Architectural floor plan of the 19th-century building at 1000 Broadway. The plan shows a symmetrical layout with a central corridor and multiple rooms on either side. The building is situated on a street corner, with the street name 'BROADWAY' visible at the top. The plan includes various rooms, including a large central hall, several smaller rooms, and a kitchen area. The drawing is a detailed architectural sketch, showing the layout of the building and its surrounding streets.

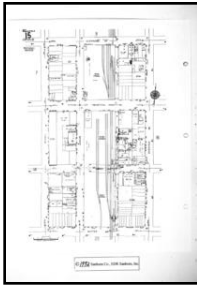

Architectural floor plan of the 23rd Street station. The plan shows a rectangular layout with a central platform area and tracks on either side. The station is labeled '23rd Street Station' and 'Platform'. The tracks are labeled 'Tracks'. A scale bar at the bottom indicates 0 to 100 feet.

Figure 1 is a detailed architectural floor plan of the 19th-century site of the 'Maison de la Vierge' in Paris. The plan shows a large rectangular building with a central courtyard, surrounded by various rooms and smaller structures. A north arrow is located in the top right corner. The plan is labeled with various numbers and letters, and includes a title block in the center.

Architectural floor plan of the 12th floor of the World Trade Center. The plan shows the layout of the towers and surrounding streets. The towers are labeled 1 and 2. The plan includes a north arrow and a scale bar. The scale bar indicates a distance of 100 feet. The plan is labeled '12th Floor' and 'WTC'.

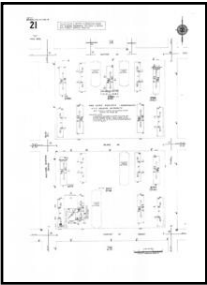

[illegible]

Architectural floor plan of the 19th-century building at 100 rue de Valenciennes. The plan shows a symmetrical layout with a central corridor and multiple rooms, including a large central hall and several smaller rooms on either side. The drawing is a detailed technical sketch, likely a reproduction of an original architectural drawing.

Architectural floor plan of the 22nd floor of the World Trade Center, showing the layout of the towers and surrounding area. The plan includes labels for various rooms and areas, such as '22nd Floor', '22nd Floor Lobby', '22nd Floor Office', '22nd Floor Restaurant', '22nd Floor Bar', '22nd Floor Gym', '22nd Floor Pool', '22nd Floor Spa', '22nd Floor Hotel', '22nd Floor Retail', '22nd Floor Parking', '22nd Floor Storage', '22nd Floor Maintenance', '22nd Floor Security', '22nd Floor Emergency', '22nd Floor Elevator', '22nd Floor Staircase', '22nd Floor Corridor', '22nd Floor Lobby', '22nd Floor Office', '22nd Floor Restaurant', '22nd Floor Bar', '22nd Floor Gym', '22nd Floor Pool', '22nd Floor Spa', '22nd Floor Hotel', '22nd Floor Retail', '22nd Floor Parking', '22nd Floor Storage', '22nd Floor Maintenance', '22nd Floor Security', '22nd Floor Emergency', '22nd Floor Elevator', '22nd Floor Staircase', '22nd Floor Corridor'.

29
FLOOR

Architectural floor plan of the 29th floor of the World Trade Center. The plan shows the layout of the towers and surrounding streets. The towers are labeled 29 and 30. The plan includes a north arrow and a scale bar.

This is a detailed architectural floor plan of the first floor of a building. The plan shows a central corridor system connecting various rooms. On the left side, there are several rooms, including what appears to be a large hall or auditorium at the bottom left, and several smaller rooms and offices along the top left. The right side of the plan features a large, open area, possibly a courtyard or a large hall, with several smaller rooms and offices adjacent to it. The plan is labeled with various numbers and letters, indicating specific rooms and areas. The overall layout suggests a complex building with multiple functional zones.

A detailed site plan for the proposed development at 2800 West 10th Avenue. The plan shows a large rectangular building footprint with multiple internal divisions, likely representing different building wings or units. To the north and east of the building are several parking lots with individual parking spaces marked. The site is bounded by West 10th Avenue to the north, West 11th Avenue to the south, and West 28th Avenue to the east. A north arrow is located in the upper right corner of the plan.

[illegible][illegible]

The site plan shows a rectangular development bounded by 1st Street to the north, 2nd Street to the south, 3rd Street to the east, and 4th Street to the west. The plan includes two large rectangular building footprints, one on the left and one on the right, separated by a central area. The left building footprint is labeled '1' and the right one is labeled '2'. There are several parking lots and areas labeled 'P' throughout the site. A north arrow is located in the upper right corner of the plan.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

VAN SINDEREN AVE. / SUTTER AVE.
BROOKLYN, NY 11212

COORDINATES

Latitude (North):	40.667900 - 40° 40' 4.4"

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 5 RCRA-LQG sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-SQG sites within approximately 0.189 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 11 RCRA-CESQG sites within approximately 0.189 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 07/11/2011 has revealed that there are 3 SWF/LF sites within approximately 0.189 miles of the target property.

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 07/05/2011 has revealed that there are 22 LTANKS sites within approximately 0.189 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 21 HIST LTANKS sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the TANKS list, as provided by EDR, and dated 07/05/2011 has revealed that there are 2 TANKS sites within approximately 0.189 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 07/05/2011 has revealed that there are

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 54 NY Hist Spills sites within approximately 0.189 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there

EXECUTIVE SUMMARY

are 46 RCRA-NonGen sites within approximately 0.189 miles of the target property.

EXECUTIVE SUMMARY

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 01/07/2011 has revealed that there are 3 ICIS sites within approximately 0.189 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there are 66 FINDS sites within approximately 0.189 miles of the target property.

MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the MANIFEST list, as provided by EDR, and dated 12/31/2010 has revealed that there are 61 MANIFEST sites within approximately 0.189 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 0.189 miles of the target property.

DEC Memo: DEC Ketani visited the site on 11/3/05. 11/3/05 - Raphael Ketani. I was present at the site as part of a DEC, DEE, and BECI enforcement action against the facility. They shut the site down for environmental reasons and for taking in stolen cars. I did my own investigation of the facility. They have a registered 10,000 gal. tank (PBS #2-218650), but they have 2 unregistered waste gasoline recovery tanks. These tanks receive gasoline from the car tanks they puncture before they dismantle or shred the cars. It is in the southern yard - address 1888 Pitkin Avenue. In this same yard they have an unregistered waste oil tank and 2 unregistered twin 275 gal. tanks in a converted refuse/demolition debris container. The twin 275 gal. tanks are used to fuel the vehicle cutting machine and contain diesel fuel. I gave Mr. Rob Sutton, the facility manager, a PBS registration form and told him that the four unregistered tanks had to be listed with DEC. Environmentally, there were a number of issues. Gasoline from the gasoline recovery station in the southern yard was running off the property and onto the New York & Atlantic

Rail Road property next door. Also, there was oil staining on the retaining wall and a pool of oil on the ground about 130 feet north of the southern end of the yard. There was a third oil stain on the retaining wall about 60 feet north of the southern end of the yard. At the northern yard (1885 Pitkin Avenue), there was spilled hydraulic fluid and lubricating oil on the floor and in the hydraulic line manifold conduit in the northern end of the cinder block building next to the car shredder machine. Additionally, there was a large pool of oily water on the ground just north of the cinder block building. This water must frequently leave the property because there were many stains on the retaining wall about 275 north of Pitkin Avenue. Also, there was a pool of oil on the ground below the stains and darkened oil absorbing socks on the ground. The people from the DEE took 7 total soil, fluff, and water samples. They did dye tests next to the gasoline recovery station and the wall next to the large pool of oily water to see whether the oil would flow off of the site where staining was visible on the retaining wall. The flowing dye showed that oil does leave the site through openings in the steel sheeting on top of the retaining wall. 11/7/05 - Raphael Ketani. I sent a contaminated soil letter to the company. 11/14/05 - Raphael Ketani. The facility manager for Gershow Recycling of Long Island called me to ask what Gershow had to do to respond to my November 7, 2005 letter. I explained to him how the spill sites needed to be investigated and cleaned up, and that the 5 small oil tanks had to be registered. 11/28/05 - Raphael Ketani. I spoke to Gershow's attorney, Andy Turro ((516) 741-6565), regarding my November 7, 2005 letter. We went over the letter and I clarified what I was asking for in the way of remediation and tank registration. He said either he or a consultant will get back to me. 12/7/05 - Raphael Ketani. I received a call today from Rich Nichols of ERM ((631) 756-8933) regarding the site. He wanted to discuss what DEC wanted in the way of remediation. I left a voice mail message. 12/8/05 - Raphael Ketani. I received a call from Mr. Nichols. He wanted to have a meeting to discuss the site and what DEC wants to have done. I agreed and we set up a meeting at LIC for 11AM. 12/9/05 - Raphael Ketani. I met with James A. Perazzo, Principal, and Rick Nichols, Project Manager, of ERM. We discussed what I was asking Gershow to do in my 11/7/05 letter. This included better housekeeping at the gas recovery station and at the Black Bear lubricant drum storage area, the removal of soil at 3 spill sites along the retaining wall of the southern half of the facility, and removal of soil at the 1 spill site along the retaining wall of the northern half of the facility, and registration of the 5 small (~275 gal.) tanks. 12/19/05 - Raphael Ketani. I received a copy of the registration form for the 2 gasoline storage tanks, 1 waste oil tank, and 2 diesel fuel tanks from Nick of PBS. 12/21/05 - Raphael Ketani. I reviewed the Dec. 19, 2005 letter from ERM in which they made a general proposal for a plan of action for resolving the environmental issues that I mentioned in my Nov. 7 letter. The only subject area that may need revision is the extent of the soil investigation and removal along the base of the retaining wall along the north and south parts of the property. I spoke to Doug Ashline of Albany DEE and he said that he saw oil contamination and the possibility of oil contamination all along the base of the retaining wall at both the north and south properties. He suggested that sampling be done all along the walls. I then spoke to Richard Nichols of ERM by cell (516) 903-7325 (office (631) 756-8933) and told him of the change in scope of the investigation that DEC wanted - from

S107416635

several soil investigation sites to a large number of sites. Mr. Nichols said that he and his boss, James Perazzo, will have to sit down again with Gershow and discuss a plan of action and investigation. He said he would get back to me. 12/22/05 - Raphael Ketani. I spoke to Faye Harris of DEE in Albany. She was the other soil sampler on 11/3 - the day of the raid on the site. She said she would send me the analytical results for the samples they took. I had a conference call at 2PM today with James Perazzo and Rick Nichols of ERM regarding the issues surrounding soil sampling and removal at the base of the retaining walls on the north and south sides of the property. They wanted to know the analyses of the samples that DEE took. I told them that the raid and sampling were done for the NYPD, not DEC, for a legal case. So, as far as I knew, I could not tell them the actual results (I didn't have the results, anyway). We discussed soil sampling locations, sample spacing, known areas of off-site contamination, railroad right of way access, where to take background samples and when the investigation plan should be submitted, but we didn't reach any conclusions. Mr. Perazzo and Mr. Nichols said they will put together an investigation plan and try to submit it by the middle of February 2006. 12/27/05 - Raphael Ketani. I wrote a letter to ERM regarding the issue of soil sampling and removal that we discussed during the 12/22/05 conference call. 1/3/06 - Raphael Ketani. I am sending out the letter today that I wrote on 12/27. 1/24/06 - Raphael Ketani. I hadn't heard anything from ERM. So I left a voice mail message for Rick Nichols. 2/28/06 - Raphael Ketani. I couldn't get ahold of Mr. Nichols. So I left a voice mail message. 3/1/06 - Raphael Ketani. Mr. Nichols called me up and said that the draft investigation and remediation plan is under review by Gershow. He said that he expects to submit the final plan to DEC by the deadline in the contaminated soil letter. 3/7/06 - Raphael Ketani. Today I received the March 7, 2006 phase II site investigation plan from ERM. I reviewed the plan and found that the proposed investigation satisfactorily addresses the issues in the Department's 1/3/06 letter. I will send out a plan approval letter today. 3/9/06 - Raphael Ketani. Mr. Perazzo of ERM called to say that Gershow submitted a bid for scrap metal from the Transit Authority. As part of their bid, they had to state whether there were any state actions against Gershow that were active. They answered "yes." As a result, they got a call from the city agency asking who was the state contact. They gave my name. Mr. Perazzo said that I may get a call from someone from this state agency. 3/27/06 - Raphael Ketani. I received a call from Al Albano, Environmental Field Engineer (718) 558-3144 for the LIRR. He asked what was going on with Gershow and the soil investigation. I asked him how the LIRR was involved. He said that the tracks are owned by the LIRR and the New York & Atlantic Rail Road just has an access agreement. I told him that Gershow has hired an environmental company to do soil sampling all along the base of the retaining wall from below the north end of the car shredder machine at 1888 Pitkin Avenue to the south end of 1885 Pitkin Avenue. I told him this will be followed by the usual soil analysis, data review, DEC review, and so forth. He said that he was out on thursday, 3/23, with Karen Staniewski - DEC Region 2 Investigator, and Richard Niedermeyer of the NYPD who were doing hand sampling for DRO (diesel range organics) and GRO (gasoline range organics). HE ASKED TO BE KEPT INFORMED AS TO WHEN THE ENVIRONMENTAL COMPANY SAMPLING WILL TAKE PLACE AND WHAT THE RESULTS ARE. I told him that this is an ongoing state and NYC investigation and that I can't

divulge the exact contaminant numbers, but I can tell him the general severity of the contamination. He said this would be alright, as he just needs general information for the LIRR law department. 4/20/06 - Raphael Ketani. I tried to get ahold of Mr. Nichols by phone, but could only leave a voice mail message. He will be out of the office from 4/21/06 to 4/24/06. Mr. Nichols called me back. He said the contract has been signed and he has the authorization to proceed from Gershow. Presently, the only hold up is authorization/permission to enter the New York and Atlantic Rail Road property. He is working on a "force application" as a first step in gaining access. Mr. Nichols said that as soon as it is in, he can apply for access to the NY&A RR property. 05/09/06-Hiralkumar Patel. Received call from Joy Charles (646-252-6333) from NYC Transit. she was asking about current position in this case. told her that Mr. Nichols has submit report to the Department and Mr. Ketani can help her if she needs more informations. 5/19/06 - Raphael Ketani. I received a call from Mr. Nichols today. He said that his crew has received the LIRR track safety training and the investigative work will start in 2 to 3 weeks. 6/6/06 - Raphael Ketani. Mr. Nichols called me today. He said that the investigation work will start this thursday or friday. 7/13/06 - Raphael Ketani. I spoke to Mr. Nichols. He said the soil sampling was finished in June. He is waiting for the analytical results. 8/7/06 - Raphael Ketani. I called up Rich Nichols (631) 756-8933 regarding the soil sampling. He said they received the results on 8/4/06 and they are just beginning to look at them. 9/14/06 - Raphael Ketani. Mr. Nichols called to say that the report has been put together and is under review by the client. He said that once it is finalized, then I will get a copy. 1/3/07 - Raphael Ketani. I reviewed the PBS case for the site. The 5 small oil storage tanks (2 gasoline storage tanks, 2 diesel fuel tanks, 1 waste oil tank) have been registered. They are listed in PBS case #2-610103. This is for the southern half of the facility. The northern half is listed with PBS case #2-218650. On 12/22/06, I received a document containing the 12/06 Investigation Report produced by ERM and the 12/06 Review of Investigation Results produced by ARG (Air Resources Group, LLC). The document had a cover letter dated 12/21/06 which was from the law firm of Meyer, Suozzi, English & Klein, P. C. (the law firm for Gershow). I reviewed the report and found that there were some very high SVOC results from soil samples taken at sites SB-6 to SB-10. However, these sites were not part of the Gershow property. The only site within the Gershow property which needs excavation is SB-01. This site had 11,000 ppb total xylene, 4400 ppb 1,3,5-trimethylbenzene, 14,000 ppb naphthalene, and 33,000 ppb 2-methylnaphthalene. The high VOC results for SB-01 (which is near the gasoline transfer station) suggest that even higher results would have been obtained had samples been taken just east of the station. Why there were no sampling stations along this part of the retaining wall is not known from the earlier case notes above. Additionally, the sample from site SB-13 (at the base of the wall and just east of a large pool of oily water on the Gershow property) had only 5 VOC hits, all of which were well below TAGM. Also, the SVOC hits for SB-13 were at the same general concentration as those for the other sites along the base of the retaining wall at the northern half of the facility. I let Karen Staniewski of DEC Law Enforcement (#6432) know about the investigation report and my analysis of the analytical results it contained. 1/4/07 - Raphael Ketani. I met with Ms. Staniewski regarding the DEE's analytical results and those of ERM.

GERSHOW RECYCLING (Continued)

S107416635

We compared the results. DEE's results were in the tens of thousands to hundreds of thousands of ppb for total gasoline range organics. The DEE results showed high levels of contamination at every site. Ms. Staniewski left me a copy of the slide show handout that Air Resources had given to enforcement staff during a recent meeting, a copy of the first round results for samples taken by DEE staff on November 3, 2005, and a copy of the results for samples collected on March 23, 2006. I sent a response letter to James Perazzo, Principal of ERM, and to Andrew Turro of Meyer, Suozzi, English & Klein, P. C. stating that there are very different results for samples taken at the same sites by DEE Albany and by ERM. I stated that the DEE samples show very high concentrations of GRO (gasoline range organics) and that new sampling must be done by ERM and that DEC wants to be there when the sampling takes place. 1/8/07 - Raphael Ketani. Mr. Albano, Environmental Field Engineer of the LIRR, called to request copies of the DEE GRO and DRO results. I sent them to him by FAX. 1/26/07 - Raphael Ketani. I received a FAXed letter from Mr. Turro explaining that the sampling results from the soil samples collected by ERM do not show that Gershow is the source of the contamination. Mr. Turro explains that the analytes are the result of historical fill in the area. He says, further, that DEC approved the sampling locations and plan and that ERM and his client have been diligent in their efforts to abide by the plan. Additionally, he says that DEE's testing and ERM's testing can't be compared. He claims that DEE tested for any possible light organic which could come from many different substances, and not necessarily from gasoline. Lastly, Mr. Turro asked for a meeting with staff from DEC before starting another round of sampling and testing. I spoke to Faye Harris of the Division of Environmental Enforcement in Albany (518) 402-9517/(607) 652-3607. We discussed what ERM's 12/2006 combined report contained and the discrepancy between the results ERM obtained and the results DEE obtained. She asked for a copy of the report and I sent her one (mail stop 5550). Next, I tried to contact Karen Staniewski, Investigator Region 2 Law Enforcement (718) 482-6432, but could only leave a voice mail and send an e-mail. A STIP with its cover letter and CAP was submitted to Randall Austin, Chief Spills Engineer Region 2 for his signature. 1/31/07 - Raphael Ketani. Mark Sanza, ALJ (518) 402-9006, of DEC called regarding the case. He wanted to know whether he had all of the documentation in the case file. 2/5/07 - Raphael Ketani. I sent the STIP with all of its attachments. 2/13/07 - Raphael Ketani. I received a FAXed letter from Katherine Keslick of Air Resources Group, LLC (ARG) (518) 452-7000 which was sent to Fawzy Abdelsadek of Region 2 Legal Affairs. The letter regarded a FOIL request for the case files for the site. 2/20/07 - Raphael Ketani. Ms. Keslick called requesting a copy of the data tables for the gasoline range organics and the diesel range organics that were generated by Ms. Harris of DEE. I told her to talk to Ms. Harris and I gave her the phone number. I called Ms. Harris and told her what Ms. Keslick wanted. She said she would talk to her boss and see whether she can give Ms. Keslick the information she wants. I received a FAXed letter from Mr. Turo dated 2/16/07 expressing disappointment that DEC was refusing to meet with him and his consultants so that he can make a presentation of the data that ERM collected. He requested that the deadline for returning the STIP agreement be extended to 3/28/07 so that he can present the data. He also asked that DEC supply the numbers and locations of the samples collected by DEC in 11/2005, the type of sample taken, the method of

GERSHOW RECYCLING (Continued)

S107416635

laboratory analysis, and further information concerning the March 23, 2006 spill. I wrote a draft response letter to Mr. Turo's 2/16/07 letter and submitted it to Randall Austin, Chief Spills Engineer Region 2. Mr. Austin talked to me about the letter at the end of the day. He told me to pass the draft on to Faye Harris of DEE before sending it so that she could make any comments and changes. 2/21/07 - Mr. Turo called me late in the afternoon. He asked for an extension of the STIP submission deadline and for a meeting between DEC, his consultants and himself to explain the data that was collected. I told him that I couldn't promise anything and that I would talk to DEC's Legal staff and to the DEE in Albany. 3/12/07 - Raphael Ketani. Today I received a letter dated 3/5/07 from ARG Group, LLC appealing the denial of the FOIL request and asking that the denial be overturned. They stated 7 reasons why they believe the information should be released. They attached a copy of their original FOIL request contained in their 2/13/07 letter to Fawzy Abdelsadek of DEC Region 2 Legal, and a copy of the original application for records. I made copies of this letter and attachments and sent them to Karen Staniewski of DLE Region 2 and John Urda of Legal Region 2. 6/1/07 - Raphael Ketani. I received a copy of the signed STIP Agreement. They have 14 days from today to meet with me on site for selecting the new soil sampling points. They have 30 days from today to do the sampling in my presence. 6/12/07 - Raphael Ketani. A meeting was held today between Jim Perazzo of ERM, Dave Alexander of ARG, Sander Bonnell of ARG, and myself. We discussed where the DEE had sampled and where ARG had sampled. We then compared the site locations to determine if further sampling was necessary at these sites. Mr. Perazzo also stated that the 30 day deadline for submission of the investigation report was not practical. He said that it will take maybe 3 weeks to get permission from the LIRR to do work next to the tracks with one of their monitors, 2 days to sample, 2 to 3 weeks to get the results back, and a little more time to put together the SIR. I asked him how much time he needed. He said 60 to 70 days. I said that will be alright with the DEC provided Gershow, ERM, and ARG stick to this new deadline. Next, we went to Gershow and met Rick Nichols of ERM and Joe Petuchio of Gershow. Everyone then went onto the LIRR/NY&A tracks. Twelve (12) sites were chosen for soil sampling by DEC and ERM and ARG. Locations that had been previously sampled by back hoe and disturbed were avoided. Mr. Perazzo said that DEC will get new maps showing the surveyed locations of the new sampling sites. He will also send an official letter memorializing everything that was agreed upon during the meeting and the field visit. 6/27/07 - Raphael Ketani. I received the June 26, 2007 Supplemental Sampling Plan and Revised Schedule produced and submitted by ERM. I reviewed the plan and revised schedule and found them to be acceptable. 6/28/07 - Raphael Ketani. I sent a letter to ERM indicating that the plan and revised schedule were found to be acceptable. However, I wrote that digging with a backhoe to obtain samples was to be done only as a last resort. 7/27/07 - Raphael Ketani. I spoke to Mr. Perazzo at ERM (631) 756-8900. He said that he has been having difficulty getting access to the NY&A railway. He said he has been calling Rose Connor at the track department at (718) 497-3023, ext 2313. However, she never returns his calls. He said that the equipment is ready to be mobilized. Rose's address is New York & Atlantic Railway, 68-01 Auto Road, Glendale, NY, 11385. He said he will let me know whether he has any success. 8/6/07 - Raphael Ketani. Mr. Nichols left a message that the only person remaining who needs track safety training is the

GERSHOW RECYCLING (Continued)

S107416635

geoprobe operator. He said this person will get the training soon. Other than this, Mr. Nichols said that he has a draft access agreement and he plans to execute it this week. He expects that they will be ready to go by the end of August. 8/13/07 - Raphael Ketani. I spoke to Mr. Nichols (631) 756-8933 regarding the dates for the drilling. He said that, right now, it looks like August 29 and 30. He said he will keep me posted. 8/15/07 - Raphael Ketani. Mr. Nichols called to say that the last week in August won't work for scheduling the sampling. He suggested possibly doing the work during the last week in September or the first two weeks in October. I told him that would be fine. 8/22/07 - Raphael Ketani. Mr. Nichols called and said that the soil sampling will take place October 9 to 12. I told him that would be fine. 8/29/07 - Raphael Ketani. Today I received the Revised Schedule-Supplemental Sampling Plan letter dated 8/22/07. 8/30/07 - Raphael Ketani. I reviewed the Revised Schedule letter dated 8/22/07 and found the change in investigation starting date to October 9, 2007 to be acceptable. I sent a response letter to Mr. Nichols stating that DEC accepted the change in schedule. 9/26/07 - Raphael Ketani. I spoke to Mr. Nichols today. He said that they did the utility markout yesterday. He said that everyone will meet at 9:30AM on the ninth. 9/27/07 - Raphael Ketani. Today I received a 9/21/07 letter from Rick Nichols of ERM requesting the analytical data, field notes, methodology, and any supporting data for the soil samples that were taken by staff from the Albany office of DEE on 11/3/05. 9/28/07 - Raphael Ketani. I spoke to Sara Komonchak of Region 2 BECI regarding the data request by ERM. She said that since the criminal case is closed, ERM should make a FOIL request to DEE, Albany for the data. I called up Mr. Nichols and let him know this. There were no other cases or involvement by other divisions, aside from Spills. 10/1/07 - Raphael Ketani. I tried to call Richard (Dick) Dana of Albany, DEE (518) 402-9518 regarding whether his office had any involvement with Gershow, but I could only leave a message. 10/9-10/07 - Raphael Ketani. I monitored the soil sampling along the retaining wall that was performed by ERM. I did my own soil descriptions for DEC. ERM collected soil samples at each of the 12 locations for laboratory analysis. However, at the next to last site, refusal was encountered during 5 attempts to sample. So only a very small portion of fill debris was recovered. 11/15/07 - Raphael Ketani. Mr. Nichols called up requesting a 2 week extension of the submittal due date for the Site Investigation Report. He said that the G-C machine failed while the samples were being analyzed and so the data is coming in slowly. I told him that the due of December 14 would be alright. 11/21/07 - Raphael Ketani. Today, I received a letter dated 11/15/07 from Mr. Nichols and Mr. Perazzo of ERM memorializing our agreement to extend the submission date of the Investigation Summary Report to 12/14/07. The letter also requested written confirmation from DEC that the new submission date is acceptable, as per the conditions of the STIP Agreement. I sent a response letter out today. 11/30/07 - Raphael Ketani. Sara Komonchak, Region 2 Investigator, and Lt. John Mattera, her supervisor, came over and inquired as to whether Gershow will have contaminated soil to remove and when the soil analytical results will be received by DEC. I told them that the investigation report is due 12/14/07 and that I saw very contaminated samples and a lot of oil soaked debris below the retaining walls that will need to be removed. They also wanted to know the dollar amount that it will cost to remove all of the contamination. 12/4/07 - Raphael Ketani. Ms. Keslick (518)

GERSHOW RECYCLING (Continued)

S107416635

452-7000 of Air Resources Group called to request a copy of a map depicting where Albany DEE personnel had collected environmental samples at Gershow for the 2005 and 2006 sampling. I told her that I had made up a map for myself for the 2005 sampling only, but that we didn't have anything official or correctly drawn in Region 2. She said she will contact Albany DEE and see if there is such a map.

12/10/07 - Raphael Ketani. Mr. Nichols (631) 756-8933 called to request an extension of the deadline for submission of the Investigation Summary Report. He said that he has various groups to respond to and the comments for all of the groups are not ready. He asked that the deadline be extended to 12/21/07. I told him this would be fine. I sent a letter memorializing the deadline extension.

12/13/07 - Raphael Ketani. Mr. Nichols called and requested another extension of the deadline for submission of the Investigation Summary Report. He requested that the deadline be extended to 1/15/08. I told him that DEC will grant this extension, but to keep us informed as to whether this deadline can not be met and to be ready to explain why. I sent a letter memorializing the deadline extension.

1/11/08 - Raphael Ketani. Mr. Nichols called requesting another deadline extension for submission of the SIR. I asked him what was holding up submission of the report. He said that ARG (the other consulting company involved) was telling ERM that they needed more time for data review. I told Mr. Nichols that DEC should have been given the raw data a long time ago so that we can conduct our own review of the data. I reminded him that there have been several extensions already and that there is a signed STIP agreement in the file which had set deadlines for activity on the project so that progress could be made in the investigation and cleanup. Mr. Nichols said he was aware of the STIP, but that there was nothing he could do about speeding up the data review with so many parties involved. I asked him how much time was needed. He said 2 weeks. I told him that DEC will give a one week extension to January 22. He said that was fine. I told him that DEC will send a letter to this effect. Mr. Nichols thanked me for the extension and the conversation ended. I informed Sarah Komonchak of Region 2 BECI about the extension.

1/16/08 - Raphael Ketani. I sent a letter to Mr. Nichols granting the extension to 1/22/08, requesting the raw data and stating that this is the last extension.

1/23/08 - Raphael Ketani. Today I received the Investigation Summary Report dated 1/22/08 and produced by ERM.

1/29/08 - Raphael Ketani. I finished my review of the ISR. Based upon the analytical results in tables 1 and 2, the PID field readings indicated in the boring logs, and the site inspections I undertook revealing the presence of abundant shredder fluff and oil contaminated debris, there is a need to remove contaminated soil and debris in many places along the base of the retaining walls north and south of Pitkin Avenue. Mr. Perazzo called and requested a meeting with DEC to discuss the results in the ISR. I told him that DEC agrees to meet with ERM in the near future on a date to be set.

2/19/08 - Raphael Ketani. The meeting took place as scheduled. In attendance were James Perazzo of ERM and Sander Bonvell and Dave Alexander of ARG, the consultants for Gershow. The consultants explained that the contamination was not from Gershow. They explained that the East New York Industrial Park has heavy general contamination. They added that the contamination was old in origin, as shown by the analytical results in the 1/22/08 Investigation Summary Report. The contamination was, supposedly, from coal which was still in the subsurface, ash from an old ash handling company, a building nearby that had burned, and companies that had

GERSHOW RECYCLING (Continued)

S107416635

existed along the present location of the elevator train. They added that some of the contamination was also from activities along the railways. This included creosote from railroad ties, leaking diesel locomotives, oil sprayed to control vegetation, and oil soaked rope that was burned to lessen the tension on continuously welded rails. I pointed out that there are only a small number of SVOC analytes with hits in the several thousand parts per billion range and a large number of VOC analytes with hits two orders of magnitude greater. I told them that the total xylenes and 1,2,4-trimethylbenzene hits were in the hundreds of thousands of parts per billion range. I added that the total VOC concentrations were over one million parts per billion in some soil samples. They pointed out that the analyses didn't represent gasoline from Gershow's cars as there was no MTBE, no toluene, and no benzene. They said that Gershow has been operating during the time when MTBE was in use. I told them that, still, this high a concentration of VOCs would not come from diesel fuel or creosote. Mr. Alexander then went on to explain that the ISR discusses the composition of creosote and how some types would loose 20 pounds of VOCs from each railroad tie. They stated that the diesel engines that pushed the hopper cars onto the siding next to the retaining wall were leaking diesel. Lastly, they presented a series of 6 chromatograms. They said the chromatograms were from the soil samples taken by DEE Albany and that DEE had given them the diagrams. They explained that the peak clusters occurred after those for gasoline and diesel fuel. They said the clusters showed that the contamination was definitely old material. I told them that I understood what they were saying, but that I would have to consult with other technical staff in DEC regarding the comparison of junkyard contamination and railroad contamination. With that, the meeting ended. Mr. Perazzo asked for another meeting to discuss the data. I told him that I couldn't give him a definite date, but that DEC is willing to have another meeting. 2/25/08 - Raphael Ketani. Today, I received a very thick package of sample analyticals with chromatograms from Mr. James Perazzo (631) 756-8900. The package was generated by Lionville Laboratory Inc. I looked the package over, but didn't see anything exceptional. 3/12/08 - Raphael Ketani. Since 2/19/08, I discussed the case and the analytical results with staff from DEC. I also re-reviewed the December 2006 Review of Investigation Results produced by ARG, and the January 2008 Review of Spill Investigation Results produced by ARG. As a result of my discussions and analysis of all of the information available in the case file, I wrote a letter to Mr. Perazzo stating that the DEC wanted all of the material along the base of the northern retaining wall that was contaminated by oil from Gershow Recycling and all of the shredder debris removed. Also, I stated that all of the oil contaminated soil at the locations of SB-27 to SB-30, and SB-36 must be remediated. I set a deadline of April 14 for the work to start and a deadline of 30 days from the date of completion of the cleanup work for ERM to send DEC a remediation report. The letter went out today. 3/21/08 - Raphael Ketani. Mr. Perazzo had sent an e-mail explaining that he was surprised that DEC had sent a letter (dated March 12, 2008) requesting that Gershow begin the cleanup of the soil and debris. He said he thought everyone had agreed to have another meeting to discuss the data with staff from the Albany DEE office in attendance. I wrote that I didn't think another meeting was necessary to rehash the same data. I explained in the e-mail that the data in the December 2006 report for sites 12A, 14A, and 17A showed that the

EPA ID Number

GERSHOW RECYCLING (Continued)

S107416635

railroad ties were not the source of the volatiles. So, the volatiles seen in the soil samples from the base of the retaining wall south of Pitkin Avenue were the result of spillage from Gershow, or at least Gershow's predecessor. I also stated that all of the oil contaminated debris north of Pitkin Avenue and shredder fluff had to be cleaned up. The letter I sent gave them until April 14, 2008 to begin the remediation. A copy of my e-mail is in the paper file. 4/23/08 - Raphael Ketani. I still have not received the signed STIP from Gershow or its attorneys. 5/15/08 - Raphael Ketani. I received the Remedial Action Plan from ERM dated 5/14/08. I reviewed the plan and found it generally acceptable. However, they didn't mention taking confirmatory soil samples to see whether the ORC reduced the contamination to about TAGM, and they didn't discuss doing additional injections in order to reduce the contaminant level. I sent a letter to ERM stating that DEC is approving the Plan, but that they must do confirmatory soil sampling for locations SB-27 to SB-30, and SB-36 to see whether the contamination is at or below TAGM levels. This was previously stated in DEC's 3/12/08 letter to ERM. Also, I will state that one round of treatment may not be enough to reduce the contamination levels to TAGM and so they may need more rounds. The letter went out today. 7/21/08 - Raphael Ketani. Today I received by e-mail a Remediation Action Plan dated July 18, 2008. I reviewed the plan. They agreed to remove the oil contaminated debris at sites SB-32 to SB-36, to do soil treatment at SB-28 to SB-30, and SB-36, and to turn SB-27 and mix in treatment solution. They will do confirmatory soil sampling where the solution was injected. However, they plan to inject many times more solution than is necessary to treat the soil. This may result in essentially trading one contaminant for another and starting a contaminant plume where none existed before. I tried to contact James Perazzo (631) 756-8900 regarding the plan to inject excessive amounts of treatment solution, but could only leave a message. 7/22/08 - Raphael Ketani. Mr. Perazzo called me back. He explained why ERM was planning to use the large stoichiometric percentage amounts of treatment solution. He said that ERM did a series of calculations based upon a number of assumptions about the amount of contamination in the subsurface, other assumptions, and how the treatment solution will work. The calculations involve 11 steps and I included a copy of them in the case file. I considered what he had said. I told him that the calculations and the remediation plan seemed reasonable. 10/16/08 - Raphael Ketani. Today I received a copy of the executed Order on Consent which was signed today by Suzanne Mattei, Region 2 Director. The work specified in the approved Remedial Action Plan is supposed to begin on October 25, 2008. 11/13/08 - Raphael Ketani. I tried to reach Mr. Perazzo to find out whether the remediation work had begun, but could only leave a message. 11/14/08 - Raphael Ketani. Mr. Nichols (631) 756-8933 called at 4:30PM. He said that ERM received verbal approval for access to the railroad tracks from New York & Atlantic Railway. Everyone who will be involved in the cleanup and remediation has received the LIRR training. Redox Tech was subcontracted to do the solution treatment injection. Metro was subcontracted for the debris removal. The work is expected to take place from 12/8 to 12/12/08. The first 3 days will involve debris removal and soil excavation. Solution injection will take place on 12/11 and 12/12. 12/5/08 - Raphael Ketani. I received an e-mail today from Mr. Nichols. He e-mailed to confirm that the work will be starting at 8:00AM on 12/8/08. A copy of the e-mail is in the file.

GERSHOW RECYCLING (Continued)

S107416635

12/8/08 - Raphael Ketani. I visited the site today to watch the beginning of the oily debris removal. The day was very sunny and dry, but the temperature was 19 degrees fahrenheit. I met Rick Nichols of ERM and Sander Bonvel of ARG. A crew from Metro Environmental Contracting Corp. (631) 884-1880 was on site as the equipment contractor. I took pictures and they are in the E-docs. The area of SB-29 and SB-30 (below the former gasoline transfer station) had been staked out for the locations where treatment solution injection will take place. The area from SB-32 to the south edge of SB-34 had been cleared of debris. There was no oil staining. They were about to begin to dig into the mound of material at SB-34. The top layer of material at this location was wet shredder fluff mixed with railroad rails and extraneous metal. The fluff consisted mostly of foam rubber, plastic, wood, car tires, small pieces of shredded car metal, pieces of railroad ties, gravel, rocks, a ball bearing, and other unidentifiable material. The PID meter didn't detect any VOCs. The layer below the wet fluff was black with oil contamination and had a strong oil odor. However, the odor was one of old, weathered, diesel oil or motor oil. The PID meter registered a minimum of 5 ppm. The backhoe excavator dug out the oily debris. This material was laid onto a thick plastic tarp. There were old tires, foam rubber, wood, gravel, sand, dirt, plastic, old absorbent socks, and metal. The debris excavation continued until 2:00PM. Mr. Nichols of ERM said that they will continue the digging tomorrow. After this time, they started transferring the oily debris to the plastic sheeting under the elevated train. This is the location from which the oily debris will be put onto trucks for removal to disposal sites. The tires and metal (including the rails) will be given to Gershow for recycling. I watched the debris transferring for awhile. The backhoe operator didn't spill the material. There was a laborer on hand to pick up any oily debris that was dropped by the excavator. After this I left.

12/9/08 - Raphael Ketani. I returned to the site today to monitor the continuation of the cleanup. Mr. Nichols told me that they were done removing the contaminated waste from the location of SB-34. I looked at the location and told him that some more waste could be removed. Mr. Nichols told me that the lawyers had told him to just go down to the railroad grade of the siding track nearby. He said that he was at the grade and that the digging was done. I told Mr. Nichols that the DEC wanted as much of the contaminated debris to be removed as is possible. I told him that the remainder of the debris here is easy to reach. He said that he will tell the backhoe operator to try and remove more debris. The backhoe operator complied and removed a little more debris. However, he struck an intact rail road siding track under the waste. The backhoe operator tried to scoop up the waste on either side of the track and between the rails, but kept getting stuck against the rails and kept hitting the concrete retaining wall. After a half hour of trying, I saw that progress wasn't being made. So I told Mr. Nichols to stop and I examined the waste area. I dug with a shovel and found that the remaining waste and track were sitting on a dense layer of what appeared to be clay. This explained why I had seen water pooling on the surface of the waste yesterday. I tried digging deeper into the soil, but it was very dense and the going was difficult. The object of the debris removal here was to dig down to remove the material that exceeded the TAGM limits. This was about the average 2 foot thickness of the contaminated waste (see the 1/22/08 ERM report for the analysis of the material at this depth). They had removed what was required and

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

GERSHOW RECYCLING (Continued)

S107416635

had reached the lateral limits of the waste. Given these factors, and considering that the site is a railroad right of way, I told Mr. Nichols that the DEC was satisfied that enough waste had been removed. Mr. Nichols then had the waste covered over by the uncontaminated shredder fluff. The rest of the day was spent moving the waste to the truck loading staging area under the elevator train. The total waste volume was about 37 feet long by 14 feet wide by about 2 feet thick. Mr. Nichols said that he thought he had excavated about 100 cu. yds. of material. 12/10/08 - Raphael Ketani. When I arrived today, the crew from Metro Environmental Contracting Corp. was busy moving new waste that had been dug up from SB-35 and digging out the remainder of the waste at the location. They ended up digging out an area of 14 feet by 9 feet and from 2 to 6 feet of depth (see pictures in E-docs). The material consisted of all kinds of metal, a tire, wood, plastic bottles, shredded car material, sand, gravel, and two long metal pipes. The material from about 2 feet below the surface was saturated with oil. There was a little standing water. The backhoe operator hit a concrete slab in the bottom of the pit and couldn't go any further. He scraped the slab and revealed a rail embedded in it. I asked Mr. Nichols to have the backhoe operator clean off the slab as best he could and then fill in the hole. The limit of the waste seemed to have been reached lengthwise and widthwise. Mr. Nichols estimated the amount of waste dug out to be about 50 cu. yds. After the pit was filled in, Mr. Nichols instructed the backhoe operator to dig a small test pit at SB-36. The object of the test pit was to see what type of waste had resulted in the TAGM exceedences for naphthalene (33000 PPB) and 2-methylnaphthalene (160,000 PPB) in the soil sample from the one foot to three foot interval. A small pit was dug to about 3 feet down at the location where the initial geoprobe boring had been performed. There was a sulfurous and hydrogen sulfide odor. Mr. Nichols measured the vapors in the bottom of the pit (where the soil sample had been taken) as 4 ppm with the PID meter. The waste was only slightly moist and consisted of mixed waste of metal, wood, glass, car parts, gravel, sand, and a tire, with a significant matrix of mixed ash, cinders, and clinker - with some possible coal fragments. The matrix of possible coal debris and combustion debris was the likely source of the low level benzo series and combustion product exceedences. As far as could be determined, the source of the two exceeding contaminants was probably oil from the few car parts (one of which looked like it belonged on a transmission). Since the ground needed to be kept firm for the solution injection truck to set up here tomorrow, I told Mr. Nichols that the test pitting was enough for now to determine what constituted the source of the shallow exceedences. Mr. Nichols suggested that we should proceed with deep solution injection as planned and come back later to treat the shallow horizon. I told him that sounded fine. The rest of the day was spent moving the newly dug up waste to the staging area under the elevator train. 12/11/08 - Raphael Ketani. Today, the objective was to do soil treatment at SB-27 and solution injection at SB-28 to SB-30 and SB-36. The recipe for the Kloxure treatment solution was 320 lbs. (60 gals.) of 25% sodium hydroxide (NaOH) with 661.2 lbs. (12 bags at 55.5 lbs./bag) of sodium persulfate (Na₂S₂O₈) and 60 gals. of water. The mixture was mixed into the surface soil at SB-27 by using a backhoe, and immediately started generating heat. The injections at the other sites were performed by mixing the solution in a large plastic tank and then pumping it with 60 lbs. of pressure at depth through

GERSHOW RECYCLING (Continued)

S107416635

geoprobe piping. There was no short circuiting of the solution, nor any interference below ground with the injecting. Mr. Nichols took waste samples for characterization. He said that he will request a quick (5 to 7 day) turnaround on the analyses. He said that he expects to get the results by December 22. After this I left the site. 1/6/09 - Raphael Ketani. Mr. Nichols sent me an e-mail that the confirmatory, post-treatment soil sampling will take place on 1/8/09. 1/8/09 - Raphael Ketani. Soil sampling took place today. In attendance were Mr. Nichols and Mr. Bonvel. The geoprobe operator cored the samples. PID readings at the respective contamination zones at each sampling location were much lower than previously detected. Mr. Nichols used a cleaned shovel to take a sample at SB-27. Mr. Nichols also decontaminated his sampling spoon at each location before taking a sample. All of the sampling appeared to have been done properly. We will now wait for the lab analyses. 2/3/09 - Raphael Ketani. Mr. Perazzo called me today. He said that they are getting the analytical results back a little at a time for the confirmatory samples. He said that at SB-36 they treated the wrong horizon. They treated the 14 to 16 foot horizon, rather than the contaminated horizon at 1 to 3 feet down. He said that they will go back and treat this shallow horizon and later take a confirmatory sample. I told him that will be fine. Mr. Perazzo said that he will send a letter to DEC explaining the mistake and the actions that will be taken to resolve the matter. 2/4/09 - Raphael Ketani. I reviewed ERM's 2/3/09 letter. It concerned treating the one to three foot interval at boring site SB-36. I found this modification to the STIP CAP and the RAP to be acceptable. I sent an e-mail approving the modification to inject. 3/12/09 - Raphael Ketani. I tried to contact Mr. Nichols (631) 756-8933 regarding receiving the data for the first round of post-treatment confirmatory samples, but could only leave a message. 3/16/09 - Raphael Ketani. I spoke to Mr. Nichols. He said that the treatment of the top three feet at SB-36 will take place either on March 25th or the 26th. He said that the load out of the dug up oily waste will also take place at this time as the application to dispose of the waste was accepted by Grows Landfill at Tullytown, PA. They will have the backhoe there for the treatment solution mixing. So it will be convenient to do both operations. I asked him how the post treatment soil analytical results were. He said that the treatment solution worked 90% to 98%. He said that once they have the post treatment results for SB-36, then they will send DEC the remediation report. 3/20/09 - Raphael Ketani. Mr. Nichols sent me the following e-mail today: As a follow-up to our conversation on 3/16, I am writing to confirm that we are scheduled to load-out the waste soil/debris associated with Spill No. 0509318 on Thursday 3/26/09. In addition, we intend to treat the upper (1-3 foot) interval at SB-36 with Kloxur in accordance with our request for modification of the Remediation Action Plan (RAP) and Corrective Action Plan (CAP) submitted on 3 February 2009. 4/21/09 - Raphael Ketani. I spoke to Mr. Nichols (631) 756-8933 regarding the site and any progress. He said that they will take the confirmatory soil sample from SB-36 this Friday. Then they will have a 7 day turnaround on the analytical results, and then they will finish the remediation report. He hoped to have the report submitted to DEC in a few weeks. 6/17/09 - Raphael Ketani. I spoke to Mr. Nichols. He said that the soil treatment report was submitted to Gershow and their lawyer for their review several weeks ago. He doesn't know why they haven't gotten back to ERM with an approval, or a disapproval with comments.

He will call them and see where they are with their review and let them know that DEC is anxiously awaiting the report. 7/31/09 - Raphael Ketani. I tried to contact Mr. Nichols, but he was out. I left a message inquiring about the status of Gershow's review of the second round soil treatment report. 8/6/09 - Raphael Ketani. Mr. Nichols called to say that he received the "go ahead" to send the remediation report to DEC. He said that DEC should receive it by 8/10/09. 8/10/09 - Raphael Ketani. Today I received the 8/7/09 Remedial Action Report and began my review of the document. Soil treatment was conducted at a number of locations, as was required. The 1/8/09 soil sample analytical results were as follows. The sample from location SB-27 had three analytes that were above TAGM, but only total xylenes was significantly above the limits (7,900 ppb). SB-28 at the 9' to 10' interval had 1,2,4-trimethylbenzene at 20,000 ppb, and 1,3,5-trimethylbenzene at 6,300 ppb. SB-30 had 1,2,4-trimethylbenzene at 22,000 ppb, 1,3,5-trimethylbenzene at 6,900 ppb, and total benzenes at 6,800 ppb. Based upon the first round of post-treatment soil analytical results, and the agreement in the 7/18/08 revision of the 5/14/08 RAP to use the Part 375 standards for comparing the results, I drafted a Spill Closure Letter to Mr. Perazzo of ERM. The letter was sent to Randall Austin, Chief of the Spills Unit, for his approval. 8/12/09 - Raphael Ketani. Mr. Austin approved the letter and it went out today. Based upon the documentation in the case file and the post-treatment analytical results in the case 8/7/09 Remedial Action Report, I am closing the spill case.

Remarks: OIL AND GAS IS SPILLING ONTO NIEGHBORING RAILROAD SITE: IT IS TWO GIANT WRECKING YARDS: THERE ARE A FEW SMALL POOLS OF ANTIFREEZE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO" 5/10/04 - AUSTIN - TRANSFERRED FROM TOMASELLO TO DEMEO - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 8/10/09- Complete File Review by intern EM Ibeh and DEC Vought. The file being reviewed in SP# 9505451, PIN# 94296, spill date- 8/2/95 at Junius St. and Belmont Ave., Brooklyn. Unknown amount of spill. No spills or PBS records were found. 6 pictures taken of the spill site were taken through a mesh gate thus not very clear, but they clearly show what seems to be oil draining into sewers on the road. 1 picture was taken at the junction of Junius St. and Pitkin Ave. Note that pictures show spill on asphalt parking lot and impacting drain. No soil affected as per pictures. 8/2/95- (2) Non-hazardous waste manifests 8/3/95- Non-hazardous waste manifest 8/7/95- Pedneault Associates Analysis report: SVOCs ND in 3 sewer manways, PCBs ND in 3 sewer manways, Benzene ND in sewer manway #1, #2 and #3. 8/9/95- Fax transmittal from F&N to DEC Tibbe requiring US EAP generator ID number for disposal purposes. 8/10/95- Pedneault Associates to DEC: Analysis of sewer manway #3 sample for fingerprint identification contained solvents and a heavy weight oil. 3/14/00- Final ISR to Albany. 08/14/09-Vought-Vought and Ibeh reviewed site with DEC Austin and spill closed as spill on asphalt with impact to sewer that was addressed by PIN contractor. Ibeh spoke with NYSOAG Bechard and they had no record of spill. Due to age of spill (greater than six years) cost recovery not possible due to statute of limitations and no known RP. Spill closed by Vought. Need for final ISR awaiting callback from DEC Farrar. 08/18/09-Vought-Spoke to DEC Farrar and as "Att. Gen. Close Date" box is filled out in UIS, no Final ISR needed.
Remarks: REQUESTING IMMEDIATE DEC RESPONSE - DEP ON SCENE WAITING FOR DEC ARRIVAL - ALSO CALL WITH ETA PHONE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
