411 ppb of total VOCs(max). MW-2 has the highest MTBE of 1,300 ppb (max). Per the quarterly report, Verizon may elec to remove the active 4000-gallon underground storage tank (UST) containing gasoline along with the dispenser island and associated piping during the next reporting period. 12/31/2004-File Update by Sun: On April 8th and 9th, 2004, one 4000-gallon gasoline underground storage tank (UST) and the associated dispenser island and piping at the subject site were removed. A total of six post-excavation soil samples were collected. Five of the soil samples were collected from the UST excavation. The soil samples were collected at each sidewall of the UST excavation in addition to the bottom of the UST excavation. On additional soil sample was collected from the area of the dispenser island. Post-excavation soil samples collected from the sidewalls and bottom of the UST excavation and from the area of the dispenser island were below NYSDEC TAGM 4046 Recommended Soil Cleanup Objectives for the VOCs analyzed. 1/3/2005-File Update by Sun: On 12/7/04, the Department approves the remedial system proposed by EnviroTrac dated 11/1/04 for the subject site; specifically, the use of Soil Vapor Extraction/Air Sparging (SVE/AS) remedial system for in-situ remediation of the petroleum contaminated subsurface soil as well as petroleum compounds dissolved in groundwater.1/5/06: Case reassigned to Andersen.1/11/06: Reviewed the quarterly report dated 1/10/06. SVE/AS in operation. Samples taken on 9/28/05. Max BTEX 164.2 ppb (MW-4). Max MTBE 178 ppb (MW2). 1/19/06: Reviewed the fourth quarterly 2005 update report. BTEX and MTBE ND in all wells sampled. Approved shutoff of the AS/SVE system. 4/27/06: Meeting with Verizon, NYSDEC, and EnviroTrac. March gw monitoring showed rebounding in one well. Awaiting formal copy of

monitoring report.5/11/06: Received first quarterly 2006. SVE/AS was shut off on 1/19/06. BTEX and MTBE ND in all wells except MWB. An off site source is suspected in MWB. Concentrations in MWB: BTEX 33.6ppb, MTBE ND, Naphthalene 1,770 ppb. The naphthalene concentration in MWB was ND for the last two quarters. Wait another quarter to confirm the naphthalene concentration in MWB. Then request off site well to confirm an off-site source. Reopened spill 8910578, failed tank tightness test of fuel oil USTs on upgradient property which was never investigated. 10/11/06: Received april - june 2006 monitoring report. Wells sampled on 6/15/06. Max BTEX 19 ppb (MWB), max MTBE 47 ppb (MW-2). TVOC 1,093 ppb (MWB). High naphthalene in MWB may be result of an off-site source. Spill 8910578, directly upgradient, is currently being investigated. The Department approved that groundwater sampling cease while the Department investigates spill 8910578.5/24/07: NFA issued.

Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: 53997
Final penalty amount: Not reported
Paid penalty amount: Not reported

Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 04/11/2008
Date achieved compliance: 07/23/2009
Violation lead agency: State
Enforcement action: FINAL 3008(A) COMPLIANCE ORDER
Enforcement action date: 06/18/2009
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: 3000
Paid penalty amount: 3000

Evaluation Action Summary:
Evaluation date: 07/23/2009
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

Evaluation date: 06/18/2009
Evaluation: NOT A SIGNIFICANT NON-COMPLIER
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

Evaluation date: 11/21/2008
Evaluation: SIGNIFICANT NON-COMPLIER
Area of violation: Generators - General
Date achieved compliance: 07/23/2009
Evaluation lead agency: State

Evaluation date: 11/21/2008
Evaluation: SIGNIFICANT NON-COMPLIER
Area of violation: TSD IS-Preparedness and Prevention
Date achieved compliance: 07/23/2009
Evaluation lead agency: State

Evaluation date: 11/21/2008
Evaluation: SIGNIFICANT NON-COMPLIER
Area of violation: LDR - General
Date achieved compliance: 07/23/2009
Evaluation lead agency: State

Evaluation date: 11/21/2008

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Memo: 03/22/05-Sharif// Sharif and Mr. Sawyer responded to the site.About 4000 gallons of #6 oil came out of vent line and top of the tank while the pump to the boiler was replaced and being tested.Oil had been contained in the secondary container(vault). Vent is located out of the building at the backside where about 20'by 20' open area adjacent to couple of abandoned railroad track line is impacted by the oil. Oil spreaded over one of the track of about 10 ft in

length. Petroleum Tank Cleaners (PTC) has been called in to do the clean up. NYC Transit, Office of System Safety (Josephina Volyn/Richel Kron, 718-243-4581, Fax: 718-243-4309) has been notified of their property impact. 04/06/05-SR// PTC excavated the rail track, took sample, backfill soon with supervision from NYC Transit. Open lot between building and the track has been field screened. Contamination found. Property owner Mr. Merhige was contacted for revised work plan including tank vault and open lot. 9/8/05-Vought-File review as per DEC Austin due to inquiry by Rachel Kron (NYC Transit 646-252-5773). Spill out of vent pipe and also into tank room. Letter from DEC Rahman to Commercial Realty Co (11 East 26th Street, 11th Floor attn: Richard Merhige)-3/23/05. Letter sent requiring: 1)excavation of all oil impacted soil and debris including railroad track area 2)removal of oil from secondary containment vault 3)submission of soil sampling results. Scope of Work from Petroleum Tank Cleaners PTC (Anthony Lara 718-624-4842)-4/5/05. Scope of work includes: 1)product removal from vaults. Soil analyticals from PTC-5/24/05. Water analyticals show no TAGM Soil Cleanup Objective exceedences except for minor PAH's attributable to fill material. Letter from PTC (Lara) to DEC Rahman-6/27/05. "PTC has removed all contaminated soil and debris from the vault, and as you agreed what was acceptable PTC has addressed any remaining contamination via the application of Biosolve bioremediation accelerant to the soil beneath the existing vault floor". "PTC plans to begin installing a new concrete floor as early as 7/6/05." 9/8/05-Vought-Called Rachel (646-252-5773) and left message with outstanding requirements: 1)endpoint soil samples from track excavation 2)site plan and locations of endpoint sampling. Vought called Commercial Realty (Richard Merhige 212-947-7500) and he tried to call Rachel who has not returned call. PTC still cleaning out second tank room. PTC collected soil samples from outside and two 20' foot containers were generated from soil excavation. Jerry Sobel will be contact for next seven weeks as Richard will be going on vacation. Vought left message for PTC to return call with status of soil excavation and endpoint sampling. 10.19.05 Sharif- I spoke with Anthony of PTC, 646-772-7180 who informed me they made formal request to NYCT's property to do geoprobe investigation. NYCT holding them regarding some insurance coverage issues which will possibly be simplified as they are working on it. NYCT is supposed to get back to PTC by this week. I'll call NYCT next week about their approval. 12/15/05 Sun reassigned from Rahman to Foley. 1/3/2005 - Feng - File reviewed by Feng and summarized: 1) some samples were collected the boiler room with site plan provided, but did not indicated out whether soil or groundwater samples. High SVOCs. 2) Track area impacted, and removed the contaminated soil. DEC has been requested 1)endpoint soil samples from track excavation 2)site plan and locations of endpoint sampling. Nono were submitted on file. 3) DEC Rahman has assisted PTC to access the NYCT property and do the sampling. Wait for sampling result report. 05/09/06 - spoke to Mr. Bob Lamirata of PTC, 718-624-2185. He said he will take care of disposing the contaminated soil pile at the site in a few days. I will find out more of the subsurface contamination. - KST6/15/06 - Bob Lamirata of PTC called and advised that contaminated soil pile has been removed. Will fax end-point sampling results. - KST6/26/06 - PTC sent in the report which only has the lab results, no write-up. The results look clean. Called Bob Lamirata and told him that DEC needs a report summarizing the contamination and the actions taken by the RP OR PTC

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
Waste name: NICOTINE, & SALTS

Waste code: P081
Waste name: NITROGLYCERINE (R)

DEC Memo: Piper contacted blue diamond and spoke w/ Bob Sntder. Bob stated that 15 gallons spilled to due a broken gauge. He then stated that he has a "crew there now." Piper asked for homowners #, 718-499-2203. Piper called though no one answered. Piper responded to the site due to major discrepancies in Bob's story. Upon arrival 3 Blue Diamond work vans outside residence and 12' diameter oil soaked speedy dry present

in roadway. Piper entered basement residence to discover Diamond Oil personell removing carpeting in bedroom. Major spill across the basement level floor. The tech was sqeegeeing oil from carpet in 5 gallon pails. Tech stated that what was spilled outside as well and a representative will be arriving shortly. Piper entered though another room where carpet was removed though old tile and wood was present that was broken and soaked in oil. The floor may be a raised floor. Requirements to follow notes. Speedy dry covered the remainder of the room. Piper inspected tank area which was behind concrete block and sheet rock. Blue diamond had already opened hole with a sledge hammer in boiler room where it was cemented painted and unaffected. Spill was behind walls of basement apartment. Piper observed where gauge was blown off due to overfill. Tech stated the construction noise was high and could not hear whistle. Oil soaked speedy dry was dumped around tank and ample amounts of sweet air was spread as well. Bob Snyder arrived on site as rep for Blue diamond. He has not seen the spill scene though he had certified tech out her that said it was 15 gallons. Piper stated he was misinformed and that a professional contractor needs to be hired. Bob hired PTC to respond for demo of basement. Bob stated that he was not going to deal with 3rd party damages because it is an illegal apartment. Piper stated it is not my concern weather it is or not my concern is that the oil is cleaned and the owners house is restored. Requirements are to remove all contaminated debris, relocate tenants, restore property. PTC arrived on site and removed 17 drums by 400. They wil return tomorrow.1/4/06- DEC Piper received call from Firemans Fund (Insurer)Ray Bootin 732-477-0084, they are taking full responsibilty for spill and will clean. Cooperation is expected. Piper agreed. Firemans fund hired action Env as consultant. Steve Bouton 518- 441-7130. He will meet Piper on site at 2pm. 6/20/07- DEC Piper spoke w. Steve Bouton and he will send closure report. SOils have been excavated, sampled, backfilled and a new slab has been poured and sealed. 6/27/07- DEC Piper recieved and reviewed closure request. Based on remedial efforts and analytical endpoint results to date, no further action is granted. This spill is closed. See e-docs if warranted/

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

to Fred Caputo at Bayside (718-946-4000). He said the whole job was contracted out to AL Eastmond. Eastmond was to close out the tank, install the new tank and take care of the PBS paperwork. 11/8/05 Spoke to Margie Alimonda she said Bayside filled in the below ground tank and installed several above ground tanks. She said Bayside was to send in the paperwork. Spoke with a Margie at Bayside now Petco she had no record of work. Gave me name of Phil Tanella their installer in the area of the spill. I called Tanella and left a message. J Lister 11/9/05 Spoke to employee of Al Eastmond (718-378-7000) who left a message for Renee. JLOpen Issues: 1) Review of DEC database shows no PBS was ever filed (for a 1500 gal tank). - Question if this really was a 1500 gal tank on a 2 Family house in Brooklyn. 2) Apparently no soil boring samples were taken. Tank was just closed out and left. 09/6/06- Zhune sent TTF letter to: Fred Alimonda 357 40th Street Brooklyn, NY 11233 Margie Alimonda called to say that she will fax a copy of letter from Eastmond & Sons, Fuel Oil Tank Cleaning. Zhune got the fax but it was not visible. She will send it by mail. Zhune. Margie sent a visible job ticket from A.L. Eastmond. Eastmond close the underground tank. They filled it with sand. They installed 2(275) gallons AST in the basement. Petro tested the tank and failed. 09/02/09- Randy Austin and Zhune review the case and found no evidence that will indicate of petroleum release. Other than that tank test failure. Since tank fail test are no presumption not prove of spill. Therefore spil has been closed.

Remarks: TANK TEST FAILURE ON 1,500 GALLON UST

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/09/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704

Number of Days to Update: 151	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 03/10/2014
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/23/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695

Number of Days to Update: 14	Next Scheduled EDR Contact: 06/23/2014
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/26/2014	Source: Department of the Navy
Date Data Arrived at EDR: 02/28/2014	Telephone: 843-820-7326
Date Made Active in Reports: 04/24/2014	Last EDR Contact: 02/14/2014
Number of Days to Update: 55	Next Scheduled EDR Contact: 06/02/2014
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/04/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/14/2014
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 03/27/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/27/2014	Telephone: 518-402-9622
Date Made Active in Reports: 04/25/2014	Last EDR Contact: 03/27/2014
Number of Days to Update: 29	Next Scheduled EDR Contact: 06/02/2014
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 02/17/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 02/19/2014	Telephone: 518-402-9814
Date Made Active in Reports: 03/31/2014	Last EDR Contact: 02/19/2014
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/02/2014

	Data Release Frequency: Semi-Annually

State and tribal leaking storage tank lists

LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 02/17/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 02/19/2014	Telephone: 518-402-9549
Date Made Active in Reports: 04/02/2014	Last EDR Contact: 02/19/2014
Number of Days to Update: 42	Next Scheduled EDR Contact: 06/02/2014
	Data Release Frequency: Varies

HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549
Date Made Active in Reports: 07/14/2005	Last EDR Contact: 07/07/2005

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
KINGS, NY

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 360497 - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
JERSEY CITY

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.
