Requesting copies of the monthly minutes of the NYNJ Port Authority for the years of 1985, 1986, 1987 and 1988.

THE PORT AUTHORITY OF NY & NJ

FOI Administrator

November 5, 2013

Ms. Karyn Kullas
Investigative Network Inc.
424 E. Gurley St.
Prescott, AZ 86301

Re: Freedom of Information Reference No. 14311

Dear Ms. Kullas:

This is a response to your September 27, 2013 request, which has been processed under the Port Authority's Freedom of Information Code, for copies of the Port Authority monthly minutes for the years of 1985, 1986, 1987 and 1988.

Material responsive to your request and available under the Code can be found on the Port Authority's website at <http://www.panynj.gov/corporate-information/foi/14311-O.pdf>.

Please refer to the above FOI reference number in any future correspondence relating to your request.

Very truly yours,

Ann L. Qureshi
FOI Administrator

 Joseph L. Vanacore, Director of Tunnels, Bridges and Terminals
 Barry Weintrob, Director, Finance Department/Comptroller
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Treasurer
 Thomas C. Young, Jr., Principal Information Officer, Public Affairs

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of December 13, 1984. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on January 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on January 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on January 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on January 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 1/10/85)

1985 Budget - January 1 through February 28, 1985

It was recalled that the Board, at its meeting on December 13, 1984, acted to confirm the authority of the Executive Director to make expenditures and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1985 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). This action was taken when it became apparent that, in connection with the review of the items constituting the proposed 1985 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary budget materials in time for the Board to consider any recommendations made by the States for possible revisions to the proposed 1985 Budget before the January 10, 1985 meeting of the Board. It was reported that the process is continuing and has not yet been concluded.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1985 Budget presented to the Board on December 6, 1984. It is expected that such payments will not exceed \$150 million per month through February 28, 1985.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through February 28, 1985 to make expenditures at a rate not to exceed \$150 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1985 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1984.

(Board - 1/10/85)

Engineering Department - Retention of Professional Services on an As-Needed Basis for the 1985 Calendar Year

It was reported that since 1977, the workload necessary for the Engineering Department to accomplish the capital and expense programs of the Port Authority and PATH has steadily increased and surpassed its available permanent staffing. Work requirements have been met by a combination of the use of professional and advisory service firms, temporary help (job shop) and technical service firms, overtime, vacation deferral and rescheduling of non-critical work when possible. A review of the planned workload for 1985 has indicated an overdemand, estimated at more than \$30 million prior to budgetary adjustment, which cannot be handled by existing permanent staff. Rather than hire a significant number of additional permanent staff to meet this workload, the retention of professional services on an as-needed basis provides the required flexibility for responding to this overdemand. During the last five years, the approximate total commitments for outside professional services retained by the Engineering Department has been:

Year	Professional and Advisory Services	Temporary Help and Technical Services	Total
1980	\$ 511,000	\$ 533,000	\$1,044,000
1981	1,259,000	1,111,000	2,370,000
1982	1,127,000	2,237,000	3,364,000
1983	4,580,000 (est.)	2,825,000	7,405,000
1984	18,974,000 (est.)	4,817,000	23,791,000

For 1985, staff recommends that the Professional and Advisory Service Firm Retainer Program be authorized to allow the Chief Engineer to enter into agreements for the performance of architectural and engineering services on an as-needed basis, from a group of approximately fifteen of the most qualified professional and advisory service firms in each functional area in which forecasted work cannot be handled by in-house staff. These firms will undertake studies, perform professional inspections, provide advice and opinions, develop recommendations, prepare contract documents and perform post-award contract work. The same selection and review procedures used in 1984 will be used for the 1985 program. However, for 1985, the limit on total payments under any one agreement will be increased from the 1984 limitation of \$250,000 to \$500,000. In addition, the agreements will contain provisions for making a good faith effort to attain a goal of 10% participation by Minority Business Enterprises on multi-disciplined projects and some projects will also be set aside for Minority Business Enterprises.

Because of the dynamic nature of engineering and architectural work, the Chief Engineer will have the flexibility to amend the agreements for specific projects, such amendments not to exceed \$100,000 per agreement and the total amount of each agreement, as amended, will not exceed \$500,000. Based upon previous experience with regard to projects forecasted and actually starting in a given year, it is anticipated that during 1985 the total expenditures for all architectural and engineering services initiated under this program will be approximately \$17 million.

(Board - 1/10/85)

The second portion of this request for authority deals with the retention of various technical service firms to furnish professional and technical personnel to supplement permanent staff on an as-needed basis during 1985 at an aggregate cost presently estimated at \$4 million. In the majority of cases, these firms furnish people who work outside of Port Authority offices and are indirectly supervised by permanent staff. During 1984, the Materials and Construction Divisions of the Engineering Department were the predominate users of technical service firms for outside inspection, testing and surveying work. As has been done for the last few years, the Chief Engineer will order work from technical service firms which are known to have the required qualifications and capabilities. However, for 1985, it is recommended that payments to any one technical service firm be increased from the 1984 limit of \$100,000 to \$250,000. This increase in authority will provide continuity of services and will assure individual responsibility for some of the larger planned projects during 1985, such as the environmental subsurface investigations for Hunter's Point and Central Jersey Industries Incorporated. The selection of technical service firms will again be on the basis of capability, price and availability.

The third portion of this request for authority deals with the retention of temporary help firms to provide professional and technical personnel for the Engineering Department and various other departments. In general, the types of personnel that would be made available from these firms are: architects, engineers, estimators, inspectors, planners, testers, technicians, surveyors, designers and draftsmen. In the majority of cases these firms furnish people who work in-house and are directly supervised by permanent staff. During 1984, the Aviation, Economic Development, Port, Rail Transportation and World Trade Departments also experienced workloads in excess of their available permanent staffing for which the Board authorized \$2.5 million for the retention of temporary help under the Engineering Department Retainer Program. These temporary help services were predominantly for planning and construction inspection personnel and were essentially administered by these line departments. For 1985, these same departments as well as the Tunnels, Bridges and Terminals and the General Services Departments have indicated that they will experience workloads in excess of their available permanent staffing. These departments have requested that \$2.8 million be provided in the 1985 authorization to hire temporary help to satisfy these needs. The aggregate estimated expenditure of \$2.8 million is divided among the seven departments as follows: Aviation Department (\$1 million); Economic Development Department (\$500,000); General Services Department (\$200,000); Port Department (\$250,000); Rail Transportation Department (\$250,000); Tunnels, Bridges & Terminals Department (\$200,000) and World Trade Department (\$400,000). During 1985, these departments will hire a larger variety of professional and technical temporary help. Such help, however, will not include personnel for design work.

It was therefore recommended that the Board authorize the Chief Engineer to:

1. retain various professional and advisory service firms on an as-needed basis for architectural and engineering related work for various Port Authority and PATH projects initiated during 1985 at an aggregate amount presently estimated at \$17 million;

(Board - 1/10/85)

2. retain various technical service firms to furnish professional and technical personnel for the Engineering Department on an as-needed basis for the 1985 calendar year at an aggregate amount presently estimated at \$4 million; and

3. retain various temporary help firms to furnish professional and technical personnel on an as-needed basis for the 1985 calendar year at an aggregate amount presently estimated at \$6.8 million, consisting of \$4 million for the Engineering Department and \$2.8 million for various other departments.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to:

1. retain various professional and advisory service firms on an as-needed basis for architectural and engineering related work for various Port Authority and PATH projects initiated during 1985 at an aggregate amount presently estimated at \$17 million;

2. retain various technical service firms to furnish professional and technical personnel for the Engineering Department on an as-needed basis for the 1985 calendar year, at an aggregate amount presently estimated at \$4 million; and

3. retain various temporary help firms to furnish professional and technical personnel on an as-needed basis for the 1985 calendar year at an aggregate amount presently estimated at \$6.8 million, consisting of \$4 million for the Engineering Department and \$2.8 million for other departments.

(Board - 1/10/85)

1985 Automotive Equipment Purchase Program

It was reported that the Port Authority's continuing program of replacing older units in its fleet of trucks, snow removal equipment, other special purpose vehicles, and miscellaneous mobile maintenance equipment, as well as provision of new equipment, will require the purchase of 325 units at a cost not to exceed \$6,386,000.

Replacement of existing equipment is determined by an economic and physical assessment of vehicle condition. The decision to exercise existing options or to solicit new bids is determined by an economic assessment at the time of vehicle replacement. Purchase order contracts are awarded on the basis of competitive bids. Bidding for passenger-type vehicles is limited to equivalent models of selected vehicle manufacturers.

Automotive equipment purchase order contracts, exclusive of those for passenger vehicles, which are generally for a single purchase of a fixed number of vehicles, are for periods not exceeding three years and the duration of these contracts is determined by operational and purchasing requirements.

It was therefore recommended that the Board authorize the Executive Director to:

1. receive bids on a series of contracts, each not to exceed a period of three years, for the purchase of operating and maintenance automotive equipment for all Port Authority departments and, in his discretion, in the case of each contract in said series either to enter into said contract with the lowest qualified bidder thereon or to reject all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicle manufacturers; and

2. exercise options, in his discretion, for the purchase of such equipment under existing contracts authorized by the Board in connection with automotive equipment purchase programs for years prior to 1985; the total expenditures under (1) and (2) combined not to exceed \$6,386,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to:

1. receive bids on a series of contracts, each not to exceed a period of three years, for the purchase of operating and maintenance automotive equipment for all Port Authority departments and, in his discretion, in the case of each contract in said series either to enter into said contract with the lowest qualified bidder thereon or to reject all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicles manufacturers; and

2. exercise options, in his discretion, for the purchase of such equipment under existing contracts authorized by the Board in connection with Automotive Equipment Purchase Programs for years prior to 1985; the total expenditures under (1) and (2) combined not to exceed \$6,386,000.

(Board - 1/10/85)

Newark International Airport - Terminal C - International Departure Facilities - Amendments to Project Authorization Relating to Development of Portions of the Terminal and Furnishing of Lime-Cement-Flyash Pavement

It was reported that this item provides for certain construction work, for which the Port Authority is responsible, required in connection with the development by People Express Airlines Inc. of two-thirds of Terminal C at Newark International Airport, including the C-1 and C-2 portions of the Terminal. Pursuant to authorization by the Board, at its meeting on September 10, 1981, international arrival facilities were constructed in the westerly third (C-3 portion) of Terminal C at Newark International Airport and, on June 1, 1984, these facilities were the first to become operational in Terminal C. The Board, at its meeting on April 12, 1984, authorized a project at a preliminary estimated project cost of \$15 million for the construction of international departure facilities to supplement these arrival facilities, thereby providing for state-of-the-art, turn-around facilities for international carriers in the airport's Central Terminal Area. Further, at its meeting on July 12, 1984, the Board authorized (a) an increase in the preliminary estimated project cost in the amount of \$2.6 million related to the design and construction of the international departure facilities and (b) the Executive Director to award Contract NIA-110.025, Newark International Airport, Terminal C, International Departures Facility, Taxiway I and Additional Aircraft Apron Pavement; Contract NIA-110.026, Newark International Airport, Terminal C, Courtyards and Canopies; and Contract NIA-110.027, Newark International Airport, Terminal C, International Departures Facility.

At its meeting on March 15, 1984, the Board approved the major terms of a lease (Proposed Lease ANA-170) under which People Express Airlines, Inc. would expand and construct the finishes of the C-1 and C-2 portions of Terminal C. The Resolution adopted by the Board on March 15, 1984 requires that the terms and conditions of the Proposed Lease be subject to the final approval of the Committee on Finance. The Committee on Finance, at its meeting on January 10, 1985, approved said terms and conditions, including the following, which depart from the Proposed Lease as follows: the Proposed Lease will be with People Express Airlines, Inc. and not with a Trust; rental will commence no later than April 1, 1987, and the term will expire no later than 25 years from said date, with the additional capital costs of providing fuel line service over and above 19 gates no longer to be the obligation of People Express in the same manner contemplated in the aforesaid Resolution (said additional capital costs would be included under the Newark Airport Master Lease cost recovery formula, applicable to all terminal lessee airlines, with recourse against People Express in any event); People Express is to have greater control over consumer services in Terminal C and there will be no right on the part of the Port Authority to terminate the Lease based on substantial changes in ownership or control of People Express, but the Port Authority will have rights of termination for events set forth in the Lease.

People Express proposes to construct its facilities on an expedited schedule also, with completion scheduled for early 1987. In order for People's leasehold premises to become operational, certain Port Authority construction, which generally interfaces with construction within People Express' leasehold, must be completed by late 1986. Such construction includes the completion of Taxiway I, the construction of courtyard areas complete with canopies at both ends of Terminal C to accommodate ground transportation services and V.I.P. parking, the completion of a permanent storm drainage trunk line system required to dispose of storm drainage from the C-1 and C-2 aircraft ramp area, and the purchase and installation of an electrical drive centrifugal

(Board - 1/10/85)

chiller in the Central Heating and Refrigeration Plant in order to serve cooling loads in People's leasehold premises. The Port Authority will also provide hydrant carts for use in the fueling of aircraft. In addition, under the terms of the Proposed Lease, People Express will extend and upgrade the aircraft fuel distribution and hydrant system and the Port Authority will reimburse People Express for such work in the amount of approximately \$12.2 million. The expenditures for all of the foregoing construction are presently estimated at \$27.3 million, including payments to contractors, allowances for extra work, and administrative, engineering and financing expenses. It is anticipated that this additional work will be partially funded by Federal aid in the amount of approximately \$3.8 million and the remainder of the total cost will be reimbursed through existing airport cost recovery formulas and under provisions contained in the Proposed Lease with People Express.

People Express has recently requested that the Port Authority include in Contract NIA-110.025, which includes apron and taxiway pavement for the international departure facilities as well as the completion of Taxiway I, a requirement that the contractor provide approximately 125,000 tons of lime-cement-flyash (LCF) pavement from the LCF plant located at the airport. The LCF pavement is required by People Express to pave the C-1 and C-2 apron ramp within its leasehold area. The Federal Express Corporation has also requested that the Port Authority provide approximately 25,000 tons of LCF for paving work associated with its "Metroplex" project under construction at the south end of the airport. Moreover, staff anticipates that approximately 60,000 tons of LCF pavement will be required during 1985 and 1986 by various Port Authority contractors constructing taxiways and aircraft parking areas at other locations at the airport. Accordingly, staff proposes that LCF pavement be provided to People Express, Federal Express and such other Port Authority contractors under Contract NIA-110.025, at a total additional project expenditure of approximately \$4.3 million. Agreements with People Express and Federal Express covering the terms under which the LCF pavement would be provided to them, with the Port Authority being fully reimbursed, have not been finalized and appropriate authorization for such agreements will be sought as needed. Provisions for the furnishing of LCF pavement to such other Port Authority contractors will be included in their respective contracts.

In addition to revising the scope of Contract NIA-110.025 to require the contractor to furnish the 210,000 additional tons of LCF pavement, as a result of discussions with People Express related to the Terminal C lease, the scope of the work to be included in Contract NIA-110.025 will be revised to require the contractor to perform additional Taxiway I work. The bulk of the underground aviation fuel distribution mains work, which will be performed by People Express, will no longer be included in Contract NIA-110.025. Accordingly, the authorization of the Board at its meeting on July 12, 1984 to the Executive Director to award the contract requires revision to reflect these changes in scope. Funds for this additional Taxiway I and fuel distribution system work are included in the \$27.3 million additional project authorization sought herein.

Since authorization for extra work under Contracts NIA-110.025, NIA-110.026 and NIA-110.027 was not included in the authorization to award such contracts authorization is now being sought to order extra work up to 10% of the amount of the bid accepted on Contracts

(Board - 1/10/85)

NIA-110.025 and NIA-110.026 and up to 15% of the amount of the bid accepted on Contract NIA-110.027. Sufficient funds for the foregoing extra work relating to the international departure facilities (in C-3) have been included in the aforementioned Board authorizations of April 12, 1984 and July 12, 1984.

It was therefore recommended that the Board authorize:

1. an increase of approximately \$27.3 million in the estimated expenditure for the project for the construction of International Departure Facilities at Terminal C at Newark International Airport to cover work related to People Express Airlines Inc.'s planned development of two-thirds of Terminal C, including an increase of approximately \$4.3 million in the estimated project expenditure for the same project to cover the furnishing under Contract NIA-110.025 of lime-cement-flyash (LCF) pavement to People Express Airlines, Inc., Federal Express Corporation and Port Authority contractors working on other construction at Newark International Airport bringing the total authorized expenditures for such projects to approximately \$49.2 million;

2. the Executive Director to award proposed Contract NIA-110.025 as revised to reflect a change in the scope of the work; and

3. the Executive Director to order extra work under Contracts NIA-110.025 and NIA-110.026 up to 10% of the amount of the bid accepted on each contract, and to order extra work under Contract NIA-110.027 up to 15% of the amount of the bid accepted on the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes:

1. an increase of approximately \$27.3 million in the estimated expenditure for the project for the construction of International Departure Facilities at Terminal C at Newark International Airport to cover work related to People Express Airlines Inc.'s planned development of two-thirds of Terminal C, including the C-1 and C-2 portions of the Terminal; and an increase of approximately \$4.3 million in the estimated project expenditure for the same project to cover the furnishing under Contract NIA-110.025 of lime-cement flyash (LCF) pavement to People Express Airlines, Inc., Federal Express Corporation and Port Authority contractors working on other construction at Newark International Airport, bringing the total authorized expenditures for such project to approximately \$49.2 million;

2. the Executive Director to award proposed Contract NIA-110.025 as revised to reflect a change in the scope of the work; and

3. the Executive Director to order extra work under Contracts NIA-110.025 and NIA-110.026 up to 10% of the amount of the bid accepted on each contract, and to order extra work under Contract NIA-110.027 up to 15% of the amount of the bid accepted on the contract.

(Board - 1/10/85)

Newark International Airport - Purchase of Additional Buses - Agreement with Olympia Trails Bus Co., Inc. - AN-962

It was reported that the Board, at its meeting on November 10, 1983, authorized an amendment to the agreement with Olympia Trails Bus Co., Inc., Newark's intra-airport ground transportation operator, for Olympia's purchase of six buses bringing the airport's bus fleet to fourteen, (which was accomplished by the purchase of one used and five new GMC-RTS buses and suitably modifying same), and an extension of the existing intra-airport ground transportation service contract with Olympia for an additional four years, expiring September 7, 1989, at a total estimated contract cost of \$13,485,300. The original contract with Olympia, which was awarded after public bidding, was for five years with two one-year Port Authority options to extend the contract commencing September 8, 1980.

The cost of the original eight buses and the six buses added later are amortized on a straight line basis over a seven-year period and upon termination, with or without cause, the Port Authority has the option to acquire any or all of the buses at their unamortized value and the contractor is obligated to sell them to the Port Authority. During the period September 8, 1987 through September 7, 1989, (the end of the amortization period of the original eight buses), the Port Authority has the option to repurchase any or all of the original eight buses at fair market value. At the expiration of the contract, the Port Authority has the option to acquire all fourteen buses from Olympia, the original eight at fair market value and the six additional buses for the remaining balance of the unamortized value.

The recent opening of Terminal C and the unanticipated opening of a temporary departure facility by Peoplexpress for its three trans-continental flights has necessitated additional bus service on the Arrivals Level, as well as the normal service between Terminal C and the North Terminal, operating on the Departure Level. Bus service between Terminal C and Long-Term Parking Lot E has had to be increased as well. Increased North Terminal activity had resulted in the weekly saturation of the long-term public parking lots at the north end of the field, thus necessitating increased bus service between Long-Term Lots D and E and the North Terminal. During these occasions of lot saturation, as many as sixteen buses (including two additional rental buses) have been in service at one time. Additional buses are needed during occasions of periodic maintenance and breakdowns. In addition, any increase in overseas traffic at the Terminal C Customs facility will require the Port Authority to provide a busing operation between the hardstand areas and Terminal C.

In addition, it is anticipated that Peoplexpress will complete its move to Terminal C by Spring 1987. The anticipated passenger levels at that time are expected to exceed 32 million as compared to 26 million in 1985, a 23% increase. As a result, traffic in the North Terminal lots will remain at saturation levels and traffic in the Central Terminal Area is expected to increase substantially. Future plans for parking lot expansion include additional space in Long-Term Lots D and E and construction of a new parking facility in the South Development Area, all of which will amount to approximately 5,000 additional spaces to be available for public parking within a few years. In order to maintain the desired level of service without increasing headway time, it will be necessary to use additional equipment on most routes, as well as operate 24-hour service to all parking lots.

(Board - 1/10/85)

Peoplexpress has indicated an increase in overseas traffic and it can safely be assumed that other overseas traffic will increase as well. Also, the Port Authority's International Departure Facility will be completed in the Summer of 1985. As a result, the Terminal C hardstand operation will expand as more international arrivals will be forced to park on Taxiway "Y".

It has come to the attention of staff that Olympia has an immediate option to purchase three GMC-RTS demonstrator model buses from General Motors and one GMC-RTS used bus at a total cost of approximately \$410,000 plus approximately \$45,000 for painting, modified seating arrangements and installation of luggage racks for airport use. Three buses will come with the factory warranties and two are equipped with wheelchair lifts which will enhance Newark's capacity to accommodate handicapped patrons.

It has been reported that negotiations have been substantially completed with Olympia for the purchase of these buses and their use under the contract for the intra-airport ground transportation services. These four buses will be amortized on a straight line basis over a seven-year period, with payment to Olympia to commence upon the date each bus is available for service presently estimated to be on or about February 8, 1985. In a manner similar to the method of payment for the existing buses, the Port Authority will pay the contractor for the four buses in monthly payments, consisting of the purchase price and modification costs divided by 84 (seven-year write off) plus 1% interest per month on the unpaid declining balance. The Port Authority would make these payments to Olympia over the remaining term of the contract period only, which will be less than 4½ years. Upon termination, with or without cause, or upon expiration of the contract, the Port Authority would have the option to acquire any or all of the four additional buses at their unamortized value as aforesaid, and the contractor would be obligated to sell them to the Port Authority.

In addition to the above, staff anticipates the possible need for up to an additional eight buses over and above the four requested above to supplement existing routes and to service new routes within the next two years. If the buses were acquired based on terms and conditions similar to the above acquisition under the existing contract, whereby the operator purchases the equipment and the Port Authority repays the operator the purchase price of the equipment plus interest and operating costs, the estimated maximum cost to the Port Authority for the eight vehicles over the remaining contract period will be approximately \$3.6 million. If the Port Authority purchases the buses itself at an estimated cost not to exceed \$220,000 per bus, makes them available to the contractor and pays the contractor only operating costs, the estimated cost to the Port Authority for the operation and purchase of the eight buses over the remaining contract period will be approximately \$4.9 million. The decision to purchase additional buses will be based upon the increase in parking lot capacity, the increase in overseas traffic at Terminal C, the increase in passenger levels and the results of a study by Operations Standards on route structure.

Under the terms of the contract, the operating cost per bus hour which would be applicable to all buses will continue to be adjusted annually according to the Consumer Price Index. Payments for fuel will be adjusted semi-annually as determined by changes in the Producer Price Index. With the addition of the four buses, the contract cost is estimated to increase to \$15,755,300, and with the possible purchase of up to eight additional buses, the total contract cost for the balance of the term of the contract is estimated to increase to \$20,655,300. It is also recommended that the Director of Aviation, in his discretion, be authorized to order extra work by the contractor at an additional payment to the contractor of not more than 15% per year of the increased presently estimated average annual cost.

(Board - 1/10/85)

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to purchase buses and to enter into an agreement or agreements with Olympia Trails Bus Co., Inc. at Newark International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized for and on behalf of the Port Authority to enter into an agreement with Olympia Trails Bus Co., Inc., in accordance with the foregoing, amending that company's intra-airport ground transportation service contract at Newark International Airport, whereby Olympia will purchase four GMC-RTS buses (three demonstrator model buses and one used bus), to be used in the intra-airport ground transportation service, the Port Authority to repay Olympia for the purchase of the buses and additional estimated operating costs amounting to a total estimated additional cost under the contract of approximately \$2,270,000 and a new total estimated contract cost of \$15,755,300; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized for and on behalf of the Port Authority, in accordance with the foregoing, to add to the bus fleet used by Olympia Trails in Newark's intra-airport ground transportation service, from time to time, up to eight additional buses on an as-needed basis, either by entering into an agreement with Olympia whereby Olympia will purchase such additional buses, make them a part of the intra-airport bus fleet under its contract, and the Port Authority would repay Olympia the bus purchase cost plus hourly operating costs in accordance with its agreement, or by the purchase by the Port Authority of such buses, at a purchase price for each bus not in excess of \$220,000 and making them available to Olympia for use in the intra-airport ground transportation service with the Port Authority to pay for the hourly operating costs in accordance with its agreement; the maximum estimated cost of this increased service to be \$4.9 million and the total contract cost for the remainder of the contract period estimated to be \$20,655,300; and it is further

RESOLVED, that the Director of Aviation, in his discretion, be and he hereby is authorized to order extra work by the contractor at an additional payment to the contractor of not more than 15% per year of the increased presently estimated average annual contract costs; and it is further

RESOLVED, that the form of the foregoing agreements be subject to the approval of General Counsel or his designated representative.

(Board - 1/10/85)

Kennedy International Airport - 150th Street Access Improvements - Phase I - Contract JFK-140.116A - Award

It was reported that the Board, at its meeting on August 31, 1983, authorized a project for the dualization of 150th Street, creating a second major access roadway to Kennedy International Airport with direct connections to the Nassau Expressway, Southern Parkway, Van Wyck Expressway and the Central Terminal roadway system, offering improved access to the cargo and hangar areas, at an estimated project cost of \$19 million, including payments to contractors, an extra work allowance and engineering, administrative and financing expenses. The award of Contract JFK-140.116A falls within the scope of this authorization.

Contract JFK-140.116A provides for the realignment of existing service roads adjacent to tenant areas at Kennedy International Airport in order to provide uninterrupted access to the airport and tenant areas during construction of a future (Phase II) main roadway system to be constructed under Contract JFK-140.117. In addition, the work under Contract JFK-140.116A includes surcharging, site work, paving, relocation of blast fences and construction of drainage, street lighting and traffic signal control systems. The work under both contracts is required in order to interface with the new Nassau Expressway.

The entire contract is eligible for Federal funds under the Airport Improvement Program (AIP).

In conjunction with AIP and in accordance with United States Department of Transportation regulations and the policy adopted by the Board, at its meetings on August 27, 1980 and June 14, 1984, the contract includes a provision that the bidder assure the Port Authority that it will meet the goal for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and the following bids were received on December 18, 1984:

	Lump Sum Amount
All Boro Paving Corp. Flushing, New York	\$3,786,000
Land-Site Contracting Corp. Westbury, New York	3,787,497
Anthony Grace & Sons, Inc. Whitestone, New York	4,167,000
Hendrickson Bros., Inc. Valley Stream, New York	4,236,571
Naclerio Contracting Company, Inc. Bronx, New York	4,295,000

(Board - 1/10/85)

Edenwald Contracting Co., Inc. Whitestone, New York	4,314,000
Willeys Point Contract Corp. Flushing, New York	4,354,000
Engineer's Estimate	\$4,100,000

All Boro Paving Corp. submitted the lowest bid and was determined by the Chief Engineering to be qualified to perform the contract.

It was therefore recommended that the Board authorize the award of Contract JFK-140.116A, Phase I, 150th Street Access Improvements, Kennedy International Airport to All Boro Paving Corp. in the amount of \$3,786,000 and to order extra work up to the amount of \$380,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to award Contract JFK-140.116A, Phase I, 150th Street Access Improvements, Kennedy International Airport, to All Boro Paving Corp., in the amount of \$3,786,000 and to order extra work up to the amount of \$380,000.

(Board - 1/10/85)

The World Trade Center - Continuation of Architectural and Engineering Services

It was reported that the Board has to date authorized approximately \$38.1 million, including its last authorization of approximately \$600,000 on August 11, 1983, for architectural and engineering design services for The World Trade Center.

In order to insure continuity in the critical areas of architectural, electrical, mechanical and structural design, staff recommends that the existing firms continue to be retained. Chief among these firms are: Robertson, Fowler & Associates (formerly Skilling, Helle, Christiansen, Robertson), the Structural Engineer of Record and Joseph R. Loring & Associates, the Electrical/Mechanical Engineer of Record. In addition, expenditures will be necessary for the services of Leo Kornblath & Associates, the tenant Alteration Architect; Glenn Monigle & Associates, the advisor for The World Trade Center's continuing signage program and various other firms whose unique expertise at The World Trade Center makes it necessary to retain their services.

The major programs that are expected to require the services of these firms include miscellaneous tenant alterations, including verification of mechanical, electrical and structural loads and utilities redesign and modifications; stack effect studies; architectural/structural/mechanical and graphic interface with developments of Olympia & York in connection with The World Financial Center; interface with 7 World Trade Center; continuation of The World Trade Center Signage Program; Structural Integrity Studies for concrete slabs and ceilings; a new Concourse entrance at Vesey Street; the Dey Street underpass; the Observation Deck entrance rehabilitation and resurfacing; the development of additional masts, antennas and screens; studies related to the dynamic response of the towers; conceptual master planning for public areas; studies for exterior lighting of the towers; Concourse Rehabilitation studies; required project changes and special design studies; and design services to be reimbursed by the Fund for Regional Development in connection with the New York State move from Two World Trade Center.

Of the requested increase, approximately \$350,000 represents the costs associated with the redesign of New York State space to accommodate the needs of Aetna Casualty and Surety Corp. Upon reimbursement from the Fund for Regional Development for the design work required for the Aetna space, the authorization for architectural and engineering services will be credited with an amount equal to the expenditures for these design services.

By maintaining the continuity of these professional services, the Port Authority assures that interface projects, will be integral, maintains the firms' responsibilities as Architects and Engineers of Record and avoids the substantial financial outlay that would be necessary if other firms, which would require extensive preparation and research time were hired. This increase will bring the architectural and engineering service costs for The World Trade Center to approximately \$39.1 million, which is 4.3% of the total contract costs including extra work.

(Board - 1/10/85)

It was therefore recommended that the Board authorize the Executive Director to expend approximately \$1.0 million beyond that previously authorized for architectural and engineering services in connection with the design and construction of The World Trade Center.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to expend approximately \$1.0 million beyond that previously authorized for architectural and engineering services in connection with the design and construction of The World Trade Center.

(Board - 1/10/85)

The World Trade Center - Contract WTC-578.552 - General Construction for Aetna Casualty and Surety Company - 35th, 36th, 37th and 38th Floors - Two World Trade Center - Award

It was reported that the Board, at its meeting on November 8, 1984, authorized execution by the Port Authority, acting on behalf of the Fund for Regional Development, of a lease with the Aetna Casualty and Surety Company covering the letting of approximately 164,000 rentable square feet in Two World Trade Center to be vacated by the State of New York, such lease to provide for an initial term of ten years with options to renew for two additional five-year terms. The lease, which has been executed, also provides Aetna with an option ("the early option") to lease between 4,500 and 23,000 square feet of additional space within 60 days after execution of the lease. The lease further provides that the Fund will construct Aetna's initial 141,000 rentable square feet of space and Aetna's early option space pursuant to architectural and engineering plans prepared to meet Aetna's requirements.

Contract WTC-578.552 will require the contractor to perform all construction work necessary to prepare approximately 141,000 square feet of the Aetna space according to the plans and specifications, so as to provide an area capable of occupancy at the time for completion stated in the contract. The contract will also require the performance of certain construction items, for which the Port Authority is to be reimbursed by Aetna, in the amount of approximately \$450,000. Also included in the work to be performed is the demolition in the existing New York State office space; installation of ceilings, walls, partitions, sprinklers and carpeting, window shades and all electrical, HVAC, mechanical and structural work. The contractor will not be required to install telephone equipment. Contract WTC-578.552 includes a provision for a bonus to the contractor of \$5,000 per day for a maximum of 45 days, for early completion of the work. Awarding the contract expeditiously will enable the contractor to prepare shop drawings and order materials, so that field work can start as soon as possible after New York State vacates the floors, thereby reducing the rent credit of up to \$12,106 per day due to Aetna for each day that construction completion is delayed beyond March 31, 1985. In addition, the contract will provide that if Aetna elects to exercise its option for certain additional space, a supplemental agreement in an amount not to exceed 20% of the amount of the proposal accepted, will be executed covering performance of similar construction in this option area.

Proposals were solicited from (to be determined) contractors qualified to perform the work and are scheduled to be received on or about January 30, 1985. In order to permit construction to be commenced at the earliest possible date, staff recommends that authority to award Contract WTC-578.552 be delegated to the Executive Director.

It was therefore recommended that the Board authorize the Executive Director to:

1. either award Contract WTC-578.552, General Construction for Aetna Casualty and Surety Company, 35th, 36th, 37th and 38th Floors, Two World Trade Center, to the contractor who submits the lowest proposal and who, in the Executive Director's opinion, is qualified by

(Board - 1/10/85)

reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals; and

2. enter into Supplemental Agreement No. 1 to Contract WTC-578.552 with the contractor awarded Contract WTC-578.552, the amount of such supplement not to exceed 20% of the amount of the proposal accepted.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized in his discretion to:

1. either to award Contract WTC-578.552, General Construction for Aetna Casualty and Surety Company, 35th, 36th, 37th and 38th Floors, Two World Trade Center, to the contractor who submits the lowest proposal and who, in the Executive Director's opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals; and

2. enter into Supplemental Agreement No. 1 to Contract WTC-578.552 with the contractor awarded Contract WTC-578.552, the amount of such supplement not to exceed 20% of the amount of the proposal accepted; and it is further

RESOLVED, that the form of said Contract and Supplemental Agreement be subject to approval of General Counsel or his authorized representative.

(Board - 1/10/85)

The World Trade Center - Contract WTC-526.00 - Sprinkler Installation - Floors 9 through 40 -
One World Trade Center

It was reported that Contract WTC-526.00 requires the contractor to furnish all structures, equipment, plant, labor, materials and other facilities necessary to install a sprinkler system in the unsprinklered areas of the 9th through the 40th floors of One World Trade Center. In addition, the contractor will be required, on a net-cost basis estimated at roughly \$360,000 to perform any adjustment or repair to the existing sprinkler piping system which may be necessary; to patch and replace certain existing patch openings in the existing partition above the ceiling line which may be required; to seal with thermafibers existing openings around pipes and ducts penetrating existing walls; to seal certain voids at the top of existing walls where they meet corrugated decking; to supply uniformed watchmen's service in tenant areas at the direction of staff; to install pre-action fire sprinkler systems in areas designated by staff and to perform miscellaneous related work. Expenditures for the pre-action system are completely recoverable from the tenants.

Proposals were solicited from 23 qualified contractors and on January 8, 1985, the following proposals were received:

Able Sprinkler Co., Inc. Maspeth, New York	\$2,381,400
Active Fire Sprinkler Corp., Brooklyn, New York	2,874,040
Triangle Fire Protection Corp., Glendale, New York	2,966,650
Richards Plumbing & Heating, Brooklyn, New York	3,161,410
S & S Fire Suppression Systems, Inc., West Nyack, New York	3,780,202
ENGINEER'S ESTIMATE	\$3,000,000

In addition, one other contractor submitted a proposal which has been deemed non-responsive.

Due to the disparity between the low bid and the Engineer's estimate the contractor's proposal was discussed with him at a post bid interview. At that time the contractor indicated that the bid price was substantially lower than other bids received due to his extensive experience in retro fitting sprinkler systems under circumstances involving certain fireproofing material. In addition the Able Sprinkler Co., Inc. proposal does not include the same contingencies contained in other proposals but the contractor reaffirmed his belief that the work will be performed with minimal problems.

(Board - 1/10/85)

Staff has determined that Able Sprinkler Co., Inc. is qualified to perform the work required under the terms of the agreement and has previously performed satisfactory work for Brooklyn Union Gas Company, Merrill Lynch, Citibank, N.A., and the New York Telephone Company.

It was therefore recommended that the Board authorize the Executive Director to award Contract WTC-526.00, Sprinkler Installation, Floors 9 through 40, One World Trade Center to Able Sprinkler Co., Inc. in the estimated amount of \$2,381,400, and to order extra work up to the amount of \$240,000, and net cost work in the approximate amount of \$360,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-526.00, Sprinkler Installation, Floors 9 through 40, One World Trade Center to Able Sprinkler Co., Inc. in the estimated amount of \$2,381,400, and to order extra work up to the amount of \$240,000.

(Board - 1/10/85)

The World Trade Center - Fund for Regional Development - Lease with Thacher, Proffitt & Wood

It was reported that subject to approval by the Board, staff has reached agreement with the law firm of Thacher, Proffitt & Wood for the leasing of approximately 80,000 rentable square feet on Floors 39 and 40 which are currently occupied by New York State in Two World Trade Center. Unless the tenant elects otherwise, the premises will be delivered in two stages. The 40th floor and most of the 39th floor will be delivered on March 1, 1985, subject to postponement, and the balance of the space will be delivered on the tenth anniversary of the day payment of rental for the first area commences. At the tenant's election the entire space will be delivered on March 1, 1985.

Rent for the first area would commence eleven months after the space is turned over to the tenant. This period includes time for the tenant to reconstruct the space. The rental rate for the ten-year period following the rent start date will be \$28 per rentable square foot per year, and for the five-year balance of the term it will be \$35 per rentable square foot per year. The tenant will also pay additional charges for electricity and cleaning and additional rent to cover increases in operating costs and payments in-lieu-of taxes. If The World Trade Center is sold, the tenant would be protected from major initial tax increases resulting from the sale. If the tenant elects to take the entire two floors initially, they would then be granted a right subordinate to the rights of the Aetna Casualty and Surety Company to lease any space which might become available on the 38th Floor.

The space will be delivered "as is". The tenant would receive an allowance of \$19 per rentable square foot toward the cost of reconstructing the space and installing required sprinklers.

There will be real estate broker commissions payable on this transaction at rates not to exceed the schedule authorized by the Board at its meeting on August 11, 1977.

It was therefore recommended to the Board that the Board authorize the Executive Director on behalf of the Port Authority acting for the Fund for Regional Development to enter into a lease agreement with Thacher, Proffitt & Wood on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board, on behalf of the Fund for Regional Development, authorize a lease with the law firm of Thacher, Proffitt & Wood for approximately 80,000 square feet of office space in Two World Trade Center to be vacated by the State of New York for a term expiring fifteen years and eleven months from the commencement thereof; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 1/10/85)

The World Trade Center - Fund for Regional Development - Lease with F. Eberstadt & Co., Inc.

It was reported that subject to approval by the Board, staff has reached agreement with F. Eberstadt & Co., Inc., an international investment banking and securities brokerage firm, for the leasing of approximately 40,000 rentable square feet of office space on the 32nd Floor of Two World Trade Center currently occupied by the State of New York.

F. Eberstadt & Co., Inc. would take over the floor after it is vacated by New York State, currently expected to be in February 1985 with the tenant having the right to cancel the lease ninety days thereafter if the space is not available to the tenant and thereafter if the space is still not available the tenant would have the right to cancel the lease at thirty day intervals. The payment of rent would commence nine months after the space is turned over to the tenant, the rent commencement date, which includes time for rebuilding. Following the rent commencement date, the rent for years 1-3 would be \$27.30 per rentable square foot per year; years 4-6, \$29.30 per rentable square foot per year; for years 7-10, \$32.30 per rentable square foot per year, exclusive of cleaning and electricity. F. Eberstadt & Co., Inc. would also pay additional rent to cover increases in operating costs and payments in-lieu-of taxes, the tenant's tax base being set at \$1.67. If The World Trade Center is sold, the tenant would be protected from major initial real estate tax increases resulting from the sale.

The space would be delivered "as is" and F. Eberstadt & Co., Inc. would receive an allowance of \$18 per rentable square foot toward its construction including the installation of a sprinkler system.

The lease would provide Eberstadt the right to sublease portions of the premises with a 50/50 sharing if there is sub-rent profit.

There will be a real estate brokerage commission payable on this transaction, at rates not to exceed the schedule of rates authorized by the Board at its meeting on August 11, 1977 which rates, in accordance with accepted practice in the real estate industry, will be applied against a net rental reflecting a six-month free rent period which is not attributable to construction time.

It was therefore recommended that the Board, on behalf of the Fund for Regional Development authorize a lease with F. Eberstadt & Co., Inc. on the foregoing terms and conditions.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board, on behalf of the Fund for Regional Development, authorize a lease for a term expiring ten years after the rent commencement date with F. Eberstadt & Co., Inc. for approximately 40,000 square feet of office space in Two World Trade Center to be vacated by the State of New York; and it is further

RESOLVED, that the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/10/85)

The World Trade Center - Lease with the Council on International Banking

It was reported that agreement has been reached, subject to the approval of the Board, for the leasing to the Council on International Banking of an unfinished unit of space on the Plaza Level of the Northeast Plaza Building, approximately 880 rentable square feet of space. The Council on International Banking, which was formed in 1924, is an association of 325 American and foreign banks, doing international banking in the United States. The Council on International Banking provides a forum for the development and refinement of operating procedures and systems related to international banking transactions of banks in the United States. The Council's counterparts in other geographical regions of the world work with the Council to improve international banking operations.

The space will be delivered to the tenant on execution of the lease on which date the term will commence. The term of the proposed lease will expire on the day preceding the tenth anniversary of the day payment of rental commences. Rental will commence no later than eight months after the date the space is turned over to the lessee for construction.

The lease will provide for a rent of \$22 per rentable square foot per year for years 1-3, \$25 per rentable square foot per year for years 4-6 and \$28 per rentable square foot per year for years 7-10, exclusive of charges for cleaning and electricity. In addition, the lessee will pay additional rental to cover increases in operating costs and in-lieu-of tax payments. The space has never been finished for tenant occupancy, and the Council on International Banking will lease the space in its "as is" condition. The Port Authority will pay for a portion of the tenant's construction work in an amount not to exceed \$120,000, with the tenant to pay additional monthly rental for each dollar of Port Authority investment in excess of \$20,000 at a rate which equates to an annual amount equal to .18273 multiplied by the amount of the Port Authority's investment which exceeds \$20,000 payable monthly over the term of the letting.

There is no brokerage commission payable in connection with this letting.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into a lease agreement with the Council on International Banking on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a lease with the Council on International Banking for approximately 880 rentable square feet on the Plaza Level of Five World Trade Center for a term expiring on the tenth anniversary of the day payment of rental for the space commences; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 1/10/85)

Port Newark - Lloyd's Underwriters and Other Foreign Insurance Companies - Settlement of Claim

It was reported that on March 10, 1980 it was discovered that a portion of Berth 63 at Port Newark had collapsed into the Elizabeth Channel and that the remaining portion had settled and shifted as a result of the collapse. At the time of the collapse, the Port Authority had in effect property damage insurance on the berth under the Fire and Allied Perils and Difference in Conditions All Risk insurance with Lloyd's Underwriters and other foreign insurance companies for the period June 1, 1978 through June 1, 1981.

Subsequent to the collapse, the Board, at its meeting on April 29, 1981, authorized: (1) a project to reconstruct the collapsed portion of Berth 63 and to perform associated paving and utilities work at an estimated project cost of \$6.2 million, which would include payments to contractors, an allowance for extra work, engineering, administrative and financial expenses and (2) as part of the \$6.2 million project, the award of Contract PN-730.019, Reconstruction of Berth 63, Port Newark, at a bid price estimated at \$3,670,000 plus authorization of \$367,000 for extra work and net cost work. Subsequently, on May 11, 1982, the Executive Director authorized the award of Contract PN-730.020, Paving and Utilities, Berth 63, Port Newark, at a lump sum bid price of \$324,298 plus an authorization of \$33,000 for extra work. Contracts PN-730.019 and PN-730.020 were awarded on May 20, 1981 and May 28, 1982, respectively.

In June 1981 a claim was presented to Underwriters in the total amount of \$6.3 million for the anticipated overall cost of repairs to Berth 63 and for the loss of revenue resulting from the collapse. Thereafter, as a result of a request by the Port Authority for a partial claim payment, in December 1981 and January 1982, Underwriters released payments to the Port Authority totalling \$3,570,000, which represented the bid price of Contract PN-730.019 less the \$100,000 policy self-insured retention.

All work associated with this project was completed in January 1983 and after the completion of an extensive review of Port Authority records by the insurance adjuster's accountant, negotiations with the adjuster commenced. As a result of eliminating a \$523,000 estimate for financial expenses, an item which is not recoverable under the insurance policy, and utilizing actual amounts for the repairs in-lieu-of the 1981 estimates, the amount of the claim was reduced to approximately \$5.4 million. The adjuster for Underwriters offered to settle for \$4.7 million after questioning various items. Subsequently, upon a detailed examination by the adjuster and staff, it was noted that there was essentially no net loss of Port Authority revenue resulting from the incident since other public berths at Port Authority facilities picked up those revenues. Accordingly, an amount of \$323,221, equal to the lost revenue claim, was withdrawn.

Negotiations on the remainder of the claim centered on internal overhead expenses and investigation costs and various other items which both parties agreed were questionable as far as recovery under the insurance policy. After discussion of each item and the related amount, the adjuster and staff have agreed that \$4,839,848 is a fair and reasonable settlement of the Port Authority's claim for the repair of actual damages sustained to Berth 63 at Port Newark.

(Board - 1/10/85)

It was therefore recommended that the Board authorize the settlement of an insurance claim of the Port Authority with Lloyd's Underwriters and other foreign companies under the Port Authority's Fire and Allied Perils and Difference in Conditions All Risk coverage, for damages incurred as a result of the collapse of Berth 63 at Port Newark, by accepting the total sum of \$4,839,848, of which \$3,570,000 has been collected.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a settlement of the Port Authority's claim against Lloyd's Underwriters and other foreign companies under the Port Authority's Fire and Allied Perils and Difference in Conditions All Risk coverage, for damages incurred as a result of the collapse of Berth 63 at Port Newark, by accepting the total sum of \$4,839,848, of which \$3,570,000 has been collected, with such settlement documents subject to approval as to form by General Counsel or his designated representative.

(Board - 1/10/85)

Bathgate Industrial Park - Amendment to Lease and Financing Agreement with South Bronx Greenhouse, Inc.

It was reported that the Board, at its meeting on June 9, 1983, authorized the Executive Director to enter into a lease and financing agreement with South Bronx Greenhouse, Inc. (SBG) for a food production and processing facility on Block 2919 at the Bathgate Industrial Park, for an initial term of 25 years commencing upon completion of construction by the lessee.

The Executive Director executed the lease with SBG on October 7, 1983. The lease provides that the Port Authority would finance the major portion of the physical facilities erected and installed on Block 2919. SBG, subject to Port Authority controls and supervision, would contract for the construction and equipping of the facility. SBG would lease the facility and repay the Port Authority at a 12½% annual rate of interest for the construction monies advanced.

Construction of the facility, expected to be completed in January 1984, is now expected to be completed in January 1985. The delay in construction was caused by many factors: (1) the need to redesign the pre-engineered greenhouse structure manufactured in Holland to conform to local code requirements; (2) the Teamsters' strike in the summer of 1984 which delayed the pouring of the slab; (3) the need to completely redo electrical wiring of the greenhouse in order to conform to local electrical codes; (4) delays at the construction site caused by local minority construction group disputes; (5) delays in the delivery of materials from Europe; (6) delays in pay to sub-contractors due to cumbersome payment terms required by the Dutch contractors and (7) additional work caused by unforeseen field conditions.

Horticultural experts from Holland, Cornell University and Rutgers University have recommended that additional capital equipment be purchased in order to maximize the productivity of the growing facility. The equipment includes additional refrigeration capacity, storage capacity and a state-of-the-art propagation room to grow new plants from seed.

Therefore, it is recommended that an additional \$200,000 be advanced to SBG to pay for unanticipated extra work in the construction of the facility and for recommended additional capital equipment for facility operations. SBG to make additional rental payments, including accrued interest at a rate of return of 13½% over an approximately 23-year period to coincide with the payment of Facility Rental as defined in the lease.

The delay in completion of the facility has also had a negative effect on the ability of SBG to raise in excess of \$100,000 of private equity through the sale of tax benefits authorized by the Board, at its meeting on March 8, 1984. The lack of this private investment, expected to be in place at this time, poses a threat to the ability of the business to survive. In addition, the delay has imposed severe operational hardships on the business. The cost of sales is significantly higher than anticipated because product must be purchased from outside sources rather than grown in the new hydroponic facility. While it was originally projected that the company would be operating at a profit adequate to finance its growth by mid-1984, because of the construction delay, it is now projected that this will not occur until mid-1985. The company has been operating on a month-to-month basis deferring expenses where possible and working out extended payment terms where necessary. It is estimated that it will require about \$200,000 to cover these commitments as of December 31, 1984.

(Board - 1/10/85)

In excess of \$300,000 of additional working capital will also be required to carry the business through mid-1985. SBG has been actively seeking investors to provide the necessary financing. An affiliate of the Harriman Trust, Merchant Sterling Venture Corporation, has agreed to participate in a transaction which will provide in excess of \$300,000 to the business. Therefore, it is recommended that an amount not to exceed \$200,000 be advanced by the Port Authority to SBG on an as-needed basis to be used to satisfy its remaining working capital needs. SBG to make additional rental payments, including accrued interest, starting in January 1987 in an amount sufficient to recover the Port Authority's investment at a rate of return of 13½% over an eight-year period.

The lease currently provides for SBG to repay the Port Authority \$106,150 out of the \$965,000 advanced for the construction of the greenhouse facility prior to the completion of the construction. This repayment would be counter-productive to the objective of providing sufficient working capital to SBG. Therefore, it is recommended that the lease be amended to allow repayment beginning two years after the completion of construction whereby SBG would pay rental in four equal quarterly installments including accrued interest from the date monies are advanced until the total amount has been repaid at a rate of return to the Port Authority of 13½%.

The lease also provides that the not-for-profit parent, GLIE, maintain a majority common stock interest in SBG. GLIE is currently in serious financial trouble (independent of the SBG situation) and is attempting to sell its stock for cash and other considerations to SBG which will in turn sell the stock as part of the transaction with the Harriman Trust for approximately \$562,000. Of that amount, \$250,000 will be paid to GLIE and SBG will retain \$312,000 in the business.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with South Bronx Greenhouse, Inc. amending the existing lease and financing agreement in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to amend the existing lease and financing agreement with South Bronx Greenhouse, Inc. (SBG) to provide for the Port Authority to:

1. advance to SBG an additional sum of \$200,000 for the purchase of additional capital equipment for the greenhouse facility on Block 2919 at the Bathgate Industrial Park and unanticipated extra work associated with the construction of said facility;
2. advance to SBG an additional amount not to exceed \$200,000 for its working capital requirements; and
3. defer SBG's repayment of \$106,150 representing its share of the facility construction cost for approximately two years;

the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/10/85)

Signature of Checks, Safe Deposit Boxes and Depository Service Agreements

It was reported that on August 11, 1983 the Board adopted a resolution (amending prior resolutions) concerning, in part, the signature of checks, safe deposit boxes, and depository service agreements, which resolution requests, authorizes and directs any depository with which The Port Authority of New York and New Jersey establishes an account (other than a payroll account) to honor checks or drafts (other than Transfer Warrants) drawn on such account in the amount of \$25,000 or less, when bearing an authorized signature (without counter-signature). This monetary limit on such non-payroll checks is insufficient to cover present and anticipated needs. Due to the increase in volume of checks, it is now desirable to raise this limit to the amount of \$50,000. Suitable controls are in place to protect the Port Authority if the increase is authorized. In connection with this recommended increase in the monetary limit for such non-payroll checks, checks (other than a Transfer Warrant) for which a counter-signature would be required would now be in an amount in excess of \$50,000.

The above-mentioned resolution also requests, authorizes and directs (i) any depository with which The Port Authority of New York and New Jersey establishes an account (other than a payroll account) to honor checks drawn on such account, in the amount of \$2,000 or less, and bearing or purporting to bear the facsimile signature of certain authorized signatories and (ii) any depository with which The Port Authority of New York and New Jersey establishes a payroll account to honor checks drawn on such account in the amount of \$3,000 or less and bearing or purporting to bear the facsimile signature of certain authorized signatories. These limits are insufficient to cover present and anticipated needs. Due to increases in the volume and dollar amount of checks, it is now desirable to raise the aforesaid limits of \$2,000 and \$3,000 in each case to the amount of \$5,000. Suitable controls are in place to protect the Port Authority if the increases are authorized.

In order to maintain adequate check signing authority in light of the new titles and staffing changes established by the reorganization of the financial functions of the Port Authority in March 1984, it is also desirable that current check signing authority be changed, primarily by including references to new titles in connection with authorization for signature of transfer warrants, signature of checks, countersignature of checks, use of facsimile signatures on certain payroll and non-payroll checks, endorsement for collection or deposit of checks, drafts, certificates of deposit and other negotiable and non-negotiable commercial paper, access to safe deposit boxes and authorization to enter into night depository agreements and other special service agreements with depositories designated by the Committee on Finance.

It was therefore recommended that the Board:

1. increase to \$50,000 the current monetary limit of \$25,000 on any check or draft (other than a Transfer Warrant or a check or draft issued only for the purpose of making payroll expenditures) drawn (without counter-signature) in the name of The Port Authority of New York and New Jersey on any depository with which the Port Authority shall have established an account for purposes other than payroll expenditures;

(Board - 1/10/85)

2. increase to \$5,000 the current monetary limit of \$3,000 on all checks bearing authorized facsimile signatures, drawn in the name of The Port Authority of New York and New Jersey on any depository with which the Port Authority shall have established a "Payroll Account";

3. increase to \$5,000 the current monetary limit of \$2,000 on all checks bearing authorized facsimile signatures, drawn in the name of The Port Authority of New York and New Jersey on any depository with which the Port Authority shall have established an account not for the purpose of payroll expenditures;

4. change all references to "the Treasury Department", to "Treasury", change all references to "the Manager, Accounting Division" to "the Manager of General Accounting" and "the Manager of Financial Accounting" and delete all references to "Assistant Manager Accounting Division"; and

5. change current check signing authority primarily by including references to new titles in connection with authorization for signature of transfer warrants, signature of checks, counter-signature of checks, use of facsimile signatures on certain payroll and non-payroll checks, endorsement for collection or deposit of checks, drafts, certificates of deposit and other negotiable and non-negotiable commercial paper, access to safe deposit boxes and authorization to enter into night depository agreements and other special service agreements with depositories designated by the Committee on Finance.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the resolution of August 11, 1983, (appearing at pages 341 et seq. of the Official Minutes of that date), relating to signature of contracts and other documents in the absence of the Executive Director, signature of checks, safe deposit boxes, and depository service agreements be and it hereby is revoked and rescinded in its entirety; and it is further

RESOLVED, that in all cases where the Executive Director has been or shall hereafter be authorized to sign contracts, agreements, instruments, documents or papers on behalf of The Port Authority of New York and New Jersey (other than checks, drafts or commercial papers), and the Executive Director is unable to act because of absence or disability, then the Deputy Executive Director, Assistant Executive Director and the Director of Administration or any of them, or their successors in office or duties, shall be authorized to sign, and in all cases where any such contracts, agreements, instruments, documents or papers are signed by the Deputy Executive Director, Assistant Executive Director or the Director of Administration, or their successors in office or duties, all persons whatsoever shall be entitled to rely thereon without proof of the Executive Director's absence or disability; and it is further

RESOLVED, that checks and drafts drawn on behalf of The Port Authority of New York and New Jersey upon any and all banks, trust companies and other banking institutions in which any funds may at any time stand to the credit of The Port Authority of New York and New Jersey shall be signed as follows:

(Board - 1/10/85)

1. Transfer Warrants, being checks or drafts bearing upon their face substantially the following phraseology, "Transfer Warrants - This check is issued only for the purposes of transferring funds from one Port Authority of New York and New Jersey depositor to another", may be signed by the Chief Financial Officer, the Assistant Chief Financial Officer, the Director, Finance Department/Comptroller, the Treasurer, the Assistant Director, Finance Department, the Assistant Treasurer, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Assistant Financial Analyst in Treasury or the Associate Financial Analyst in Treasury, without co-signature and without limitations as to amount.

2. Any check or draft (other than a Transfer Warrant) the amount of which shall be in excess of Fifty Thousand Dollars (\$50,000), shall be signed by either the Executive Director, the Deputy Executive Director, the Assistant Executive Director, the Chief Financial Officer, the Assistant Chief Financial Officer, the Treasurer or the Assistant Treasurer and shall be countersigned by the Executive Director, the Deputy Executive Director, the Assistant Executive Director, the Chief Financial Officer or the Assistant Chief Financial Officer, (if they shall not have signed same), the Comptroller, the Deputy Comptroller, the Director, Finance Department/Comptroller or the Assistant Director, Finance Department; provided, however, that the Executive Director, Treasurer or Director, Finance Department/Comptroller, respectively, as appropriate, may delegate such authority to sign such checks or drafts in his absence to the Director of Administration, the Senior Financial Analyst in Treasury or the Staff Financial Analyst in Treasury, or the Manager of General Accounting or the Manager of Financial Accounting, respectively.

3. Any check or draft, the amount of which shall be Ten Thousand Dollars (\$10,000) or less and which is issued only for the purpose of making payroll expenditures, shall be signed by either the Comptroller, Director, Finance Department/Comptroller, Assistant Director, Finance Department, Deputy Comptroller, or the Manager of General Accounting or Manager of Financial Accounting without co-signature.

4. Any check or draft (other than a Transfer Warrant or a check or draft issued only for the purpose of making payroll expenditures), the amount of which shall be Fifty Thousand Dollars (\$50,000) or less, shall be signed either by the Chief Financial Officer, the Assistant Chief Financial Officer, the Director, Finance Department/Comptroller, the Treasurer, the Assistant Director,

Finance Department, the Assistant Treasurer, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury or the Assistant Financial Analyst in Treasury, the Associate Financial Analyst in Treasury, (but only if drawn on the bank with which there is on deposit the petty cash fund of a particular Port Authority trade development office, regional sales office or the Port Authority's Washington Office) by the Manager or the Assistant Manager of such trade development office, regional sales office and for the Washington Office, by the Port Authority's Washington Representative, without co-signature; and it is further

RESOLVED, that any depository designated by the Committee on Finance with which The Port Authority of New York or New Jersey shall have established a "Payroll Account" be and it hereby is requested, authorized and directed to honor all checks, drawn in the name of The Port Authority of New York and New Jersey on said bank (including those drawn to the individual order or any person or persons whose names appear thereon as signer or signers thereof) in the amount of \$5,000 or less, when bearing the phrase "Payroll Account" and when bearing or purporting to bear the facsimile signature of any one or more of the following officers of The Port Authority of New York and New Jersey:

Director, Finance Department
Comptroller
Deputy Comptroller
Assistant Director, Finance Department
Manager of General Accounting
Manager of Financial Accounting

and such depository shall be entitled to honor and to charge The Port Authority of New York and New Jersey for all such checks, regardless of by whom or by what means the actual or purported facsimile signature or signatures thereon may have been affixed thereto, if such facsimile signature or signatures resemble the facsimile specimens from time to time filed with the bank by the Secretary or other officer of The Port Authority of New York and New Jersey; and it is further

RESOLVED, that any depository designated by the Committee of Finance with which The Port Authority of New York and New Jersey shall have established an account be and it hereby is requested, authorized and directed to honor all checks, drawn in the name of The Port Authority of New York and New Jersey on said bank in the amount of \$5,000 or less, when not drawn on a Payroll Account and when bearing or purporting to bear the facsimile signature of any one or more of the incumbents of the following positions at The Port Authority of New York and New Jersey:

(Board - 1/10/85)

Senior Financial Analyst in Treasury
 or
 Staff Financial Analyst in Treasury
 or
 Financial Analyst in Treasury
 or
 Assistant Financial Analyst in Treasury
 or
 Associate Financial Analyst in Treasury

and such depository shall be entitled to honor and to charge The Port Authority of New York and New Jersey for all such checks, regardless of by whom or by what means the actual or purported facsimile signature or signatures thereon may have been affixed thereto, if such facsimile signature or signatures resemble the facsimile specimens from time to time filed with the bank by the Secretary or other officer of The Port Authority of New York and New Jersey; and it is further

RESOLVED, that any and all banks, trust companies and other banking institutions in which funds may at any time stand to the credit of The Port Authority of New York and New Jersey be and they hereby are authorized to honor all checks and drafts signed on behalf of The Port Authority of New York and New Jersey in accordance with the terms of this resolution; and it is further

RESOLVED, that the Treasurer, the Assistant Treasurer, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Assistant Financial Analyst in Treasury, the Associate Financial Analyst in Treasury and the Senior Cashier in Treasury be and each of them hereby is separately authorized to endorse for collection or deposit to the credit of The Port Authority of New York and New Jersey any and all checks, drafts, certificates of deposit and other negotiable and non-negotiable commercial paper to be credited to the account of The Port Authority of New York and New Jersey in any bank, trust company or other banking institution; and it is further

RESOLVED, that the Executive Director, and the Deputy Executive Director or the Assistant Executive Director, be and they hereby are authorized to rent or discontinue rental or safe deposit boxes in any bank, trust company or safe deposit company in the Port of New York District, and that access thereto may be had, subject to the rules and regulations of said bank, trust company or safe deposit company, by and of the following officers, to wit:

(a) The Treasurer, the Assistant Treasurer, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Assistant Financial Analyst in Treasury, the Associate Financial Analyst in Treasury, the Cashier,
 or

(b) The Comptroller, the Deputy Comptroller, the Manager of General Accounting, the Manager of Financial Accounting,

(Board - 1/10/85)

provided, that no one of the foregoing officers shall have access thereto except in the presence of another of the foregoing officers, and provided, further, that at least two of the officers having access thereto as above provided shall be listed in different subdivisions in the above list of officers by whom such access may be had; and it is further

RESOLVED, that the Chief Financial Officer, the Assistant Chief Financial Officer, the Director, Finance Department/Comptroller, the Treasurer, the Assistant Director, Finance Department and the Assistant Treasurer be and each of them hereby is separately authorized to enter into night deposit agreements and other such special service agreements with any depository designated by the Committee on Finance; and it is further

RESOLVED, that the foregoing authority shall be granted to the successors in office or duties of all the positions named herein.

(Board - 1/10/85)

Kennedy International, Newark International and LaGuardia Airports - Police Professional Liability Insurance

It was reported that pursuant to Federal Airport Security Regulations, Title 14, Code of Federal Regulations, Part 107, promulgated by the Federal Aviation Administration of the United States Department of Transportation, the Board, at its meeting on August 8, 1974, authorized agreements with domestic airlines at Kennedy International, Newark International and LaGuardia Airports under which the Port Authority would provide police security services for the airlines at the passenger boarding gates of the three airports and the airlines would reimburse the Port Authority for the costs of such services. At its meeting on July 12, 1979, the Board authorized agreements to provide similar services to foreign-flag and supplemental air carriers at the three airports.

At its meeting on November 10, 1983, the Board authorized the purchase of Police Professional Liability Insurance for a three-year term effective December 5, 1983, covering Port Authority police security service for the airlines at the passenger boarding gates of Kennedy International, Newark International and LaGuardia Airports, in limits of \$2 million per occurrence through the broker Hamond & Regine, Inc. In early December 1984, the broker advised that, as a result of the tightening of world insurance markets and severe reinsurance market capacity contraction, one of the insurers of the Police Professional Liability Insurance program, Transit Casualty Co., would cancel its three-year policy effective January 5, 1985, while the other carrier, Granite State Insurance Co., declined to renew its participation, effective December 5, 1984.

As a result, brokers Hamond & Regine, Inc. and Frank B. Hall of New York, Inc. were requested to seek insurers which might be interested in providing replacement coverage. Frank B. Hall of New York, Inc. subsequently advised that none of the carriers it contacted had the underwriting capacity to provide the coverage, while Hamond & Regine, Inc. indicated that it was able to secure Police Professional Liability Insurance for a one-year term in limits of \$500,000, per occurrence effective January 5, 1985, through the National Sheriff's Association, with coverage underwritten by The Imperial Casualty and Indemnity Co. at a total premium cost of \$93,307. Imperial Casualty and Indemnity Co. holds a Best's Policyholder Rating of "A+," and a financial size rating of Class XIII.

Hamond & Regine, Inc. is presently continuing discussions with domestic and London insurers in order to arrange additional Police Professional Liability Insurance coverage, up to a limit of \$1.5 million excess of the \$500,000 coverage, per occurrence. The purchase of such additional coverage will be made provided the premium is reasonable in light of current market conditions and in comparison to the premium for the coverage to be provided by Imperial Casualty and Indemnity Co. for the primary \$500,000, per occurrence, of insurance. Until such additional Police Professional Liability Insurance is purchased, the Port Authority will self-insure this exposure, on its own behalf and for its own liability, above the primary insurance provided through the National Sheriff's Association.

(Board - 1/10/85)

Staff has evaluated the one-year premium of \$93,307 quoted by Imperial Casualty and Indemnity Co. for \$500,000 of coverage as acceptable in light of the recent severe tightening of world insurance capacity. While the quoted premium is significantly higher than the premium cost for the coverage approved by the Board at its meeting on November 10, 1983, that cost reflected six years of declining marketplace cashflow underwriting. In fact, on an inflation-adjusted basis, the currently quoted premium is comparable to the 1977 premium for this coverage. In view of the protection afforded the airlines as additional insureds under this coverage, staff believes the purchase of coverage is warranted. Premium for this insurance is reimbursed to the Port Authority by the airlines.

Recommendation was made that the Board authorize:

1. the purchase of Police Professional Liability Insurance from Imperial Casualty and Indemnity Co., through the broker, Hamond & Regine, Inc., in a limit of \$500,000 per occurrence for a one-year term effective January 5, 1985, at a total premium cost of \$93,307; and

2. the Executive Director to purchase additional Police Professional Liability Insurance as may become available, in limits up to \$1.5 million, per occurrence, excess of \$500,000, at a premium considered reasonable in light of current market conditions and in relation to the premium charged for the primary \$500,000 of insurance.

Approved.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Commissioner H. Carl McCall

Chairman Sagner welcomed Commissioner McCall to his first Board meeting and expressed the pleasure of his fellow Commissioners at having Commissioner McCall join them as a colleague in the work and programs of the Authority.

(Board - 2/14/85)

Tribute to Honorable Lewis L. Glucksman

The following resolution was unanimously adopted, expressing the appreciation of the Commissioners of The Port Authority of New York and New Jersey to the Honorable Lewis L. Glucksman.

WHEREAS, during the years since his appointment as a Commissioner of The Port Authority of New York and New Jersey by Governor Hugh L. Carey in 1976 and his reappointment by Governor Carey in 1979, the Honorable Lewis L. Glucksman has given unstintingly of his time, energy and abilities to the continued development and progress of the Port of New York/New Jersey and the entire region of the Port District; and

WHEREAS, in his various capacities as a member of the Board of Commissioners, as Vice Chairman and Chairman of the Committee on Finance, member and Chairman of the Audit Committee, and as a member of the Committee on Construction, the Committee on Operations, and the Committee on Port Planning, Commissioner Glucksman has contributed his judgment and guidance and his rich background of financial and business experience to the formulation of the financial policies and programs of The Port Authority of New York and New Jersey; and

WHEREAS, his fellow Commissioners and the staff have greatly valued his help and advice in all areas of the planning, management and particularly the financing of this public enterprise;

NOW, THEREFORE, be it

RESOLVED, that the Commissioners of The Port Authority of New York and New Jersey do hereby express to Lewis L. Glucksman their deep appreciation for his outstanding service to the Port Authority and their highest respect for him as a valued colleague; and be it further

RESOLVED, that the Commissioners do hereby direct that this resolution be suitably engraved and presented to Commissioner Lewis L. Glucksman as a token of the high esteem and deep respect in which he is held by his fellow Commissioners and by the staff.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of January 10, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on February 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on February 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on February 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on February 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 2/14/85)

1985 Budget - January 1 through March 31, 1985

It was recalled that the Board, at its meeting on December 13, 1984, acted to confirm the authority of the Executive Director to make expenditures and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1985 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). This action was taken when it became apparent that, in connection with the review of the items constituting the proposed 1985 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary budget materials in time for the Board to consider any recommendations made by the States for possible revisions to the proposed 1985 Budget before the January 10, 1985 meeting of the Board. It was reported that the process is continuing and has not yet been concluded.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1985 Budget presented to the Board on December 6, 1984. It is expected that such payments will not exceed \$150 million per month through March 31, 1985.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through March 31, 1985 to make expenditures at a rate not to exceed \$150 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1985 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1984.

Fund for Regional Development - Former New York State Leasehold in Two World Trade Center - Retention of Appraisal Services

It was reported that pursuant to the Agreement among the State of New York, the State of New Jersey and the Port Authority, a Fund for Regional Development has been established for the purpose of making available to the States the capital value resulting from the vacation of space presently held by the States in Two World Trade Center. The Fund's income is provided by subleasing space formerly occupied by New York State, less certain costs including brokerage commissions, construction allowances, payment to the Port Authority of base rent plus rental for other costs, and payment to New York State for its move-out cost, and payment of an administrative fee to the Port Authority.

Recent discussions have been held with both States regarding the possibility of a Port Authority "buy-out" of the Fund's leasehold interest. The advantages of such a proposal would be to ease the Fund's administrative burden and to make the Fund's assets available to the States for projects as expeditiously as possible. These discussions have progressed to the point where it is now necessary to determine the value of the assets of the Fund for Regional Development.

In consultation with both States, staff has determined that it is necessary and desirable that two separate and independent appraisals be obtained. One appraisal will be for the use of the Port Authority as potential purchaser of the leasehold. The purpose of that evaluation would be to assist the Port Authority in setting a price at which it would be willing to acquire the lease from the Fund for Regional Development. A separate appraisal will be sought for the use of the Fund, which would be in the position of seller.

Staff has interviewed and is considering Brooks-Harvey as a firm well-qualified to perform services for the Port Authority. Brooks-Harvey & Company, Inc., has substantial experience in arranging appraisal and real estate financing for large-scale transactions involving office buildings. As a Morgan Stanley affiliate, Brooks-Harvey supplements its own resources with full access to Morgan Stanley's substantial knowledge and experience in real estate finance.

The Fund has informed the Port Authority that they have selected Bear, Sterns & Company as the firm most qualified to appraise and report on the value of the Fund's assets.

It is estimated that the performance of these services can be completed within 30 days from the initiation of the work.

It was therefore recommended that the Board authorize the Executive Director to enter into agreements with two outside consultants to provide real estate appraisal services to appraise the value of the leasehold in Two World Trade Center held by the Fund for Regional Development.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into agreements with two outside consultants to provide real estate appraisal services to appraise the value of the leasehold in Two World Trade Center held by the Fund for Regional Development; and it is further

RESOLVED, that the form of said agreements be approved by General Counsel or his authorized representative.

(Board - 2/14/85)

LaGuardia Airport - Host Services of New York, Inc., a Subsidiary of Marriott Corporation -
Amendment to Lease AG-700

It was reported that the Board, at its meeting on May 10, 1973, authorized a 15-year lease agreement with Host International, Inc., which agreement was subsequently assigned to Host Services of New York, Inc., its wholly owned subsidiary, covering the operation of various food and beverage facilities at LaGuardia Airport. As a necessary service improvement, it is now proposed that Host, now a subsidiary of Marriott Corporation, relocate, upgrade and refurbish certain of the existing food and beverage facilities and construct new ones. The proposed rehabilitation and expansion is consistent with the anticipated expansion of the Central Terminal Building and will require an investment of approximately \$5,080,000. In consideration of this new investment, a five-year extension of the term of the lease from October 1, 1989 to September 30, 1994 is recommended. This will allow the tenant a further period in which to amortize its new investment.

The current percentage rental arrangement set forth in the lease produced \$708,000 in revenues to the Port Authority for the calendar year 1983. Under the proposed new arrangement, the tenant will pay a percentage rental for the balance of its current term equivalent to the sum of 14.5% of all annual gross receipts arising from the sale of alcoholic beverages, 10.5% of annual gross receipts arising from airport terminal food sales and 5% of employees' cafeteria food sales. If the total rental paid by the tenant in any year reaches \$1,350,000, the Port Authority will grant the tenant a rental credit equivalent to 5% of the gross receipts arising from sales in the employees' cafeteria. These increases in percentage rentals will be effective with respect to the main Terrace restaurant and bar and the Central Fast Food Cafeteria as of April 1, 1985. The increase will become effective with respect to all other restaurants and bars upon substantial completion of the construction, relocation and refurbishing work therein. It is contemplated that during construction, certain temporary facilities will be required and the existing percentage rentals, not the increased ones, will apply to these. It is estimated that this new arrangement will produce approximately \$1,350,000 in revenues to the Port Authority for the 1987 lease year. For the period October 1, 1989 through September 30, 1994, the tenant will pay an annual percentage rental equivalent to the sum of 16.5% of all annual gross receipts arising from the sale of alcoholic beverages, 12.5% of annual gross receipts arising from airport terminal food sales and 5% of employees' cafeteria food sales. Host will continue to be entitled to the credit of 5% of employees' cafeteria food sales if annual rental exceeds \$1,350,000.

In view of the extremely large investment by the tenant and the substantial increase in rentals, the Port Authority has agreed as part of this arrangement to a capital investment formula which will provide the tenant with a further credit against the rentals due the Port Authority in an annual amount not to exceed \$100,000, which amount will be reduced proportionately if the amount of the tenant's investment is less than \$5,080,000. If less than \$4,173,000 is invested, the tenant would not be entitled to this credit. This credit will be applied in equal monthly installments against monthly payments of rental due until exhausted.

The lease with Host would continue to be subject to termination by the Port Authority at any time without cause on thirty days' notice during the term of the extension, in which event the tenant would be reimbursed for the then unamortized portion of its actual construction and installation costs, and such reimbursement would also be made in the event Host's lease is not renewed for any reason other than for cause, upon its expiration on September 30, 1994.

(Board - 2/14/85)

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement with Host Services of New York, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized for and on behalf of the Port Authority to enter into agreements with Host Services of New York, Inc. providing for Host to invest approximately \$5,080,000 to rehabilitate and expand the food and beverage facilities being operated by it at LaGuardia Airport under its lease with the Port Authority, amending the percentage rental provisions of the lease and extending the term of the letting under the lease for a five-year period commencing October 1, 1989, such agreement also to provide for the tenant to perform certain environmental and ramp work for the Port Authority's account and to be reimbursed for the cost thereof in an estimated amount of \$700,000; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 2/14/85)

Newark International Airport - Butler Aviation-Newark, Inc. - Supplement to Lease AN-998 for Aircraft Service Center

It was reported that the Board, at its meeting on December 9, 1982, authorized the Executive Director to enter into an agreement of lease with Butler Aviation-Newark, Inc. (hereinafter called "Butler") covering the letting of a site of approximately 37 acres of land at Newark International Airport on which Butler would design, construct and operate a major Aircraft Service Center. The Lease (AN-998) was fully executed by the Port Authority and Butler on November 7, 1983 and is for a term to expire approximately 30 years from completion of construction on Area I but no later than August 31, 2014. The leased premises are divided into Area I and Area II for the purpose of phased and obligated construction. Under the lease, the Port Authority will make payments to Butler for the construction of its facilities including those of approved sublessees in an amount not to exceed \$28 million for construction which will have started not later than August 31, 1985. Under the existing terms of the lease, Butler is to pay to the Port Authority, effective when construction is completed in Area I but no later than September 1, 1984, an initial annual ground rental of approximately \$401,237, the said annual ground rental to increase to approximately \$809,682 effective upon any occupancy of any facility constructed in Area II but no later than September 1, 1985.

At the time of the December 9, 1982 Board authorization it was anticipated that construction would commence by mid-1983 and that it would take approximately 24 to 36 months to complete facilities representing an ultimate construction investment of approximately \$40 million. The various dates contained in the lease covering completion of construction, payment of rental and Port Authority payments for construction were based on staff's desire to move the project as quickly as possible and apparently overly optimistic information. The complexity of the project, its two stage development, its financial considerations, such as permitting a subtenant to invest its own funds in structures within the Butler leasehold and the special relationship established therefrom required almost a year of negotiation resulting in several redraftings of lease provisions. Consequently, negotiations between the Port Authority and Butler's representatives were not completed until November 1983. In addition, Butler advised that its construction plans called for a firm commitment of at least one major subtenant which was not obtained until June 1984 after lengthy negotiations among Butler, its major subtenant and the Port Authority. As a result of these delays the project's design and construction schedule was revised and the estimated completion of Area I construction originally scheduled for early 1985 was set back to October 15, 1986.

It is recommended that specific dates contained in the lease be revised to more realistically reflect Butler's development and occupancy of the site. Tentative agreement has been reached with Butler whereby the lease would be supplemented to postpone the payment of the initial ground rental to provide that Butler would pay an initial ground rental of \$809,682 effective when there is completion of construction in Area I or occupancy of any facility which has been constructed in Area II but no later than September 1, 1985. The annual ground rental consists of a fixed amount of \$166,452 based on \$4,500 per acre (the constant factor) and a variable amount of \$643,230 (the Airport Services Factor). It should be pointed out that the variable amount represents the Airport Services Factor which through the workings of the Airline Master Lease formula does not become payable until the site is revenue producing to the Port Authority. Therefore, in actuality, by postponing the commencement of ground rental there would be no payment of only the constant portion of the ground rental for Area I which amounts to \$81,630.

(Board - 2/14/85)

Under the proposed amendment to the lease effective the tenth year instead of the eleventh year, after the initial ground rental commences, the constant factor will be increased to \$221,928 based on \$6,000 per acre, and effective the twentieth year instead of the 21st year after ground rental commences, the constant factor will be increased again to \$277,410 based on \$7,500 per acre. The Airport Services Factor, which will be adjusted at the time ground rental commences, and will be subject to annual adjustment thereafter, is based on the Airline Master Lease Adjustment at the airport for the calendar year 1981 amounting to approximately \$17,400 per acre.

The other terms and conditions of the lease previously approved by the Board, at its meeting on December 9, 1982, will remain unchanged.

Under the terms of the lease, the Port Authority is obligated to provide paving and utilities to the perimeter of the site, including access roads and taxiways, underground utility systems for water, sanitary and storm drainage, and underground duct systems for electrical power distribution and communications. The Board, at its meeting on December 9, 1982, also authorized the Executive Director to implement a project to provide certain Port Authority construction work. This construction work is ongoing and it is estimated to be completed by September 1985.

It is therefore recommended that the Board authorize the Executive Director to enter into an agreement with Butler Aviation-Newark, Inc. amendatory and supplemental to Lease AN-998, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into an agreement with Butler Aviation-Newark, Inc. amendatory and supplemental to Lease AN-998 between Butler Aviation-Newark, Inc. and the Port Authority covering premises at Newark International Airport on which Butler Aviation-Newark, Inc. will design, construct and operate an Aircraft Service Center which would:

1. revise the effective date for the commencement of ground rental under the lease so that the lessee will pay an initial ground rental of \$809,682 for the entire 37-acre site on the earliest of completion of construction in Area I, the date of occupancy of any facility in Area II or September 1, 1985 with the ground rental to consist of a constant factor based on \$4,500 per acre and a variable amount which is subject to annual adjustment based on the Airport Services formula under the Airline Master Leases at the airport;

2. provide that the constant factor of the annual ground rental be increased to \$6,000 per acre effective the tenth year instead of the eleventh year after the ground rental commences and to be increased again to \$7,500 per acre effective the twentieth year instead of the 21st year after the ground rental commences; and

(Board - 2/14/85)

3. extend the period during which the Port Authority will make payments for the construction of the Aircraft Service Center to cover construction which will have started not later than August 31, 1986 instead of August 31, 1985; and it is further

RESOLVED, that the form of said agreement be subject to the approval of General Counsel or his designated representative.

(Board - 2/14/85)

Newark International Airport - Transit Access Study - Agreement with NJ Transit Corp.

It was reported that several access studies have been performed for Newark International Airport over the past two decades. None of these, however, anticipated the extraordinary growth rate currently being experienced at Newark International Airport, the fastest growing of the region's (and the nation's) airports.

It is now apparent that sustained growth at the airport will require a more comprehensive examination of feasible Newark International Airport transit access alternatives.

The Urban Mass Transportation Administration has awarded NJ Transit, as project sponsor, a grant for a \$245,000 study of improved transit access to Newark International Airport known as the NIA Transit Access Study.

The proposed study will include:

1. an analysis of existing public transit access to Newark International Airport and its immediate vicinity;
2. an analysis of existing market data relating to short-term transit improvements;
3. the making of recommendations relating to short-term physical and other transit services improvements; and
4. an analysis of long-term transit access alternatives.

Discussions between staff and NJ Transit have resulted in a joint recommendation that the Port Authority participate in the proposed study. NJ Transit would take the lead, with Port Authority cooperation, on the short-term portion of the study, which includes evaluating existing bus services and potential bus diversions as well as identifying new markets. The Port Authority would (with consultant assistance) perform the long-term portion of the study, which would include a long-term capital, operations and institutional analysis for various guideway alternatives (e.g., light rail transit). Of the \$245,000 to be committed to the study, 80%, or \$196,000, will be Federally funded, and the balance, the 20% local share, or \$49,000, will be provided in the form of services-in-kind by the Port Authority (\$21,000) and by NJ Transit (\$28,000) under the proposed cooperative agreement between them. From the study grant, \$164,000 will be reimbursable to the Port Authority and with services-in-kind, the total cost to the Port Authority will be \$185,000.

The study, which is expected to last one year, will include consideration of data from several other studies being performed concurrently, which will form the basis for analysis relating to data collection, demand estimates and current service analysis.

Under the proposed agreement with NJ Transit, the Port Authority, following issuance of a Request for Proposals, would enter into agreements with professional advisory service firms in an aggregate amount not to exceed \$149,000.

(Board - 2/14/85)

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with NJ Transit Corp., under which the Port Authority would participate with NJ Transit in a study of improved transit access to Newark International Airport at a total cost to the Port Authority of \$185,000, of which \$164,000 would be reimbursable to the Port Authority by NJ Transit from Federal grant funds; and

2. enter into an agreement or agreements with one or more professional advisory service firms, in connection with the proposed agreement with NJ Transit relating to the NIA Transit Access Study, to assist staff in the analysis of various short-term and long-term transit access alternatives to assess market potential and determine physical improvements in an aggregate amount not to exceed \$149,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with NJ Transit Corp., under which the Port Authority would participate with NJ Transit in a study of improved transit access to Newark International Airport at a total cost to the Port Authority of \$185,000, of which \$164,000 would be reimbursable to the Port Authority by NJ Transit from Federal grant funds, such agreement to be subject to approval as to form by General Counsel or his designated representative; and it is further

RESOLVED, that the Executive Director is authorized to enter into an agreement or agreements with one or more professional advisory service firms, in connection with the proposed agreement with NJ Transit relating to the NIA Transit Access Study, to assist staff in the analysis of various short-term and long-term transit access alternatives in an aggregate amount not to exceed \$149,000, such agreement or agreements to be subject to approval as to form by General Counsel or his designated representative.

(Board - 2/14/85)

Waterfront Development Program - Hunters Point, Queens, New York - Supplemental Environmental Studies

It was reported that physical planning work and environmental planning and analysis of the Hunters Point, Queens, Waterfront Development Project has proceeded and studies are currently underway, pursuant to the December 8, 1983 Board authorization for the project. Staff now recommends initiation of an additional study to survey the aquatic biota and water quality in the East River and Newtown Creek areas at Hunters Point. This environmental planning and analysis work is a prerequisite for securing site and other developmental approvals and/or permits which may be needed in connection with the Hunters Point Waterfront Development Project.

The survey will include, among other things, the analysis of water quality, zooplankton and phytolankton, benthos, fish and physical and chemical properties of sediments. This work will be performed in close cooperation among the Port Authority, the New York State Department of Environmental Conservation, the New York City Department of Environmental Protection and the U.S. Army Corps of Engineers. The study, which will coincide with the ongoing master plan development activities and other environmental services, will be conducted over a five season period at an amount estimated to be \$300,000.

These services would be obtained through a Request for Proposals, using either a select list of qualified firms or public advertisement or a combination of both. Based on a detailed evaluation of the proposals received and the firms' qualifications, staff would recommend an appropriate firm to perform the study. The Request for Proposals is expected to be issued shortly and an agreement is expected to be executed with the selected firm by March 15, 1985.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement, on the basis of proposals to be received, for the performance of an environmental field study of aquatic biota and water quality at Hunters Point, Queens, New York, in an amount estimated to be \$300,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement, on the basis of proposals to be received, for the performance of an environmental field study of aquatic biota and water quality at Hunters Point, Queens, New York, in an amount estimated to be \$300,000.

**New York City Passenger Ship Terminal, Port Newark, Elizabeth and Brooklyn Port Authority
Marine Terminals - Maintenance Dredging - Contract MFP-158 - Award**

It was reported that Contract MFP-158 provides for the removal and disposal of approximately 600,000 cubic yards of accumulated material from various berths at the New York City Passenger Ship Terminal and the Port Newark, Elizabeth and Brooklyn Port Authority Marine Terminals.

The contract was publicly advertised and the following bids were received on January 17, 1985:

	Estimated Total Amount
Great Lakes Dredge & Dock Company Staten Island, New York	\$2,617,500
Weeks Dredging & Contracting, Inc. Cranford, New Jersey	2,679,610
ENGINEER'S ESTIMATE	\$2,700,000

Great Lakes Dredge & Dock Company submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract MFP-158, Maintenance Dredging, New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn Port Authority Marine Terminals, to Great Lakes Dredge & Dock Company in the estimated total amount of \$2,617,500 and to order extra work up to the amount of \$262,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract MFP-158, Maintenance Dredging, New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn Port Authority Marine Terminals, to Great Lakes Dredge & Dock Company in the estimated total amount of \$2,617,500 and to order extra work up to the amount of \$262,000.

(Board - 2/14/85)

Meritorious Service Award of Police Commendation Medal to Detectives Matthew T. Besheer and Pastor Toro, Jr.

It was recommended that the Police Commendation Medal be awarded to Detectives Matthew T. Besheer and Pastor Toro, Jr.

The Police Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Detectives Matthew T. Besheer and Pastor Toro, Jr. it is recommended that the Police Commendation Medal award be given on the following grounds:

On May 6, 1984, Detective Matthew T. Besheer and Detective Pastor Toro, Jr. were assigned to the Port Authority Bus Terminal on the evening tour. At approximately 4:15 p.m., Police Sergeant William Corrigan, on duty at the Police Desk, received a call from a New Jersey bus dispatcher stating that, "a patron was holding up a few buses. . . he must be on something." Sergeant Corrigan immediately dispatched a police officer to the scene and advised other units that a Code 50 (disorderly person) was occurring at Platform 50.

Overhearing the radio transmission, Detectives Besheer and Toro, who were in the immediate vicinity, responded to the scene. Being the first to arrive on the scene, they observed a New Jersey Transit bus parked at the curb of Platform 50 and an individual standing in the bus doorway.

In the best interests of the bus patrons whose lives were being threatened, Detective Toro bypassed the person standing in the bus doorway to speak to the bus driver about the problem. In so doing, the individual in the doorway turned to exit the bus, while withdrawing an open knife from his pants pocket, and advanced toward Detective Besheer who was standing outside of the bus. Alerted by the warning of the bus driver, Detective Besheer backed away, unholstering his weapon as he walked. Detective Toro immediately ran after the subject and grabbed him from behind to prevent the subject from attacking anyone. Detective Toro and the man became embroiled in a violent struggle on the floor. After placing his weapon back in its holster, Detective Besheer joined in the struggle to help subdue the man.

(Board - 2/14/85)

Responding uniformed police officers were confronted with the melee, during the course of which Detective Toro sustained a deep stab wound to his torso, just to the right of the groin. Though Detective Besheer had also sustained knife wounds to his ankle, he realized the gravity of the situation and succeeded in disarming the individual, guaranteeing the safety of innocent patrons and enabling the arrest to be effected by the responding officers. Detective Toro was then rushed to Roosevelt Hospital and surgery was performed to tie a severed artery.

The prompt and courageous intervention by Detectives Besheer and Toro was directly responsible for resolving this incident without injury or loss of life of innocent bystanders. Despite the fact that the man was brandishing an opened knife, they did not hesitate to take decisive action, safeguarding "victimized" patrons. The fact that no shots were fired despite the intensity of the situation is a credit to the Detectives' professionalism and extreme regard for protecting human life, including the safety of someone threatening their own lives.

For their instinctive responsiveness in subduing a man who had been menacing passengers on a bus at the Port Authority Bus Terminal, even after they sustained personal injuries, it is recommended that the Police Commendation Medal be awarded to Detective Matthew T. Besheer and Detective Pastor Toro, Jr.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Detective Matthew T. Besheer and Detective Pastor Toro, Jr.

(Board - 2/14/85)

Meritorious Service Award of Police Commendation Medal to Police Sergeant Patrick DiBenedetto

It was recommended that the Police Commendation Medal be awarded to Police Sergeant Patrick DiBenedetto.

The Police Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Sergeant Patrick DiBenedetto it is recommended that the Police Commendation Medal award be given on the following grounds:

On February 28, 1984, Police Sergeant Patrick DiBenedetto was assigned as Airport Emergency Crew Chief on the evening shift at Kennedy International Airport. At 4:19 p.m., the JFK Control Tower transmitted an emergency call for a Scandinavian Airlines jumbo jet with which the tower had lost contact following a landing on Runway 4R. As the Police Desk was broadcasting the aircraft emergency, Sergeant DiBenedetto and his unit responded to the aircraft's last known location at the far end of Runway 4R, near the approach end of Runway 32. As his unit neared the scene, the Sergeant observed that the aircraft, an SAS DC-10, was partially in Thurston Basin and immediately an evacuation procedure was begun. Sergeant DiBenedetto also summoned assistance from municipal agencies.

Since there was no fire, the Sergeant directed his crew and responding police personnel to assist the 163 passengers and 14 crew members out of the aircraft and to direct them to a safe area. Some passengers in the rear of the aircraft were able to exit onto dry land, while others were exiting over the left wing onto Runway 22L approach lighting pier, where police officers led them to safety. However, approximately 15 passengers had exited the right front door of the aircraft and were floating in a life raft attached to the DC-10. Sensing danger at their proximity to the steaming, stricken aircraft and fearing for their lives, the passengers detached the raft from the aircraft and drifted away from its nose. To hasten their escape and since no oars were present, they used their hands to paddle away from the plane.

(Board - 2/14/85)

Despite several attempts to toss a rope to the raft, 15 anxious and confused passengers were adrift in the center of Thurston Basin. The air reeked of jet fuel and steam poured from the doused engines. Sergeant DiBenedetto, realizing that the aircraft was not fully shut down and that the presence of Emergency Unit 2 would enable command to be relegated to the Main House Crew Chief, took the decisive action that would save 15 lives. He grabbed a life line and entered the treacherous and frigid waters, swimming approximately 25 yards to the stranded passengers, thereby enabling police officers on shore to pull the raft quickly and safely to land.

Sergeant DiBenedetto's actions were in the finest traditions of Port Authority police service. Disregarding his own safety, he did not hesitate to take prompt, decisive action to effect the rescue of the stranded passengers. Sergeant DiBenedetto is directly responsible for the fact that these 15 passengers were safe on dry land within seven minutes of the aircraft ditching.

In recognition of his alert initiative and disregard for his own safety, in diving into the freezing water of Thurston Basin to rescue passengers adrift in a life raft discharged from a downed aircraft, it is recommended that the Police Commendation Medal be awarded to Police Sergeant Patrick DiBenedetto.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Sergeant Patrick DiBenedetto.

(Board - 2/14/85)

Meritorious Service Award of Police Commendation Medal to Police Officer Emiliano Sepulveda, Jr.

It was recommended that the Police Commendation Medal be awarded to Police Officer Emiliano Sepulveda, Jr.

The Police Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Emiliano Sepulveda, Jr. it is recommended that the Police Commendation Medal award be given on the following grounds:

On October 31, 1984, during the evening, off-duty Police Officer Emiliano Sepulveda, Jr., his wife and children were walking in the Town House area of Co-op City in the Bronx, when Officer Sepulveda observed a large group of youths, approximately 40 or 50 in number, apparently chasing one youth. As the crowd continued to pursue the individual into an unlit grassy area, Officer Sepulveda observed them stop and, by the movements of the crowd, suspected that a fight had broken out.

After ushering his wife and children to safety, Officer Sepulveda approached the "Greenway" and noticed a group of youths huddled near what Officer Sepulveda believed to be an individual lying on the ground, while some other members of the crowd were jumping up and down. Sensing that an assault was being committed, Officer Sepulveda's first thought was to call for assistance since he was seriously outnumbered and unarmed. However, because of the seriousness and urgency of the situation, he immediately removed and displayed his police shield above his head and shouted loudly to the crowd "Police Officer, don't move."

(Board - 2/14/85)

Scared by this warning, the group of youths dispersed, and Officer Sepulveda immediately approached the young man who was lying on his back and suffering from a knife wound to the right side of his neck. Within seconds of his observation, he heard someone shout, "Help me, I've been stabbed" and discovered another male who was stabbed in the right side of his chest. Instinctively Officer Sepulveda administered first aid to both men by exerting direct pressure on their wounds. Officer Sepulveda then called to his wife who was in a nearby covered area to summon assistance, remaining with the victims until emergency services personnel in an ambulance arrived.

Although both victims were critically wounded they subsequently recovered, but this might not have been the case if it weren't for the unselfish and courageous intervention of Officer Sepulveda. New York City Police investigating this incident credit Officer Sepulveda with saving the lives of these two "victims." Despite being out-numbered and being unarmed, Officer Sepulveda's instantaneous reaction exemplifies true police valor, bringing credit to himself and to the entire Port Authority. Officer Sepulveda's heroism was also honored by the Council of The City of New York and by Congressman Mario Biaggi.

For his initiative, decisive actions and selflessness in dispersing a large crowd of unruly youths and ultimately saving the lives of two young men, in the finest tradition of police professionalism, it is recommended that the Police Commendation Medal be awarded to Police Officer Emiliano Sepulveda, Jr.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Emiliano Sepulveda, Jr.

(Board - 2/14/85)

Meritorious Service Award of Commendation Medal to Joseph A. Cairo

It was recommended that the Commendation Medal be awarded to Joseph A. Cairo.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Joseph A. Cairo it is recommended that the Commendation Medal award be given on the following grounds:

At PATH's Journal Square station at approximately 9:48 p.m. on December 2, 1983, Power Rail Maintainer Joseph A. Cairo observed a young female passenger on the eastbound platform acting strangely. Her fidgeting behavior indicated that she might jump onto the rail tracks. As Mr. Cairo watched her, he called for power off in case the young woman jumped onto the tracks in an attempt to hurt herself. Seconds later, the passenger did indeed jump onto the track. She then moved toward the power rail and attempted to place her foot on the third rail, powered with 600 volts of electricity.

Mr. Cairo immediately ran over, jumped onto the tracks and positioned himself between the woman and the third rail. Under emergency circumstances, power is removed within one minute. In this case, the timing from when Mr. Cairo called for power off and when he jumped between the rail and the patron was seconds. Mr. Cairo was fully aware that the rail was most probably still charged with power when he leaped on to the tracks to save a patron.

The situation Mr. Cairo placed himself in was extremely dangerous. Contact with the third rail would have resulted in electrocution and death to the patron or to Mr. Cairo. In the face of possible death, Mr. Cairo exercised exceptional bravery and reacted to save the woman. His life-saving actions to aid a patron were clearly above and beyond his normal responsibilities.

For his extraordinary actions that prevented the possible death of a patron without regard for his own life, it is recommended that Joseph A. Cairo be awarded the Commendation Medal.

(Board - 2/14/85)

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Joseph A. Cairo.

(Board - 2/14/85)

Meritorious Service Award of Commendation Medal to Frank Comes

It was recommended that the Commendation Medal be awarded to Frank Comes.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Frank Comes it is recommended that the Commendation Medal award be given on the following grounds:

While on duty at the Journal Square Transportation Center on the evening of June 6, 1984, Car Inspector Frank Comes observed a male passenger attempting to board a train between cars, after the doors had closed. The train was already in motion when the man stepped on the bottom safety strap between the sixth and seventh cars. The safety strap could not support the man's weight and gave way.

Within seconds, Mr. Comes assessed the potential for a fatality and ran to the train to aid the man. The passenger struggled to hold himself up and in doing so made it difficult for Mr. Comes to grab onto him. Mr. Comes managed to grab hold of the man under the arm with one hand, and proceeded to run with the train as it gained speed. While running, with his free hand, Mr. Comes pulled his radio out of the holder and called for the motorman to stop the train. The passenger never regained his balance and relied solely on Mr. Comes to keep him from falling between the trains and being crushed by the moving cars. Mr. Comes was also in grave danger of being pulled under the moving train and suffering fatal injuries. Various eyewitness accounts attest to the fact that had Car Inspector Comes' actions not been so prompt and selfless, the passenger would have certainly fallen beneath the train and possibly lost his life. Mr. Comes acted above and beyond the normal requirements of his duties, maintained his composure and exercised keen judgment in an extremely dangerous situation.

For his extraordinary and successful efforts to save the life of a patron while risking his own life in the process, it is recommended that the Commendation Medal be awarded to Frank Comes.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Frank Comes.

(Board - 2/14/85)

Meritorious Service Award of Commendation Medal to Michael S. Petrillo

It was recommended that the Commendation Medal be awarded to Michael S. Petrillo.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Michael S. Petrillo it is recommended that the Commendation Medal award be given on the following grounds:

In the early hours of April 23, 1983 while en route to work, Facility Operations Agent Michael S. Petrillo was travelling along a Staten Island side street when he noticed a seemingly abandoned motorcycle. His suspicions aroused, Mr. Petrillo stopped to investigate and discovered a critically injured and unconscious man, later confirmed as a victim of a hit-and-run accident.

Recognizing the critical condition of the unconscious man, Mr. Petrillo immediately flagged down a passing motorist. Very fortunately, both Mr. Petrillo, who is certified in cardiopulmonary resuscitation and first aid techniques, and the motorist, a paramedic, applied first aid while waiting for an ambulance to respond to the scene. The hit-and-run victim's left leg was sheared and arteries severed.

Once the victim was rushed to the closest hospital, doctors performed reconstructive surgery, which lasted several hours, and reconnected severed arteries, saving the victim's left leg which was severely damaged from the accident. According to the victim's father, "the physicians and surgeons who worked on my son agreed that Mr. Petrillo's skill and timely concern did nothing short of saving my son's life." After subsequent operations and months of therapy, the hit-and-run victim is now walking better than any of his doctors had hoped for.

Mr. Petrillo's quick and responsive actions saved the life of an accident victim. Whether on the job or off duty, Facility Operations Agent Petrillo is sincerely dedicated to public service, as demonstrated by his conduct in this situation, and is a true emergency service professional.

(Board - 2/14/85)

For his immediate and proper actions in a life-threatening situation that saved the life of a young adult, whose lifestyle could have been drastically altered due to serious leg injuries from a hit-and-run accident, and for representing the very best of public service ideals, it is recommended that the Commendation Medal be awarded to Michael S. Petrillo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Michael S. Petrillo.

Award of Distinguished Service Medal to Frederick Almerino

It was recommended that the Distinguished Service Medal be awarded to Frederick Almerino.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Frederick Almerino it is recommended that the Distinguished Service Medal award be given on the following grounds:

Frederick Almerino began his career with the Port Authority in 1954 in the Comptroller's Department as an Accountant I. During his 29 years of service, Mr. Almerino has held a variety of responsible financial positions including Property Accounting Supervisor, supervising positions in the Audit Division, Assistant General Auditor which ultimately led him, in 1975 to the World Trade Department as the Manager of the then newly-created Business and Economic Division where he presently serves admirably.

Mr. Almerino brought to his current position not only his years of experience in accounting and Port Authority auditing but also his previous experience in private industry. During those years in the Audit Department, Mr. Almerino displayed initiative and enthusiasm which were reflected in a number of accomplishments which the Port Authority benefits from to this day. The volume of construction which the Port Authority was involved in was unprecedented in the agency's history and construction auditing was a new, uncharted field. Mr. Almerino was instrumental in formulating and implementing the first construction claim audit which established the format for this type of auditing for the Port Authority and the industry. In addition, he formulated and implemented a program which provided a basis for the uniform system of payments to contractors for construction equipment purchases. Today, this formula is not only a standard element of all Port Authority construction contracts but has also been adopted by New York State for use in their contracts.

Mr. Almerino has not only demonstrated financial and auditing expertise, he has displayed foresight by looking for ways to streamline and modernize accounting procedures. Mr. Almerino was one of the first managers to recognize the importance of computers and the need to automate Port Authority records for

fixed charges. Under his direction, a manual system was replaced by a computer system, resulting in a more accurate and viable system. The basic format of that program is still in use today, and served as a model, once again for New York State agencies.

Mr. Almerino's analytical, common sense style of management and his financial expertise were truly tested in his assignment as Manager, Business and Economics Division in the World Trade Department. In 1975, two of the department's major tourist attractions were scheduled to preview, the Club/Restaurant and the World Trade Center Observation Deck, both of which are operations of a truly unique nature to the Port Authority. His ability to develop and implement the financial programs necessary to maximize Port Authority revenues from these activities were instrumental in establishing those facilities as top New York City tourist attractions. Mr. Almerino also had a hand in setting up a program of selling excess Club memberships, which today amounts to an excess of 3,000 dues paying members.

Additionally, Mr. Almerino is involved in the selective expansion of the Concourse food facilities. Mr. Almerino also played a key role in obtaining final broadcaster acceptance of the financial terms he developed, which govern the rent payable for the use of the television antenna by the regional broadcasters. He has been instrumental in establishing World Trade Department financial controls and programs designed to ensure maximum benefit and cost effectiveness. Mr. Almerino has left his mark on a variety of other World Trade Department activities including many major projects such as The Teleport and most recently, the Newark Legal and Communications Center. During his ten years with the World Trade Department, Mr. Almerino has established and crafted an effective budgeting plan for the approximate \$200 million of World Trade Center revenues and \$100 million of expenses. His insights cover not only all of the World Trade Department financial programs but most of the departments activities. Mr. Almerino's ability to review an operating procedure and indicate where problems, inefficiencies or ineffectiveness may exist has earned him the title of unofficial "Counsel" for the Department.

Mr. Almerino's foresight and intuition is further evidenced by the success of the World Trade Center revenue forecasting program. Through his persistence and direction, the Port Authority's first successful revenue forecasting computer program is in place. This program is currently under review by a variety of Departments to determine if the system can be modified to accommodate other departmental needs.

In recognition of his 29 years of dedicated and exemplary service to the Port Authority, and for his ingenuity and foresight which have helped advance the Port Authority's programs and goals, it is recommended that the Distinguished Service Medal be awarded to Frederick Almerino.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Frederick Almerino for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Robert Bird

It was recommended that the Distinguished Service Medal be awarded to Robert Bird.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Robert Bird it is recommended that the Distinguished Service Medal award be given on the following grounds:

Robert Bird began his combined Hudson and Manhattan and Port Authority Trans-Hudson Corporation career in 1949 as an Acting Train Clerk in the Transportation Division. He quickly advanced to the position of Towerman in 1950 and subsequently mastered all of the interlocking towers on the PATH system.

At PATH Mr. Bird consistently selected the most demanding position and responsibilities. For many years, Mr. Bird was the System Console Supervisor on the evening tour at PATH's Control Center, the nucleus of the railroad. It was here, through his awareness and intimate knowledge of the system, that he demonstrated his ability and expertise in coordinating the safe, efficient and on-time movements of trains during the evening rush hours, the period with maximum passenger demand.

Recently, Mr. Bird elected to work at PATH's Henderson Street Yard tower. Henderson Yard is the major support yard for the Car Equipment Division where minor and major repairs on the PATH car fleet are performed. Mr. Bird coordinates his work closely with the Yard Foreman and the Car Equipment supervisors and is responsible for the proper distribution of cars to the inspection pits and repair tracks. When difficult situations arise, just knowing that Mr. Bird is on duty in the tower is enough to provide a sense of confidence.

(Board - 2/14/85)

As it is with people who have exceptional ability and use it fully, Mr. Bird is an enthusiastic, loyal, dedicated worker. He has an exceptionally good attendance record during his 35-year career. He is also an excellent role model to his fellow Towermen, most of whom have trained under him. Supervisors have been careful to ensure that Mr. Bird participates in the training of all new Towermen because of his ability to share his knowledge and his enthusiasm in working with others. Observing him, a student Towerman sees the true importance of a Towerman's work and also realizes the satisfaction that comes from knowing that millions of passengers will travel safely via PATH because he has done his job well. Mr. Bird's dedication to railroad carries over into his leisure time and he builds railroad cars to scale. He has also received many awards and national recognition for his skills and craftsmanship.

For his 35 years of selfless dedication in the performance of his work, and for his admirable demeanor which has served as a role model for many PATH Transportation Division employees, it is recommended that the Distinguished Service Medal be awarded to Robert Bird.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Robert Bird for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to John Bogart

It was recommended that the Distinguished Service Medal be awarded to John Bogart.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of John Bogart it is recommended that the Distinguished Service Medal award be given on the following grounds:

As Maintenance Unit Supervisor of the Mechanical Maintenance Unit at Kennedy International Airport, John Bogart is responsible for the operation and maintenance of a highly sophisticated and extensive water distribution system at that facility. Having spent the majority of his Port Authority career at Kennedy International Airport, Mr. Bogart has been closely involved in the orderly expansion and growth of the water distribution system. His inherent grasp of mechanical procedures, coupled with his exceptional performance, led to his rise from Assistant Water Engineer to his present position as Maintenance Unit Supervisor in 1981.

The water distribution system which Mr. Bogart oversees is, in fact, two distinct and separate systems: a high pressure distribution system and a low pressure distribution system. There are approximately 30 miles of high pressure underground piping throughout the airport, providing fire protection service through hydrants and aircraft hangar deluge systems. In addition, there are 25 miles of low pressure underground piping providing domestic water service, for kitchens, bathrooms, boiler rooms, and the like, as well as fire protection service. There are over 375 control valves associated with this system, and Mr. Bogart knows where each one is located. The complexities of this program are monumental when one considers that Kennedy International Airport has a distribution system larger than most suburban cities. In fact, no comparable municipal high pressure distribution systems exist.

Presently, Mr. Bogart guides and directs a staff of fifteen skilled craftspeople. His comprehensive knowledge of safety, Port Authority policies, the airport water system network, combined with his inherent ability and expertise has enabled him to carry out complex assignments with skill, dependability and alacrity. He has become the mechanical expert on the airport, providing "consultant services" to staff and tenants alike. Most recently, his expertise was sought to help in the design and relocation work associated with the Kennedy International Airport consolidated rental car facility and the Nassau Expressway extension.

(Board - 2/14/85)

Mr. Bogart's level-headed performance during emergency situations has earned him the respect and admiration of his supervisors and subordinates alike. Mr. Bogart's ability to quickly grasp the criticalness of any situation has proven of inestimable value. That full water service has always been restored at the airport in the shortest possible time with the minimum of inconvenience to tenants and patrons, stands as a tribute to his competence and dedication. His professional record contains numerous commendations concerning his efforts during aircraft emergencies, major snowstorms as well as his extensive contributions in training both Port Authority and external staff. In 1982, he received the Port Authority Commendation Medal for the role he played in assisting in the capture of armoured car hijackers at the airport.

For his devotion to duty and dedicated ability over the past three decades, and in recognition of the important role he plays in providing outstanding day-to-day leadership in the Mechanical Maintenance Unit at Kennedy International Airport, it is recommended that the Distinguished Service Medal be awarded to John Bogart.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to John Bogart for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Venera A. Canale

It was recommended that the Distinguished Service Medal be awarded to Venera A. Canale.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Venera A. Canale it is recommended that the Distinguished Service Medal award be given on the following grounds:

Venera (Vera) A. Canale began her Port Authority attorney career in 1944 and continues today in the same vital capacity, with her value and contributions to the organization increasing with each passing year. By virtue of her wise legal counsel, superb judgment and unsurpassed devotion to the Port Authority and its employees over the past four decades, Mrs. Canale has distinguished herself as an excellent lawyer while earning the love and respect of all who came in contact with her.

Mrs. Canale graduated from Hunter College and earned her Law Degree at Fordham University before joining the Port Authority during World War II. At that time, Mrs. Canale, then Vera Melaragno, was hired on a temporary basis pending the return of the Law Departments "permanent" lawyers from their World War II military service. Fortunately for the Port Authority and the hundreds of staff members who have been the recipients of her sagacious counsel over the last forty years, when the "permanent" lawyers did return, Vera Melaragno became one of them.

During her long and remarkable career, Mrs. Canale has filled the role of the Port Authority's "corporate" lawyer, with the responsibility for advising on legal questions involving Port Authority By-Laws, resolutions and minutes, and for seeing to it that all of the resolutions and minutes necessary for Board and Committee meetings are drafted efficiently and accurately. Mrs. Canale's other responsibilities have included the preparation and interpretation of rules and regulations governing Port Authority facilities, the handling of Federal grant agreements, and counseling staff in the delicate area of employee disciplinary proceedings. As one of her colleagues said, "She's one of a kind...because of her unique personality, she gets involved with cases, particularly disciplinary cases, which she handles with a heart, yet still remains objective."

(Board - 2/14/85)

To record Mrs. Canale's many contributions to the work of the Law Department over the last forty years is practically impossible, since her administrative abilities and intimate knowledge of Port Authority policies and procedures have played important roles in virtually every major Port Authority project. Just one example of Mrs. Canale's administrative and technical skills at work is her ability to coordinate with the responsible Attorney and Executive Director's Administrative Assistant the numerous revisions that are made to items being presented at Committee and Board meetings, so that both the items and their resolutions accurately reflect the actions recommended to the Commissioners.

In addition to Mrs. Canale's responsibilities in this area and her role as the Port Authority's "lawyers' lawyer," staff throughout the Port Authority have repeatedly sought Mrs. Canale's counsel, not only concerning the Port Authority's statutory powers and responsibilities, but also with respect to a never-ending variety of other issues. Mrs. Canale has always managed to find time to discuss whatever problems arise and has benefitted many a Port Authority employee with her pragmatic counsel. The great esteem in which Mrs. Canale is held by Port Authority staff is further confirmed by her election as 1984-85 President of the Port Service Club.

The Port Authority has been most fortunate that over more than two thirds of its existence, Mrs. Canale has seen fit to devote her extraordinary talents, her unflinching industry, her warm and friendly personality and her unmatched ability to get along with others to its service.

For her outstanding record of service, for her many contributions to the Port Authority, for her caring attitude and assistance in resolving job-related and personal problems, it is recommended that the Distinguished Service Medal be awarded to Venera A. Canale.

NOW, THEREFORE, after due deliberation had, it its

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Venera A. Canale for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Catherine C. Cassidy

It was recommended that the Distinguished Service Medal be awarded to Catherine C. Cassidy.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Catherine C. Cassidy it is recommended that the Distinguished Service Medal award be given on the following grounds:

Catherine C. Cassidy joined the Port Authority in 1963 as a Supervisor in the Civilian Tolls Program with great enthusiasm and obvious skills as an administrator. That enthusiasm has never flagged, and her skills have been greatly developed and finely tuned, so much so that she is recognized in the Tunnels, Bridges and Terminals Department as an extremely capable unit head and an invaluable resource for facility operations knowledge. Many staff units consult her on all types of facility-related questions and problems.

Miss Cassidy's reputation has been established the old-fashioned way. She earned it through many years of conscientious and hard work. As she has assumed positions of higher responsibility, her assignments have included: Assistant Chief Tolls Supervisor at the Holland Tunnel; Assistant Chief and Chief Tolls Supervisor of the Tolls Training and Pool Center; Chief Tolls Supervisor, Staten Island Bridges and her current position as Supervisor, Staten Island Bridges Operations. Along the way she had mobility assignments in the Tunnels and Bridges Toll Program Coordination Unit and as a Staff Assistant in the General Services Department. For nearly ten years, Catherine also made the time to continue her education in the evening. She completed her Bachelor of Arts degree at Pace University in 1977 and was awarded a Masters in Business Administration from Monmouth College in 1980.

In 1966, as Chief Tolls Supervisor at the Staten Island Bridges, she played a lead role in the conversion to civilian toll collection at that facility. She also demonstrated her professional competence in orchestrating a major changeover in 1970 when the Port Authority began one-way toll collection at the Goethals, Outerbridge and Bayonne Bridges. These efforts and her daily operational responsibilities are further complicated by the physical separation of the three bridges and the taxing demands of managing geographically disperse but operationally united facilities.

(Board - 2/14/85)

In recent years, the Staten Island Bridges has become the fastest growing facility, hence more traffic brings in more toll transactions. In spite of the traffic increase, the SIB Toll Collectors, with Miss Cassidy's guidance and training, have consistently achieved high accuracy ratings on their Toll Collector Performance Reports, more commonly known as PA 404s.

Miss Cassidy is not one to sit back on her laurels, she's always willing to take on new responsibilities. Just this past year, she helped launch the West Sales Ticket Office for westbound commuters at the Goethals Bridge. This convenience has been so well received by patrons that the program will be expanded to other Trans-Hudson crossings, where applicable.

On the job she always displays concern for her staff, both professionally and personally, The most moving example, which exemplifies her typical behavior, was her visit to all three bridges this past Thanksgiving. Although she had the day off, she made a special trip to all three bridges to say hello to those working who could not be at home with their families on this holiday.

For her devotion to her staff and to the organization, for her consistently high level of performance, for her untiring energy and for her superior commitment to excel in the name of public service, it is recommended that the Distinguished Service Medal be awarded to Catherine C. Cassidy.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Catherine C. Cassidy for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Walter J. Cogan

It was recommended that the Distinguished Service Medal be awarded to Walter J. Cogan.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Walter J. Cogan it is recommended that the Distinguished Service Medal award be given on the following grounds:

Walter J. Cogan has spent 22 of his 35 years of Port Authority service in the Marine Terminals Department, now the Port Department, and has established a distinguished record of performance. His career is characterized by consistent good judgment and initiative during an extended period of unparalleled changes at our Port Authority marine facilities.

Mr. Cogan started his career as a Management Trainee in 1948 and almost immediately began his real estate career in the former Real Estate Department. He amassed his real estate knowledge, along with his negotiation abilities as a Terminal Rentals Agent which eventually lead to his promotion in 1962 to the Manager of Commercial Rentals, Marine Terminals. This assignment led to his eventual promotion to General Manager, Marine Rentals in 1966.

During his tenure as General Manager of Marine Rentals, the New Jersey Marine Terminals grew from a small public breakbulk terminal into one of the world's premier port facilities. This rapid expansion produced an unprecedented increase in the number of tenants at the facility. Such growth placed exceptional demands on the person responsible for the rentals at that facility.

Mr. Cogan has been responsible for increasing the revenue for the marine terminal facilities in extraordinary leaps and bounds during the past 22 years. In 1962, when Mr. Cogan first took on the responsibility for leasing marine facilities, revenues totalled \$14.8 million per year. In just a short four-year period, he increased those revenues by 156% to \$23 million, and by 1983 the marine facility revenue increased 252% since 1966 to a very impressive \$58 million a year. The percentage of increased revenue tells only a small part of Mr. Cogan's contributions over the years.

(Board - 2/14/85)

Mr. Cogan's accomplishments are many. The training and leadership given to his staff have enabled an entire division to be productive and knowledgeable in the real estate business. He has added to the tenant list names such as: Toyota, Nissan, Ralston, Purina, Diamond Crystal Salt, East Coast and K-Mart. Mr. Cogan has also negotiated many property acquisitions for the Port Authority including the Navy Area property at Port Newark, the Central Railroad of New Jersey property, Greenville and Port Jersey property with pending negotiations for the acquisition of the Passaic Valley property and additional Central New Jersey property on South North Avenue.

The Port Department's Properties Division, under Mr. Cogan's tutorage since 1982, established the successful Foreign Trade Zone at Port Newark and increased revenues at the New York City Passenger Ship Terminal by using it for alternate uses, such as trade shows and special functions. Most recently, staff is in the process of negotiating and renting space at the Erie Basin Fishport. Mr. Cogan has always been revenue-oriented with an eye on cost reduction. He is well known in the region's real estate industry and well respected by Port Authority staff as well as professionals within the industry.

For his dedication to the Port Authority for the exemplary manner in which he has handled the significant challenges and changes in the marine terminals industry, for his leadership through the years in the field of real estate, and for his sustained record of accomplishments it is recommended that the Distinguished Service Medal be awarded to Walter J. Cogan.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Walter J. Cogan for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Bernard J. Duffy

It was recommended that the Distinguished Service Medal be awarded to Bernard J. Duffy.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Bernard J. Duffy it is recommended that the Distinguished Service Medal award be given on the following grounds:

Bernard J. Duffy's Port Authority career has spanned more than 38 years and 25 of these have been spent at the Bus Terminal in positions of increasing responsibility. Throughout his career, Mr. Duffy has made significant contributions to the organization through his dedication to public service, exceptional supervisory skills, methodical planning and organizing, and unruffled approach to the many aggravating and crisis situations he faces on a daily basis.

Beginning his career in 1946 as a messenger in the former Port Authority Building, he has worked his way through the ranks in the Aviation Department and the Tunnels, Bridges and Terminals Department. In 1968, he was assigned to the Bus Terminal as Operations Services Supervisor and progressed through Operations Group Supervisor, Maintenance Group Foreman in 1973, Sanitation Group Supervisor two years later, and attained his current position of Sanitation Unit Supervisor in 1981. His position is a difficult one and has become more involved with each passing year due to increased activity and patron traffic through the modernized and expanded Bus Terminal. During his career, Mr. Duffy has found time not only to perform his job in an exemplary manner but also to earn a Bachelor's degree from John Jay College.

Mr. Duffy's assumption of a key role in the changeover from Port Authority to contract cleaning personnel during 1979 and his development of a contract auditing procedure to assure full contract compliance, are but two examples of his expertise for which he received the recognition and praise of the Audit Department as well as his own department. Mr. Duffy's responsibility for overseeing administration of the cleaning and sanitation contracts is difficult enough, given the size of the two-City block Bus Terminal, let alone getting it done while 160,000 patrons bustle through the facility daily. He has also seen Bus Terminal patrons and tenants through some turbulent times including contract cleaners' job actions. With his calm demeanor and can-do-anything attitude, Mr. Duffy has also assumed responsibility for all the preparation details and additional clean-up work associated with frequent Bus Terminal entertainment programs and art exhibits.

(Board - 2/14/85)

Outside agencies have also called upon Mr. Duffy for advice in formulating cleaning contracts for large transit facilities. New Jersey Transit was among those seeking Mr. Duffy's expertise in this area last year when the agency assumed operations of Penn Station Newark.

It's hard to perfect cleaning and sanitation duties, but Mr. Duffy's sense of commitment to his responsibilities has made it possible to come pretty close. Commendation letters from the travelling public and his superiors are testimony to his dedication and thoroughness on the job.

For his willingness to do the impossible, for his ability to work well with contractors, tenants and public agency officials, for his organizational skills in getting a job done without inconveniencing patrons and for his ever-present amicable nature, it is recommended that the Distinguished Service Medal be awarded to Bernard J. Duffy.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Bernard J. Duffy for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Mary Godwin

It was recommended that the Distinguished Service Medal be awarded to Mary Godwin.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Mary Godwin it is recommended that the Distinguished Service Medal award be given on the following grounds:

Mary Godwin is the last of the original Port Authority Bus Terminal employees who have served their entire career at the Bus Terminal. Miss Godwin began her Port Authority career at the Bus Terminal in 1950 as an Information Agent I. Very early on, Miss Godwin distinguished herself as a true professional in the field of transportation information. Her commitment to the Bus Terminal and its patrons is evident in the admirable skill she exhibits in the performance of her duties in the best tradition of public service.

Miss Godwin, never being satisfied with things remaining the same, has worked to improve the information services to patrons for more than three decades. As a person who was instrumental in developing plans for relocating the Information Room in 1963, she was a key consultant to facilitate the second major relocation effort scheduled for this year. Her recommendations for the layout of equipment and personnel based on her knowledge and experience were invaluable. The same attention to detail and productivity are evidenced by her suggestion for wiring changes to update the old Bus Terminal switchboard position. Previously, an operator had to use two headsets, one for outside calls routed through the main switchboard to various offices, and one for the Automatic Call Distributor (ACD) information. Using Miss Godwin's recommendation, a double pole switch interconnecting the switchboard with the ACD position was installed enabling the use of one headset, thereby facilitating Information Agent ease and increasing productivity.

A further testimony to her commitment to excellent information service is her warm manner in which she welcomes new Information Agents, assists in their training and encourages a comfortable atmosphere in the often hectic environment of the Information Room. Added to this are the many patron commendations received which express appreciation for her pleasant attitude, patience and knowledge when furnishing bus information.

Working well with others is apparently a natural gift to Miss Godwin. She inspires peers and supervisors through her professional dedication, volunteering her services for special committees and organizing programs. She has in fact developed a reputation of quickly doing the right thing to recognize an achievement or milestone for fellow employees. By so doing, she has fostered good employee morale at the Bus Terminal.

In 1978, Mary Godwin helped set up training for the new Patron Aide program. The Patron Aide program has since become one of the most successful programs, which was implemented during a time of great modernization and expansion at the facility. A significant part of this success can be attributed to Miss Godwin's input.

Mary Godwin has handled approximately 4.5 million telephone calls at the Bus Terminal, a truly remarkable accomplishment. Her enthusiasm, expertise and pleasant manner have made her an inspiration and role model for many Information Agents during her 34 years of employment.

Since day one at the Port Authority Bus Terminal, Miss Godwin has been there to not only cater to our patrons informational needs but has been a reliable and knowledgeable source for newcomers to the Information Room, management, tenants and the public at large. It's hard to estimate the number of people Miss Godwin has "reached out to touch" anonymously.

For her expert ability and patience in handling bus information inquiries in an efficient and enthusiastic fashion for 34 years, and for making so many people's first contact with the Port Authority a pleasant experience, it is recommended that the Distinguished Service Medal be awarded to Mary Godwin.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Mary Godwin for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Dorothy D. James

It was recommended that the Distinguished Service Medal be awarded to Dorothy D. James.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Dorothy D. James it is recommended that the Distinguished Service Medal award be given on the following grounds:

In her nearly 29 years of service with the Port Authority, Dorothy D. James has established an admirable record. Mrs. James' first Port Authority assignment in 1956 was as Clerk Stenographer II in the Contracts Division of the Engineering Department and later in the Port Commerce Division. In 1963, she was promoted to Secretary to the Deputy Director of the Rail Transportation Department. She has been with the Rail Transportation Department since that time, being promoted to increasingly responsible positions as Departmental Secretary, Staff Assistant, Administrative Assistant and currently Senior Administrative Assistant.

With each and every new assignment, whether delegated or assumed voluntarily, Mrs. James has demonstrated the same earnestness and vigor to get the job done and to do it well. There has not been an administrative transaction in the Rail Transportation Department, in recent years, which has been processed and completed without her capable guidance and assessment. In addition to her fine technical skills, she has consistently demonstrated an extremely high level of sensitivity, competency, foresight and tact in the conduct of all her assignments. These traits have become increasingly important in her current responsibilities as the overall coordinator for the Rail Transportation Department's human resources development.

As a result of the positions she has held, Mrs. James has been made privy to virtually all the sensitive executive issues in the Department. During her tenure as Departmental Secretary, the Director was deeply involved in major developments such as the PATH service restructuring as a result of the abandonment of the Hudson River ferries; construction of the Journal Square Transportation Center, World Trade Center Terminal and the acquisition of new cars and the Port Authority Bus Program. Throughout it all Mrs. James displayed an exceptional degree of thoroughness and professionalism, helping make it happen and showing herself to be a stalwart member of the team.

(Board - 2/14/85)

As administrator, she also has coordinated and implemented the bonus program (she was a bonus recipient several times), the department's equal opportunity program, salary administration, recruitment and other functions covering the broad and sensitive questions of human resources development. She is a key part of the restructured effort in the Department to assure the needed emphasis in this area, and she has assumed the lead role in acquainting departmental employees with the performance appraisal system being implemented throughout the organization.

As secretary or administrator, whatever the crisis or the problem, Mrs. James always handles the situation calmly, effectively, efficiently and pleasantly, in a manner that inspires confidence and gives assurance that the situation is completely under control. She commands total respect from her peers for her professionalism and for her leadership talents. Mrs. James' personal quest for excellence is confirmed by her citation in 1979 as a YMCA Black Achiever in Industry. As the culmination of two decades of developing and improving her skills, she earned her Master's Degree from Adelphi University in 1980.

For her demonstrated commitment to the highest personal and organizational goals, which has made her an outstanding role-model for her fellow employees, and for her consistently high level of performance, achievement and dedication, it is recommended that the Distinguished Service Medal be awarded to Dorothy D. James.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Dorothy D. James for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Philip J. Landi

It was recommended that the Distinguished Service Medal be awarded to Philip J. Landi.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Philip J. Landi it is recommended that the Distinguished Service Medal award be given on the following grounds:

Philip J. Landi began his Port Authority career in 1948 with the Port Authority's acquisition of Teterboro Airport and its staff. Following Korean War Service, Mr. Landi was transferred from the Teterboro operations staff to the Office of the Manager of Airports. At that time, he was given responsibility for supervising the maintenance of the Port Authority's fledgling helicopter fleet. Not one to take his new responsibility lightly, Mr. Landi immediately set out to better prepare himself for his new role and enrolled in special training courses in helicopter maintenance. This technical training gave him a more thorough understanding of the complex maintenance techniques associated with helicopter overhaul procedures. He also took special flight training to improve his knowledge of rotary flight procedures, helicopter characteristics and performance around high buildings.

This base of first-hand knowledge has enabled Mr. Landi to continually achieve an outstanding personal efficiency and effectiveness in the performance of his assignments, and to be especially effective in dealing with the highly specialized personnel and the complex technologies involved in the application of rotary wing aircraft to everyday needs. Since that time, Phil Landi has been ultimately responsible for the successful development and operation of the Port Authority heliports, and the safe and efficient operation of the helicopter fleet. These accomplishments, whose excellence has been recognized far beyond the Port Authority, have resulted in Mr. Landi being sought out as both a speaker and consultant to various organizations both nationally and abroad and have brought international acclaim to the Port Authority's helicopter program.

(Board - 2/14/85)

Under Mr. Landi's management, the Port Authority helicopter fleet has been utilized in numerous, creative applications in promoting Port Authority objectives and in sustaining facility operations during emergencies. For example, during the February 1969 blizzard which paralyzed the metropolitan area, Mr. Landi mobilized the helicopter fleet to ensure delivery of the necessary medicine, food, supplies and personnel to the isolated and inaccessible facilities. During the July 1977 blackout, Mr. Landi used the fleet to deliver supplies and key personnel to various locations. Following the tragic Eastern Airlines crash at Kennedy International Airport, Mr. Landi pressed the helicopters into service to ferry doctors, specialized personnel and equipment to the airport.

In more routine applications, Mr. Landi has skillfully employed the helicopter fleet in numerous ways to save money, to provide a unique vantage point for problem solving and obtaining otherwise unobtainable data. Aerial inspection over construction sites to quickly determine problems and solutions not readily apparent by on-the-ground methods, "sky counts" and aerial photography of airport traffic congestion to identify problem points and potential solutions are but a few of these applications. And, of course, what finer marketing tool exists to promote the area's magnificent facilities than an aerial inspection skillfully conducted by Mr. Landi himself or one of his pilots. Most recently, he has spearheaded the purchase, transition training and new operating procedures for the Port Authority's new Bell 222 helicopter, a seven-seater with rescue capabilities.

Perhaps no better measure of Mr. Landi's high degree of professionalism and managerial effectiveness exists than the exemplary safety record he and his staff have achieved while meeting regular and special demands. Throughout more than 35 years of operation, Port Authority helicopters have been flown over 56,832 hours, 6,323,480 miles and accommodated 215,733 passengers without a single fatal accident. This is quite an impressive record compared to any standards in the industry, and even more outstanding since the NY-NJ metropolitan area airways are heavily travelled, especially in terms of general aviation traffic.

For his 36 years of dedicated and skillful management of the Port Authority's heliports and helicopters and for his resourceful application of rotary wing technology in the advancement of Port Authority programs, while maintaining the highest safety record, it is recommended that the Distinguished Service Medal be awarded to Philip J. Landi.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Philip J. Landi for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Cornelius J. Lynch

It was recommended that the Distinguished Service Medal be awarded to Cornelius J. Lynch.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Cornelius J. Lynch it is recommended that the Distinguished Service Medal award be given on the following grounds:

Cornelius J. Lynch began his career with the Port Authority in 1953 as an Economic Analyst II in the Aviation Department. Over the next 31 years, Mr. Lynch rose through positions of increasing responsibility in the Aviation and World Trade Departments to his present position of Deputy Director for Programs & Services, World Trade Department. Throughout his career, there has not been an assignment which he has not handled expertly, and no job too big for him to handle.

During the years from 1960 to 1964, while on loan to the New York World's Fair Corporation, Mr. Lynch's expertise was put to good use in the leasing of the Fair's Transportation Section which amounted to approximately 25% of the entire Fair's rental program.

Upon completion of this assignment and his return to the Port Authority, Mr. Lynch assumed responsibility for heading the development and execution of a leasing program for the then new World Trade Center project. To undertake the renting of ten million square feet of office space and an additional one quarter million square feet of commercial space was a monumental undertaking. But Mr. Lynch put his formidable skills to work and, with his staff, successfully developed a rentals program which has kept the Trade Center almost fully occupied, even through the depressed rental doldrums of the '70s.

(Board - 2/14/85)

In 1968, while considering authorization for the installation of the Con Edison substation on Vesey Street, the Board of Commissioners was also asked to approve an expenditure to lay additional foundation work to support a future building over this substation. Last June, the construction of that future building, a 43-story building which will be 7 World Trade Center, with 1.7 million square feet of general office space and connected to the World Trade Center complex by a covered pedestrian bridge over Vesey Street commenced. The eventual construction of 7 World Trade Center was no coincidence; Mr. Lynch's foresight and intuitiveness laid the necessary ground work to enable future construction. The principal negotiator in this matter, he drew upon all his past experience, knowledge and "gut feeling" to solve the various obstacles and technicalities which presented themselves.

Sprinklering of the Vista Hotel had been an area of great concern to the Port Authority as a method of providing additional safety to hotel users. When World Trade Center Hotel Associates decided to divest themselves of its controlling interest in the World Trade Center Vista Hotel to Kuo Hotel Corporation, Mr. Lynch was handed the responsibility of sitting down with the parties involved. Through complex and intense tri-party negotiation, Mr. Lynch made sprinklering a condition of the sale.

Similarly, Mr. Lynch's expertise was drawn upon for the development of the master plan for the Newark Legal and Communications Center, which will consist of an office building, parking garage and a pedestrian walkway connecting the complex and Newark Penn Station in downtown Newark. He is also very involved in marketing the concept to both the private and public sectors in Newark and to potential occupants. Mr. Lynch's years of real estate experience and the contacts he has developed have paved the way for this project to move forward.

Recently, Mr. Lynch was also a key player in the negotiations with a perspective tenant for twenty of the floors to be vacated by New York State in Two World Trade Center during the next several years. This represents approximately 50% of the space to be vacated by New York State and subsequently let.

Throughout his three decades of service, Mr. Lynch's real estate and negotiating expertise have secured millions of dollars in rental fees for the Port Authority. Mr. Lynch can always be relied upon to tackle any and all problems and resolve them in a very beneficial and professional manner.

For his outstanding achievements and his 31 years of dedicated service to the Port Authority and to the marketing of The World Trade Center, it is recommended that the Distinguished Service Medal be awarded to Cornelius J. Lynch.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Cornelius J. Lynch for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to Frank J. Smyth

It was recommended that the Distinguished Service Medal be awarded to Frank J. Smyth.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Frank J. Smyth it is recommended that the Distinguished Service Medal award be given on the following grounds:

Frank J. Smyth's career began in 1948 with a field operations job at Newark International Airport and progressed over the years to positions of increasing responsibility. His competence, experience and organizational skills resulted in outstanding performance as he filled the positions of Assistant to the Director of Tunnels and Bridges, Assistant Manager at the Holland Tunnel, and the Bus Terminal, and his current job as Manager of the Holland Tunnel, which he was promoted to in August of 1981.

In 1973, Mr. Smyth was charged with the responsibility of setting up and implementing the Facility Operations Agency (FOA) Program. His untiring efforts in writing the job specifications, establishing performance criteria, and assisting with the testing, selection, training, and placement of the first group of FOA's at tunnel and bridge facilities established a solid foundation for the successful program which exists today.

His contribution as a member of the Tolls Study Team in 1978 to the analysis of the potentiality of variable toll pricing at tunnel and bridge facilities resulted in the development of a standard methodology, representing a significant contribution in this field. The team developed a highly complex computer simulation program which enabled staff to explore the myriad toll schedule alternates within the limited time frame of the study. The submission of the Toll Study Report to the Federal Highway Administrator completed a unique study effort to explore the feasibility of this concept while in a largely theoretical state. Mr. Smyth's work on this team earned him the Executive Director's Unit Citation.

(Board - 2/14/85)

To his current job as Manager of the Holland Tunnel, he has brought a breadth of experience and skill in both line and staff areas. He possesses the flexibility and leadership which have made it possible to maintain a high standard of public service while planning and implementing major rehabilitation projects and handling record levels of traffic. Currently, the Holland Tunnel ceiling replacement, requiring major traffic re-routing, closing of a tube at night and numerous other operational adjustments is being managed with as little motorist inconvenience as possible, given the extent of this monumental rehabilitation project, under Mr. Smyth's able direction.

The fine performance of Mr. Smyth and his staff was evident during a Jersey City emergency in July of 1982, when a major water main break left the entire city (except for the downtown area which includes the Holland Tunnel) without water. For three days, Holland Tunnel staff provided tank trucks to aid in fire fighting and continuation of medical services, and arrangements were made to pump New York City water into the Jersey City water main system via a tunnel standpipe system. All of this was accomplished without adverse impact on the facility's operations.

Mr. Smyth worked long and hard hours to make the 1975 and 1984 tolls increases successful. The smooth transitions which took place were the result of coordinated planning, preparation and training that increasingly cut into evenings and early mornings, weekends and holidays, as the implementation hour approached. His energy, skills and professionalism produced results which met and surpassed expectations.

In recognition of this 36-year career which is marked by his hard work, dedication and a sustained level of outstanding performance, it is recommended that the Distinguished Service Medal be awarded to Frank J. Smyth.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Frank J. Smyth for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to John Verbist

It was recommended that the Distinguished Service Medal be awarded to John Verbist.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of John Verbist it is recommended that the Distinguished Service Medal award be given on the following grounds:

John Verbist, currently a General Maintenance Supervisor in World Trade Operations, began his Port Authority career in 1948 as a laborer at the Holland Tunnel. He worked his way up through the maintenance ranks, advancing steadily through Tunnel Equipment Maintainer, Maintenance Group Foreman and Deputy Director, Fire Safety. He has served at the Lincoln Tunnel, LaGuardia Airport, the George Washington Bridge and The World Trade Center. In his current position since January of 1982, he heads the Structural Section of World Trade Center Operations which is responsible for all of the carpentry, locksmith work, painting and landscaping required in the two Towers of The World Trade Center as well as the lobby areas. He supervises both Port Authority and contract employees, and much of the work they do is undertaken on weekends and off-hours. The work is often admired but taken for granted by tenants.

Joining the World Trade Operations Sections in 1971, as the Deputy Fire Safety Director, Mr. Verbist was involved in all facets of fire safety, specifically in developing a fire safety program for Two World Trade Center. This included developing educational programs, giving orientations and ensuring compliance with fire code laws. In addition, Mr. Verbist had the difficult task of working with New York State and formulating an acceptable and feasible fire rescue plan for the three floors occupied by the New York State Compensation Board, whose patrons have special needs. Within the offices of the New York State Compensation Board, there was the possibility of 400 handicapped individuals being in that area at any given time. Mr. Verbist quickly proposed a specific fire-rescue plan tailored for such a potential disaster.

(Board - 2/14/85)

Mr. Verbist was named Chief Maintenance Supervisor of The World Trade Center in 1974, just at the time when the very first tenants were moving into the building. At this time, there was no routine maintenance program for The World Trade Center, something essential for safe and efficient operations and to ensure the building's structural integrity and aesthetics. Mr. Verbist singlehandedly composed a roster of routine jobs, including those which are performed daily, weekly, monthly and annually. Without this roster, it would have been impossible to develop a workload and to formulate future staffing needs. This document is ever-changing, and Mr. Verbist keeps on top of it and alters it as conditions deem necessary.

Mr. Verbist's knowledge, experience and familiarity with different craft groups, union contracts, policy and procedures contribute significantly to the efficient operations of the Structural Section. Another of Mr. Verbist's admirable talents is his ability to share his accumulated knowledge with others. He has a unique ability to impart this knowledge and he is a patient, natural instructor and is well respected by staff.

In recognition of his 36 years of dedicated service, his continued efficiency, integrity and the knowledge he has imparted to others, it is recommended that the Distinguished Service Medal be awarded to John Verbist.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to John Verbist for the performance of outstanding service.

(Board - 2/14/85)

Award of Distinguished Service Medal to William Warnock

It was recommended that the Distinguished Service Medal be awarded to William Warnock.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of William Warnock it is recommended that the Distinguished Service Medal award be given on the following grounds:

William Warnock, currently a Maintenance Unit Supervisor with Staff Engineering Maintenance and Construction (SEMAC), has consistently contributed to the physical appearance and structural integrity of Port Authority steel structures. Hired as a bridge painter in 1946, Mr. Warnock then advanced to Bridge Painter Foreman in 1964, Supervisor of Bridge Painters in 1966 and in 1967 was named to his current title.

Mr. Warnock knows every plumb post, suspender rope and chord member of all the Port Authority bridges. He has either personally painted or supervised others in painting more than 14 million square feet of steel structures. His expertise has contributed substantially to the maintenance of the George Washington Bridge, Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, the Lincoln Tunnel Helix, the Bus Terminal ramps, the approaches to the Staten Island viaducts and various PATH structures.

In his current post, Mr. Warnock supervises a bridge painting crew of 28 and is regarded organization-wide as "an expert on bridge painting techniques." He is also credited with introducing numerous safety measures to a hazardous occupation.

Known for his ability to mobilize a work crew into action quickly, he has responded to emergency calls on innumerable occasions. For example, when a heavily laden tractor-trailer flipped onto its side on the lower level of the George Washington Bridge and was precariously hanging over the roadway center opening, Mr. Warnock quickly assembled a crew of bridge painters and directed them to secure the cab with cable, thereby preventing the rig from possibly falling into the river below.

(Board - 2/14/85)

Mr. Warnock has also been instrumental in keeping the accident and fatality record low at the bridges. Responsible for getting permanent traveling bridges and stationary platforms on the Staten Island crossings, Mr. Warnock has continuously sought out ways to reduce the need for risky rigging. He has also been instrumental in getting handrails and catwalks installed on various bridges.

Aside from the many safety improvements he has initiated, Mr. Warnock has also been credited with shortening the bridge painting process and expanding the bridge painting season. Mr. Warnock was one of the first to propose night painting. In 1972, in an effort to finish painting the George Washington Bridge's lower-level quicker and to reduce the inconvenience for patrons, Mr. Warnock suggested this innovative idea, which is still in use today. In addition, through the years, he has worked closely with other Engineering units to test new painting techniques and materials which have proven more durable and stronger against the elements.

Mr. Warnock also assisted with the mechanization of the George Washington Bridge flag, the largest free flying flag in the world. Prior to 1977, whenever the flag was displayed it involved a risky rigging job which required at least twelve individuals. The mechanized lowering or raising of the flag now requires one person, takes approximately fifteen minutes and does not interfere with the flow of traffic, as it once did.

Mr. Warnock has been instrumental in the tutelage of numerous new bridge painter employees throughout his 38 years with the bridge painting maintenance section. He personally makes sure that all new apprentices are paired with experienced mechanics, and that they are well trained in safe operating practices. Bridge painting requires working at extreme heights under adverse conditions and Mr. Warnock ensures that his crew is up to the challenge by instilling the qualities of confidence, trust and teamwork which are so essential to the craft.

For his outstanding leadership, for his dedication to achieving the highest standards, for his knowledge and expertise in the area of bridge maintenance and for his significant role in preserving Port Authority investments, it is recommended that the Distinguished Service Medal be awarded to William Warnock.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to William Warnock for the performance of outstanding service.

(Board - 2/14/85)

Award of Howard S. Cullman Distinguished Service Medal

It was recommended that the Howard S. Cullman Distinguished Service Medal be awarded to Peter C. Goldmark, Jr. for his bold and farsighted leadership, for setting a standard of excellence and diligence that can guide his successor and guide the Port Authority and other public agencies for years to come, for unwavering dedication to this agency and the region it serves.

The Howard S. Cullman Distinguished Service Medal, under Board Resolution of March 14, 1957, is to be awarded to a Port Authority employee who has performed the most outstanding service among those who qualify.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 14, 1957, the Howard S. Cullman Distinguished Service Medal was established, which award is to be given to a Port Authority employee who has performed the most outstanding service; and

WHEREAS, in the case of Peter C. Goldmark, Jr. it is recommended that the Howard S. Cullman Distinguished Service Medal award be given on the following grounds:

Peter C. Goldmark, Jr. has served as Executive Director of the Port Authority since 1977. In that time, he has left an indelible imprint on the Port Authority and the region. An individual of uncommon ability and vision, Mr. Goldmark has reflected great credit upon this organization, reinforcing the agency's reputation as a place of first-rate management and first-rate ideas.

Mr. Goldmark has been equally adept addressing the crisis of the next hour or the critical issues of the next decade. He has translated new demands on the agency's resources and new dimensions of the agency's responsibilities into a series of remarkable new achievements by the Port Authority.

Early in his tenure, Mr. Goldmark created a Committee on the Future to chart a new course for the Port Authority. Using the work of this panel as a springboard, Mr. Goldmark has helped to define a challenging new agenda for the agency and the region and develop the steps needed to bring this agenda to life.

The projects and programs bearing Mr. Goldmark's stamp read like a road map of the region's path to long-term economic health.

To revive the region's bus transportation, he initiated a large-scale bus purchase program with both states and carried out a massive modernization of the bus terminal. Mr. Goldmark guided the spectacular growth of Newark International Airport, now America's fastest growing major airport. He conceived and carried out construction of the Red Hook Container Terminal. He worked successfully with the carriers and longshoremen to fashion an agreement that will strengthen the competitive position of the Port.

(Board - 2/14/85)

Under Mr. Goldmark's leadership, the Port Authority has not only met its traditional commitment to the movement of people and goods, but also launched an extensive involvement in the area of economic development.

He established an industrial development program, which includes one of the nation's most effective and innovative examples of central city job creation, Bathgate Industrial Park. He won legislative approval for mixed-use waterfront development projects that can transform neglected shoreline into a shining regional asset. He guided the Port Authority into other promising new ventures — from Fishport to Teleport to resource recovery.

Finally, Mr. Goldmark played an indispensable role in awakening the region to a coming crisis in infrastructure and to the need for greater public and private investment in the "inner ring" of New York and New Jersey counties around Manhattan. It is testimony to Mr. Goldmark's insight and influence that so many of the ideas he conceived or circulated are now firmly implanted as regional priorities.

Building upon the substantial accomplishments of those who came before him, Mr. Goldmark has made a lasting contribution to the region and made the Port Authority an essential element of regional growth. He has helped to shape a period of positive and productive relations among the Port Authority, the two states and the communities of the region. His achievements have won him the gratitude of the people of New York and New Jersey — and the respect and affection of the people of the Port Authority.

In all of this, he imparted to the agency his own high degree of integrity, honesty, openness and steadfast dedication to achieving excellence in the public service.

For impressive as the substance of his work has been, his character and personality have been an equally important factor in making Mr. Goldmark one of the nation's outstanding public servants. Peter Goldmark has always been eager to listen and to learn, as well as to lead. He has approached a demanding job with a seriousness of purpose, yet somehow managed never to take himself too seriously. He has benefited from a disarming sense of humor and an invaluable sense of perspective. With these gifts, with a generous and thoughtful and fair approach to his colleagues, with an insatiable intellectual curiosity and an exceptional ability to ask the right questions, he has always been able to bring out the best — and then some — in the people with whom he has worked.

For his bold and farsighted leadership, for setting a standard of excellence and diligence that can guide his successor and guide the Port Authority and other public agencies for years to come, for unwavering dedication to this agency and the region it serves, it is recommended that the Howard S. Cullman Distinguished Service Medal be awarded to Peter C. Goldmark, Jr.

(Board - 2/14/85)

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Howard S. Cullman Distinguished Service Medal be awarded to Peter C. Goldmark, Jr. for the performance of outstanding service.

Whereupon, the meeting was adjourned.

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, March 14, 1985, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Jerry Fitzgerald English
Robert V. Van Fossan
William K. Hutchison
Henry F. Henderson, Jr.

NEW YORK

Robert F. Wagner, Vice-Chairman
William J. Ronan
James G. Hellmuth
John G. McGoldrick
Howard Schulman

Peter C. Goldmark, Jr., Executive Director
Patrick J. Falvey, General Counsel/Assistant Executive Director
Doris E. Landre, Secretary
Gwendolyn K. Crider, Administrative Assistant
Henry DeGeneste, Superintendent of Police, Public Safety
Sidney Frigand, Assistant Executive Director/Director of Public Affairs
Louis J. Gambaccini, Assistant Executive Director/Director of Administration
Francis A. Gorman, Director of Rail Transportation
Philip LaRocco, Director, Economic Development Department
Donald R. Lee, Director of Audit
Lillian C. Liburdi, Director of Management and Budget
Katharine B. MacKay, Assistant Executive Director/Director of State Relations
Mark Marchese, Assistant Director, Information Services, Public Affairs
John B. McAvey, Assistant Chief Financial Officer
Rino M. Monti, Director of Engineering/Chief Engineer
Edward J. O'Malley, Director of Personnel
James O'Malley, Deputy Director of Management Information Services
Martin E. Robins, Director of Planning and Development
Morris Sloane, Deputy Director of Aviation
Victor T. Strom, Director of Public Safety
Anthony J. Tozzoli, Port Director
Guy Tozzoli, Director of World Trade
Joseph L. Vanacore, Director of Tunnels, Bridges and Terminals
Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer
Marvin Weiss, Director, Office of Minority Business Development
Marshal L. Wilcox, Jr., Treasurer
Robert N. Williams, Deputy Director of General Services
Thomas C. Young, Jr., Principal Information Officer, Public Affairs

The meeting was called to order by the Vice-Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of February 14, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on March 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on March 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on March 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on March 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 3/14/85)

1985 Budget

It was reported that the 1985 Budget for The Port Authority of New York and New Jersey, including the anticipated expenditures of the Port Authority Trans-Hudson Corporation, as shown on the following table, consists of approximately \$460 million of gross capital expenditures, \$854 million of operating expenses (including \$35 million of interdepartmental rents), \$319 million of debt service charged to operations and reserves (including \$150 million applicable to commercial paper), \$33 million of expenditures on behalf of the Fund for Regional Development, and \$27 million of other expenditures (exclusive of certain amounts which are reimbursable under the New York State Commuter Railroad Car Program).

1985 Budget by Program
(Thousand of Dollars)

OPERATING PROGRAM

Operating Expenses	
Trans Hudson Network	\$ 292,285
Aviation	377,526*
World Trade	139,882
Port	41,472
Economic Development	3,062
Sub-Total	854,227
Debt Service	318,749
Deferred Charges	27,083
Expenditures on Behalf of the Fund for Regional Development	32,543
Total Operating Program	\$1,232,602

CAPITAL PROGRAM

Trans Hudson Network	\$ 129,870
Aviation	101,049
World Trade	33,213
Port	41,930
Economic Development	48,958
Bank for Regional Development	100,000
Emergency Repairs and Construction	5,000
Total Capital Program	460,020

Total 1985 Budget **\$1,692,622**

*Includes \$10.1 million debt service on Special Project Bonds.

(Board - 3/14/85)

CAPITAL PROGRAM

The \$460 million in gross capital expenditures includes \$271 million in transportation, trade and commerce projects, \$169 million for maintenance and repair projects, \$123 million in regional reconstruction projects and \$79 million in economic development projects, before anticipated delays of \$182 million.

Transportation, Trade and Commerce

Projects aimed at improving transportation, trade and commerce amount to \$271 million. The Aviation Department's capital plans include expenditures of \$135 million, of which \$50 million is for domestic terminal finishes and \$8 million is for construction of the International Departure Facility, both at Terminal C, and \$13 million is for the Butler Aviation Aircraft Service Center, all at Newark International Airport. At Kennedy International Airport, \$15 million is included for the Eastern Terminal, \$10 million is for Improvements to the Nassau Expressway, and \$6 million is for Dualization of 150th Street.

The Rail Transportation Department anticipates expenditures of \$75 million in this category, including \$53 million allocated to the Bus Programs and \$5 million each for PATH Station Improvements and construction of the Running Repair Facility.

Additional capital expenditures in this category include \$9 million for Red Hook Container Terminal expansion work, \$7 million associated with the installation of sprinklers in The World Trade Center and \$6 million for the Port Authority Bus Terminal, in part for signing and other remaining work to complete the modernization and improvement program.

Maintenance and Repairs

Rail Transportation Department capital projects of \$64 million in this category include \$21 million associated with PATH Safety Program expenditures for tunnel and station ventilation and standpipe systems, \$16 million for rehabilitation of PA class cars and \$5 million for the purchase of cars.

The Tunnels, Bridges and Terminals Department's total of \$51 million in this category includes \$13 million for the replacement of ceilings in both tubes of the Holland Tunnel, and \$5 million to replace the upper level sidewalks and \$2 million for rehabilitation of the Henry Hudson Ramps, both at the George Washington Bridge.

Of a total of \$35 million to be undertaken by the Aviation Department for maintenance and repairs, \$5 million is for the purchase of eight mobile passenger lounges, \$4 million is for the control and removal of sub-surface oil and \$3 million is slated for IAB ramp repaving all at Kennedy International Airport.

(Board - 3/14/85)

The Port Department's total of \$14 million in this category is primarily for structural integrity repairs, waterfront cleanup and rehabilitation of aging facilities.

A contingency of \$5 million has been included for emergency repairs and construction at all Port Authority facilities.

Regional Infrastructure Development

Planned expenditures of \$123 million for regional infrastructure development include \$100 million for the proposed Bank for Regional Development, \$10 million for a resource recovery facility in Essex County, New Jersey and \$8 million for continued construction of the rail freight link to the Oak Point yard in the Bronx.

Economic Development

Planned expenditures of \$79 million for economic development projects include \$35 million by the World Trade Department, of which \$18 million is earmarked for The Teleport and \$12 million is for the development of the Newark Legal and Communications Center.

The Economic Development Department's capital plan in this category includes \$13 million for the Yonkers Industrial Park, \$10 million for waterfront development programs at Hoboken and Hunters Point, \$10 million for the Bathgate Industrial Park and \$4 million for the Elizabeth Industrial Park.

Planned capital expenditures for the Port Department provide \$6 million for Phase I of the Fishport project at Erie Basin.

Other

A provision of \$400,000 has again been included to reimburse the States of New York and New Jersey for expenses incurred by each State, including staff costs, in reviewing the 1985 annual Budget and any amendments thereto.

In order to provide sufficient funds to substantially complete the Port Authority's capital program for 1985, together with capital funds carried into 1985 and the proceeds of Consolidated Bonds and Commercial Paper Notes to be issued in 1985, it is desirable at this time to authorize the appropriation for the purpose of capital expenditures to be made in 1985 of funds paid into and available in the Consolidated Bond Reserve Fund in a total amount, consistent with the Port Authority's financial commitments and policies, not to exceed \$100 million.

In order to continue the Port Authority's practice of annually setting aside amounts towards covering self-insured contingent losses, it is necessary in light of currently established accounting standards to authorize an appropriation from the Consolidated Bond Reserve Fund of a total amount, consistent with the Port Authority's financial commitments and policies, not to

(Board - 3/14/85)

exceed \$5 million to a Provision for Self-Insurance for the year 1985. Furthermore, as an initial step to deal with any future liability for post-retirement health and life insurance benefits, an amount, not to exceed \$10 million, will be provided in connection therewith, pending completion of a study as to the extent and nature of the liability.

It is the Port Authority's long-established policy to retire debt as rapidly as sound financial management permits, while maintaining at year end, in its reserve funds including reserve funds in trust a combined amount equal to at least the amount of the next two years' mandatory bonded debt service. It is recommended that the Executive Director be authorized during the year 1985, to pay from the Consolidated Bond Reserve Fund, by transferring to sinking funds due in future years, an amount not to exceed \$20 million par value of Consolidated Bonds of individual series purchased for investment and on hand during 1985. The individual series of such bonds will be determined at the time of the accelerated retirement. The status of the Port Authority's reserve funds at December 31, 1985 and the amount of Consolidated Bonds held by the Port Authority are expected to permit the debt retirement acceleration in accordance with the stated policy.

Circumstances have arisen during the year 1984 which were not foreseeable or determinable on January 12, 1984 when the Board adopted the 1984 Budget, including consultants for the Essex County Resource Recovery project tenant construction at the Elizabeth - Port Authority Marine Terminal and Port Newark, expansion of structural integrity efforts and increased costs of the fuel farm operation at Newark International Airport. These changes set forth in Exhibit B, together with all other expenditures for the Port Authority for the year 1984 (including previously authorized individual amendments to the Budget), will not exceed the amount as set forth in the original 1984 Budget.

It was therefore recommended that the 1985 Budget and the changes of certain budget items for the year 1984 be approved.

Whereupon, to carry out the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the following Budget for The Port Authority of New York and New Jersey be and the same hereby is approved and adopted for the year 1985:

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
Including subsidiary Port Authority Trans-Hudson Corporation

(Board - 3/14/85)

RESOLVED, that, based upon a requisition of the Governor of the State of New York or the Governor of the State of New Jersey, or the duly authorized designee of each, the Port Authority shall pay to the State of New York or the State of New Jersey, or both, upon receipt of an appropriate expenditure plan from said State, an amount not in excess of \$200,000 to each said State to reimburse said State or States for expenses incurred by said State or States, including staff costs, in reviewing the 1985 annual Budget of the Port Authority and any amendments thereto; and it is further

RESOLVED, that, in connection with the Port Authority's capital program, the financing by the Executive Director from funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund and to the Special Reserve Fund in Trust not required for the maintenance of those Funds, of capital expenditures during the year 1985 in connection with the Port Authority's facilities in a total amount not to exceed \$100 million in 1985 be and the same hereby is authorized and approved; provided, however, that the amount so financed would not exceed an amount which, when combined with any other amounts financed in 1985 from such funds paid into and available in the Consolidated Bond Reserve Fund, would preclude the Port Authority from (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds), and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby authorized and approved; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized, in connection with the Port Authority's self-insurance program to continue to appropriate and to apply, during the year 1985, from funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund and to the Special Reserve Fund in Trust not required for the maintenance of those Funds, to a provision for self-insurance in connection with the Port Authority's facilities and to provide for similar future liabilities in an amount consistent with the Port Authority's practice of self-insurance; provided, however, that the amount so appropriated and so applied shall not exceed \$15 million for 1985; and provided, further, that the amount so appropriated and so applied shall not exceed an amount which, when combined with any other amounts financed in 1985 from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds), and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby authorized and approved; and it is further

RESOLVED, that the payment by the Executive Director, in connection with the Port Authority's long-established policy to retire debt as rapidly as sound financial management permits, from the Consolidated Bond Reserve Fund, by transferring to sinking funds due in future years, an amount not to exceed \$20 million in 1985 par value of Consolidated Bonds of individual series purchased for investment and on hand during 1985; provided, however, that the amount so financed would not, in each case, exceed an amount which when combined with any other amounts financed in 1985 from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds), and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set fourth herein is hereby authorized and approved; and it is further

RESOLVED, that the application of any bonds to sinking fund requirements for more than one year shall be in satisfaction of the requirements for each series in regular succession until exhausted and the respective sinking fund requirement for each year shall be satisfied in full before any bonds are applied to that for a later year; and it is further

RESOLVED, that the cancellation and destruction of all of said bonds so transferred be and the same hereby is approved.

(Board - 3/14/85)

Kennedy International and LaGuardia Airports and the New York City Passenger Ship Terminal - Taxi Dispatch Program

It was reported that prior to the implementation of the taxi dispatch program, complaints were regularly received concerning the taxi service at the New York airports. Taxi drivers frequently chose patrons in a manner which discriminated against short-haul patrons and patrons requesting service to certain points in New York City. In order to improve the taxi service, an experimental program whereby dispatchers control taxi service at taxi passenger loading areas was initiated by the Port Authority at the International Arrivals Building at Kennedy International Airport on March 1, 1971. The program was later expanded to cover the Unit Terminals at Kennedy and to LaGuardia as well. The program also supplies dispatchers from time to time upon request to the New York City Passenger Ship Terminal.

Due to the success of the experimental program, the Board, at its meetings on December 9, 1971, December 14, 1972, December 11, 1975 and January 11, 1979 respectively, authorized the continuation of taxi dispatching services at the New York airports for a one-year period, 1972, and for successive three-year periods, 1973-1975, 1976-1978 and 1979-1981. At its meeting on March 11, 1982, the Board authorized the extension of taxi dispatching services for a three-year period, 1982-1984, at a total estimated cost of \$3,800,000 before reimbursement from the airlines. Our continuing evaluation of the dispatch service confirms the program's success in carrying in excess of ten million taxi riders per year at the two airports while minimizing the short-haul problems and improving cooperation between taxi and police personnel.

At present, there are a total of 37 taxi dispatchers serving the International Arrivals complex and the Unit Terminals in the Central Terminal Area at Kennedy International Airport. At LaGuardia Airport, there are 23 taxi dispatchers serving the Central Terminal Building, the Eastern Air Lines Shuttle Terminal and Delta Airlines Terminal.

Each unit terminal operator participating in the program at Kennedy International Airport reimburses the Port Authority for the direct costs of providing taxi dispatch service at its terminal. The portion of the direct cost at the International Arrivals Building and the overall police and supervisory costs of the program not recovered in various cost formula calculations are absorbed by the Port Authority. As a result, almost 80% of the costs of the program at Kennedy International Airport are reimbursed by the airlines. The costs of the program at LaGuardia Airport are substantially recovered through airport charges and it is the intention of the Aviation Department to continue to recover these costs.

Negotiations with Local 3036 have been substantially completed to extend the taxi dispatch contract for three years and three months through April 4, 1988. The agreement contemplates an average annual wage and benefit package increase to dispatchers of 5.5% during the term of the contract. Otherwise, the contract remains essentially unchanged in scope and content. Local 3036 understands that each Unit Terminal lessee at Kennedy International Airport is expected to continue its participation in the program under the proposed new contract and further understands that the proposed new contract may be terminated by the Port Authority in whole or in part, at any time.

(Board - 3/14/85)

It was therefore recommended that the Board authorize the agreement as outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a three-year and three-month contract with the New York City Taxi Drivers' Union, Local 3036, for taxi dispatching services at Kennedy International Airport and LaGuardia Airport and the New York City Passenger Ship Terminal effective January 1, 1985 at an estimated cost of approximately \$5.5 million for the 39-month period; said agreement to be subject to approval as to form by General Counsel or his designated representative.

(Board - 3/14/85)

All Airports - Noise Abatement Projects at Five Selected Schools

It was reported that the Board, at its meetings on August 11, 1983, April 12, 1984, and July 12, 1984, authorized individual agreements which collectively allowed for the soundproofing of nine schools in the vicinity of Port Authority airports in the total estimated amount of \$4,120,000 Federal and \$1,030,000 Port Authority funds. Construction at seven of these schools is scheduled to start during the summer recess of 1985. The work for the remaining two schools is in the preliminary design stage with construction anticipated for early 1986.

In a collaborative effort with school officials and elected governmental officials, it is deemed prudent to proceed with soundproofing of five additional schools at this time as a continuation of the Port Authority's policy of benefiting the communities surrounding the airports and to take advantage of the available Federal funds in the current fiscal year. Accordingly, it is requested that the Board authorize agreements with the respective governing bodies of the following schools:

Lawrence High School, 1st and 2nd Floors, Cedarhurst, New York
P.S. 143, Corona, New York
P.S. 104, Far Rockaway, New York
St. Patrick's Elementary School, Elizabeth, New Jersey
Wilson Avenue School - New Wing, Newark, New Jersey

The proposed soundproofing work for these schools would be similar to that planned for the previous nine schools, and it is estimated that the cost of such improvements, including engineering and administrative effort will be approximately \$4.4 million based upon preliminary Aviation Department estimates. Definitive estimates will be prepared before the design phase of the projects. It has been proposed to the respective governing school bodies that they select and retain an architect to perform the preliminary design and contract document preparation and that they award the construction contracts. If any of the respective governing school bodies are unable to administer the soundproofing work with their own staff in a timely manner, the Port Authority, in collaboration with the governing school body, will engage the services of a professional architectural and engineering firm to develop recommendations and prepare contract documents for the soundproofing work and employ the services of a construction contractor to perform the work under the supervision of the governing school body.

Under the Airport and Airway Improvement Act of 1982, Federal funds are available at an 80% funding rate for soundproofing of schools. The Port Authority will pay the 20% sponsor share with no cost to be paid by the schools. Accordingly, applications will be made for funding the above work, and grants should be received before the end of the current Federal fiscal year, which expires September 30, 1985. The soundproofing project work will be sponsored by the Port Authority subject to the availability of Federal funds.

(Board - 3/14/85)

Also, the Board, at its meeting on April 12, 1984, authorized an agreement with Wyle Research Laboratories to establish criteria for the interior environment to be attained from the soundproofing work and to develop criteria for determining future school soundproofing candidates. The criteria developed to date would be used for the proposed 1985 schools. The final results of the Wyle Research Laboratories study will be utilized by the Port Authority Aircraft Noise Abatement Office in recommending any future school soundproofing program for which authorization will be sought contingent on the continued availability of Federal funds.

It was therefore recommended that the Board authorize the Executive Director to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority operated airports to permit joint Port Authority-Federal Airport Improvement Program funding in the estimated amount of \$3.5 million Federal and \$900,000 Port Authority funds for projects to reduce aircraft noise levels in these schools.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority operated airports to permit joint Port Authority-Federal Airport Improvement Program funding in the estimated amount of \$3.5 million Federal and \$900,000 Port Authority funds for projects to reduce aircraft noise levels in these schools; and it was further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 3/14/85)

Kennedy International Airport - Lease of Hangar 4 and Related Outside Areas to British Airways Plc

It was reported that Hangar 4 is part of a complex of Hangars 3, 4 and 5 which were constructed by the Port Authority in 1950 and which have been rented to various airline tenants on a multi-occupancy basis since their completion. Under the terms of those leases, the Port Authority has retained responsibility for certain common items such as insurance, structural integrity, operation of a centralized heating plant serving the three hangars and maintenance of specific components of the fire protection system. Most recently Hangar 4 was occupied on a shared basis by Braniff Airlines and Delta Airlines.

Braniff's occupancy was terminated in 1983 as part of a bankruptcy proceeding involving that company and Delta Airlines' lease for a portion of the premises expired by its term on December 31, 1984. Delta has continued to occupy a small portion of the premises under a short-term permit pending a determination by the Port Authority with respect to a long-term lease with a single tenant for the entire facility. Negotiations have been substantially completed with British Airways for a five-year lease for the entire Hangar 4 complex and related outside areas at an approximate annual rental of \$695,117. This annual rental is based on the following rental rates and approximate areas:

	Building Area	Outside Area	Approximate Total Annual Rental
4/1/85 to 3/31/90	\$504,917 (91,803 sq. ft. @ \$5.50 per sq. ft.)	\$190,200 (9.51 acres @ \$20,000 per acre)	\$695,117

British Airways intends to use the facility to service its own aircraft as well as those of other carriers which it handles at Kennedy International Airport. The facility will be a principal base station for British Airways and will be used to maintain aircraft serving the United States, Canada and the Caribbean as well as for major rectification involving aircraft assigned to these areas. In addition to being used as a maintenance facility, a portion of the hangar will be used for bulk storage by British Airways and as a training center for engineering staff stationed in the United States, Canada and the Caribbean.

The lease will include a provision requiring British Airways to surrender certain aircraft parking positions located on the south apron of the hangar, at the option of the Port Authority, to provide for the construction of a taxiway to serve the north cargo area of the airport with an appropriate abatement of rental. The lease will also provide for an agreement between the Port Authority and British Airways to enable the Port Authority to utilize a portion of the premises in connection with the maintenance of plane mates and loading bridges used at the IAB. The Port Authority will compensate British Airways for this use in an amount equal to a pro-rata share of the cost of the facility.

(Board - 3/14/85)

Under the terms of the lease, the Port Authority will provide, and British Airways will pay, for electricity and cold water on a metered basis. British Airways will also reimburse to the Port Authority British Airways' pro-rated share of operating the boiler room serving the complex. The Port Authority will retain responsibility for certain items including insurance, structural integrity, roof repairs and maintenance of specific components of the fire protection system serving Hangars 3 and 4.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement of lease with British Airways Plc at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a five-year lease with British Airways Plc commencing on or about April 1, 1985 for Hangar 4 and related outside areas at Kennedy International Airport at an approximate annual rental of \$695,117; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

Kennedy International Airport - Lease of Space in Cargo Building No. 81 and Related Outside Areas to DHL Airways, Inc.

It was reported that the Board, at its meeting on March 10, 1983, authorized the Executive Director to enter into a ten-year lease with DHL Airways, Inc. (DHL) for Building No. 179 and site at Kennedy International Airport to be used by DHL in connection with its air courier operations. At the time, DHL's operation at Kennedy International Airport anticipated that it would use the building as a staging area for packages flown in by helicopter and small twin engine aircraft for subsequent shipment on regularly scheduled commercial flights.

Subsequently, DHL changed the nature of its operations to include the use of a 727 aircraft to serve its expanding market. As a result of this change, DHL found it necessary to acquire additional space at Kennedy International Airport. Arrangements were made for DHL to sublease from Trans World Airlines (TWA) with the Port Authority's consent, space in Cargo Building No. 81. This space, which is adjacent to the DHL facility in building No. 179, was well suited to DHL's needs. Facility staff advised DHL that when TWA's lease on Building No. 81 expired the Aviation Department would consider recommending to the Board that the Port Authority enter into a direct lease with DHL for the subleased space for a term to run concurrently with DHL's lease for Building No. 179. Such an arrangement would enable DHL to develop both locations as a consolidated facility.

TWA's plans to relocate its cargo operation to Hanger No. 12 have been finalized and DHL's operations at Kennedy International Airport have expanded to the extent that DHL now desires to acquire approximately 34,000 square feet of space in Cargo Building No. 81 in addition to its space in Building No. 179. The modifications undertaken by DHL in Building No. 179 and its expanding operation at Kennedy International Airport are indicative of DHL's commitment to develop Kennedy International Airport as a major facility in its operation. It is, therefore, recommended that the Board authorize the Executive Director to enter into a lease with DHL Airways for approximately 34,000 square feet of space in Cargo Building No. 81 and related outside area for a term of eight years at the following approximate annual rentals:

Effective Date	Building	Outside Areas	Approximate Total Annual Rental
4/1/85 to 3/31/90	\$170,000 (34,000 sq. ft. @ \$5.00/sq. ft.)	\$42,500 (85,000 sq. ft. @ \$.50/sq. ft.)	\$212,500
4/1/90 to 3/31/93	\$204,000 (34,000 sq. ft. @ \$6.00/sq. ft.)	\$46,750 (85,000 sq. ft. @ \$.55/sq. ft.)	\$250,750

The space will be used by DHL in connection with its expanding air cargo business, and more specifically, to handle larger inbound and outbound shipments which cannot be handled efficiently in Building No. 179 which has been modified to handle primarily documents and small packages.

(Board - 3/14/85)

DHL will be responsible for any alterations that may be required to convert the premises from a single occupancy tenancy to a multi-occupancy premises including the separation of any utility systems and construction of any fire separations that may be required. DHL will also have complete responsibility for maintenance and operation of the leased premises except for insurance and the responsibility for maintenance of the structural supporting frame and roof which shall be the responsibility of the Port Authority. The Port Authority will provide water and electricity to the premises to be paid for by DHL on a metered basis.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement with DHL Airways, Inc. at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a lease with DHL Airways, Inc. for space in Cargo Building No. 81 and related outside areas at Kennedy International Airport for a term of eight years commencing on or about April 1, 1985 at an approximate annual rental of \$212,500 for the period April 1, 1985 to March 31, 1990 and \$250,750 for the period April 1, 1990 to March 31, 1993; the form of the foregoing agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

Downtown Manhattan Heliport - Pier Reconstruction - Contract DMH-110.004 - Authority to Award

It was reported that the Board, at its meeting on October 13, 1983, authorized the Executive Director to enter into an agreement of lease with The City of New York covering the letting of a site (the "Downtown Manhattan Heliport") consisting of approximately 310,000 square feet of land under water located generally east of Vietnam Veterans Plaza between the northerly side of Pier 5 and the southerly side of Pier 8 at the East River, including the then existing Pier 6 Heliport, and providing for construction of a permanent air terminal by the Port Authority. The term of the lease would commence upon the surrender by the Port Authority of its existing lease covering the letting of the Downtown Manhattan Heliport and would expire approximately twenty years from completion of construction, with such construction to be performed in phases, with the first phase to include the rehabilitation of existing Pier 6, new piling, fencing, paving, lighting, a new terminal building, office areas and related facilities. The Board further authorized the implementation of a project covering the first phase of construction of the permanent air terminal.

It is anticipated that The World Trade Center/Battery Park City Heliport, which is now being operated by the Port Authority as a public heliport, will not be available for such use after March 31, 1986, at which time the agreement between the Port Authority and Battery Park City Authority for its use will terminate.

The Department of Transportation of The City of New York is presently reviewing the new heliport lease, which has not yet been submitted to the Board of Estimate of The City of New York, but it is deemed advisable to proceed as quickly as possible with the construction of a permanent air terminal for use as the new Downtown Manhattan Heliport under the provisions of the existing lease which, if not surrendered, would expire on December 4, 1997. This would be done with the concurrence of the City's Department of Transportation.

Pursuant to authorization by the Committee on Construction, at its meeting on August 8, 1984, a contract for the demolition of the then existing Pier 6 heliport was awarded to Weeks Stevedoring Company, Inc. and demolition has been completed.

Contract DMH-110.004 provides for the construction of a new pier for the new Downtown Manhattan Heliport. The pier will have a precast, prestressed concrete deck with a cast in place concrete top slab. The deck will be supported on concrete pile caps and concrete-filled steel pipe piles.

The contract includes a provision to the effect that the bidder will use every good faith effort to meet a goal for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and of 1% for firms owned and controlled by women.

In view of the expected closure of The World Trade Center/Battery Park City Heliport, on March 31, 1986, and in order to meet the project schedule, it will be necessary to award Contract DMH-110.004 as soon as possible. Contract DMH-110.004 will be publicly advertised on March 28, 1985 and bids are scheduled to be received on April 18, 1985.

(Board - 3/14/85)

It was therefore recommended that the Board authorize the Executive Director, in his discretion, either to award Contract DMH-110.004, Pier Reconstruction, Downtown Manhattan Heliport, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director, in his discretion, either to award Contract DMH-110.004, Pier Reconstruction, Downtown Manhattan Heliport, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

(Board - 3/14/85)

George Washington Bridge - Upper Level Sidewalk Steel Modifications - Contract GWB-110.084 - Increase in Classified Work - Supplemental Agreement No. 1

It was reported that the Board, at its meeting on June 14, 1984, authorized the Executive Director to award a contract for repairs and/or replacement of deteriorated structural steel in the north and south sidewalks of the George Washington Bridge to the lowest qualified bidder on the basis of bids to be received and to order extra work up to an amount equal to 10% of the bid accepted. Subsequently, on August 7, 1984, the Executive Director authorized the award of Contract GWB-110.084 to United States Steel Corporation, the low bidder, at its bid price in the estimated total amount of \$4,483,430, plus an authorization of \$450,000 for extra work.

As repair work progressed, it became evident that the deterioration of individual structural steel members had progressed to a point where it was necessary to replace them rather than to repair them, resulting in a substantial increase in classified work monies. In addition, due to the extent of the deterioration, a planned plate repair method for the top flange of the fascia girders has become impractical. Approximately 80% of the top flange angles of the fascia girders must now be replaced. This corrective work results in an increase in classified work from \$3,533,430 to \$5.5 million.

Also, upon removal of the sidewalks, which are closed to the public during the performance of this work, staff observed oscillating of the existing lamp posts and fractures in the light pole bases. In order to insure public safety, staff recommended that when the existing lamp posts are removed to permit the necessary steel rehabilitation, instead of reinstalling the post after the steel work is completed, temporary interim lighting be installed to illuminate the roadway and sidewalk areas. The sidewalks are scheduled to be open to the public before new permanent light poles are erected under a later contract. United States Steel Corporation is willing to perform the lamp post repairs and to provide temporary roadway lighting at an amount estimated at \$325,000. The latter price includes the fabrication of lighting brackets and the installation of fixtures, adapter plates and temporary lighting brackets, all of which were not included in the original contract, but which are required for public safety.

The requested authorization would result in an increase in the total estimated project cost from \$14,113,000 to \$16,867,000.

It was therefore recommended that the Board authorize:

1. an increase in the expenditure for classified work under Contract GWB-110.084 with United States Steel Corporation from an estimated total amount of \$3,533,430 to an estimated total amount of \$5.5 million, an increase of \$1,966,570; and
2. the Executive Director to enter into Supplemental Agreement No. 1 to Contract GWB-110.084 to provide for lamp post repairs and temporary roadway lighting at an amount estimated at \$325,000.

(Board - 3/14/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes an increase in the expenditure for classified work under Contract GWB-110.084 with United States Steel Corporation from an estimated total amount of \$3,533,430 to an estimated total amount of \$5.5 million, an increase of \$1,966,570; and it is further

RESOLVED, that the Board authorizes the Executive Director to enter into Supplemental Agreement No. 1 to Contract GWB-110.084 to provide for lamp post repairs and temporary roadway lighting at an amount estimated at \$325,000; such supplement to be subject to the approval as to form by General Counsel or his designated representative.

(Board - 3/14/85)

The World Trade Department - The Teleport - Contract TP-110.006 - Paving and Utilities - Phase 1B - Award

It was reported that the Contract TP-110.006, Paving and Utilities, Phase 1B, The Teleport, provides for the construction of infrastructure necessary for 50 acres of The Teleport. The contract requires the contractor to furnish and install: a storm drainage system, a sanitary sewer system, a water supply system, water meter pits, power and communication duct banks, roadways, temporary roadway lighting and site work for the entrance facility building. In addition, the contract provides for the performance of snow removal, clearing, and grubbing, and excavating, removing and disposing off-site of unsuitable materials in all areas of The Teleport on a net cost basis estimated at roughly \$500,000.

The contract includes a provision for the contractor to use every good faith effort to achieve a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Proposals will be solicited under Contract TP-110.006 from 44 qualified contractors and proposals will be received on or about March 20, 1985. In order to complete the site infrastructure so as to accommodate tenants at the earliest possible time, it is necessary to promptly begin the work under this contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract TP-110.006, Paving and Utilities, Phase 1B, The Teleport, to the contractor submitting the lowest proposal, who, in his opinion is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to an amount of 10% of the amount of the proposal accepted, or to reject all proposals.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract TP-110.006, Paving and Utilities, Phase 1B, The Teleport, to the contractor submitting the lowest proposal, who, in his opinion is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to an amount of 10% of the amount of the proposal accepted, or to reject all proposals.

(Board - 3/14/85)

The World Trade Department - The Teleport - Agreement with The Vault Properties, Limited

It was reported that staff has made a proposal to The Vault Properties, Limited, which operates a disaster recovery and magnetic tape storage facility in Atlanta, Georgia, covering the letting by that company, or a subsidiary or affiliate thereof, of a parcel of land at the Teleport for the design and construction of such a facility. The parcel contains approximately 1.029 acres of land, and a building containing approximately 15,000 square feet of space is contemplated. The building will be constructed by the tenant entirely at its expense. Plans and specifications would be subject to Port Authority approval.

The proposal includes the right as defined to add to the lease, during a specified period, an additional area containing approximately .854 acres of land on which an additional building would be constructed to be used for the same purpose.

The arrangement being discussed with the tenant contemplates a 40-year term following completion of the initial building but not beyond the expiration date of the Port Authority lease with The City of New York covering the Teleport, with the tenant to pay a basic rental at the annual rate of approximately \$98,650 plus operating expense escalation equal to its proportionate share of increases in common Teleport operation and maintenance expense costs. If the additional parcel is included in the letting the tenant would pay an additional basic rental therefore at the annual rate of approximately \$81,850 per year plus its proportionate share of increases in common Teleport operation and maintenance expense costs. The Executive Director or staff on his behalf would negotiate the terms of the lease with respect to the foregoing, and among the matters expected to be discussed with the tenant and included in the agreement to be negotiated are assignment, subletting, mortgaging and refinancing provisions. The material terms of any arrangement finally agreed to would be subject to approval by the Mayor of The City of New York.

There are no brokerage commissions in connection with this transaction.

It was therefore recommended to the Board that the Board authorize the Executive Director on behalf of the Port Authority to enter into a lease agreement with The Vault Properties, Limited, or a subsidiary or affiliate thereof on the terms and conditions outlined above.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into a lease agreement with The Vault Properties, Limited or a subsidiary or an affiliate thereof for the leasing of approximately 1.029 acres of land at the Teleport to be used for the construction and operation of a disaster recovery center and magnetic tape storage facility for a term of approximately 40 years, the tenant to have certain rights with respect to the leasing of an additional site; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

The World Trade Center - Kuo Hotel Corporation - Amendment to Lease

It was reported that at its meeting on May 11, 1978, the Board authorized a lease with WTC Hotel Associates for the construction and operation of a hotel at The World Trade Center. At its meeting on June 10, 1982, the Board authorized the assignment of that lease to the Kuo Hotel Corporation.

Under the terms of the lease, the Port Authority receives one-half of the hotel's net cash flow as rent. In an effort to generate additional income, subject to Board approval, staff has reached agreement with Kuo for expansion of its banquet and conference room facilities into approximately 7,250 rentable square feet of contiguous space which was recently vacated by Cable News Network. The space would be leased for an initial period of approximately 2½ years commencing on the earlier of Kuo's occupancy of the space or September 1, 1985 and expiring on March 31, 1988. The impact this expansion has on net cash flow during this 2½-year period will be evaluated and a determination made as to the desirability of continuing the use of this additional space on a long-term basis.

During this interim period, Kuo will pay the Port Authority an annual rental of \$250,000 for the additional space. The Port Authority will pay an amount not to exceed \$250,000 for initial design and alterations to the area and for furnishing and fixture costs, Kuo to pay the Port Authority for each dollar of Port Authority investment at a monthly rate which equates to an annual amount equal to .182729 multiplied by the amount of the Port Authority's investment, over a 10-year period. In addition Kuo will pay additional rent to cover increases in operating costs and in-lieu of tax payments and will pay for all utilities and services. The rental and other payments payable in connection with this arrangement will be deductions from gross income in computing Net Cash Flow under the lease.

At the end of three consecutive peak banquet seasons, both Kuo and the Port Authority will evaluate the effect the use of this additional space has had on revenues earned and if both Kuo and the Port Authority agree that the use of this area should be continued, this leasing arrangement, subject to the Board's approval, will be extended and authorization will also be requested if additional refinancing is required to alter and furnish the space to accommodate the long-term use of the area.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement with Kuo Hotel Corporation on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. the Executive Director to enter into an agreement amending the Port Authority's lease with the Kuo Hotel Corporation covering the operation of the Vista Hotel to add to the premises thereunder approximately 7,250 rentable square feet adjacent to the Vista Hotel on the Concourse of One World Trade Center for a term expiring on March 31, 1988; and

(Board - 3/14/85)

2. the Port Authority to pay up to \$250,000 for rebuilding and furnishing the space to be repaid by Kuo over a ten-year period at a monthly rate which equates to an annual amount equal to .182729 multiplied by the amount of the Port Authority's investment; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

Waterfront Development Program - Hunters Point, Queens, New York - Retention of Technical Assistance Associated with Property Appraisals

It was reported that at its meeting on October 11, 1984, the Board authorized the Executive Director to enter into agreements with Messrs. Jerome Haims and Roger Darby to provide separate and independent real estate fee appraisal services to ascertain the current fair market value of properties within the Hunters Point Waterfront Development site. Such agreements were executed. Both fee appraisers have concluded their comparable sales and rental data bases and are presently engaged in their analysis of the subject properties at Hunters Point.

As reported at that meeting, both real estate fee appraisers had advised that their valuations of certain unique improvements within the site would require professional architectural and engineering services and fixture and machinery valuations.

Discussions have been held with both fee appraisers and the Law Department and it has been determined that the services of an independent expert experienced in engineering appraisal methodology to provide machinery and architectural estimates are critical to the timely production of the valuations of several key properties on the site. Services provided by the engineer appraiser would include: reproduction or replacement costing of cement silos, pumping equipment, docking facilities, manufacturing and bottling plant equipment; replacement cost and cost to cure estimates for certain existing improvements on the site.

After preliminary inquiries and interviews with potential engineering-appraisal firms, staff has identified the firm of Martin M. Gross and Associates of West Orange, New Jersey, as being uniquely qualified to carry out this assignment due to the high degree of specialization and experience the firm has achieved in performing this type of work. In particular, the firm's principal, Martin M. Gross, is a licensed professional engineer, MAI and senior member of the American Society of Appraisers. Mr. Gross has over 30 years experience as an engineer appraiser for both government and private entities and has successfully provided expert testimony in many court procedures. He has been utilized by the Port Authority, City and State of New York and the U.S. Government in the past and also by such firms as Xerox Corporation, United Technologies and American Brands. Both fee appraisers retained by the Port Authority concur in this recommendation and have worked successfully with Mr. Gross in the past. Subject to approval by General Counsel, the Port Authority will enter into an agreement with the engineer appraiser at a total estimated cost of \$130,000.

Performance of the above is necessary and desirable in order for the fee appraisers to make a timely valuation of the site and for the Port Authority to maintain its schedule of activities in progressing the Hunters Point Waterfront Development.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Martin M. Gross and Associates to provide necessary architectural/engineering appraisal services in support of the valuation of certain improvements within the Hunters Point Waterfront Development site, the aggregate cost of these services based on the firm's proposal being estimated at \$130,000.

(Board - 3/14/84)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with Martin M. Gross and Associates to provide necessary architectural/engineering appraisal services in support of the valuation of certain improvements within the Hunters Point Waterfront Development site, the aggregate cost of these services based on the firm's proposal being estimated at \$130,000; and it is further

RESOLVED, that the form of said agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

Waterfront Development Project - Hunters Point, Queens, New York - Supplemental Environmental Studies - Retention of Lawler, Matusky & Skelly Engineers - Increase in Amount Authorized

It was reported that the Board, at its meeting on February 14, 1985, authorized the Executive Director to enter into an agreement, on the basis of proposals to be received, for the performance of an environmental field study of aquatic biota and water quality at Hunters Point, Queens, New York, in an amount estimated to be \$300,000.

The estimate of \$300,000 was based upon cost estimates provided to staff by a specialist in marine biology and by the New York State Department of Environmental Conservation. When proposals for performance of the study were received, however, the amounts proposed were much higher.

Proposals were solicited from a select list of qualified firms and on February 21, 1985, the following proposals were received:

Princeton Aqua Science Edison, New Jersey	\$ 480,000
Lawler, Matusky & Skelly Engineers Pearl River, New York	602,231
Cosper Environmental Assoc. Stonybrook, New York	1,009,947

Staff has reviewed the proposals and recommends the selection of Lawler, Matusky & Skelly Engineers (LMS) based upon its superior staff qualifications and proposed scope of services. The LMS proposal was considered preferable to those of the other firms in terms of the numbers and experience of specialists who would be assigned to the project, analysis techniques, data management, quantification of impacts, and quantification of incremental benefits resulting from potential mitigation measures.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Lawler, Matusky & Skelly Engineers for the performance of an environmental field study of aquatic biota and water quality at Hunters Point, Queens, New York, in an amount not to exceed \$602,231, an increase of \$302,231 over the amount authorized by the Board for the study at its meeting on February 14, 1985.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with Lawler, Matusky & Skelly Engineers for the performance of an environmental field study of aquatic biota and water quality at Hunters Point, Queens, New York in an amount not to exceed \$602,231, an increase of \$302,231 over the amount authorized by the Board for the study at its meeting on February 14, 1985, said agreement to be subject to approval as to form by General Counsel or his designated representative.

(Board - 3/14/85)

The Industry/University Cooperative Research Center for Hazardous and Toxic Waste

It was reported that the Cooperative Research Center, located on the campus of the New Jersey Institute of Technology, is a consortium of eighteen major corporations and six universities in the New York/New Jersey metropolitan area. Each corporation is required to contribute a minimum of \$30,000 a year for a three-year period. Additional grants have come from the National Science Foundation and from Governor Kean's Commission on Science and Technology.

The Corporate Research Center was formed two years ago as a result of a great need to improve control of hazardous substances and toxic waste in the bi-state area. The goals of the Center are to develop new waste management technologies, provide a data base to identify a range of acceptable "real world" cost-effective options towards the solution of a range of waste management problems and advance the state of engineering management of hazardous and toxic waste. In addition, environmental health and public policy programs will be developed to educate the media and public with the objective of avoiding the hysteria that so often accompanies environmental problems.

The Port Authority is working hard to induce high technology firms, service industries and manufacturing companies to locate in our region and thereby provide jobs for the population. However, high technology and manufacturing is very frequently associated with the generation of toxic substances and hazardous waste, which must be managed properly at reasonable cost.

Membership in the Cooperative Research Center will enable the Port Authority to harvest a number of benefits:

1. the Port Authority will avail itself of the latest information on environmental control to enable it to make more meaningful public policy decisions relative to future airport expansion, industrial park development and resource recovery;
2. the Port Authority will have access to new technology for cost-effective management of hazardous and toxic wastes; and
3. the Port Authority will have the right to participate in identifying future research programs to be conducted by the Center.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the Industry/University Cooperative Research Center for Hazardous and Toxic Waste wherein the Port Authority would make a contribution of \$30,000 per year with a three-year commitment totaling \$90,000 and in return participate as a member of the Industry Advisory Board which gives overall direction to the Center's research efforts.

Whereupon, the following resolution was unanimously adopted, Commissioner English abstaining:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the Industry/University Cooperative Research Center for Hazardous and Toxic Waste wherein the Port Authority would make a contribution of \$30,000 per year with a three-year commitment totaling \$90,000 and in return participate as a member of the Industry Advisory Board which gives overall direction to the Center's research efforts; and that the form of such agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/14/85)

Engineering and Planning and Development Departments - Project Management System - Implementation and Optimization of System and Training of Management Staff - Retention of Ira Bitz and Associates, Ltd.

It was reported that the long range plans of the Port Authority include the undertaking of a capital construction program which is estimated to cost several billion dollars. During 1981, the Engineering Department formalized its project management system to enhance its ability to accommodate the increasing demand for engineering services required to support the Port Authority program. The system has since been refined and extended throughout the department and it has made a substantial contribution to improved effectiveness.

Because of the influx of new people into the Engineering Department to meet the workload and to replace a substantial number of vacancies created by retiring and promoted personnel, a new continuing training program is needed so that new personnel have the benefit of customized training in project management as did the majority of present staff. In addition, increases in productivity and optimization of the project management system can be attained with continuing refinement and intermittent audits and evaluations of the system. These services become particularly important in view of the Engineering Department's increasing need to interface with various line and staff departments and its efforts to computerize the system, and also in view of the current efforts to develop a more comprehensive organization-wide cost control system.

The potential value of project management techniques has also been recognized by the Planning and Development Department, which is responsible for many varied and highly complex programs. The Planning and Development Department staff wishes to refine its program and project control systems in order to increase staff capability for tracking and monitoring project status, facilitating corrective action, analyzing resource utilization and forecasting resource needs. The Planning and Development Department needs professional and advisory services to assess project management needs, prepare specific guidelines and procedures for implementation and prepare and present staff training seminars in project management techniques.

Ira Bitz and Associates, Ltd. of Chevy Chase, Maryland, has been retained since 1981 by the Engineering Department to formalize the project management system under various Executive Director and Committee authorizations. To date, the total compensation paid to Ira Bitz and Associates, Ltd. for professional services is \$103,150 which includes \$43,500 for services rendered to various line departments. Ira Bitz and Associates, Ltd. is familiar with the organizational structure of the Port Authority and staff is pleased with the services the firm has provided thus far. Therefore, staff is of the opinion that Ira Bitz and Associates, Ltd. is well qualified to perform the additional services. It is anticipated that the services required by the Engineering Department will result in an expenditure of approximately \$30,000 and that the services desired by the Planning and Development Department will also result in an expenditure of approximately \$30,000.

It was therefore recommended that the Board authorize the Chief Engineer to enter into an agreement with Ira Bitz and Associates, Ltd. for the provision of professional and advisory services to further optimize the project management system and to train additional management staff for the Engineering Department and to refine the program and project control systems of the Planning and Development Department in an aggregate amount not to exceed \$60,000 for a one-year period.

(Board - 3/14/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to enter into an agreement with Ira Bitz and Associates, Ltd. for the provision of professional and advisory services to further optimize the project management system and to train additional management staff for the Engineering Department and to refine the program and project control systems of the Planning and Development Department for a one-year period, in an aggregate amount not to exceed \$60,000; said agreement to be subject to approval as to form by General Counsel or his designated representative.

Personnel Department - Retention of Professional Services and Instructors for Human Resource Programs for the 1985 Year

It was reported that in November 1983 staff discussed plans for a Comprehensive Human Resource Program with the Commissioners. The Executive Development Program is one component of this comprehensive program. The primary purpose of the program is to assure a maximally effective executive succession plan for the remainder of the decade through identification, assessment and planned development of outstanding executive staff who demonstrate the potential to be moved into senior executive levels.

In 1984 the Board authorized the Personnel Director to retain the services of Dr. Joel Moses of Applied Research Consultants to assist in the implementation of two Assessment Centers. This first phase of the Executive Development Program resulted in the selection of 24 staff members and identified, through job related simulations, their developmental needs.

For 1985 staff expects an expansion of the Executive Development Program and is planning to conduct three Assessment Centers which will result in the selection of up to 36 staff members. Staff recommends the continued use of Applied Research Consultants to assist in the implementation of the Assessment Centers at a cost not to exceed \$67,000. The use of the Assessment Center will augment the Port Authority's Human Resource Program efforts and is a critical component in identifying the specific developmental needs of staff who are nominated by their departments to participate in the Executive Development Program.

It is further recommended that the Personnel Director be authorized to enter into agreements for the performance of professional and instructor services on an as-needed basis to provide assistance in the design and delivery of a variety of executive training programs. These programs will include distinguished speaker presentations, workshops, seminars and residency programs in areas such as media relations, policy analysis, executive leadership, teambuilding, corporate ethics and strategic planning. The cost of programs currently being developed are estimated to range from approximately \$5,000 for a several day policy analysis workshop to approximately \$20,000 for a media relations program that was previously used to train Department Directors and other key staff. Retention of professional services and instructors for human resource programs will be done by the Personnel Department in consultation with appropriate members of the Executive Development Steering Committee composed of Departmental Directors and executive staff. Minority Business Enterprise firms will be included among the firms solicited.

The total expenditure for these services will not exceed \$200,000.

It was therefore recommended that the Board authorize the Director of Personnel to retain various professional and instructor services on an as-needed basis to assist the Personnel Department in the performance of development activities associated with the Executive Development Program and other key human resource programs at an individual expenditure in an amount not to exceed \$67,000 and at an aggregate amount not to exceed \$200,000 for 1985.

(Board - 3/14/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Personnel Director be and he hereby is authorized to retain various professional and instructor services on an as-needed basis to assist the Personnel Department in the performance of development activities associated with the Executive Development Program and other key human resource programs at an individual expenditure in an amount not to exceed \$67,000 and at an aggregate amount not to exceed \$200,000 for 1985; said agreement to be subject to approval as to form by General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Secretary

MINUTES of Annual meeting of The Port Authority of New York and New Jersey held Thursday, April 11, 1985, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Alan Sagner, Chairman
 Jerry Fitzgerald English
 Robert V. Van Fossan
 Philip D. Kaltenbacher
 William K. Hutchison
 Henry F. Henderson, Jr.

NEW YORK

Robert F. Wagner, Vice-Chairman
 James G. Hellmuth
 Howard Schulman
 John G. McGoldrick
 H. Carl McCall

Peter C. Goldmark, Jr., Executive Director
 Patrick J. Falvey, General Counsel/Assistant Executive Director
 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Acting Director of Tunnels, Bridges and Terminals
 Stephen Carlson, Assistant Director of Planning and Development
 John J. Collura, Assistant Director, Finance Department
 Gwendolyn K. Crider, Administrative Assistant
 Henry DeGeneste, Superintendent of Police, Public Safety
 Sidney Frigand, Assistant Executive Director/Director of Public Affairs
 Louis J. Gambaccini, Assistant Executive Director/Director of Administration
 Gene Gill, Director of General Services
 Jeffrey S. Green, Chief, Finance Division, Law
 James J. Kirk, Deputy Director of Rail Transportation
 Philip LaRocco, Director, Economic Development Department
 Donald R. Lee, Director of Audit
 Lillian C. Liburdi, Director of Management and Budget
 Robert J. Linn, Deputy Director of World Trade
 Katharine B. MacKay, Assistant Executive Director/Director of State Relations
 Mark Marchese, Assistant Director, Information Services, Public Affairs
 John B. McAvey, Assistant Chief Financial Officer
 Rino M. Monti, Director of Engineering/Chief Engineer
 Edward J. O'Malley, Director of Personnel
 James O'Malley, Deputy Director of Management Information Services
 Victor T. Strom, Director of Public Safety
 Anthony J. Tozzoli, Port Director
 Joseph L. Vanacore, Executive Officer for Capital Programs
 Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Treasurer
 Thomas C. Young, Jr., Principal Information Officer, Public Affairs
 Gerard Fernandez, Jr., Bond Counsel, Hawkins, Delafield & Wood
 Donald J. Robinson, Bond Counsel, Hawkins, Delafield & Wood
 Joel J. Rogoff, Executive Partner, Touche Ross & Co.
 Dominick Mustillo, Supervisor, Touche Ross & Co.

Chairman Sagner called the Annual meeting to order and called for the Report of the Nominating Committee. Commissioner Van Fossan, Chairman of the Nominating Committee, reported that the Committee had met earlier that afternoon and recessed until a future date. Chairman Sagner announced that the requirements of the Port Authority's By-Laws with respect to the Annual meeting having been met, we may now proceed to the regular order of business.

(Board - 4/11/85)

Report of Independent Auditors

The Board received a report of Touche Ross & Co., Independent Auditors, as presented by Mr. Joel J. Rogoff. The report which follows was ordered spread upon these Minutes of the Board.

“We have completed our examination of the consolidated financial statements of The Port Authority of New York and New Jersey, and its subsidiary, Port Authority Trans-Hudson Corporation, for the year ended December 31, 1984. We made a similar examination of the 1983 financial statements. Our report dated February 22, 1985, on the comparative financial statements, appears on page 34 of the Port Authority’s 1984 Annual Report. Our examinations were conducted in accordance with generally accepted auditing standards. Our opinion states that the Port Authority’s financial statements are fairly presented in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year. Our opinion also states that Schedules A, B, and C are fairly presented in conformity with the requirements of law and the Port Authority’s bond resolutions which have been applied on a basis consistent with that of the preceding year.

“Concurrently with our examination of the annual financial statements, we also studied and evaluated the Port Authority’s system of internal accounting control. Our report dated November 28, 1984, on the adequacy of the Port Authority’s system of internal accounting control, appears on page 23 of the Annual Report. In our opinion, the Port Authority’s system of internal accounting control, taken as a whole, which was in effect at October 31, 1984, was sufficient to meet such system’s objectives; that is, to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management’s authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles and, where appropriate, in accordance with the Port Authority’s bond resolutions and the requirements of law.

“In addition, we issued a report on the Special Reserve Fund in Trust which certifies to Citibank, N.A., as Trustee, that there are adequate funds in the Trust as of December 31, 1984 to retire the outstanding General and Refunding Bonds as scheduled. We also issued two net revenue reports in accordance with lease agreements between the Port Authority and the City of New York and the City of Newark.

Meetings with the Audit Committee:

“On October 11, 1984, we met with the Audit Committee and reviewed the audit approach that we designed for our examination of the Port Authority’s 1984 financial statements. Our approach to the audit included reviewing and documenting the Port Authority’s accounting systems, and identifying the systems’ key controls. Our audit plan also provided for utilizing, where possible, the Port Authority’s internal audit department and the financial accounting staff. Our examination was performed and completed pursuant to that audit plan.

(Board - 4/11/85)

“Based on the results of our study and evaluation of the system of internal controls, including the controls in the data processing area, we developed recommendations for strengthening the system and made suggestions with respect to accounting and financial reporting. We discussed our comments and recommendations together with management’s responses with the Audit Committee on December 13, 1984. At that meeting, we also reviewed our report on the Port Authority’s system of internal accounting control.

“We completed our field work with respect to the 1984 audit on February 22, 1985, and met with the Audit Committee on February 27th to review the draft of the Port Authority’s 1984 financial statements, requisite footnote disclosures, and our opinion on those financial statements.

Financial Reporting Highlights:

“We worked with the Port Authority’s staff with respect to the accounting treatment for several financial matters which are reflected in the 1984 Annual Report. Among these financial matters are the gain on insurance proceeds received in 1984 in connection with the fire which had destroyed Pier B at the Hoboken-Port Authority Marine Terminal, the disclosure of the cost of health care and insurance benefits for active and retired employees, the suit by the City of New York against the Port Authority in connection with payments-in-lieu-of-taxes at the World Trade Center, and the buyout of the original Terminal C tenants at Newark International Airport. Schedule E has been expanded to provide 10 years of selected financial data in order to comply with the requirements for a Certificate of Conformance, the highest form of recognition given by the Government Finance Officers Association in the area of governmental financial reporting.

“During 1984, we also reviewed the Official Statements prepared by the Port Authority and performed certain auditing procedures in connection with the issuance of the Fifty-first and Fifty-second Series of Consolidated Bonds, and Series HH, Series II, and Series JJ of Consolidated Notes, respectively.

Other Matters:

“During the year, there were several meetings held with Port Authority management, at which various accounting and financial reporting matters were discussed. Changes in professional pronouncements and accounting principles during 1984 did not have any effect on the Port Authority’s financial statements.

“We received the complete cooperation of Port Authority management and employees. There are no restrictions placed on our approach or the scope of our examination. We were given access to all individuals, records, documents, and other supporting data which we requested, and our inquiries were satisfactorily answered.

“We appreciate the opportunity to appear before you and would be pleased to answer any questions you may have pertaining to the financial statements, our approach and the scope of the 1984 audit, and the reports which we issued with respect to the Authority’s system of internal accounting control and annual financial statements.”

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of March 14, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on April 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on April 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on April 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on April 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 4/11/85)

Waterfront Development Program - Hunters Point, Queens, New York - Retention of Professional Assistance to Provide Development Theme Analysis and to Assess Waterborne Transportation System Feasibility

It was reported that, at its meeting on December 8, 1983, the Board authorized the Executive Director to undertake all necessary planning for mixed-use waterfront development in Hunters Point, Queens, New York. In July 1984, the selected master planning consultant, a joint venture of the Gruzen Partnership/Beyer, Blinder, Belle and their sub-consultants undertook the planning effort. The first cycle of that planning process, including site physical inventory and conceptual development planning (uses, densities, open spaces, roadway schemes) is now near completion.

As an outcome of those efforts, staff has determined that a critical element in creating a world-class, mixed-use development at Hunters Point, and particularly in providing anchor uses for the commercial component of the project, is the establishment of an overall development theme which will create a unique focus or thrust for all or part of the development.

Staff has identified biotechnical/biomedical research and the video/media industries as two logical and attractive theme concepts and now recommends the retention of professional assistance to conduct site-specific market feasibility analyses. This assistance is needed at this time in order to interface with work being performed by the Gruzen Partnership/Beyer, Blinder, Belle on the development of the site Master Plan. The selection of viable themes will strengthen the commercial office development potential and, hence, job production of the site.

New York City and the metropolitan area have one of the highest concentrations of biomedical research and biotechnical activity in the nation. The eastside of Manhattan has an unusually high concentration, (sixteen institutions) of well-respected life sciences research and teaching institutions, including Sloan-Kettering Institute, Rockefeller University, New York Hospital-Cornell Medical Center, and the three branches of the New York University Medical Center. Among the wide range of specialty research conducted by these institutions are biochemistry, behavioral and neural sciences, molecular biology, pharmacology, biomedical engineering and computer sciences. Hunters Point, located approximately one-half mile across the East River, is potentially an excellent area for biomedical and biotechnical research and support activities spawned by or attracted to the area because of the presence of these institutions.

Based on staff review of firms specializing in analysis of this industry, three firms which have conducted site-specific research on biomedical/biotechnical centers or related research have been interviewed:

Battelle – Columbus Division – Columbus, Ohio
Arthur D. Little, Inc. – Cambridge, Massachusetts
PA Consulting Services, Inc. – Princeton, New Jersey

Staff proposes that final selection be made on the basis of proposals to be received from the above three firms.

(Board - 4/11/85)

In addition to the biomedical/biotechnical concentration, New York is a national center for the media industry and its ancillary activities. This industry is increasing both in size and in technology diversity. Hunters Point presents a potentially unique opportunity as a center for the consolidation of pre and post-production activities due to its close proximity to the industry's traditional clients and suppliers, as well as its surrounding industrial area which could serve the production functions.

Staff reviewed the capacities of twelve advisory firms with media related expertise and had interviews with three firms:

Browne, Bortz & Coddington, Inc.
Denver, Colorado

Foster Associates, Inc.
Washington, D.C.

Kalba Bowen Associates, Inc.
Cambridge, Massachusetts

In the case of Browne, Bortz & Coddington, Inc., the firm has performed analysis similar to the one proposed; however, those studies were limited exclusively to West Coast markets. The studies performed by Foster Associates, Inc. have as a principal focus support of their clients' economic positions in Public Service Commission rate cases.

It was determined that the third firm, Kalba Bowen Associates, Inc., possessed demonstrably unique qualifications for undertaking this work. This firm is a nationally well-regarded specialist in analysis of the media industry. Its New York City clients include CBS, Citicorp, Chase Manhattan and A.C. Neilson.

Staff believes, however, that the most important factor differentiating this firm from the other two is its one-year study of the film/video industry related to New York State. Completed in 1982 for the NYS Urban Development Corporation and the NYS Division of Communication Industries Development, the study was specifically aimed at the film/video segment of the media industry and focused especially on New York City firms, including data relevant to Queens. In addition, staff believes that the firm's database and experience within the New York-based media industry will have a major bearing on the timeliness, quality and cost of the work.

Work to be performed under both the Center for Life Sciences study and the Media Center study would include: review of industries, with particular focus on the New York City metropolitan area; review of similar projects elsewhere; concept refinement and site-specific demand analysis and forecasting. The period of performance is estimated to be between three and four months for each study.

In the second phase of the Hunters Point site physical planning process, which will involve a preferred master plan alternate and two other alternatives, transportation access improvements to the site will be a major focus. This access is key to accommodating development densities for the office, retail, residential and hotel uses anticipated to be part of the Master Plan, as well as their location in the overall site plan.

(Board - 4/11/85)

An IRT No. 7 subway station (Vernon/Jackson) is located within walking distance of the site; however, the physical assessment conducted to date indicates that, during the A.M. peak hour into Manhattan, passenger loads are very dense. With the added impact from the Hunters Point site's development, improvements to this service as well as other transportation alternatives may be necessary and must be analyzed. One of the alternatives to mitigate the impact from the development is a waterborne transportation service which would, in addition, offer off-peak user and visitor transport to and from the site. The distance across the East River between Hunters Point and Manhattan is 2400 feet and offers the possibility of efficient vessel use.

Booz-Allen would be required to analyze and supplement existing origin and destination, modal split and volume data for both current and anticipated conditions after development of the Hunters Point site. In addition, Booz-Allen would project from that data, based on modeling analyses, the anticipated usage of a ferry service during the phased development of the Hunters Point site and after full development.

Booz-Allen is recommended on the basis of their response to the Request for Proposals (RFP) process recently completed by the Planning and Development Department. Eight firms participated in that process and Booz-Allen was deemed best qualified, by the staff evaluation team, to provide transportation planning/modeling analyses.

Staff recommends that an agreement be entered into with Booz-Allen rather than engaging in another RFP process which staff feels would be duplicative of the process recently completed by the Planning and Development Department. This recommended approach would save significant staff effort and accelerate the planning process by several months.

If sufficient ridership/usage is demonstrated by the Booz-Allen study, additional professional assistance, chosen on the basis of proposals to be received, would be required to undertake the assessment of physical development requirements, including river traffic and current conditions, terminal sighting and design parameters, mainland connections in Manhattan, as well as capital costs and other related factors. A RFP process would be initiated for the study of the physical development requirements and cost analysis, if deemed necessary, after the Booz-Allen study is completed. This phase of the feasibility assessment would be implemented about July 1, 1985. Therefore, staff feels there is sufficient time to undertake the RFP process in this case.

Future assessment of the operations and maintenance requirements/costs of the waterborne transportation system between the Hunters Point Waterfront Development and Manhattan, as well as vessel design parameters, would be derived from work being performed currently by the Planning and Development Department and the consultant team studying the Sea Bus system for possible Hudson River use.

Performance of the above services is necessary and desirable at this time in order for the Port Authority to maintain its schedule of activities in progressing the Hunters Point Waterfront Development.

The total expenditure for the four aforementioned studies is estimated to be \$230,000 and would require an increase of \$230,000 in the 1985 Budget.

(Board - 4/11/85)

It was therefore recommended that the Board authorize:

1. the Executive Director to enter into an agreement for professional assistance, on the basis of proposals to be received, to provide analysis and recommendations as to the feasibility of a Center for Life Sciences as a potential theme for the Hunters Point Waterfront Development, at an estimated amount of \$65,000;

2. the Executive Director to enter into an agreement with Kalba Bowen Associates, Inc., to provide analysis and recommendations as to the feasibility of a Media Center as a potential theme for the Hunters Point Waterfront Development, at an estimated amount of \$65,000;

3. the Executive Director to enter into an agreement with Booz-Allen & Hamilton, Inc., to assess the need for and usage feasibility of a waterborne transportation system between the Hunters Point Waterfront Development and Manhattan, at an estimated amount of \$50,000;

4. the Executive Director, in his discretion and based on the usage level and need as demonstrated by the Booz-Allen study, to enter into an agreement for professional assistance, on the basis of proposals to be received, to assess the physical design parameters and capital costs of terminal facilities at the Hunters Point Waterfront Development and on the Manhattan side of the East River, at an estimated amount of \$ 75,000; and

5. an increase in the 1985 Budget of \$230,000 to accomplish the services recommended herein.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with a consultant, on the basis of proposals to be received, to provide analysis and recommendations as to the feasibility of a Center for Life Sciences as a potential theme for the Hunters Point Waterfront Development, at an estimated amount of \$65,000; and it is further

RESOLVED, that the Executive Director is authorized to enter into an agreement with Kalba Bowen Associates, Inc., to provide analysis and recommendations as to the feasibility of a Media Center as a potential theme for the Hunters Point Waterfront Development, at an estimated amount of \$65,000; and it is further

RESOLVED, that the Executive Director is authorized to enter into an agreement with Booz-Allen & Hamilton, Inc., to assess the need for and usage feasibility of a waterborne transportation system between the Hunters Point Waterfront Development and Manhattan, at an estimated amount of \$50,000; and it is further

RESOLVED, that the Executive Director, in his discretion and based on the usage level and need demonstrated by the Booz-Allen study, is authorized to enter into an agreement with a consultant, on the basis of proposals to be received, to assess the physical design parameters and capital costs of terminal facilities at the Hunters Point Waterfront Development and on the Manhattan side of the East River, at an estimated amount of \$50,000; and it is further

RESOLVED, that the 1985 Budget is increased in the amount of \$230,000 to provide for the services authorized herein; and it is further

RESOLVED, that the form of the four foregoing agreements is subject to the approval of General Counsel or his designated representative.

(Board - 4/11/85)

Waterfront Development Program - Hoboken, New Jersey-Retention of Professional Assistance for Programming and Special Uses Planning

It was reported that at its meeting on December 8, 1983, the Board authorized the Executive Director to undertake all necessary physical planning for mixed-use waterfront development projects in Hoboken, New Jersey. The plan for the Hoboken Waterfront Development Project is nearing completion and there is presently a shift from conceptual to implementation planning. This requires the retention of consultants to examine and refine possible special uses, such as cultural and entertainment programs and facilities, which may be appropriate to the Hoboken Waterfront Development. The need for expert advice at this time is particularly important as the project's development planning consultants are nearing a point where such information must logically be considered in finalizing the overall Hoboken Waterfront Development plan.

The attractiveness to the public and businesses of waterfront sites is enhanced by a carefully conceived series of programming activities oriented to improving the attractiveness of the formerly deteriorated site. The creation of an identity in the marketplace, and, at the same time, the provision of meaningful activities for the local population along the waterfront is essential for a successful project. This programming function will attempt to integrate the physical aspects of the site itself, the nautical theme of the waterfront and the needs and interests of the site tenants, visitors and the local community. Expertise in this area is highly specialized, and Port Authority staff currently do not possess this expertise. Based upon the recommendations of Cooper, Eckstut Associates, the master planning firm for the Hoboken Waterfront Development Program, and other experts on waterfront development, it is recommended that Ann Tindal, Director of Programmes, Harbourfront Corporation, Toronto, be retained to provide Economic Development staff with conceptual advice and specific recommendations regarding an appropriate plan of programming activities for Hoboken, for both immediate and future implementation by Economic Development staff. Her work product could lead to events on site as soon as the latter half of 1985. Concurrently, Ms. Tindal would provide specialized training in the programming field to Economic Development staff, thus diminishing the need for future consultants in this area.

Such programming activities and special uses functions may include, for example, special events and attractions, festivals, and recreational, cultural and entertainment programs and recommendations for facilities which would service to enhance the overall aesthetics and image of the project and improve its marketability and longrange economics. Hoboken Waterfront Development staff have visited Harbourfront and observed its superior programming activities and have held numerous discussions with Ms. Tindal regarding her operations' applicability to Hoboken. Her input was found by staff to be most valuable, and a continuation of her services in a more formal relationship is now being sought. Ms. Tindal is an internationally recognized expert in the waterfront programming area and has been on the staff of Harbourfront for over ten years. She is experienced in the selection and retention of professional theater consultants, which may be necessary as part of her work and is provided for under this authorization. Recently, she was retained by the firm of Olympia and York to provide assistance regarding the programming activities of Battery Park City. In Toronto, Harbourfront is a large-scale urban waterfront development project as well as a very successful community/cultural center which enjoys a world-wide reputation in the programming field. We believe her prior experience and expertise is, therefore, particularly relevant to the Hoboken Waterfront Development Project. Ms. Tindal would be retained at an estimated amount of \$35,000, which would include travel and out-of-pocket expenses. Specific Board authorization for individual programming will be requested as appropriate.

(Board - 4/11/85)

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Ann Tindal to provide conceptual advice and specific recommendations on programming issues and special uses activities, including the possible retention of professional theater consultants, for the Hoboken Waterfront Development Project at an estimated cost of \$35,000.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with Ann Tindal to provide conceptual advice and specific recommendations on programming issues and special uses activities, including the possible retention of professional theater consultants, for the Hoboken Waterfront Development Project at an estimated amount of \$35,000; and that the form of such agreement is subject to the approval of General Counsel or his designated representative.

(Board - 4 /11/85)

Erie Basin Fishport - Lease with M. Slavin & Sons, Ltd.

It was reported that the Board, at its meeting on December 8, 1983, authorized a project for the development of the first phase of the Port Authority Fishport at a total estimated cost of \$27 million, and the Executive Director to enter into appropriate leases with fish processors and distributors, subject to approval of the Committee on Operations.

M. Slavin & Sons, Ltd., a seafood processor, would lease Building 211 for a fish processing, cold storage and a distribution operation. M. Slavin & Sons, Ltd. will continue to operate its other locations in Brooklyn and Manhattan. The proposed Erie Basin location would enable the lessee to receive fish in greatly increased volume and process it for distribution.

The basic rent would be \$224,000 per year, from the commencement of the second year of the lease through the twenty-sixth year of the lease, subject to a Consumer Price Index adjustment every two and one-half years with a 3% minimum increase and a 5% maximum increase compounded annually.

Approximately \$3 million will be allocated for general building repairs and improvements, and project overheads.

Slavin's realty and equipment improvements in Building 211 are estimated at approximately \$5 million, an amount to be repaid during the lease at the Citibank prime rate with a 20% override for Port Authority engineering, administration and financial costs.

Slavin also requested additional realty and equipment improvement allowances of approximately \$1 million late in the negotiations. The Port Authority would make such allowances but the Port Authority would be immediately repaid within 30 days of completion of construction with a similar 20% override.

M. Slavin & Sons, Ltd. would engage the services of St. Onge Ruff of York, Pennsylvania, an engineering firm specializing in the design of food processing, cold storage, and distribution facilities. St. Onge Ruff would prepare final and complete drawings, plans and specifications, and cost estimates for the rehabilitation of all of Building 211, including Port Authority work. However, the details of the structural frame of the building, roofing, siding and paving would be supplied to St. Onge Ruff by the Port Authority. The Port Authority would bid and award the construction contract. The Port Authority would reimburse M. Slavin & Sons, Ltd. for St. Onge Ruff's services in the maximum amount of \$350,000. M. Slavin & Sons, Ltd. would repay this amount through the 20% override charge. St. Onge Ruff's services would substitute for engineering work ordinarily performed by the Port Authority for the lessee and its costs for the work are considered reasonable.

The improvements will be determined, by the Port Authority, to be realty or equipment. The lessee will pay an additional monthly rental for each dollar of Port Authority investment with the additional rent being computed every six months in accordance with the Citibank prime rate. The additional rent will be paid for 25 years for realty improvements and for fifteen years for equipment with the lessee having the right to repay the unamortized principal at any time.

(Board - 4/11/85)

Additional revenues would also be received based upon fees, when developed, for the loading and unloading of fish by vessel. These fees would be collected through the handling hall operation and if fish are directly discharged to the Plant, dockage and wharfage would be paid.

The lease contains concellation provisions which can be triggered by either the Port Authority or the tenant if either does not adhere to certain schedules for the accomplishment of engineering work and the completion of construction contracts. The lease may also cancel if the bid price for the tenant's work exceeds \$5 million. The work is estimated to cost \$4.5 million. Lastly, the lessee has the right to cancel upon ten days' notice if the Port Authority fails to complete the premises 540 days after contract award.

The Port Authority is not obligated to reimburse the lessee for its obligation to St. Onge Ruff should the Port Authority or the lessee cancel the lease or should the lease automatically cancel before the award of the contract.

Because of the sizable infrastructure costs that will be distributed among all of the tenants in the Fishport, the first phase of this development will not generate sufficient revenues to recover all of the Port Authority's costs.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into a lease with M. Slavin & Sons, Ltd. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director on behalf of the Port Authority to enter into a 26-year lease, with M. Slavin & Sons, Ltd. commencing not later than 540 days after contract award for Building 211, covering the letting of that building, containing approximately 112,000 square feet, and adjacent paved open area of approximately 60,000 square feet at the Erie Basin-Port Authority Marine Terminal, at an annual rental of \$224,000 plus escalation with provision for expenditure by the Port Authority of approximately \$9 million in project cost to rehabilitate Building 211, including approximately \$6 million for the lessee's account for the cost of leasehold improvements in the building including the purchase of operating equipment for the lessee, the lessee to repay the Port Authority at 120% of the costs of its leasehold improvements at the Citibank prime rate; the said lease to be in accordance with the foregoing; the form of the lease to be subject to the approval of General Counsel or his designated representative.

(Board - 4/11/85)

Newark International Airport - Allied Aviation Service Company of New Jersey, Inc. - Contract AN-652 - Operation and Maintenance of the Aviation Fuel System - Contract Extension

It was reported that the Board, at its meeting on April 12, 1973, authorized the award of the present fuel system operation and maintenance contract to Allied Aviation Service Company of New Jersey, Inc. The Board, at its meetings on June 10, 1976, July 12, 1979 and August 12, 1982, extended the contract for additional three-year periods and the contract will expire April 30, 1985. Total payments to Allied, under the contract during the three-year period ending April 30, 1985, will total approximately \$25.1 million, including the additional payments authorized by the Board at its meeting on May 10, 1984.

The Board, at its meeting on May 10, 1984, also authorized the leasing of up to ten refuelers from Allied, on a month-to-month basis, to supplement the airport's truck fleet to meet increased fueling requirements. The contract is supported by a guarantee by Allied Maintenance Corporation, the parent company of Allied Aviation Service Company of New Jersey, Inc.

The Master Airline Leases provide that if the Port Authority and a majority of the lessee airlines are satisfied with the existing contractor's performance, the Port Authority shall proceed to negotiate with the same contractor for a three-year extension of its agreement with the same procedure to be followed for each succeeding renewal. The lessee airlines have requested that the Port Authority continue Allied's service as operator.

The Executive Director granted authorization to enter into negotiations for a three-year extension of the contract with Allied. Delay in formulation of the new contract is the result of considerable negotiation that began earlier this year and continues apace in an attempt to use the most timely and accurate information available. In addition, new procedures were recently worked out whereby the lessee airlines are being permitted to participate in our review of Allied's proposed budget. The airlines are expected to retain the services of the same fuel consultant they retained at Kennedy International Airport for this purpose. This involvement by the airlines will undoubtedly lengthen the time required for completing this complex negotiation. However, these negotiations are expected to be successfully completed during the six-month extension period at which time authorization providing for the full three-year extension would be requested from the Board.

The existing terms and conditions of the agreement would be continued under the proposed interim six-month extension. It is expected that payments to Allied under the proposed interim six-month extension will total approximately \$6.6 million including the rental of up to five refuelers from Allied Aviation at a rental rate of \$800 per month. The said payments will cover monthly gallonage fees at the current rate set forth in the agreement, as well as certain amortization amounts and payments for specified services and materials. It is expected that the new fee structure to be negotiated will be retroactive to May 1, 1985, the start of the extension.

Under the Master Airline Leases, the amount payable by the Port Authority to the operator of the system plus the amortization of the Port Authority's investment in the system is payable by the airlines.

(Board - 4/11/85)

The contract as extended will contain provisions covering Affirmative Action/Equal Employment Opportunity and the use of Minority Business Enterprises and Women Owned Business Enterprises pursuant to the Resolution of the Board adopted at its meeting on November 8, 1984.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement for a six-month extension commencing May 1, 1985 of the contract with Allied Aviation Service Company of New Jersey, Inc. for the operation and maintenance of the Aviation Fuel System at Newark International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into an extension of Contract AN-652 with Allied Aviation Service Company of New Jersey, Inc. covering the operation and maintenance of the Fuel Storage Area and Aviation Distribution System at Newark International Airport for a six-month period beginning May 1, 1985 and ending October 31, 1985, at an estimated cost of \$6.6 million including the leasing of refuelers previously authorized by the Board, subject to the terms and conditions of the present contract; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 4/11/85)

Newark International Airport - Extension of Taxiways "Y" and "A" - Project Authorization and Authorization to Award Contract

It was reported that with the continued unprecedented growth of air traffic at Newark International Airport, staff recommends that extensions to Taxiways "Y" and "A" be made to improve aircraft ground movement and control.

The extension of Taxiway "Y" to the east will connect this taxiway directly to the holding block for takeoffs on Runway 22R. The extension of Taxiway "A" from Taxiway "O" to the portion of Taxiway "PA", which is currently being constructed under Contract NIA-140.052, will provide a secondary access route to the Federal Express Metroplex and the Butler Aviation Corporate Service Center, both of which are currently under construction and scheduled to become operational in late 1985 and late 1986, respectively. This secondary routing will be necessary on those occasions when aircraft are queued on the primary route along the northerly portion of Taxiway "PA" awaiting takeoff clearance on either Runway 4L or Runway 4R.

Contract NIA-220.026, which is the only contract proposed to be awarded in connection with the project, provides for the construction of paving, drainage, lighting and other related work for the Taxiway "Y" and "A" extensions. The contract will be publicly advertised and bids are presently scheduled to be received in June 1985. The contractor will be furnished LCF mix from the LCF plant operator, as previously authorized by the Board.

It was therefore recommended that the Board authorize:

1. a project at Newark International Airport for construction of extensions to Taxiways "Y" and "A", at an expenditure presently being estimated at \$2 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; and

2. the Executive Director, in his discretion, either to award Contract NIA-220.026, Taxiway "Y" and "A" Extensions, to the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at Newark International Airport for construction of extensions to Taxiways "Y" and "A", at an expenditure presently being estimated at \$2 million; including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion either to award Contract NIA-220.026, Taxiway "Y" and "A" Extensions, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

(Board - 4/11/85)

Newark International Airport - Rehabilitation of Taxiways "I" and "O" - Contract NIA-423 - Authority to Award

It was reported that Contract NIA-423 provides for removal of the existing asphalt concrete wearing course and installation of a rubberized asphalt shockabsorbent and waterproof membrane, installation of a new wearing course and replacement of the taxiway center line lights and installation of a fuel leak detection system, all in connection with the rehabilitation of Taxiways "I" and "O" at Newark International Airport. The contract also includes provisions for reinstallation of barricades, addition of bitumen to recycled asphalt, the removal of oil-contaminated material which may be uncovered as a result of excavating and pumping oil-contaminated ground-water, to be performed on a net cost basis, estimated at roughly \$50,000.

The contract also includes a provision for the winter suspension of work if weather conditions do not permit further performance of the contract. Additionally, a portion of the work for this contract will be performed on the weekends so as to minimize interference with airport operations.

The contract includes a provision that the bidders will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Contract NIA-423 will be publicly advertised and bids are scheduled to be received on April 18, 1985. In order to allow construction to commence promptly after receipt of bids, it is recommended that the Executive Director be authorized to award the contract.

It was therefore recommended that the Board authorize the Executive Director, in his discretion, either to award Contract NIA-423, Rehabilitation of Taxiways "I" and "O", Newark International Airport, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director, in his discretion, either to award Contract NIA-423, Rehabilitation of Taxiways "I" and "O", Newark International Airport, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order net cost work, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

(Board - 4/11/85)

Holland Tunnel - Ceiling Replacement - Phase II - Ceiling Installation - Contract HT-110.022 -
Project Authorization and Contract Award

It was reported that early in 1980, it was determined by staff that the ceilings of the Holland Tunnel had reached the end of their useful life and had to be replaced. Accordingly, staff deemed it necessary to conduct a trial demolition of a section of the south tube ceiling and a test program to test different ceiling finishes. Subsequently, test panels were constructed and installed in the tunnel. Each of the panels were evaluated from the standpoint of ease of construction, durability, reflectivity and ease of maintenance. Based on this evaluation, staff concluded that precast concrete panels with a ceramic tile finish was the best choice. It provides a durable finish that can be routinely washed and maintained with the tile tunnel walls to provide required brightness and appearance.

As part of the project, the Board, at its meeting on October 13, 1983, authorized the Executive Director to award a contract to remove the ceilings in both the north and south tubes of the tunnel. Subsequently, the Executive Director authorized the award of Contract HT-110.019 to Beaver Concrete Breaking Co., Inc. at its low bid price of \$8,469,000. The removals were completed in December 1984. The project costs to date total roughly \$17 million.

Contract HT-110.022 provides for the installation of a concrete ceiling, predominantly precast ceiling panels with a ceramic tile finish, replacement of the tunnel lighting system and installation of fiber optic cables for the closed circuit surveillance system. These panels will utilize tiles prepurchased under another contract.

The work will be performed during nighttime hours and is scheduled to be completed by October 1987. In order to minimize interference with traffic flow and essential facility maintenance operations during the construction period, one tube of the Holland Tunnel will be closed during work hours and traffic will be diverted to the Lincoln Tunnel.

The contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

By public advertisement, prospective bidders were invited to submit prequalification information for Contract HT-110.022 and on April 9, 1985, the following bids were received:

	Classified Work	Unclassified Work	Estimated Total Amount
Morrison-Knudson Co., Inc. New York, New York	\$5,522,500	\$32,076,100	\$37,598,600
Bellezza Company, Inc. S. Kearny, New Jersey	5,695,010	36,290,864	41,985,874

(Board - 4/11/85)

	Classified Work	Unclassified Work	Estimated Total Amount
Defoe Corp. and Karl Koch Erecting Co., Inc., a joint venture Mount Vernon, New York	3,246,000	39,829,305	43,075,305
Nab Construction Corp. College Point, New York	4,327,950	40,918,050	45,246,000
Beaver Concrete Breaking Co., Inc. and Slattery Associates, Inc., a joint venture Maspeth, New York	4,735,450	42,093,000	46,818,450
Bechtel Constructors Corporation Reno, Nevada	3,620,448	43,499,823	47,120,271
The P.J. Carlin Construction Company, Carlin Construction & Development Corp. and Carlin- Atlas Holding Co., Inc., a joint venture New Rochelle, New York	6,900,000	42,835,000	49,735,000
Koren DiResta Construction Co., Inc. New York, New York	7,826,750	45,000,000	52,826,750
Daidone Electric of New York, Inc., and Schiavone Construction Co., a joint venture Secaucus, New Jersey	8,982,400	44,705,550	53,698,950
ENGINEER'S ESTIMATE			\$29,000,000

Morrison-Knudson Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. project to replace the ceilings of the Holland Tunnel at an expenditure presently being estimated at \$78,310,000, including payments to contractors, an allowance for extra work and engineering, administrative and financial expenses; and

2. the Executive Director to award Contract HT-110.002, Ceiling Replacement, Phase II, Ceiling Installation, to Morrison-Knudson Co., Inc. in the estimated amount of \$37,598,600 and order extra work up to the amount of \$3,760,000.

(Board - 4/11/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project to replace the ceilings of the Holland Tunnel at an expenditure presently being estimated at \$78,310,000, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract HT-110.022, Ceiling Replacement, Phase II, Ceiling Installation, to Morrison-Knudson, Co., Inc. in the estimated amount of \$37,598,600, and to order extra work up the the amount of \$3,760,000.

(Board - 4/11/85)

Port Authority Operating Equipment - Lease Financing Program

It was reported that in the past the Port Authority has used operating funds to finance the purchase of operating equipment. However, since the useful life of such equipment often exceeds one year, a one-time cash payment for these expenditures does not adequately reflect the useful operating life of the equipment. Financing the purchase of operating equipment through lease-financing transactions would provide a more accurate allocation of costs in that it would allow the Port Authority to provide for the cost of operating equipment over its estimated useful life.

The feasibility of a Port Authority lease-financing program was discussed with several firms which have had experience in lease-financing. The program would involve entering into lease-financing transactions to facilitate the purchase of a portion of the Port Authority's operating equipment, including but not limited to: automotive vehicles; telephone, radio and computer equipment; and office furnishings, in an aggregate principal amount not to exceed \$10 million outstanding at any one time. Lease-financing transactions under the program would be entered into no earlier than May 1, 1985 and no later than June 30, 1988. Expressions of interest were received from the following firms:

Bank of America NT & SA
New York, New York

Gelco Municipal Services
Eden Prairie, Minnesota

Municipal Leasing Services, Inc.
Boston, Massachusetts

The other firms contacted did not submit expressions of interest either because the size of the proposed lease-financing program is too small or because these firms deal primarily with private corporations and do not have an established leasing program which offers tax-exempt interest rates.

The information submitted by the three firms was evaluated and it was determined that Bank of America's proposal would produce the lowest cost to the Port Authority. It is anticipated that the cost of the arrangements with the lessor-investor or investors and with Bank of America NT & SA, New York, New York, BankAmerica Trust Company of New York or other BankAmerica entity ("Bank of America") will be as follows: a variable interest rate on the lease transactions equal to 60% of Bank of America's variable reference rate of interest (comparable to "prime" rate at other money center banks and hereafter "Reference Rate") publicly announced as such for the agreement with the proposed initial lessor-investor; a placement fee of 1% on the total principal amount of equipment financed through the lease-financing program to be paid as funds are periodically received from the lessor-investor or investors; a one-time payment to Bank of America for legal, financial and administrative charges in connection with the establishment of the program with the initial lessor-investor not in excess of \$20,000; and payment to Bank of America for financial and administrative expenses for paying agency, registration and certification services not in excess of \$5,000 per year.

(Board - 4/11/85)

In the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in market conditions, the Port Authority and the lessor-investor or investors may agree to a rate not to exceed 85% of Bank of America's Reference Rate.

Bank of America would provide for the lease-financing transactions, through a private placement or placements, to one or more institutional investors who would be the lessor-investor or investors in the transactions. On a present value basis this program, over a two-year period, is expected to lower the Port Authority's cost of providing the equipment by an amount in excess of \$.5 million. Each letting of the equipment would be for a period of years to be determined by the Port Authority on a case-by-case basis for each item of equipment but would not exceed the useful life of such equipment.

It is contemplated that the lessor-investor or investors would, upon application by the Port Authority, advance to the Port Authority the money necessary to finance the purchase of specified operating equipment planned to be acquired in the three to six months immediately following such application. It is understood that the Port Authority would request not less than \$2.5 million in the first application and not less than \$1.0 million in any subsequent application. These monies would be separately accounted for and as equipment is delivered and accepted, the Port Authority would utilize these funds to pay the manufacturer. For example, during the next three months the Port Authority's Central Automotive Division expects to take delivery on approximately \$2.0 million worth of vehicles. In addition, \$800,000 worth of two-way radio equipment is expected to be purchased for use by personnel at Port Authority and PATH facilities. Under the proposed program, Bank of America would raise \$2.8 million from the lessor-investor or investors for the timely purchase of the equipment by the Port Authority. The Port Authority would retain sole discretion to determine which equipment to purchase and whether the equipment delivered is acceptable. Upon delivery to and acceptance by the Port Authority of the equipment, the Port Authority would use the lessor-investor's payment for such purchase and the equipment would become part of the lease between the Port Authority and the lessor-investor. The rental obligation with respect to each letting of equipment would be an operating expense of the Port Authority payable in the same manner and out of the same revenues as all other such expenses.

With respect to each payment made to the lessor-investor by the Port Authority, the Port Authority would pay the lessor-investor interest (without any amortization of principal) from the date of such payment to the Port Authority until the date the equipment for which such payment is made is delivered and accepted. When the equipment has been delivered and accepted, the Port Authority would begin making principal and interest payments on the delivered items and interest-only payments on any balance of any unexpended funds paid by the lessor-investor. Repayment of principal would be amortized in equal installments over the term of the financing lease. As of April 11, the Reference Rate was 10.5% and 60% for the initial letting was equivalent to 6.3%. It is contemplated that the interest rate will be adjusted on the first day of each month and will be calculated according to Bank of America's Reference Rate in effect on the fifteenth day of the previous month.

(Board - 4/11/85)

The lessor-investor or investors will have the right to terminate the letting with respect to equipment under lease with the Port Authority at any time on seven days' notice to the Port Authority and the Port Authority would be obligated to pay the unamortized principal amount on such termination. It is not expected that such right will be exercised as the variable interest rate feature of the transaction assures the lessor-investor that the return on this investment will fluctuate according to interest rate changes in the market. Bank of America has advised that it is the present intention of the proposed initial lessor-investor to maintain the investment until maturity. Further, in the event the letting is terminated, Bank of America, although not required to do so, may be able to remarket the obligation. The Port Authority will also have the right to terminate the letting under the lease with the lessor-investor at any time and pay interest accrued to the date of termination plus the then unamortized principal amount without penalty. It is also understood that it will not be necessary for the Port Authority to obtain a rating on the obligation.

No part of the payments by the lessor-investor to the Port Authority to be used for the purchase of equipment is to be used directly or indirectly to acquire securities or obligations which may reasonably be expected, on the date that such payments are made, to produce a yield during the term of the letting of the equipment which is materially higher than the yield to the lessor-investor or investors during such letting, but such payments may be invested for a temporary period in securities or other obligations until such proceeds are needed for the purchase of equipment. The Executive Director would be authorized to impose further restrictions on the investment of the payments by the lessor-investor and, if on the date that such payments are made, a differential yield is permitted, to invest such payments in obligations which will not produce a yield greater than that permissible.

It is recommended that certification on behalf of the Port Authority as to the Port Authority's intentions with respect to the application and investment of payments made by the lessor-investor or investors to the Port Authority for the purchase of equipment may be made by the Chairman of the Port Authority; the Vice Chairman of the Port Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Assistant Chief Financial Officer; Director, Finance Department/Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Port Authority; and that any action (including conducting public hearings) which may be necessary or desirable in connection with such payments to assure that such payments are applied in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, may be taken by any one of the foregoing, and that any such actions taken in connection therewith be ratified, authorized or approved.

It was therefore recommended that the Board:

1. authorize the Executive Director on behalf of the Port Authority to enter into lease-financing transactions no earlier than May 1, 1985 and no later than June 30, 1988, to facilitate the purchase of portions of the Port Authority's operating equipment including, but not limited to: automotive vehicles; telephone, radio and computer equipment; and office furnishings, in an aggregate principal amount not to exceed \$10 million at any one time at an interest rate to the lessor-investor or investors equal to 60% of Bank of America's variable Reference Rate publicly announced as such for the agreement with the proposed initial lessor-investor, and in the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in

(Board - 4/11/85)

market conditions, the Port Authority and the lessor-investor or investors may agree to a rate not to exceed 85% of Bank of America's Reference Rate; the term of each letting of equipment not to exceed the useful life of the equipment included therein; the rental obligation for each letting of equipment to be divided into components of principal and interest and to be an operating expense of the Port Authority, payable in the same manner and out of the same revenues as all other such expenses of the Port Authority;

2. authorize the Executive Director on behalf of the Port Authority to enter into agreements with Bank of America NT & SA, BankAmerica Trust Company of New York or any other BankAmerica entity and with the lessor-investor or investors to effectuate the purchase and lease-financing (and to take such other action as may be necessary or appropriate in connection with such purchase and lease-financing) of the above described operating equipment; the agreement with Bank of America NT & SA (or other BankAmerica entity) to provide for a placement fee of 1% of the principal amount of equipment financed through the lease-financing program to be paid as funds are periodically received from the lessor-investor or investors; and the agreement with BankAmerica Trust Company of New York (or other BankAmerica entity) to provide for one-time only legal, financial and administrative charges in connection with the establishment of the program with the initial lessor-investor not in excess of \$20,000 and to also provide for an annual administrative fee not in excess of \$5,000 per year;

3. provide that no part of the payments by the lessor-investor or investors to the Port Authority to be used for the purchase of equipment be used directly or indirectly to acquire securities or obligations which may reasonably be expected, on the date that such payments are made, to produce a yield during the term of the letting of the equipment which is materially higher than the yield to the lessor-investor or investors during such letting, but provide also that such payments may be invested for a temporary period in securities or other obligations until such payments are needed for the purchase of equipment, and authorize the Executive Director to impose further restrictions on the investment of the payments by the lessor-investor or investors and, if on the date that such payments are made, a differential yield is permitted, to invest such payments in obligations which will not produce a yield greater than that permissible; and

4. provide that certification on behalf of the Port Authority as to the Port Authority's intentions with respect to the application and investment of payments made by the lessor-investor or investors to the Port Authority for the purchase of equipment may be made by the Chairman of the Port Authority; the Vice Chairman of the Port Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Assistant Chief Financial Officer; Director, Finance Department/Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Port Authority; and that any action (including conducting public hearings) which may be necessary or desirable in connection with such payments to assure that such payments are applied in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, may be taken by any one of the foregoing, and that any such actions taken in connection therewith be ratified, authorized or approved.

(Board - 4/11/85)

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized on behalf of the Port Authority to enter into lease-financing transactions no earlier than May 1, 1985 and no later than June 30, 1988, to facilitate the purchase of portions of the Port Authority's operating equipment including, but not limited to: automotive vehicles; telephone, radio and computer equipment; and office furnishings, in an aggregate principal amount not to exceed \$10 million at any one time at an interest rate to the lessor-investor or investors equal to 60% of Bank of America's variable Reference Rate publicly announced as such for the agreement with the proposed initial lessor-investor, and in the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in market conditions, the Port Authority and the lessor-investor or investors may agree to a rate not to exceed 85% of Bank of America's Reference Rate; the term of each letting of equipment not to exceed the useful life of the equipment included therein; the rental obligation for each letting of equipment to be divided into components of principal and interest and to be an operating expense of the Port Authority, payable in the same manner and out of the same revenues as all other such expenses of the Port Authority; and it is further

RESOLVED, that the Executive Director is hereby authorized on behalf of the Port Authority to enter into agreements with Bank of America NT & SA, BankAmerica Trust Company of New York or any other BankAmerica entity and with the lessor-investor or investors to effectuate the purchase and lease-financing (and to take such other action as may be necessary or appropriate in connection with such purchase and lease-financing) of the above described operating equipment; the agreement with Bank of America NT & SA (or other BankAmerica entity) to provide for a placement fee of 1% of the principal amount of equipment financed through the lease-financing program to be paid as funds are periodically received from the lessor-investor or investors; and the agreement with BankAmerica Trust Company of New York (or other BankAmerica entity) to provide for one-time only legal, financial and administrative charges in connection with the establishment of the program with the initial lessor-investor not in excess of \$20,000 and to also provide for an annual administrative fee not in excess of \$5,000 per year; and it is further

RESOLVED, that no part of the payments by the lessor-investor or investors to the Port Authority to be used for the purchase of equipment be used directly or indirectly to acquire securities or obligations which may reasonably be expected, on the date that such payments are made, to produce a yield during the term of the letting of the equipment which is materially higher than the yield to the lessor-investor or investors during such letting, and that such payments may be invested for a temporary period in securities or other obligations until such payments are needed for the purchase of equipment; the Executive Director is hereby authorized to impose further restrictions on the investment of the payments by the lessor-investor or investors and, if on the date that such payments are made, a differential yield is permitted, to invest such payments in obligations which will not produce a yield greater than that permissible; and it is further

(Board - 4/11/85)

RESOLVED, that certification on behalf of the Port Authority as to the Port Authority's intentions with respect to the application and investment of payments made by the lessor-investor or investors to the Port Authority for the purchase of equipment may be made by the Chairman of the Port Authority; the Vice Chairman of the Port Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Assistant Chief Financial Officer; Director, Finance Department/Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Port Authority; and that any action (including conducting public hearings) which may be necessary or desirable in connection with such payments to assure that such payments are applied in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, may be taken by any one of the foregoing, and that any such actions taken in connection therewith be ratified, authorized or approved.

(Board - 4/11/85)

Retention of Independent Auditors for 1985

It was reported that under the By-Laws, the Audit Committee has the responsibility to recommend retention of independent accountants for designation by the Board to audit the books and accounts of the Port Authority. Under a policy adopted at its meeting on June 21, 1983, the Audit Committee monitors the independent auditing function and decides annually the question of which firm to recommend to the Board for retention by the Port Authority and for what period of time in light of then current circumstances.

Consistent with that policy, the Audit Committee recommended that the Board retain Touche Ross & Co. to audit the books and accounts of the Port Authority for the year ending December 31, 1985.

It was therefore recommended that the Board:

1. designate Touche Ross & Co. as independent auditors to audit the books and accounts of the Port Authority for the year ending December 31, 1985; and
2. refer to the Audit Committee, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above designated auditors.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Touche Ross & Co. be and it hereby is designated as independent auditors to audit the books and accounts of the Port Authority for the year 1985; and it is further

RESOLVED, that the matter of arranging for such auditing by the above designated auditors be and it hereby is referred to the Audit Committee, in accordance with the By-Laws of the Port Authority.

(Board - 4/11/85)

Lease and/or Purchase of Video Display Computer Terminals and Related Equipment - Agreement with ITT Courier Terminal Systems, Inc.

It was reported that the computer terminals and printers are currently used throughout the Port Authority for such functions as financial analysis, program development, word processing, statistical analysis, computer graphics, accounting procedures and timekeeping systems.

The Port Authority currently leases 467 video display terminals and 198 printers. In order to respond to current requests for equipment, anticipated new areas of automation and the need to replace existing equipment as current leases expire, staff estimates a need for 370 terminals and 135 printers which, by the end of 1986, will replace all existing video display type terminals and related equipment currently installed. As the recommended ITT Courier equipment is to be installed over a two-year period, a decision to either purchase or lease will be made based upon the anticipated length of use of the equipment by Port Authority staff.

Over the next two years, an increase in the use of office automation equipment and personal computers throughout the Port Authority will reduce the Port Authority's needs by approximately 100 video display terminals and 60 associated printers. However, staff anticipates a continued need for video display terminals to support on-line systems such as project control, timekeeping, inventory and maintenance control and financial systems. The acquisition of the currently undetermined amount of additional automation equipment will be the subject of a subsequent recommendation to the Board.

On August 11, 1983, the Committee on Operations authorized the Executive Director to enter into lease agreements in the amount of \$1.3 million with Lee Data Corporation for video display terminals and related equipment. On August 17, 1984, the Executive Director authorized an increase of up to \$250,000 in the amount payable under the contract with Lee Data Corporation for lease of additional terminals that were required while a Request for Proposal was issued and proposals evaluated.

A Requests for Proposal was publicly advertised on November 7, 1984 and over 400 vendors were contacted. One hundred and one vendors requested copies of the Request for Proposal. Eleven proposals were received and reviewed by an evaluation committee comprised of staff from the Management Information Services and General Services Departments. Four proposals were considered non-responsive. The remaining seven proposals were reviewed using predefined evaluation criteria which included cost, technical features and maintenance availability.

The following vendors' proposals were evaluated:

Ericsson Information Systems
Port Washington, New York

Harris Corporation
New York, New York

(Board - 4/11/85)

International Business Machines Corporation
New York, New York

ITT Courier Terminal Systems, Inc.
New York, New York

Lee Data Corporation
Minneapolis, Minnesota

Mohawk Data Sciences
New York, New York

Telex Computer Products, Inc.
Elmsford, New York

After careful analysis of the proposals, reference checks and visits to vendor's facilities, the evaluation committee selected ITT Courier Terminal Systems, Inc. as having the best overall product to meet current Port Authority requirements taking into account technical ability to provide the required and desired equipment features for Port Authority users and anticipated maintenance requirements.

It was therefore recommended that the Board authorize the Executive Director to enter into a negotiated contract with ITT Courier Terminal Systems, Inc. in the estimated amount of \$1.8 million over the next two years for the lease and/or purchase and for maintenance of video display computer terminals and related equipment to provide for new installations and to replace existing leased equipment.

Whereupon, the following resolution was unanimously adopted, Commissioner McGoldrick abstaining:

RESOLVED, that the Board authorizes the Executive Director to enter into a negotiated contract with ITT Courier Terminal Systems, Inc. in the estimated amount of \$1.8 million over the next two years for the lease and/or purchase for maintenance of video display computer terminals and related equipment to provide for new installations and to replace existing leased equipment; the form of the contract to be subject to the approval of General Counsel or his authorized representative.

(Board - 4/11/85)

Personnel Department - Retention of Professional and Contract Services on an As-Needed Basis

It was reported that the Personnel Department is developing a comprehensive recruitment plan in order to meet increased human resources needs resulting from an expanded Port Authority capital program, new program initiatives and renewed commitment to service improvements. The projected workload for 1985 includes the hiring of at least 450 managerial and professional staff members from outside the Port Authority. The positions for which we will be recruiting externally cover the full range of administrative, technical and professional classifications and cuts across all management bands. Many of the positions such as Rail Signals Engineer, Rail Car Barn Engineer, Financial Credit and Collection Manager, EDP Audit Manager as well as a number of systems programmers will require unique and specialized skills and experience and will, therefore, require a more targeted recruitment effort to identify and attract qualified candidates. The recruitment program exceeds our current capacity to fill all of the positions which have been approved within the time constraints imposed by organizational priorities. Because of the immediacy of this intense effort, it may be necessary to make greater use of executive search firms and employment agencies. Therefore, it is deemed more practical to retain professional and contract services on an as-needed basis to handle the more specialized positions during this peak workload period.

Further, the planned staffing expansion provides an opportunity to continue the progress of the affirmative action program and to attract qualified and competent minorities and women to available positions. While progress continues to be made in the recruitment of minorities and women at all levels, there is a continuing need to improve this representation at the executive levels of management. The continued use of minority executive search firms to identify and attract an enlarged pool of highly qualified candidates with the depth of managerial experience for key positions and for advancement to executive level positions, will likewise augment the efforts of staff.

The estimated cost for supplemental services in 1985 is \$330,000. This is based on the anticipated use of professional employment agencies to fill approximately 25 technical/engineering positions with an average salary of \$40,000 and utilizing executive search firms for about six high level positions. Employment agencies typically charge a fee of 20% of salary and executive search firms typically charge 30 to 35% of the hiring salary.

The Personnel Department will select firms to provide executive search, minority and related recruitment services from a select list composed of firms from whom proposals have been received and reviewed by staff. The determination of the firms deemed most appropriate to provide these professional services will depend on their experience, record of accomplishment in similar searches and executive placements, and demonstrated capacity to handle the various positions for which it is decided to augment staff efforts.

Qualified minority/women owned executive search firms will be included on the list and selected. The total expenditures for professional and contract services is not expected to exceed \$330,000 and the funds are provided for in the 1985 Budget.

(Board - 4/11/85)

It was recommended that the Board authorize the Director of Personnel to retain various professional firms and employment agencies as outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Director of Personnel be and he hereby is authorized to retain various professional firms and employment agencies on an as-needed basis to assist the Personnel Department in its recruitment efforts for the calendar year 1985; the total cost of this effort not to exceed \$330,000 for all of 1985.

(Board - 4/11/85)

Industrial Development Program - Essex County Resource Recovery Facility - Authority to Enter into Agreements and Acquire Site

It was recalled to the Board that the Board, at its meeting on November 10, 1983, subject to the appropriate authorizations and amendments to the Industrial Development Master Plan (Master Plan) setting forth potential industrial development sites and subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds, authorized an approximately \$260 million project for the development of a resource recovery plant located in the Blanchard Street area of the City of Newark, County of Essex (Project), with a Port Authority expenditure of up to approximately \$165 million. The Executive Director was authorized to negotiate the agreements necessary to effectuate the Project, including agreements with the City of Newark (City), the County of Essex (County), Browning-Ferris Industries (BFI) and/or an entity to be established by BFI, Public Service Electric & Gas Company (PSE&G), and others as appropriate, and present such agreements to the Board for its approval. The Board authorized that the agreement with BFI could provide up to approximately \$165 million of costs for the resource recovery project, and BFI could provide approximately \$50 million of project costs, lease land, and design, construct and operate the mass burn resource recovery plant (Plant).

It was recommended that the Board, subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds, authorize the Executive Director to enter into various agreements with respect to the Project which, among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreements summarized in this report and authorize the Committee on Construction to take various actions in connection with the acquisition of the Site, described below.

It was further recommended that the Project authorization be increased to reflect an increase in the total costs of or related to the Project to approximately \$343 million, with an increase in the Port Authority expenditures or moneys provided for financing provided in connection therewith to an amount not to exceed \$236 million, including approximately \$23 million in connection with certain contingencies for up to one year of construction delays. It was also recommended that the Executive Director be authorized to provide an amount presently estimated at \$61 million in 1985 dollars for capital costs resulting from the occurrence of unforeseen and other similar circumstances, which amount will be determined and adjusted based on a service fee increase limitation of up to \$7.50 per ton, at January 1, 1983, as adjusted for escalation until used, of acceptable solid waste computed on the basis of 680,000 tons per year to be paid by the Port Authority as a component of the service fee to American REF-FUEL Company of Essex County (REF-FUEL) for solid waste disposal services, as described in the summary of the Service Agreement at "Service Fee Increase Limitation"; with a correspondingly increased tipping fee to be paid by Essex County to the Port Authority, as described in the summary of the County Agreement at "Tipping Fee Increase Limitation".

(Board - 4/11/85)

The Board, at its meeting on January 12, 1984, authorized the Executive Director to enter into an agreement with BFI under which BFI would perform certain developmental design work in connection with the planning of the Project at a cost to the Port Authority of approximately \$1.8 million. Work pursuant to such agreement has been completed and will be merged into the Service Agreement to be entered into in connection with the design, construction and operation of the Plant, the authorization for which is presently recommended.

The Board, at its meeting on March 8, 1984, amended the Master Plan to include a site to be used for the Project in the City of Newark, generally bounded by the Passaic River, the New Jersey Turnpike, Raymond Boulevard and Blanchard Street (Blanchard Street Site) and nearby or adjacent areas that may be required in connection with ingress-egress (collectively, the Site).

Host Municipality Agreement (City Agreement)

Representatives of the City, the County and the Port Authority have reached agreement on the terms of the City Agreement concerning the Project.

The major provisions of the proposed City Agreement are as follows:

Term 25 years from the date of full acceptance of the Plant or the full term of the Service Agreement between the Port Authority and REF-FUEL, whichever is shorter.

Consideration The City will receive an annual host municipality consideration of \$1.3 million which will be adjusted annually on a formula basis. The City will also receive an amount equivalent to 10% of all disposal fees collected on out-of-County waste delivered to the Plant.

During the term of the City Agreement, the Project will be exempt from local real property taxes and the host municipality consideration and the out-of-County disposal fee share will represent the total payments by the Port Authority in-lieu-of taxes contemplated by the parties, subject to increase as a result of possible changes in State law or judicial decision mandating the collection of additional payments of taxes.

Industrial Development Assistance

The City will receive a one-time payment from the Port Authority of \$1.5 million to be applied to City-designated industrial develop-

ment projects, along with Port Authority architectural and engineering services related to such projects, the cost for which will not exceed \$100,000, which amounts will be included in the costs of or related to the Project.

**Municipal
Improvements**

Improvements or modifications of certain public facilities directly related to the Plant and continuing maintenance of these improvements or modifications, will become part of the overall Project costs. The Port Authority or the City will undertake additional infrastructure improvements in the area of the Project, the cost for which will not exceed \$750,000 and which will become part of the overall Project costs. The City will have sole responsibility for the maintenance of such additional improvements once completed.

**Affirmative
Action**

Provisions are included in connection with the City's Affirmative Action Plan, including requirement of a good faith effort to attain a goal of \$25 million of minority business enterprise participation in the construction of the Project.

**Applicability
of Local Laws**

In undertaking the Project, the Port Authority will comply or cause REF-FUEL to comply with certain specified local laws, enactments, ordinances, rules or regulations of the City and no other provisions will apply to the Project. As a matter of policy, the Port Authority will conform or cause REF-FUEL to conform to all other local laws, enactments, ordinances, rules or regulations of the City, to the extent that the Port Authority finds it practicable to do so without interfering with, impairing or affecting the efficiency or economy of the operation of the Project, the ability to operate the Project upon a self-supporting basis, or the Port Authority's obligations, duties and responsibilities to the States of New York and New Jersey, its bondholders or the general public.

**Environmental
Monitoring**

The Port Authority and the County will retain the services of an independent firm, to be selected by an environmental monitoring committee comprised of the Port Authority, the County and the City, to monitor and evaluate

(Board - 4/11/85)

the environmental performance of the Plant, as part of the Project costs.

**Conditions
Precedent**

The City Agreement will be effective only upon acquisition by the Port Authority of marketable title, subject only to those encumbrances which the Port Authority agrees to accept, for the 25-acre Blanchard Street Site, which is presently owned by the Newark Redevelopment and Housing Authority (Housing Authority); completion of negotiations and subsequent approval by the Board of an agreement between the Port Authority and the County; execution of all agreements relating to the construction and operation of the Plant; the appropriate certifications by the Port Authority including those necessary prior to the issuance by the Port Authority of Consolidated Bonds, if any; and the receipt of applicable Federal and State permits and approvals including all environmental permits as may be required by law with respect to the City Agreement and all other agreements relating to the construction and operation of the Plant. If any of such conditions have not been satisfied or waived by the parties on or before June 30, 1986, any party to the City Agreement may cause its termination.

County of Essex Agreement(s) (County Agreement)

The major provisions of the proposed agreement(s) between the County and the Port Authority are as follows:

Term

The County Agreement, which will be effective only upon satisfaction or waiver of certain conditions precedent by June 30, 1986, will be coterminus with the term of the Service Agreement between REF-FUEL and the Port Authority.

**County
Funds for the
Project**

The County will provide the Project with the proceeds of a \$15 million interest free loan originally from the Natural Resources Bond Act of 1980, received from the State of New Jersey and the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be finally determined, for 20 years from the commencement of construction, received from the Hackensack Meadowlands Development Commission (HMDC) both pursuant to an Amended Consent Judgment between the County, the HMDC, and the

New Jersey Department of Environmental Protection (NJDEP). Effectuation of the Project will be contingent upon either (a) provision of the equivalent of a \$25 million grant received from the State or any of its agencies for the Project or (b) certification by the Committee on Finance that the \$25 million has become available from other sources allocated to the State.

**Alternate
Disposal Sites**

The County will arrange for the provision of one or more landfills to be made available for the disposal of residue, non-processible waste, unacceptable waste, hazardous waste and bypassed waste.

**Hazardous
Waste**

The County will use reasonable efforts to prevent the delivery of hazardous waste to the Plant, to inspect vehicles from time to time at the Plant and to trace the origins of any hazardous waste delivered to the Plant, including reasonable use of police and other public powers. The Port Authority will cooperate with the County in connection with matters regarding hazardous waste, and the Service Agreement between the Port Authority and REF-FUEL will require REF-FUEL to use reasonable efforts to prevent the processing of hazardous waste inadvertently accepted at the Plant.

Recycling

The Port Authority shall provide an amount not to exceed \$5 million for the development of recycling facilities at the Blanchard Street Site, and such other appropriate sites as may be designated by the County, subject to all approvals and certifications by the Port Authority required prior to the effectuation of such facilities, to assist the County in implementing the County's responsibilities to institute recycling under its Solid Waste Management Plan and certain permits. Such funds will be repaid by the County from the revenues of such recycling facilities and any shortfall shall be paid over the remaining term of the County Agreement through a surcharge to the tipping fee paid for disposal of acceptable solid waste at the Plant.

Deration

In the event of the acceptance of the Plant by the Port Authority at a processing capacity below the name-plate processing capacity of

2,277 tons per day at 5,300 BTU's per pound of acceptable solid waste, or in the event the Plant is not accepted (in which event the Service Agreement and the County Agreement will terminate), the Port Authority will only pay the County for a period of up to five years from the scheduled acceptance date of the Plant, the liquidated damages received from REF-FUEL of up to \$20 per ton escalated from January 1, 1983, to offset the cost, incurred by the County for the transporting and disposing up to the guaranteed tonnage of 680,000 tons per year, of the County's waste at an alternate disposal facility, in excess of the proposed tipping fee which would have been paid by the County to the Port Authority as if the available County waste up to the guaranteed tonnage had been processed at the Plant, for a period of up to five years from the scheduled acceptance date of the Plant.

**Port Authority
Payments on
Behalf of the
County**

The Port Authority shall make payments on behalf of the County resulting from costs assumed by the Port Authority in connection with the disposal of County waste, including without limitation the following items included in the service fee paid to REF-FUEL or payable as a result of other agreements with REF-FUEL or other parties; portions of operation and maintenance fees; fees paid under the Host Municipality Agreement; amounts due to the State of New Jersey or any of its agencies, to the extent provided for as summarized at "County Funds for the Project"; operating insurance premiums; transportation and disposal costs for residue or for hazardous waste inadvertently delivered to the Plant and Plant clean-up costs, if any, resulting from such hazardous waste deliveries; costs in connection with the transport and disposal of unacceptable waste and non-processible waste at alternate disposal sites; additional tipping fees ("gate fees") for REF-FUEL's processing of County acceptable waste above the guaranteed tonnage; fuel oil costs resulting from special NJDEP operating requirements; certain potential landfill costs; costs of the environmental monitoring program specified in the City Agreement; charges in excess of the base tipping fee for the transportation and disposal of any acceptable solid waste up to the guaranteed tonnage that is scheduled to be

delivered or delivered to the Plant and not accepted and which is delivered to an alternate disposal facility; and revenue shortfalls due to certain strikes. The Port Authority will pay such costs in the year in which incurred. Portions of certain of these costs, not included in the base tipping fee, will be repaid in the following year, with interest accruing at a rate equal to 75% of the then publicly announced prime rate of an acceptable financial institution, through a surcharge to the tipping fee.

Tipping Fee

The haulers of waste originating in Essex County will pay a tipping fee to the Port Authority, which includes a base tipping fee of \$18.50 per ton times an adjustment factor with a surcharge for Port Authority payments on behalf of the County for portions of costs not included within the base tipping fee and a surcharge for costs in connection with unforeseen or certain other similar circumstances.

The base tipping fee of \$18.50 per ton will be increased, for the following additional costs related to the construction of the Plant, which costs are to be paid as incurred by the Port Authority directly or through a corresponding increase to the Service Fee paid by the Port Authority to REF-FUEL pursuant to the Service Agreement:

- Unforeseen Circumstances and strikes prior to scheduled acceptance date subject to the Tipping Fee Increase Limitation summarized at "Tipping Fee Increase Limitation".
- Cost of extra work approved by the County.
- Costs relating to site clean-up and mitigation measures specified in the NJDEP permit during the construction period.
- Shortfalls in financial commitments of the State of New Jersey and the HMDC required under the terms of the Amended Consent Judgment dated May 2, 1983.
- Imposition of any state or local sales or use, or similar tax.
- Cost incurred for excess fuel oil by REF-FUEL and paid by the Port Authority,

required to comply with NJDEP air permit requirements during Plant start-up.

**Tipping Fee
Increase
Limitation for
Unforeseen or
Other Similar
Circumstances**

The Tipping Fee is subject to a Tipping Fee Increase Limitation in the event of the occurrence of an unforeseen or other similar circumstance. The County's tipping fee to be paid by the haulers of waste originating in Essex County will be automatically and mandatorily increased on the basis of a formula coordinated to the Service Fee Increase Limitation of the Service Agreement between the Port Authority and REF-FUEL. However, in connection with an unforeseen or other similar circumstance, the County shall not be required to increase the tipping fee throughout the term of the County Agreement in excess of the Tipping Fee Increase Limitation. If the Tipping Fee Increase Limitation is exceeded, REF-FUEL or the Port Authority may absorb the costs of or related to such unforeseen or other similar circumstances and the County Agreement will continue; or, if REF-FUEL or the Port Authority decline to absorb such excess costs, the County Agreement will be terminated. In the event of a termination of the Service Agreement by either REF-FUEL or the Port Authority, if the Port Authority does not purchase the Plant, the County Agreement will be terminated, the Port Authority shall have no further responsibilities to the County and, in such event, the County shall have an option to purchase the Plant directly from REF-FUEL.

County Advances

To the extent that the County's tipping fee payments and other amounts received by the Port Authority (including energy revenues) are less than the Port Authority's payments on behalf of the County, described above, the difference will be deemed to be a shortfall and advanced to the County. For purposes of determining revenue sharing such County advances shall accumulate, with interest, from year to year.

**Revenue
Sharing**

In any year that the County's tipping fee payments and other amounts received by the Port Authority (including energy revenues) are greater than the Port Authority's costs related to the Port Authority payments on behalf of the County, described above, permitting full recovery of the accumulated County advances with interest over the remaining term of the County Agreement, then the Port Authority and the County will share revenues.

**Delivery and
Processing of
Acceptable
Solid Waste**

The County shall cause a minimum delivery to the Plant of 680,000 tons of acceptable solid waste (assuming 5,000 BTU's per pound), other than recyclables separated for resale, and the Port Authority shall cause such waste to be processed by REF-FUEL. Additionally, the County will be obligated to use reasonable efforts to cause all acceptable solid waste originating in the County, other than recyclables separated for resale, to be delivered to the Plant up to the available capacity in the Plant. If the minimum delivery guarantee of 680,000 tons is not delivered by the County haulers, and to the extent that REF-FUEL or the Port Authority are unable to mitigate the County waste shortfall by causing deliveries of acceptable solid waste, including out-of-County waste, in any year, lost tipping fees and lost revenues from recovered resources (including that of REF-FUEL) shall be recoverable with interest at 75% of the then publicly announced prime rate of an acceptable financial institution as a surcharge to the next year's tipping fee.

The County will use reasonable efforts to maintain and enforce the Franchise Area Designation issued by the New Jersey Board of Public Utilities (BPU), the Franchise (if obtained by the County) and the District Solid Waste Management Plan so as to ensure the delivery to the Plant of all acceptable solid waste originating in the County up to the available capacity of the Plant. The Port Authority or the Company may reject waste delivered by any hauler of County acceptable solid waste who has not complied with the tipping fee payment terms and in such event shall be able to make a short-term arrangement with any other supplier of acceptable solid waste to offset this shortfall.

**Operations
Prior to Actual
Acceptance Date**

The County will provide acceptable solid waste as needed for start-up and acceptance testing during this period and pay a tipping fee to the Port Authority on the basis of actual tons delivered to the Plant.

Termination

If the Service Agreement is terminated due to the fault of REF-FUEL or the Port Authority, and if the Port Authority does not purchase the Plant, the County Agreement will be

terminated, the Port Authority shall have no further responsibilities to the County and, in such event, the County shall have an option to purchase the Plant directly from REF-FUEL.

**County
Responsibility
for Composition
of Solid Waste**

The County and the Port Authority would agree that, as between the Port Authority and the County, the County is fully responsible for the composition of solid waste originating in Essex County or originating outside Essex County and caused by the County to be delivered to the Plant pursuant to its commitment under the County Agreement, but the County would not be responsible for the composition of solid waste caused by the Port Authority or REF-FUEL to be delivered to the Plant or for the design, construction or operation of the Plant. The County shall pay or cause to be paid any judgment entered by a court of competent and final jurisdiction against the County for or on account of injuries (including wrongful death), loss or damage of any kind whatever resulting from a judicial determination that such injuries, loss or damage are a result of Plant stack air emissions caused by the composition of such solid waste as to which the County has acknowledged responsibility. The County would agree that its obligation to provide monies for the payment of any such judgment shall be in addition to and in no way limited to its obligation to cause a tipping fee to be paid to the Port Authority. The Executive Director of the Port Authority may determine to provide, on behalf of the County, for up to \$10 million for such judgments upon appropriate increases by the County in the tipping fee and other assurances as to the repayment of such amount to the Port Authority.

**Site
Indemnification**

The cost of certain additional site mitigation will be paid by the County through an increase in the tipping fee. If the County Agreement is terminated and the County and Port Authority undertake a resource recovery project at another site, the cost of any additional site mitigation at the Blanchard Street Site will be paid by the County through the tipping fee for the new project. In the event that there is no replacement facility or if the Port Authority does not participate in the development of such replacement facility, the Port Authority will be solely responsible for all additional site mitigation at the Blanchard Street Site.

**Site Lease
Revenues**

Notwithstanding the expiration of the term of the Service Agreement and the County Agreement, the County will receive 50% of the net energy revenues and 50% of the gross tipping fee revenues received by the Port Authority from REF-FUEL resulting from REF-FUEL's operation of the Plant in the extension periods of the Site Lease Agreement.

**Project
Development
Costs**

The Port Authority and the County shall each be reimbursed for their project development costs in accordance with the provisions of the agreement between the County and the Port Authority dated January 14, 1983.

American REF-FUEL Company of Essex County Agreements (REF-FUEL Agreements)

During the course of negotiations between Port Authority staff and representatives of BFI, BFI together with Air Products and Chemicals, Inc. (APCI) formed subsidiary corporations which have entered into a general partnership in New Jersey, American REF-FUEL Company of Essex County. REF-FUEL has agreed to enter into a Service Agreement providing for the design, construction, start-up and acceptance testing of the Plant to provide services for the incineration of acceptable solid waste originating in the County; a Site Lease Agreement under which it will occupy the Blanchard Street Site during and subsequent to the term of the Service Agreement; a Conditional Sale Agreement under which a portion of Plant construction will be financed by the Port Authority; and, an Escrow Agreement in connection with the administration of certain pledges by REF-FUEL of revenues and other assets under the Conditional Sale Agreement and the receipt, temporary investment and disbursement of Plant revenues.

BFI and APCI will enter into a Company Support Agreement with REF-FUEL under which BFI and APCI will provide guarantees, financial support and working capital to REF-FUEL for the full performance of its obligations, under the Service Agreement and Conditional Sale Agreement, in connection with the construction of the Plant; financial support for the satisfaction of judgments resulting from certain site conditions arising from construction activities undertaken by REF-FUEL at any time at the Site and to the extent the Port Authority indemnity provided to REF-FUEL, as described in the summary of the Site Lease Agreement at "Site Indemnification", is not applicable; financial support up to \$50 million, as necessary to enable REF-FUEL to meet its obligations to pay debt service under or arising from the Conditional Sale Agreement and to operate the Plant during the full term of the Service Agreement; and financial support to enable REF-FUEL to meet its obligations to provide additional equity in connection with construction costs necessitated by unforeseen or other similar circumstances. BFI and APCI would provide, from permitted cash distributions to them by REF-FUEL, a limited "keep-well" to their commitment of \$50 million described above, so that in the event of expenditures which reduce this commitment, additional support would be available to satisfy judgments resulting from Plant stack air emissions and/or judgments

resulting from certain site related matters arising from Plant operations to the extent of permitted distributions (after the first \$2.5 million of distributions to each of BFI and APCI) up to a total maximum of \$50 million available for these judgments. BFI and APCI shall be severally obligated for the foregoing performance or financial support, each to the extent of 50% of REF-FUEL's obligations.

Service Agreement

The major provisions of the proposed Service Agreement between the Port Authority and REF-FUEL, which includes provision for Plant design, construction, start-up and acceptance testing are as follows:

**Term
Construction/
Service**

The Service Agreement, which will be effective only upon satisfaction or waiver of certain conditions precedent by June 30, 1986, covers a 25-year operating period with three one-year optional extensions preceded by a three-year period to build the Plant. To the extent that the Plant meets certain performance criteria, the construction period may be extended for up to an additional five years, at the option of REF-FUEL, to permit the full performance criteria, summarized at "Acceptance", to be met. At its sole option, prior to the satisfaction or waiver of the conditions precedent, the Port Authority may require REF-FUEL to pursue further design, engineering and construction activities subject to mutual agreement as to the extent and cost of such further activities, in a total cost up to approximately \$25 million. If the Service Agreement does not become effective, REF-FUEL shall be paid for the above work.

Capacity

REF-FUEL will build the Plant with a name-plate processing capacity of 2,277 tons of acceptable solid waste per day, at 5,300 BTU's per pound, and will guarantee performance of the Plant to accept and process the Port Authority's guaranteed tonnage, summarized at "Delivery and Processing of Acceptable Solid Waste", which originates in Essex County, subject to deration to a lesser processing capacity, summarized at "Acceptance".

**Cost of
Construction/
Equity Capital**

Estimated at \$232 million, as of September 30, 1985, for the design, construction, start-up and acceptance testing of the Plant, subject to adjustments for inflation until the start of construction, exclusive of capitalized interest from the commencement of construction until the

scheduled acceptance date of the Plant. Construction will be financed by REF-FUEL under the Conditional Sale Agreement and through the provision of equity capital in an amount equal to at least 25% of specified elements of the cost of construction, excluding without limit, those items for which there is no presently acceptable federal income tax benefits which would be anticipated by REF-FUEL, and as adjusted for certain cost increases, subject to possible reduction of such amount of equity capital through service fee payments to REF-FUEL, as summarized at "Pass-Through Costs", to take into account certain changes in federal tax law only in connection with the issuance of industrial development bonds for the Plant and only to the extent that such changes would reduce the value of the federal income tax benefits anticipated by REF-FUEL.

The cost of construction may be increased, among other items, for delays, extra work, unforeseen or other similar circumstances after commencement of construction, imposition of any State or local sales or use, or similar tax, and certain strikes, to the extent of the available funds authorized for the Project. Off-site work or site mitigation may also cause an increase to the cost of construction or may be provided to the Project through separate contracts with REF-FUEL or other parties.

REF-FUEL will be obligated to provide prorata equity capital equal to 25% of the total construction costs arising from each unforeseen circumstance and certain other similar circumstances. Such percentage of prorata equity may be reduced, on the basis of a formula, to take into account certain changes in federal income tax laws which reduce the value of the federal income tax benefits anticipated by REF-FUEL, but in no event shall such percentage be reduced below a minimum prorata equity capital contribution of 10% of such construction costs.

**Scheduled
Acceptance Date**

36 months from the start of construction, as extended for unforeseen circumstances, certain strikes and extra work. If acceptance has not occurred by such date, a maximum extension period of 24 months is allowed for REF-FUEL to demonstrate the Plant's processing capacity to

be at a minimum of 75% of name-plate processing capacity. If the Plant achieves such minimum processing capacity by the end of this 24 month extension, REF-FUEL, at its option, may have up to an additional 36 months to raise Plant processing capacity prior to formal acceptance of the Plant.

Acceptance

The Plant will be automatically accepted by the Port Authority at full capacity if at any time after the Scheduled Acceptance Date, summarized above, it can meet 95%-100% of name-plate processing capacity and 85% of its guaranteed energy production level.

At the option of REF-FUEL, the Plant will be accepted by the Port Authority after the Scheduled Acceptance Date at a lesser processing capacity of not less than 75% of name-plate processing capacity and 85% of its guaranteed energy production level. In such event there shall be a repayment of a proportionate amount of the advances under the Conditional Sale Agreement on the basis of the reduced processing capacity described in the summary of the Conditional Sale Agreement at "Repayment".

At the option of the Port Authority, if the Plant cannot meet 75% of name-plate processing capacity, the Port Authority may accept the Plant at a lower processing capacity. In such event there shall be a consequent repayment of a portion of advances under the Conditional Sale Agreement on the basis of the reduced processing capacity in such amounts and over such periods as described in the summary of the Conditional Sale Agreement at "Repayment".

The Plant may be conditionally accepted on the basis of the full or partial processing capacity, even if, at such time, it is unable to meet its guaranteed energy production level. If the Plant cannot meet 85% of its guaranteed energy production level within 12 months of acceptance on the basis of processing capacity, the Port Authority may terminate the Service Agreement. During this one year period REF-FUEL will make up lost energy revenues to the Port Authority.

In the event the Plant is not accepted or can not meet its guaranteed energy production level, and the Port Authority terminates the Service Agreement, advances under the Conditional Sale Agreement shall be fully repaid by REF-FUEL in such amounts and over such periods as described in the summary of the Conditional Sale Agreement at "Repayment", and the Port Authority shall have an option to purchase the Plant as summarized at "Termination Rights".

In the event of acceptance of the Plant at a reduced processing capacity, or in the event the Service Agreement terminates because the Plant is not accepted, REF-FUEL shall pay liquidated damages for a period of up to 5 years from the scheduled acceptance date of the Plant for the cost of transporting and disposing of up to the Port Authority's guaranteed tonnage at an alternate disposal facility. Such amount is liquidated at \$20 per ton as of January 1, 1983.

Service Fee

The Port Authority will pay a service fee which includes amounts for debt service on advances (and other permitted borrowings by REF-FUEL under the Conditional Sale Agreement) under the Conditional Sale Agreement, operation and maintenance fees and pass-through costs. The Port Authority will also pay an additional disposal fee as part of the service fee for REF-FUEL's processing of acceptable solid waste originating in Essex County above the guaranteed tonnage.

**Delivery and
Processing of
Acceptable
Solid Waste**

The Port Authority will be obligated to guarantee a minimum of 680,000 tons of acceptable solid waste per year at 5,000 BTUs per pound, and pay a service fee even if the County haulers fail to deliver that tonnage. REF-FUEL will guarantee that, on and after acceptance of the Plant, it will accept and process the guaranteed tonnage. In the event of a failure of the County haulers to deliver the guaranteed tonnage, REF-FUEL will use reasonable efforts to mitigate such waste shortfall by obtaining other acceptable solid waste, including from out-of-County sources, and if REF-FUEL is unable to mitigate such waste shortfall the Port Authority shall have the right to attempt to do so.

The Port Authority will be obligated to use reasonable efforts to cause all acceptable solid waste originating in Essex County to be delivered to the Plant and REF-FUEL will be obligated to use reasonable efforts to accept for processing all waste originating in Essex County up to the capacity of the Plant. The Port Authority will also have a right of first refusal for certain excess or additional Plant processing capacity, if any.

**Operation and
Maintenance Fees**

Priced by REF-FUEL at \$9,942,000 as of December 31, 1984, to be escalated thereafter.

**Pass-Through
Costs**

Pass-through costs include, without limitation, operating insurance premiums; transportation and disposal costs for non-hazardous residue resulting from Plant processing; certain transportation and disposal costs for hazardous waste inadvertently delivered to the Plant and Plant clean-up costs resulting from such hazardous waste deliveries, if any; fuel oil costs resulting from special NJDEP operating requirements; costs in connection with the transport and disposal of by-passed waste at alternate disposal sites, subject to certain offsets to be paid by REF-FUEL; reductions to equity capital resulting from certain federal tax law changes during construction only in connection with the issuance of industrial development bonds for the Plant and only if such changes would reduce the value of the federal income tax benefits anticipated by REF-FUEL; costs related to strikes after the acceptance of the Plant; and fees paid to the Escrow Agent.

**Operations Prior
To Scheduled
Acceptance Date**

The Port Authority will provide acceptable solid waste as needed for start-up and acceptance testing during this period. REF-FUEL will not charge the Port Authority a service fee and will retain 60% of the energy revenues and disposal fees received for out-of-County waste, if any, with the Port Authority to receive the balance of such revenues. During this period, the Port Authority is to pay the cost for transporting to and disposing at alternate disposal sites, process residue and hazardous waste delivered to the Plant, if any, and certain other pass-through costs.

Operations After
Scheduled
Acceptance Date
And Prior To
Actual
Acceptance

The Port Authority will provide acceptable solid waste as needed for operations and testing during this period, and pay a prorata service fee for the tons of acceptable solid waste actually processed by REF-FUEL with REF-FUEL to pay the remaining costs associated with its failure to process the balance of the guaranteed tonnage. REF-FUEL will also be responsible for liquidated damages for the cost of transportation to and disposal at an alternate disposal site for disposal of acceptable solid waste delivered or to be delivered to the Plant up to the guaranteed tonnage and which it was unable to process. Such amount is liquidated at \$20 per ton as of January 1, 1983.

Energy Revenues,
Revenues From
Other Recovered
Resources and
Gate Fees

REF-FUEL is to enter into an Electric Sales Contract with PSE&G for the sale of electrical energy including generation capacity. The Port Authority is to receive 85% of energy revenues received by REF-FUEL from the processing of the guaranteed tonnage and consequent sale of electric energy and 50% of energy revenues received by REF-FUEL from the processing of acceptable solid waste in excess of the guaranteed tonnage and consequent sale of electric energy. The Port Authority will also receive a proportionate share of generation capacity charges received by REF-FUEL. REF-FUEL shall have the right to present a substitute electric sales contract to the Port Authority, upon the consent of the Port Authority, which consent shall not be unreasonably withheld if the substitute contract is comparable to the PSE&G contract in terms of economics and risks and only to the extent that such substitute contract does not have an adverse effect upon the Port Authority-County transaction.

In the event that REF-FUEL fails to process the guaranteed tonnage or fails to meet its guaranteed energy production level, or the Port Authority fails to cause the County to deliver the guaranteed tonnage of acceptable solid waste, the party at fault will make up lost energy revenues to the other party.

Revenues derived from the sale of other recovered resources will be distributed on the same basis as energy revenues.

The Port Authority will receive 50% of "gate fees" collected by REF-FUEL as the disposal fees for tonnage above the guaranteed tonnage of acceptable solid waste processed at the Plant net of REF-FUEL's cost for processing such waste.

**Unforeseen
or Other
Similar
Circumstances**

Subject to the Service Fee Increase Limitation, summarized below, in the event of the occurrence of an unforeseen or other similar circumstance during the term of the Service Agreement (including the construction period) the Port Authority shall be required to increase the service fee to permit REF-FUEL to obtain additional advances under the Conditional Sale Agreement or through other permitted borrowings for capital construction and/or to pay resultant increases in REF-FUEL's operating costs arising from the occurrence of an unforeseen or other similar circumstance.

**Service Fee
Increase
Limitation For
Unforeseen and
Other Similar
Circumstances**

The Port Authority shall pay an increase in the service fee for the consequences of unforeseen or other similar circumstances either through an increase to the debt service component of the service fee to permit additional advances under the Conditional Sale Agreement (or to the extent permitted under the Conditional Sale Agreement, or after termination of such agreement, to enable REF-FUEL to obtain other borrowings) for increased construction costs or through an increase to the operating cost component of the service fee to pay increased operating costs caused by an unforeseen or other similar circumstance. However, the Port Authority shall not be required to so increase the service fee throughout the term of the Service Agreement by more than a total of \$7.50 per ton at January 1, 1983, of acceptable solid waste, computed on the basis of 680,000 tons per year. During the term of the Service Agreement the unused portion of such \$7.50 amount shall be escalated on a formula basis.

If the Port Authority declines to pay amounts, related to unforeseen or other similar circumstances, in excess of the Service Fee Increase Limitation and REF-FUEL does not elect to absorb such excess amounts and continue the Service Agreement, the Service Agreement shall terminate. In such event, REF-FUEL would acquire title to the Plant upon full payment of

(Board - 4/11/85)

the aggregate amount of advances outstanding under the Conditional Sale Agreement and the Port Authority would be required to make one of the following termination payments. At its sole option the Port Authority may:

1. acquire the Plant from REF-FUEL by paying to REF-FUEL the aggregate principal amount of advances then outstanding under the Conditional Sale Agreement (and other permitted borrowings by REF-FUEL under the Conditional Sale Agreement in replacement of advances required to be made by the Port Authority and which the Port Authority fails to make) plus REF-FUEL's equity capital investment determined in accordance with the procedure described in the summary of the Escrow Agreement at "Replacement Cost Certificate" reduced on the basis of a formula derived from an agreed to schedule of the value to REF-FUEL of the tax benefits, including straight-line depreciation, over the term of the transaction on the basis of a 15% rate of return plus an agreed to forecast of the economic value of the business enterprise to REF-FUEL as if such unforeseen or other similar circumstance had not occurred, adjusted to an 11% return on such total economic value for one-half of the remaining initial term of the Service Agreement, without optional extensions; or
2. if termination of the Service Agreement is prior to the actual acceptance date for the Plant and the Port Authority chooses not to acquire the Plant, the Port Authority would pay to REF-FUEL the aggregate principal amount of advances then outstanding under the Conditional Sale Agreement (and other permitted borrowings by REF-FUEL under the Conditional Sale Agreement in replacement of advances required to be made by the Port Authority and which the Port Authority fails to make) plus REF-FUEL's equity capital investment determined in accordance with the procedure described in the summary of the Escrow Agreement at "Replacement Cost Certificate" reduced on the basis of a formula derived from an agreed to schedule of the value to REF-FUEL of the tax benefits, including straight-line depreciation,

(Board - 4/11/85)

over the term of the transaction on the basis of a 15% rate of return and further reduced by the salvage value of the Plant, if any; or

3. if termination of the Service Agreement is after the actual acceptance date for the Plant and the Port Authority chooses not to acquire the Plant, the Port Authority would pay to REF-FUEL the aggregate principal amount of the advances then outstanding under the Conditional Sale Agreement (and other permitted borrowings by REF-FUEL under the Conditional Sale Agreement in replacement of advances required to be made by the Port Authority and which the Port Authority fails to make).

**Termination
Rights**

If the Service Agreement is terminated due to either party's default (other than as a result of the anticipatory breach by REF-FUEL of its construction obligations), the Port Authority will have the right to purchase the Plant at a price determined on the basis of a formula taking into account the then fair market value of the Plant which fair market value would be determined as described in the summary of the Site Lease at "Fair Market Value".

If the Port Authority does not purchase the Plant, REF-FUEL may acquire ownership upon payment by the defaulting party of advances outstanding under the Conditional Sale Agreement, which in the case of a default by the Port Authority would be paid by the Port Authority to REF-FUEL as a termination payment.

In the event of the termination of the Service Agreement as a result of REF-FUEL's anticipatory breach of its construction obligations, REF-FUEL shall pay an amount equal to its remaining share of the required equity capital plus the excess of the reasonable cost to complete the Plant. The Port Authority shall acquire the Plant and upon its completion shall pay to REF-FUEL an amount equal to the sum of its required equity capital and advances outstanding under the Conditional Sale Agreement on the date of termination.

(Board - 4/11/85)

**Port Authority
Chief Engineer/
Independent
Engineer**

The authority and duties of the Chief Engineer, shall include, among other things, the right to determine, in his sole discretion whether REF-FUEL's design and construction of the Plant conforms to certain agreed to critical items such as boilers, turbines and cranes, as well as the right to determine in his sole discretion, whether such design and construction conforms to local laws, enactments, ordinances, rules or regulations of the City. Additionally, the Chief Engineer, in his sole discretion, will determine whether the Plant has passed the Acceptance Test, other than portions of said Acceptance Test relating to environmental matters which will be determined by NJDEP, and in the event of an acceptance of the Plant at other than name-plate capacity, the processing capacity, as summarized at "Acceptance". However, the rights of the Chief Engineer are not as extensive as those in a traditional Port Authority construction contract, a prime example being that in certain instances engineering disputes will be submitted to an independent engineer for arbitration. Such independent engineer shall be selected by the Port Authority with the approval of REF-FUEL at a cost or expense to be shared equally by the parties. In the event that REF-FUEL or the Port Authority have not agreed upon the selection of the independent engineer, the independent engineer shall be expeditiously selected by the President of the American Arbitration Association or his designee.

Indemnification

The Port Authority shall indemnify and hold REF-FUEL harmless "For any personal injury to or death of, any persons or persons, or loss or damage to property or any suit arising out of the performance (or nonperformance) of the Port Authority's obligations under the Service Agreement", including its obligation to deliver acceptable solid waste, the proper processing of which would not cause a violation of air emissions standards. Additionally, REF-FUEL will not agree to indemnify the Port Authority for strict or absolute liability exposures from REF-FUEL's operation of the Plant including air emissions, despite the possibility of strict liability regardless of fault, being imposed by the courts for release of pollutants into the environment.

Conditional Sale Agreement

The major provisions of the proposed Conditional Sale Agreement to be entered into between the Port Authority and REF-FUEL, are as follows:

Advances

Under the Conditional Sale Agreement, the Port Authority shall provide advances to REF-FUEL to enable REF-FUEL to finance a portion of the Plant's construction cost. The aggregate principal amount of all advances to REF-FUEL by the Port Authority in respect of Plant construction would be in an amount required to finance the cost of construction of the Plant as described in the summary of the Service Agreement at "Cost of Construction/Equity Capital", not provided by REF-FUEL's equity capital commitments as summarized below at "Equity Capital". Subject to and as determined by the Service Fee Increase Limitation, described in the summary of the Service Agreement at "Service Fee Increase Limitation", the Port Authority shall be required to provide additional advances in respect of any costs of construction necessitated by unforeseen or other similar circumstances, which costs shall also include capitalized interest during the construction period resulting from the occurrence of such unforeseen or other similar circumstances. To the extent the Port Authority fails to make a required advance REF-FUEL shall be permitted to obtain other borrowings on a parity basis.

Equity Capital

REF-FUEL shall provide equity capital in an amount equal to 25% of specified elements of the cost of construction, excluding without limit, those items for which there is no presently acceptable federal income tax benefits which would be anticipated by REF-FUEL, and as adjusted for certain cost increases, subject to possible reduction of such amount of equity capital, through service fee payments to REF-FUEL, as described in the summary of the Service Agreement at "Pass-through Costs", to take into account certain changes in federal tax law only in connection with the issuance of industrial development bonds for the Plant and only to the extent that such changes would reduce the value of the federal income tax benefits anticipated by REF-FUEL. REF-FUEL shall also provide additional equity capital in an amount equal to 25% of the total construction costs necessitated by each unforeseen or other similar circumstance. Such percentage of

prorata equity may be reduced, on the basis of a formula, to take into account changes in the federal income tax laws, but in no event shall such percentage be reduced below a minimum equity capital contribution of 10% of such construction costs.

Term

Advances will be repaid over 20 years from the scheduled acceptance date for the Plant and additional advances will be repaid over a period commencing on the completion of the construction related to such additional advances and ending at the end of the initial 25 year operating term of the Service Agreement without extensions for certain strikes.

Interest Rate

The rate of interest on advances shall be determined by the Executive Director as the rate not in excess of a rate based on the average 25 year Revenue Bond index as reported in The Bond Buyer for the six week period prior to the date of the notice to proceed with construction. The rate of interest on additional advances shall be determined by the Executive Director on the same basis as that for advances for all additional advances relating to construction costs arising from each unforeseen or other similar circumstance. In the event that either such index is not published by The Bond Buyer or The Bond Buyer is not published said rates shall be based on an equivalent published index.

Repayment

The aggregate amount of all advances shall be repaid by REF-FUEL to the Port Authority from payments made under the Service Fee on the basis of an annual repayment schedule to be computed in accordance with the provisions of the Conditional Sale Agreement to provide for repayment of advances over a 20 year term and advances in respect of unforeseen or other similar circumstances over the remaining portion of the 25 year operating term of the Service Agreement from the date of the completion of the advances related to a particular unforeseen or other similar circumstance, with provisions for acceleration in the event of a default by REF-FUEL or other termination of the Service Agreement or Conditional Sale Agreement.

When all advances are fully repaid, the Port Authority will provide good and marketable indefeasible, fee simple title to those

portions of the Plant that constitute real property, insurable at regular rates by a title insurance company located in the State of New Jersey and title to those portions of the Plant that constitute personal property, in each case free and clear of all liens and encumbrances, with the exception of certain permitted encumbrances or those caused by acts of REF-FUEL.

If the Plant is accepted by the Port Authority with a processing capacity of less than 95% of name-plate processing capacity, BFI and APCI shall guarantee REF-FUEL's obligation to repay, or shall assume repayment of, the following amounts, severally to the extent of 50% of such amount each; provided that if either BFI or APCI fails to maintain an investment grade credit rating on their long-term debt, the portion guaranteed or assumed by the entity failing to maintain such credit rating shall be immediately due and payable:

1. If processing capacity is 75% or greater, up to 95%, of name-plate capacity, the aggregate principal amount of advances then outstanding shall be accelerated by an amount equal to the percentage by which processing capacity has been reduced and, within 60 days of such acceleration, REF-FUEL shall pay said amount.
2. If processing capacity is less than 75% of name-plate capacity, the aggregate principal amount of advances outstanding shall be accelerated by an amount equal to the percentage by which processing capacity has been reduced and, within 60 days of such acceleration, REF-FUEL shall pay an amount equal to 25% of the then outstanding advances, with the balance of such amount of accelerated advances to be repaid in two equal annual installments of principal with semi-annual interest on the unpaid balance. Repayment of the balance of such principal shall commence twelve months after the date of acceptance of the Plant and interest payments shall commence six months after the date of acceptance of the Plant.

If the Plant is not accepted by the Port Authority, the Service Agreement shall terminate, the then outstanding principal amount of advances shall be accelerated and

each of BFI and APCI shall guarantee REF-FUEL's repayment obligation or assume the repayment of such accelerated amount, severally to the extent of 50% of such amount each. The accelerated amount shall be repaid as follows: 25% of the then outstanding advances within 60 days of acceleration, with the balance of such amount of accelerated advances to be repaid in three equal annual installments of principal with semi-annual interest on the unpaid balance, subject to the maintenance by each of BFI and APCI of an investment grade credit rating on their long-term debt. Repayment of the balance of such principal shall commence 12 months after the date of termination of the Service Agreement and interest payments shall commence six months after the date of termination of the Service Agreement. If either BFI or APCI fails to maintain an investment grade credit rating on their long-term debt, the portion of the accelerated advances assumed or guaranteed by such entity failing to maintain such credit rating shall be immediately due and payable.

**Construction
Drawdown
Schedule**

A construction drawdown schedule providing for 36 advances and a final advance by the Port Authority, in respect of retainage, will be established. The principal amount of any advance, except the final advance which may only be changed with the consent of the Port Authority, may be increased or decreased on prior notice from time to time by REF-FUEL by up to \$5 million to accommodate changes in the construction schedule, subject to a quarterly reconciliation by the Port Authority.

Expenditures

REF-FUEL shall expend at least 85% of the total amount of all advances for the construction of the Plant, other than the final advance, on or prior to the scheduled acceptance date of the Plant and at least 85% of each additional advance shall be expended within three years from commencement of construction related to such additional advances. In the event that REF-FUEL fails to make such expenditures, the Port Authority may refuse to continue to provide further advances. REF-FUEL would be permitted to obtain other borrowings which would not be secured by the Plant or any of its assets, however, under the Service Agreement, the Port Authority would pay, in the debt service component, an amount equal to the debt service due as if such advances were made under the Conditional Sale Agreement.

Escrow Agreement

The major provisions of the proposed Escrow Agreement to be entered into between the Port Authority, REF-FUEL and an Escrow Agent to be selected by the Executive Director after consultation with REF-FUEL, are as follows:

Term

The Escrow Agreement shall be coterminus with the Service Agreement and provide for the administration of REF-FUEL's pledges of revenues and other assets in support of the Conditional Sale Agreement and shall provide for the receipt, temporary investment and disbursement of Plant revenues.

Escrow Agent

The Escrow Agent shall be a bank or a trust company organized under the laws of the State of New York or New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000.

**Compensation of
Escrow Agent**

The reasonable compensation for services performed by the Escrow Agent shall be a pass-through expense paid by the Port Authority as part of the service fee described in the summary of the Service Agreement at "Service Fee".

**Investment of
Funds**

The Escrow Agent shall invest the monies in the various accounts to be established during the construction and operation periods of the Service Agreement, on a temporary basis until needed for the purpose intended, in certain agreed upon investment securities, upon direction of REF-FUEL after consultation with the Port Authority, including, in regard to certain operating and surplus funds, investment in commercial paper or demand notes of BFI or APCI to the extent of 50% each with regard to such monies, subject to certain credit and other requirements.

**Disbursement of
Construction
and Equity Funds**

The Escrow Agent shall disburse monies in the Construction and Equity Funds upon presentation of a certificate by an authorized representative of REF-FUEL detailing the purpose of such expenditure. Advances from the Construction Fund for the construction of the Plant, with the exception of certain limited preliminary development expenses, shall only be

for purposes of qualifying expenditures to provide solid waste disposal facilities.

**Replacement
Cost
Certificate**

Upon acceptance of the Plant, REF-FUEL will provide a replacement cost certificate issued by a nationally recognized insurance broker or carrier stating that the minimum replacement cost of the Plant is at least 133% of advances provided under the Conditional Sale Agreement for the construction of the Plant and shall also provide an insurance policy for the Plant issued in an amount at least equal to such minimum replacement cost. Such certificate and insurance policy will establish REF-FUEL's equity capital (as the minimum replacement cost of 133% of advances) for purposes of certain termination payments under the Service Agreement. Upon issuance of such certificate, the Escrow Agent will return any unspent monies in the Equity Fund to REF-FUEL. In the event such certificate is not issued or the insurance policy for the Plant does not reflect at least such minimum replacement cost, unspent monies in the Equity Fund will be used to repay advances under the Conditional Sale Agreement and REF-FUEL's equity capital will be established as if such certificate had been issued indicating such minimum replacement cost of 133% of advances.

Site Lease Agreement

The major provisions of the proposed Site Lease Agreement between the Port Authority and REF-FUEL, are as follows:

Term

The Site Lease Agreement provides for a term equal to the term of the Service Agreement. REF-FUEL's occupancy of the Blanchard Street Site will generally be governed by the terms of the Service Agreement and upon its expiration, REF-FUEL may exercise up to six optional 5 year renewal terms during which the provisions of the Site Lease Agreement would govern. During both the initial and renewal terms, the Blanchard Street Site may only be used for mass burn resource recovery purposes.

Rent

During the term of the Service Agreement, under the Site Lease Agreement, REF-FUEL will pay a nominal rental, and in the six optional five year renewal periods, REF-FUEL will pay an annual rental equal to the fair market value

rental of the unimproved land (for industrial uses) and 5% of net energy revenues and of gross tipping fees received by the Plant from its customers.

**Determinations
of Fair Market
Value**

If a determination of the fair market value of the rent or of the Plant is required, REF-FUEL shall notify the Port Authority of its estimate of such fair market value. In the event that the Port Authority rejects such estimate, the fair market value shall be determined by a board of appraisers to be selected by the Port Authority and REF-FUEL, which appraisers in the case of a determination with respect to rental shall be members of the American Institute of Real Estate Appraisers, or equivalent organization selected by REF-FUEL and the Port Authority and in the case of a determination with respect to the Plant shall be members of a national industrial appraisal or industrial real estate association or institute selected by REF-FUEL and the Port Authority.

**Site
Indemnification**

REF-FUEL is concerned about the potential for contaminants at the Blanchard Street Site (not selected by REF-FUEL) and on the adjacent Ottilio property which may give rise to unbudgeted financial exposures greater than REF-FUEL is prepared to accept.

A draft document entitled "Essex County Resource Recovery Project Recommendations and Mitigation Measures Dealing with Subsurface Contamination Issues", dated November 9, 1984, prepared by the NJDEP Hazardous Site Mitigation Administration and Division of Water Resources, (and referred to by the New Jersey Public Advocate in written comments, dated January 18, 1985, to NJDEP on Project Permits) states, "in general the entire southern portion of the property is contaminated to some extent with lead and petroleum hydrocarbons" and "since there is insufficient evidence to identify a source of contamination on-site but sample results indicate soils and groundwater contamination throughout the site, a soils sampling program shall be implemented to test the excavated materials." NJDEP's report in regard to the source of groundwater contamination, states, "it is possible that an off-site source exists (Ottilio Landfill),

however, DWR (Division of Water Resources) can not make this determination with the information available. It is also possible that an on-site source exists such as the soils contaminated with elevated levels of petroleum hydrocarbons." The Housing Authority has a contractor at the Blanchard Street Site engaged in removing visible drums and tanks and further work to improve environmental conditions. Since contaminants may remain at the Blanchard Street Site and on nearby sites which might cross contaminate or otherwise materially affect the Blanchard Street Site, it is deemed prudent for the Executive Director to obtain authorization for him: (a) to enter into an agreement with a consultant to prepare a Plan of Mitigation in consultation with the Chief Engineer and Director of Economic Development and (b) to enter into an agreement with a contractor for mitigation of conditions, materials and substances on the Site and on nearby sites to the extent they may materially affect the Site, in order to achieve conformance with applicable laws, regulations and requirements related to the protection of the environment, persons and property.

Notwithstanding REF-FUEL's requirement that the Port Authority assume responsibility for failures or inadequacies of the Mitigation Plan, the contents of the Mitigation Plan already prepared by the Housing Authority's Contractor without Port Authority participation may be binding on the Port Authority once it acquires title to the Site since the Housing Authority's Mitigation Plan was prepared pursuant to an Administrative Consent Order with the NJDEP, the provisions of which are binding on the Housing Authority's successors. Staff will discuss this matter with NJDEP and endeavor to negotiate appropriate changes in the Mitigation Plan in our effort to ensure that the ultimate Mitigation Plan is as effective as possible.

The dewatering process which will be undertaken by REF-FUEL in the construction of the Plant's garbage pit, approximately 35 feet deep by 500 feet in length by 65 feet in width may introduce cross-contamination from the adjacent Ottilio property, a former waste dump (which NJDEP has requested the United States

Environmental Protection Agency to include on the superfund national priority list of hazardous waste sites). Accordingly, REF-FUEL as a condition of its participation in the Project at the Blanchard Street Site requires that the Port Authority enter into the following broad assumption of liability and indemnification agreement:

- (a) The Port Authority and REF-FUEL have been and will be involved in the formulation of a plan of mitigation as it may be amended or supplemented from time to time (the "Mitigation Plan") which plan, when approved by the New Jersey Department of Environmental Protection (NJDEP) as a condition of the Plant's solid waste permit will be designed to take into account certain pollutants and/or contaminants which may exist on the Blanchard Street Site as of the date of the Notice to Proceed under the Service Agreement, and to achieve conformance with laws and regulations relating to protection of the environment, persons and property applicable at that time. Notwithstanding REF-FUEL's involvement, the Port Authority hereby agrees to assume full responsibility and liability that may arise from the failure or inadequacy of the Mitigation Plan, when implemented in accordance with the terms and conditions of such Mitigation Plan to contain, eliminate, or adequately treat such pollutants and/or contaminants or prevent the release of inadequately treated pollutants and/or contaminants at or from the Blanchard Street Site subject to the exclusions with respect to REF-FUEL and others set forth at subsection (b) below.
- (b) The Port Authority agrees to protect, indemnify and hold harmless REF-FUEL, its partners, parents, and grandparents and their respective officers, members, employees, agents, contractors, subcontractors and materialmen from and against all liabilities, actions, damages, claims, demands, requests, judgments, losses, costs, expenses, suits or actions, including reasonable attorney's fees for

investigation and defense (collectively the "Liabilities"), for or on account of personal injury to, or death of, any person or persons (excluding employees of REF-FUEL, its partners, parents and grandparents); clean-up or other mitigation; or loss of or damage to property of third persons, excluding property of REF-FUEL and its partners, parents and grandparents and their respective officers, members, employees, agents, contractors, subcontractors and materialmen; physical loss of or physical damage to property of REF-FUEL, its partners, parents and grandparents and their respective officers, members, employees, agents, contractors, subcontractors and materialmen; and notices of compliance or noncompliance (to the extent such indemnification is legally permitted) arising in any manner whatsoever out of:

- (i) failure or inadequacy of the Mitigation Plan when implemented to contain or adequately treat pollutants and/or contaminants existing as of the date of the Notice to Proceed under the Service Agreement or prevent the release of inadequately treated pollutants and/or contaminants (existing as of the date of such Notice to Proceed) at or from the Blanchard Street Site except: (A) as to Liabilities arising hereunder, not exceeding \$10 million, to the extent Liabilities arising hereunder result from REF-FUEL's, its contractors', subcontractors', materialmen's or agents' failure to follow the specific procedures or instructions set forth in the Mitigation Plan or failure to conform to generally accepted construction standards that would apply to the specific work under the then existing conditions of the Site and (B) as to Liabilities arising hereunder exceeding \$10 million, to the extent that Liabilities arising hereunder result from REF-FUEL's, its contractors', subcontractors', materialmen's or agents' (1) gross negligence in failing to follow the

specific procedures or instructions set forth in the Mitigation Plan or (2) gross negligence in failing to conform to generally accepted construction standards that would apply to the specific work under the then existing conditions of the Site.

- (ii) pollutants and/or contaminants existing as of the date of the Notice to Proceed under the Service Agreement and which are deposited on or may discharge into or from the soil, groundwater, surface water or air (to the extent such air emissions result from such pollutants and/or contaminants and not from plant operations) at or near the Site, including the Ottilio site and other adjacent sites as well as present and future cross-contamination related thereto except: (A) as to Liabilities arising hereunder not exceeding \$10 million, to the extent Liabilities arising hereunder result from REF-FUEL's, its contractors', subcontractors', materialmen's or agents' failure to follow the specific procedures or instructions set forth in the Mitigation Plan or failure to conform to generally accepted construction standards that would apply to the specific work under the then existing conditions of the Site and (B) as to Liabilities arising hereunder exceeding \$10 million, to the extent that Liabilities arising hereunder result from REF-FUEL's, its contractors', subcontractors', materialmen's or agents' (1) gross negligence in failing to follow the specific procedures or instructions set forth in the Mitigation Plan or (2) gross negligence in failing to conform to generally accepted construction standards that would apply to the specific work under the then existing conditions of the Site.

The cumulative amount of all judgments to be paid and satisfied by REF-FUEL, its partners, parents and

grandparents under the foregoing paragraph (b)(i)(A) and (b)(ii)(A) shall in no case exceed a total of \$10 million.

The foregoing provisions shall survive any expiration or termination of the Site Lease Agreement.

REF-FUEL, however, will provide appropriate indemnities to the Port Authority for Liabilities resulting from geotechnical conditions of the Site arising from its construction activities.

The Port Authority's exposure under this assumption of liability-indemnification agreement can be lessened to the extent a Plan of Mitigation can effectively and within an estimated price range ameliorate environmental conditions to achieve compliance with applicable laws and regulations relating to the protection of the environment, persons and property and to the extent the tipping fee is available (only if the Plant is in operation; if the plant is not in operation to the extent that the Port Authority and the County undertake the development of a replacement Plant) to cover associated costs pursuant to the Port Authority's agreement with the County.

Additionally, environmental impairment liability insurance is not obtainable and, furthermore, REF-FUEL's attorney advises that REF-FUEL's general liability insurance policy will be endorsed to delete coverage not only for gradual, non-sudden pollution but also sudden-accidental occurrences related to environmental conditions. In effect, the Port Authority under the open-ended assumption of liability-indemnification agreement required by REF-FUEL, will be, an insurer to the extent no tipping fee is available.

For release of certain pollutants into the environment including air emissions from the Plant stack, strict liability regardless of fault may be imposed by the courts.

Site Acquisition

Staff will identify the various parcels of lands (within the Master Plan's resource recovery site area) in which fee or easement interests must be acquired for the Project including the associated ingress-egress roadway. Rail, utility and electrical interconnection access requirements may necessitate acquisition of additional property interests within such site areas. The owner of the Blanchard Street Site is the Housing Authority. Owners of land over which the access road will run include Conrail, the New Jersey Turnpike Authority, PSE&G and the State of New Jersey which claims title to certain now or formerly tide flowed property. Other parties having easements of record within the Blanchard Street Site or the roadway properties include the Transcontinental Gas Pipe Line Corporation, PSE&G and Norpak Corporation. Preliminary title reports and surveys have been obtained and are in the process of being analyzed to verify the identity of the various property owners from whom property interests have to be acquired and to ascertain the liens and encumbrances on the properties which are outstanding and which will have to be eliminated. While staff's intention is to acquire the necessary property interests by purchase after negotiation, it is deemed prudent to also request authorization to acquire the necessary property by condemnation if circumstances warrant, subject, of course, to the requirement of the Port Authority Industrial Development Projects Statute that no acquisition of property owned by the State or any municipality or public authority, agency or commission may be undertaken without the consent of such governmental entity. Certain further easement interests required by PSE&G for the electrical power interconnection between the Plant's and PSE&G's electrical station will be acquired by the Port Authority.

The Port Authority's appraiser, Franklin Hannoeh, before completing his appraisal of the Blanchard Street Site, has requested data on the extent of contaminants thereon and the estimated costs of mitigation therefor. This topic is important not only in connection with the appraisal of the Blanchard Street Site but also in view of REF-FUEL's requirement that the Port Authority indemnify it against all claims and expenses on account of personal injury, death, property damage, clean-up or other mitigation arising out of site conditions, including cross-contamination from the Ottilio site which is adjacent to the Blanchard Street Site. We have requested information from the NJDEP regarding certain environmental clean up activities now being undertaken by the Housing Authority pursuant to an administrative consent order with the NJDEP. The Port Authority's Engineering Department, with the help of REF-FUEL and consultant(s), if necessary, will evaluate what mitigation work remains to be performed in order for the Blanchard Street Site to be developed for the Plant and what the estimated costs might be so that this data may be supplied to the appraiser.

Before completing his appraisal of the value of the fee or easement interests which will have to be required for the ingress-egress roadway to the Plant, Mr. Hannoeh has asked that the right of way be plotted on a survey of the impacted parcels of land so that consequential and

severance damages to the remainder of the parcels may be estimated. The Board's authorization will enable REF-FUEL to design the access roadway right of way so that the plotting the appraiser requires may be completed.

The most direct route for the ingress-egress roadway would be across the Ottilio site. Because of the environmental problems associated with this land, and the traffic congestion associated with Blanchard Street, another possible access route, the currently planned ingress-egress roadway, was selected. This path would run under a Conrail right of way bridge necessitating replacement with a larger bridge at the Port Authority's cost, which amounts will be included in the costs of or related to the Project. The road would also pass below the elevated New Jersey Turnpike and bridge a stream of water known as "Lawyers Ditch" which drains into the Passaic River. While not navigable in fact, the U.S. Coast Guard takes the position that this stream is navigable in law, thus subject to Coast Guard jurisdiction which requires a Coast Guard Bridge Permit. This permit with an associated environmental assessment and possibly a National Environmental Policy Act Environmental Impact Statement could take a period of time to secure which is not consistent with the Project schedule. Staff is considering seeking congressional action to resolve this situation and is also exploring with NJDEP the possibility of the clean-up of the Ottilio site, now owned by the City of Newark and Deleet Merchandising Company, which clean-up would open up for further consideration the option of an ingress-egress roadway across the Ottilio site.

Public Service Electric & Gas Company Agreement (Energy Contract)

With Port Authority participation, substantial agreement has been reached between PSE&G and REF-FUEL, under which PSE&G would purchase the net electrical energy produced by the Plant, excluding electrical energy consumed by the Plant, at a rate of 110% of the Pennsylvania-Jersey-Maryland Billing Rate which has been defined by the New Jersey Board of Public Utilities to be PSE&G's avoided cost, and generation capacity from the Plant, in accordance with the terms and conditions of an Energy Contract to be entered into. In addition, under the Energy Contract, PSE&G would provide backup electrical energy power to the Plant, if necessary, and the Plant would be interconnected to the PSE&G system. In the event the Port Authority exercises its option under the Service Agreement to purchase the Plant, it shall also have the right under the Energy Contract to assume the Energy Contract for its unexpired term.

Certain Other Agreements

The Executive Director would be authorized to enter into such other agreements with REF-FUEL or such other parties as may be necessary or desirable to effectuate the construction or operation of the Plant, including those necessary for provision of residue disposal sites and alternate disposal sites, mitigation and off site work.

Environmental Approvals

The Environmental Impact Statement (EIS) and necessary environmental permits have been reviewed by the NJDEP. The EIS has been approved by NJDEP and draft permits were issued in November 1984. A public hearing was held on such draft permits on December 17 and 18, 1984 and the hearing record remained open through January 18, 1985. Permits are expected to be issued by the NJDEP by early May 1985.

Air pollution offsets for total suspended particulates and non-methane hydrocarbons are required by the NJDEP because the area in which the Plant will have air pollution impacts is not in attainment of federal air quality standards. Such offsets can be obtained either by purchasing the rights to emit pollutants from a plant that is closing or by reducing emissions from an existing plant. Negotiations to obtain the required offsets have begun and are expected to be completed by the summer of 1985.

New Jersey Board of Public Utilities

It is intended that certain of the agreements in connection with the effectuation of the Project, including the Energy Contract, will be subject to a one-time filing for approval by the BPU.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted, Commissioner Van Fossan abstaining:

RESOLVED, that subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds:

1. the total costs of or related to the Essex County Resource Recovery Facility (Project) be and the same are hereby increased to approximately \$343 million with an increase in the Port Authority's expenditures or moneys provided for financing provided in connection therewith to an amount not to exceed \$236 million, including approximately \$23 million in connection with certain contingencies for up to one year of construction delays;

2. the Executive Director be and he is hereby authorized to provide an amount presently estimated at \$61 million in 1985 dollars for capital costs resulting from the occurrence of unforeseen or other similar circumstances, which amount will be determined and adjusted based on a service fee increase limitation of up to \$7.50 per ton, at January 1, 1983, as adjusted for escalation until used, of acceptable solid waste, computed on the basis of 680,000 tons per year, to be paid by the Port Authority as a component of the service fee to American REF-FUEL Company of Essex County (REF-FUEL) for solid waste disposal services with a correspondingly increased tipping fee to be paid by the County of Essex to the Port Authority;

3. the Executive Director be and he is hereby authorized to enter into a Host Municipality Agreement with the City of Newark and the County of Essex concerning the Project, which agreement, among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreement summarized in the foregoing report;

4. the Executive Director be and he is hereby authorized to enter into an agreement(s) with the County of Essex concerning the Project, which agreement(s), among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreement summarized in the foregoing report and such other agreements with the County or such other parties as may be necessary or desirable to effectuate the provision of residue disposal sites and alternate disposal sites;

5. the Executive Director be and he is hereby authorized to enter into a Service Agreement with REF-FUEL, a general partnership of subsidiary corporations formed by each of Browning-Ferris Industries, Inc. and Air Products and Chemicals, Inc., concerning REF-FUEL's design, construction, start-up and acceptance testing and operation of the mass burn resource recovery plant (Plant), which agreement, among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreement summarized in the foregoing report, and such other agreements with REF-FUEL or such other parties as may be necessary or desirable to effectuate the construction or operation of the Plant, including those necessary for provision of residue disposal sites and alternate disposal sites, mitigation and off site work;

6. the Executive Director be and he is hereby authorized to enter into a Conditional Sale Agreement with REF-FUEL under which the Port Authority would provide advances to REF-FUEL to enable REF-FUEL to finance a portion of the capital costs related to the Plant, including those with respect to unforeseen or other similar circumstances, which agreement, among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreement summarized in the foregoing report;

7. the Executive Director be and he is hereby authorized to enter into an Escrow Agreement with REF-FUEL and an escrow agent to be determined by the Executive Director after consultation with REF-FUEL, to provide for the administration of REF-FUEL's pledges of revenues and other assets in support of the Conditional Sale Agreement and to provide for the receipt, temporary investment and disbursement of Plant revenues, which agreement, among other matters, will contain terms and conditions to effectuate the

major provisions of the proposed agreement summarized in the foregoing report;

8. the Executive Director be and he is hereby authorized to enter into a Site Lease Agreement under which REF-FUEL will lease the Plant site and will be indemnified for certain site conditions, which agreement, among other matters, will contain terms and conditions to effectuate the major provisions of the proposed agreement summarized in the foregoing report;

9. the Committee on Construction be and it is hereby authorized, subsequent to, and subject to, execution of the agreement or agreements required by Sections 11 and 12 of the Port Authority's Industrial Development Projects Statute, on behalf of the Port Authority, to find and determine that it is necessary for a public use to acquire a fee simple absolute or lesser interest in certain blocks and lots (to be specifically enumerated) in the City of Newark, State of New Jersey for the industrial development project or facility purposes namely, for the Project including but not limited to road, rail, utility and electrical interconnection access thereto;

10. the Executive Director be and he is hereby authorized to: (a) enter into an agreement with a consultant, to be selected, for the preparation of a Plan of Mitigation, to be developed in consultation with the Chief Engineer and Director of Economic Development, for conditions, materials and substances on the Site and on nearby sites to the extent they may materially affect the Site, which Plan of Mitigation will be designed to achieve compliance with applicable laws, regulations and environmental requirements and be submitted to the New Jersey Department of Environmental Protection for approval as a condition of the Solid Waste Permit and (b) enter into an agreement, with a contractor to be selected by the Executive Director, for mitigation of conditions, materials, and substances on the Site and on nearby sites to the extent they may materially affect the Site, in order to achieve conformance with applicable laws, regulations, and requirements relating to protection of the environment, persons and property;

11. the Committee on Construction be and it is hereby authorized, subject to execution of the agreement or agreements required by Sections 11 and 12 of the Port Authority's Industrial Development Projects Statute and the development of the above-mentioned Plan of Mitigation, to authorize the Executive Director to acquire a fee simple absolute or lesser interest in said property, by purchase for prices and upon conditions to be approved by the Committee, or by condemnation or the exercise of the power of eminent

(Board - 4/11/85)

domain, and to incur all expenses necessary or incidental thereto, provided that no property vested in or held by the State of New Jersey or any municipality, public authority, agency or commission shall be acquired without the authority or consent of such entity or by appropriate legislation, pursuant to Section 8 of said Port Authority Statute;

12. the Committee on Construction be and it is hereby authorized to authorize General Counsel, subject to the foregoing requirements of the Port Authority's Industrial Development Projects Statute, in the name of and on behalf of The Port Authority of New York and New Jersey: to conduct a condemnation proceeding to acquire a fee simple absolute or lesser interest in all or part of said property for the Project, to do all things required by law in connection therewith and to incur all expenses necessary or incidental to the conduct of proceedings for the acquisition of said property; and

13. the Committee on Construction be and it is hereby authorized to authorize the Executive Director to grant easements or leases on terms to be approved by the Committee, in addition to and other than the REF-FUEL Site Lease Agreement, on property the Port Authority acquires in connection with the Project, to Public Service Electric & Gas Company and to other entities, as appropriate in the interests of the Project; and it is further

RESOLVED, that the form of all documents or agreements necessary to effectuate the Project be subject to approval by General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Secretary

NEW YORK
LIBRARY
OFFICE

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, May 9, 1985, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Alan Sagner, Chairman
 Jerry Fitzgerald English
 Robert V. Van Fossan
 Philip D. Kaltenbacher
 William K. Hutchison
 Henry F. Henderson, Jr.

NEW YORK

Robert F. Wagner, Vice-Chairman
 William J. Ronan
 Howard Schulman
 John G. McGoldrick
 H. Carl McCall

Peter C. Goldmark, Jr., Executive Director
 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Acting Director of Tunnels, Bridges and Terminals
 Gwendolyn K. Crider, Administrative Assistant
 Sidney Frigand, Assistant Executive Director/Director of Public Affairs
 Louis J. Gambaccini, Assistant Executive Director/Director of Administration
 Francis A. Gorman, Director of Rail Transportation
 Louis J. LaCapra, Assistant Director of Personnel
 Philip LaRocco, Director, Economic Development Department
 Donald R. Lee, Director of Audit
 Joseph Lesser, Deputy General Counsel
 Lillian C. Liburdi, Director of Management and Budget
 Katharine B. MacKay, Assistant Executive Director/Director of State Relations
 Rino M. Monti, Director of Engineering/Chief Engineer
 James O'Malley, Deputy Director of Management Information Services
 Martin E. Robins, Director of Planning and Development
 Robert N. Steiner, Deputy Port Director
 Victor T. Strom, Director of Public Safety
 Guy F. Tozzoli, Director of World Trade
 Joseph L. Vanacore, Executive Officer for Capital Programs
 Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Treasurer
 Robert N. Williams, Deputy Director of General Services
 Thomas C. Young, Jr., Principal Information Officer, Public Affairs

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of April 11, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

The Secretary reported that in the April 11, 1985 Minutes on page 136, paragraph 8, lines 1 and 2; page 137, number 5 and page 138, paragraph 2, line 1, the figure "\$230,000" should read "\$255,000". She further reported that on page 137, number 3, line 3; page 137, paragraph 10, line 4, the figure "\$50,000" should read "\$75,000", and in number 4, line 5, the figure "\$75,000" should read "\$50,000".

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on May 9, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on May 9, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on May 9, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on May 9, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 5/9/85)

Kennedy International Airport - Inter-Terminal Bus Service - Elimination of Service Charge to Airlines for Affinity Bus Service

It was reported that the existing inter-terminal bus contract at Kennedy International Airport (AYB-306) expires on May 31, 1986, with the Port Authority having the option to extend it through May 31, 1987. Under the terms of the agreement, the contractor, Hudson General, provides ground transportation services which consist of a Central Terminal Area (CTA) inter-terminal service, an Autolink service, an Affinity service and a bus service to and from the long-term parking lots.

The CTA Inter-Terminal Connecting Bus Service provides coach service among all the airline terminals within the CTA, at no cost to the passengers. Under an agreement with the airlines, 50% of the cost of this service (exclusive of the Affinity Service) is paid for by the airlines, as part of the flight fee, and 50% is absorbed by the Port Authority.

Autolink uses a specially-designed wheelchair van for handicapped patrons and station wagons for V.I.P.'s and quick connection needs. The airlines requesting this custom service pay \$3 per passenger. Any costs that are not covered by this charge are recovered through the flight fee.

The Affinity service is an exclusive bus service that the airlines may request when there is a need to transport a large group of passengers (currently a minimum of fifteen) between terminals. Airlines utilizing this service currently pay \$45 per movement with any additional expenditures over and above this amount absorbed by the Port Authority.

The long-term parking lot service provides a free bus that transfers patrons between the CTA unit terminals and long-term parking lots Nos. 8 and 9. This service is funded by revenues from the long-term parking lot operation.

It was recalled that the Board, at its meeting on November 12, 1981, authorized the Executive Director to eliminate the passenger fare on the CTA inter-terminal bus at Kennedy International Airport, effective December 13, 1981. This was done in the interest of improving public service and as a means of enhancing Kennedy International Airport's reputation and competitive position. Although this policy proved successful in achieving these two basic goals, it has also made increasingly clear the strong inter-relationship between the Affinity Bus Service program and the CTA bus service. Since the airlines currently pay \$45 for each Affinity Bus movement they request, there is a trend developing to reduce operating costs whereby airline agents are steering Affinity groups to curbside where they congregate waiting for the no-fare CTA bus connection service. This action reduces airline operating costs, but works against Port Authority goals of improving transfer connection times for our customers and reducing congestion on the curb frontages.

The present fee of \$45 was established on June 1, 1981 and was, at that time, thought to be sufficient to cover all costs. It is estimated that the total cost of the Affinity Bus Service program for the calendar year 1985 will approximate \$415,000 rising to about \$470,000 in 1986.

(Board - 5/9/85)

Under the proposed arrangement, the airlines would no longer be charged a fee for each Affinity movement, but rather would pay 50% of the cost thereof, as defined, as part of the flight fee. The other 50% would be absorbed by the Port Authority putting this arrangement on the same basis as our existing agreement with the airlines relevant to the cost-sharing formula for the CTA bus service. The Autolink service would remain unchanged, with the airlines continuing to pay a fixed fee of \$3 per passenger and the balance of the cost, as defined, going into the flight fee.

Staff has been negotiating the aforementioned Affinity Service cost-sharing formula with the Dewey Lessee Airlines in an effort to restore a better balance between the Affinity and the CTA bus services. Staff has pointed out to the airlines the benefits that restoring a proper relationship between these two services will promote, namely a substantially improved level of service for inter-line connection service; reduced bus and patron congestion on roadways and curb frontages and a potential increase in Kennedy International Airport's volume of airline tour groups who presently use competing gateway airports for inter-line international connections. As a result of these negotiations, the Dewey Lessee Airlines have indicated their willingness to engage in a twelve to eighteen-month test to determine the effectiveness of this new policy.

It is therefore recommended that effective June 1, 1985, the start of the busy summer season, the current Affinity charge of \$45 be eliminated and the Port Authority and the airlines share the cost of the Affinity service on the same 50-50 basis currently used to cover the CTA bus service cost. During the experimental period, the Port Authority and the airlines will evaluate the program to determine the value of making it permanent.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to temporarily eliminate the charge to airlines for the Affinity Bus service at Kennedy International Airport and to enter into agreements with the Dewey Lessees concerning the flight fee and the Unit Terminal Lessees and the Wing Building Lessees amending the provisions of the various agreements concerning ground transportation within the Central Terminal Area, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority be and he hereby is authorized to temporarily eliminate the charge to airlines for the Affinity Bus serving the various airline terminal buildings at Kennedy International Airport, effective June 1, 1985 for an experimental period of from twelve to eighteen months; and it is further

RESOLVED, that the Executive Director, for and on behalf of the Port Authority be and he hereby is authorized to enter into agreements supplemental to the Dewey, Unit Terminal, and Wing Buildings leases at Kennedy International Airport whereby 50% of the cost of the Affinity Bus Service, as defined, would become a part of the cost of providing, maintaining and operating the public aircraft facilities under the Dewey Leases and 50% would be the obligation of the Port Authority; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

LaGuardia Airport - Hudson General Corporation Common Air Cargo Facility Lease of a Portion of Hangar 7

It is recalled that at its September 13, 1984 meeting, the Board authorized the acceptance of a surrender from Butler Aviation, LaGuardia Airport, Inc., under its Fixed Base Operator Lease, of Hangar 7 and its related office space, effective October 31, 1984, such hangar being in excess to Butler Aviation's needs to maintain general aviation aircraft. It was anticipated that this space would be used to accommodate the development of a common air cargo facility by Hudson General Corporation. The common air cargo facility was expected to be covered by a short-term Agreement, however, because of the increased scope of work necessary to convert the premises for cargo handling use, the construction conversion costs now appear to be estimated at approximately \$800,000, which is far in excess of Hudson's original estimate. Consequently, Hudson has requested, a five-year lease to allow a reasonable amortization period.

When the construction of the new East End Passenger Terminal at the Airport commences, and Hangar 8 and possibly all or part of Hangar 6 are demolished, certain air carrier operations, including air cargo handling, storage of aircraft and automotive parts and supplies, and commissary supplies, may need to be relocated. Due to the limited amount of space available at the Airport, it is necessary that the Port Authority have the right to terminate the proposed Hudson General Lease in Hangar 7 in order to provide space for the aforementioned functions. This right of termination would be exercisable by the Executive Director, at his discretion. In the event it becomes necessary to exercise such right to terminate, the Port Authority would be obligated to reimburse Hudson General its unamortized capital costs for the aforesaid cargo facility conversion up to a maximum of \$800,000 based on a straight-line, five-year write-off with no interest. This payment of the unamortized construction costs will be recovered from a combination of the airline tenant(s) relocating to Hangar 7 and those which will occupy the proposed new East End Terminal.

Hudson General will have complete responsibility for the maintenance and operation of the leased premises, except for the maintenance of the structural supporting frame and roof which shall be the responsibility of the Port Authority. The Port Authority will provide water and electricity to the premises to be paid for by Hudson General on a metered basis.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement of lease with Hudson General Corporation at LaGuardia Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Hudson General Corporation for a term of five years commencing on or about May 15, 1985, at an annual rental of \$109,404, covering approximately one-half of the floor area of Hangar 7 at LaGuardia Airport for use as a common air cargo facility, with the Executive Director to have the right to terminate the lease in the event that the leased premises are required to accommodate displaced air carrier operational functions on the Airport; and with the Port Authority being obligated, in the event of such termination, to reimburse Hudson General for its unamortized capital costs, up to a maximum of \$800,000, of converting the premises to a common air cargo facility.

(Board - 5/9/85)

Aviation Department Assistance to Regional Aviation Consulting Firms in Connection with the Submittal of Proposals for and the Performance of a Feasibility Study of a New International Airport in The People's Republic of China

It was reported that in the interest of promoting international trade and commerce through the New York/ New Jersey region and advancing regional involvement in foreign airport development, staff proposes to work with appropriate regionally-based airport consultants in order to assist these consultants in promoting their design and construction management services abroad. Many foreign countries interested in airport development and modernization do not have the capability of executing airport planning and design and look to help from outside their countries. Airport services are presently provided by airport organizations principally from the Netherlands, France, Britian and Germany. Consultant firms located in the New York/New Jersey region and others throughout the nation are involved in early-on competition for the design and construction management of foreign airport projects. However, without institutional support by the United States government and airport operators, other foreign organizations backed by their governments all too frequently are awarded the work.

On April 9, 1985 the United States Trade Development Program (TDP) issued notice of a Request for Proposals (RFP) tendered by the People's Republic of China (PRC) for a feasibility study of a new international airport in the Shenzhen Special Economic Zone, Responses to the RFPs were to be received in China no later than April 30 and a decision is expected by June 1, 1985. PRC is expected to entertain bids from a list of United States firms, as well as from foreign consultants, including the British Airport Authority, Paris Airport Authority and other such entities, which have been successful in gaining major airport development contracts around the world. In order to help obtain international contracts and their resulting benefits for United States firms, TDP has committed to PRC \$700,000 towards the \$800,000 airport feasibility study.

The Shenzhen Airport project first came to the attention of staff last fall when Nai C. Yang, who has an independent engineering consultant firm located in New York and is a former Port Authority Chief Civil Engineer, approached Aviation Department staff. Based upon communication with officials of the Civil Aviation Administration of China (CAAC), Mr. Yang proposed that the Port Authority take a lead role in conducting the feasibility study, in association with his firm.

Staff believes that the Port Authority's association with a consulting firm or firms from the region will enhance the possibility of obtaining the feasibility study contract for a locally-based firm. The Federal Aviation Administration (FAA), which assisted PRC in developing the RFP, and the TDP have indicated that they would favor Port Authority participation in a supporting role. In addition to gaining entree for the region's airport design and construction firms into the potentially extensive Chinese market for such services, benefits for the New York/New Jersey region might include millions of dollars in additional trade and commerce through the region.

(Board - 5/9/85)

It is anticipated that Aviation Department staff in cooperation with other staff would perform three basic tasks: (1) coordination of the work of the consultant(s); (2) reviewing, evaluating and critiquing the work of the consultant(s) at appropriate stages of the study and (3) providing expertise on airport management, operations and maintenance. Staff anticipates that in the event a consultant or consultants from the region is (are) selected to perform the study, 10 to 20% of the study would be performed by Port Authority staff and the Port Authority would be reimbursed its costs. Authorization to enter into such an agreement or agreements would be sought when the terms are finalized. However, because of the need to submit responses to the RFP, tendered by the PRC, prior to April 30, and in order to maximize the benefits of Port Authority participation to locally-based consultants responding to the RFP, after notifying the Board of the intention to do so, staff informally advised several such consultants that, if one of them is selected to perform the study, subject to Board approval, the Port Authority would participate in the study.

In addition to Mr. Yang's consulting firm, staff offered its assistance in this project to appropriate consultants in the New York/New Jersey region who have conducted major airport planning studies and have substantial airport planning staffs located in the region.

It was therefore recommended that the Board approve the action of the Executive Director in authorizing the Aviation Department (1) to explore with aviation consulting firms based in the region how it might assist them in preparing their responses to a Request for Proposals (RFP) from the People's Republic of China for the performance of a feasibility study of a proposed new international airport in the Shenzhen Special Economic Zone and (2) to participate in the feasibility study if one or more of these consulting firms is selected to perform the study.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board approves the action of the Executive Director in authorizing the Aviation Department (1) to explore with aviation consulting firms based in the region how it might assist them in preparing their responses to a Request for Proposals (RFP) from the People's Republic of China for the performance of a feasibility study of a proposed new international airport in the Shenzhen Special Economic Zone and (2) by participating in the feasibility study if one or more of these consulting firms is selected to perform the study.

(Board - 5/9/85)

Port Authority Bus Terminal - Central Park Gourmet, Inc. - Lease Number LBT-477 - Supplement No. 2

It was reported that the Committee on Operations, at its meeting on January 13, 1983, authorized a 20-year lease with Central Park Gourmet, Inc., which submitted the successful proposal from those solicited on a competitive basis, for the operation of a restaurant and liquor bar in the South Wing of the Port Authority Bus Terminal, at an annual basic rental for the premises at the rate of \$155,000 per year for the first five years of the term, \$166,000 per year for years six through ten, \$177,000 per year for years eleven through fifteen and \$198,000 per year for the final five years, against a percentage rental equivalent to 20.211% of all annual gross receipts arising from the tenant's operations. The premises were delivered to the tenant for construction and space preparation work therein effective August 1, 1983. Pursuant to the terms of the lease, payment of rental was accordingly fixed to begin on the earlier of January 28, 1984, or the date the tenant would complete its space preparation work and subsequently begin public operations in the premises.

The Board, at its meeting on July 12, 1984, authorized a postponement of the commencement date for the payment of rentals, under the lease, to the earlier of November 1, 1984 or the date the tenant would complete its space preparation work and begin public operations, and increased the initial limitation on the costs for which the tenant would be reimbursed by the Port Authority without cause to \$500,000.

In addition, the Board authorized the Port Authority to pay the tenant up to the sum of \$350,000 towards the cost of construction, which will reduce the maximum amount due the tenant in the event the letting is terminated by the Port Authority without cause, with the tenant obligated to repay such amount over a five-year period commencing one year after completion of the construction and renovation work in the premises in equal monthly installments equivalent to the annual amount determined by multiplying the total Port Authority investment in such construction by an annual factor of .303737.

Subsequent to such Board authorization, the tenant was unable to reach agreement with its contractor on the cost for the extensive necessary structural changes required by the Port Authority and the contractor withdrew from the job. Negotiations with sub-contractors to complete the work and the need to make changes in the construction already in place further delayed the completion of work and substantially increased the tenant's costs. It is now estimated that all work will be completed no later than June 1, 1985. Tentative agreement, therefore, has been reached with the tenant, subject to the approval of the Board, to postpone the commencement date of the rental from November 1, 1984 to May 1, 1985. All other terms and conditions of the lease as previously authorized will remain in full force and effect.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement with Central Park Gourmet, Inc. amending its lease with the Port Authority on the terms and conditions outlined above.

(Board - 5/9/85)

Whereupon, the following resolution was unanimously adopted, Commissioner English abstaining:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with Central Park Gourmet, Inc. amending its lease with the Port Authority to provide for the postponement of the commencement date for the payment of rentals under the lease to May 1, 1985; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 5/9/85)

Lincoln Tunnel - Emergency Garage Extension - Contract LT-110.041 - Increase in Payment Under an Agreement with Architects DiGeronimo

It was reported that the Board, at its meeting on December 9, 1982, authorized the Chief Engineer to enter into agreements for the performance of architectural and engineering services for small scale projects. The Chief Engineer was further authorized to amend these agreements and increase the compensation payable thereunder by an amount not to exceed \$100,000 per agreement provided that the total compensation payable under each agreement, as amended, could not exceed \$250,000.

In accordance with this authorization, the Chief Engineer entered into an agreement with Architects DiGeronimo on July 7, 1983, for professional engineering services and advice including the development of preliminary design, contract preparation, construction cost estimating, pre-award and post-award contract changes and review and approval of shop drawings, all in connection with Contract LT-110.041, Lincoln Tunnel, Emergency Garage Extension.

The agreement provided for compensation to Architects DiGeronimo not to exceed \$44,745. Subsequent to the start of Architects DiGeronimo's design effort, the scope of work was increased to include a temporary garage, additional granite fascia, three separate mechanical ventilation schemes which resulted in a final design of a ventilation tower to meet code requirements on carbon monoxide levels, and a modification to the existing mechanical room.

The agreement provides that in the event of a material change in the scope of work, the Chief Engineer may, in his discretion, increase the maximum compensation payable to the consultant.

In six separate amendments to the agreement, between December 1983 and February 1985, the compensation payable thereunder was increased from \$44,745 to \$124,801. These amendments were the direct result of the above-mentioned increased scope of work.

The above additions in compensation were approved on the basis of estimates of the work submitted by the consultant; however, upon completion of the contract documents, the consultant requested additional compensation on the basis that it had grossly underestimated the work required to perform these changes. Based on the documentation submitted by the consultant, the Chief Engineer recommends the authorization of additional compensation including an allowance for future project changes, of up to \$150,199, for a total compensation to the consultant not to exceed \$275,000.

It was therefore recommended that the Board authorize the Chief Engineer to increase the total compensation payable under an agreement with Architects DiGeronimo from \$124,801 to \$275,000, for professional engineering services including the preparation of contract documents, post-award contract changes and the review of shop drawings in connection with Contract LT-110.041, Lincoln Tunnel, Emergency Garage Extension.

(Board - 5/9/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Chief Engineer to increase the total compensation payable under an agreement with Architects DiGeronimo from \$124,801 to up to \$275,000, for professional engineering services including the preparation of contract documents, post-award contract changes and the review of shop drawings in connection with Contract LT-110.041, Lincoln Tunnel, Emergency Garage Extension.

(Board - 5/9/85)

Expansion of Foreign Trade Zone No. 49 to Include a Subzone at the Hooton Chocolate Company Plant in Newark, New Jersey

It was reported that subzones are special-purpose ancillary sites authorized by the Foreign-Trade Zones Board to permit the conduct of operations by firms that cannot be accommodated within an existing general-purpose zone when it can be demonstrated that the activity, usually manufacturing, will result in a public benefit. Foreign-Trade Zone regulations require that applications for subzones be requested by a general purpose Foreign Trade Zone grantee, which has ultimate responsibility for a subzone. As grantee of Foreign Trade Zone No. 49 at the Port Newark/Elizabeth-Port Authority Marine Terminal, the Port Authority has been asked by the Ambrosia Chocolate Company to apply for subzone status for its Hooton Chocolate Company manufacturing plant in Newark, New Jersey.

The Ambrosia Chocolate Company, a division of W. R. Grace & Company, is the leading U.S. supplier of bulk industrial cocoa-based and related products to the confectionary, baking and dairy industries. The Hooton Chocolate Company is one of Ambrosia's two principal plants, the other located in Milwaukee, Wisconsin, and produces and sells approximately fifty million pounds of chocolate and cocoa-based products annually. The Hooton plant, which has been operating in Newark for the past ninety years, presently employs approximately 100 people. Over the past two years, because of the dramatic difference between world sugar and domestic sugar prices, Hooton has lost approximately ten million pounds of business to imports. As a defensive measure, Hooton has turned to purchasing finished chocolate products from foreign producers and reselling it to current U.S. customers. However, this is temporary and unsatisfactory because foreign producers are now selling directly to some of Hooton's customers.

To retain this business in Newark and allow Ambrosia to compete on an equal basis with foreign producers, Ambrosia requires subzone status. Zone status will enable Ambrosia to purchase foreign sugar at the world price and process it into finished chocolate products not subject to quota; thus eliminating the need to purchase finished products from Canada. In addition, the zone will assist Ambrosia in developing an export business through the processing of imported and domestic ingredients. Through zone status, continuation of this ninety-year old facility in the city of Newark will thus be assured.

Ambrosia has agreed to enter into an appropriate agreement with the Port Authority which will insure that the subzone will be operated by it without cost, expense or risk of loss to the Port Authority.

The Port Authority is the sponsor of the Ford Motor Co. subzone in Edison, New Jersey and has an application on file with the Foreign-Trade Zones Board for the General Motors' plant in Linden, New Jersey.

It was therefore recommended that the Board authorize the Executive Director to file an application with the Foreign-Trade Zones Board of the U.S. Department of Commerce for the establishment of a subzone at the Hooton Chocolate Company plant in Newark, New Jersey and to enter into an appropriate agreement with the Ambrosia Chocolate Company regarding the financial responsibility for operation of the subzone.

(Board - 5/9/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director and General Counsel be and they are hereby authorized to prepare and file an application with the Foreign Trade Zone's Board of the U. S. Department of Commerce to establish a subzone at the Hooton Chocolate Company plant in Newark, New Jersey and to enter into an appropriate agreement with the Ambrosia Chocolate Company regarding the financial responsibility for operation of the subzone.

(Board - 5/9/85)

Expansion of Foreign-Trade Zone No. 49 to Include the GATX Terminals Corporation Facility in Carteret, New Jersey

It was reported that GATX Terminals Corporation is a worldwide public terminal company specializing in the storage, transfer, processing and packaging of liquid bulks. As a public terminal, GATX owns no product but provides such services as buffer storage, intermodal transfer and product blending. At present, GATX has thirteen domestic facilities which together comprise 41.7 million barrels of storage capacity or about 25% of the public terminal storage capacity in the United States. GATX also has eight foreign terminals in four countries (Belgium, Japan, Singapore and Spain) which provide an additional 4.8 million barrels of storage capacity. In 1984, GATX's thirteen domestic facilities handled 409.3 million barrels of products.

As a result of changes in the structure of the petroleum industry in this region, the GATX facility on the west bank of the Arthur Kill in Carteret, New Jersey, which has a capacity of 6½ million barrels, is experiencing a shift from a storage support function for major oil companies' petroleum products and chemicals to a gasoline storage and blending function for gasolines and gasoline blendstocks owned by independent marketers. Gasoline blending is a relatively new business in the Port of New York/New Jersey. It involves the combining of imported and domestic components to produce finished gasoline, which is marketed in the New York/New Jersey metropolitan region and in New England under various independent labels. The retail price for such blended gasoline is traditionally a few cents per gallon lower than the pump price of a major brand gasoline. Since gasoline importing and blending is a highly competitive industry where profit margins are extremely thin, the ability to reduce the cost of gasoline several cents a gallon is critical.

Under Foreign-Trade Zones Board regulations, GATX is not authorized to apply for zone status and has asked the Port Authority, as grantee of the Port Newark/Elizabeth zone, to secure zone status for its Carteret Terminal. As grantee, the Port Authority does have ultimate responsibility for all zone facilities.

Zone status will enable GATX customers to defer duty on imported petroleum products; take advantage of the lower duty rates on blends; and, eliminate duty on re-exported products. Foreign-Trade Zone status will help to keep GATX and its customers competitive with both domestic and foreign gasoline blenders.

Foreign-Trade Zone status, in addition to adding approximately 25 new jobs and retaining the over 200 existing jobs in the Port Region related to GATX's operation, is expected to increase tonnage in the Port of New York/New Jersey. Other similar operations in the area have also expressed interest in zone status.

GATX has agreed to enter into an appropriate agreement with the Port Authority which will insure that the site will be operated by it without costs, expense or risk of loss to the Port Authority.

(Board - 5/9/85)

It was therefore recommended that the Board authorize the Executive Director to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce to include the GATX facility in Carteret, New Jersey, in Foreign-Trade Zone No. 49 and to enter into an operating agreement with GATX Terminals Corporation regarding the financial responsibility for operation of the zone.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director and General Counsel be and they are hereby authorized to prepare and file an application with the Foreign Trade Zone's Board of the United States Department of Commerce to include the GATX facility in Carteret, New Jersey, in Foreign-Trade Zone No. 49 and to enter into an operating agreement with GATX Terminals Corporation regarding the financial responsibility for operation of the zone.

(Board - 5/9/85)

Essex County Resource Recovery Facility - Certification

It was reported that the Board, at its meeting on October 13, 1981, directed the Executive Director to undertake all necessary planning for a resource recovery plant in Essex County, New Jersey, including the solicitation of proposals for the design, construction and operation of the plant and an assessment of the financial feasibility of the plant, utilizing tax-exempt financing, government aid programs and private equity to the extent possible, and to present to the Board, for its further consideration, appropriate analyses and recommendations concerning such planning.

At its meeting on November 10, 1983, the Board, subject to the appropriate authorizations and amendments to the Industrial Development Master Plan setting forth potential industrial development sites and subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds, authorized a project for the development of a resource recovery plant located in the Blanchard Street area of the City of Newark, County of Essex, at a cost of approximately \$260 million with a Port Authority expenditure of up to approximately \$165 million. The Executive Director was authorized to negotiate the agreements necessary to effectuate the project, including agreements with the City of Newark (City), the County of Essex (County), Browning-Ferris Industries (BFI) and/or an entity to be established by BFI, Public Service Electric & Gas Company (PSE&G), and others as appropriate, and present such agreements to the Board for its approval. At its meeting on March 8, 1984, the Board amended the Master Plan in connection with the Essex County Resource Recovery Facility (the Facility).

At its meeting on January 12, 1984, the Board authorized the Executive Director to enter into an agreement with BFI concerning certain developmental design work in connection with the planning of the Facility at a cost to the Port Authority of approximately \$1.8 million. At its meeting on April 11, 1985, the Board was advised that work pursuant to such authorization had been completed, and it was provided that, as part of the service agreement between the Port Authority and American REF-FUEL Company of Essex County (REF-FUEL), the Port Authority at its sole option, prior to the satisfaction or waiver of the conditions precedent to such agreement becoming effective, may require REF-FUEL to pursue further design, engineering and construction activities subject to mutual agreement as to the extent and cost of such further activities, in a total cost of up to approximately \$25 million, with the proviso that if the service agreement does not become effective, REF-FUEL would nevertheless be paid for such work. Upon execution of the service agreement and prior to reaffirmation of this certification, it is expected that REF-FUEL would pursue further design and engineering with respect to the planning for the Facility, including the making of arrangements for the acquisition of certain items of equipment for the Facility. Any on-site activities would not be undertaken until issuance of necessary permits, approvals and certifications. REF-FUEL is a general partnership of subsidiary corporations formed by each of BFI and Air Products and Chemicals, Inc., for the design, construction, start-up and acceptance testing of the plant and the provision of solid waste disposal services to the Port Authority.

(Board - 5/9/85)

At its meeting on April 11, 1985, the Board authorized, subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds, the increase of the total costs of or related to the Facility to approximately \$343 million with an increase in the Port Authority's expenditures or moneys provided for financing provided in connection therewith to an amount not to exceed \$236 million, including approximately \$23 million in connection with certain contingencies for up to one year of construction delays; additionally, the Executive Director was authorized to provide an amount presently estimated at \$61 million in 1985 dollars for capital costs resulting from the occurrence of unforeseen or other similar circumstances, which amount will be determined and adjusted based on a service fee increase limitation of up to \$7.50 per ton, at January 1, 1983, as adjusted for escalation until used, of acceptable solid waste, computed on the basis of 680,000 tons per year, to be paid by the Port Authority as a component of the service fee to REF-FUEL for solid waste disposal services with a correspondingly increased tipping fee to be paid by the County to the Port Authority.

The Executive Director was further authorized to enter into agreements necessary to effectuate the Facility, including agreements with the City, the County, REF-FUEL, an escrow agent, and others as appropriate including those agreements necessary to effectuate the purchase of the site. The major provisions of these agreements to be entered into and the relationship of the various parties to such agreements as described in the minutes of the April 11, 1985 meeting of the Board, entitled "Industrial Development Program - Essex County Resource Recovery Facility - Authority to Enter into Agreements and Acquire Site", at pages 161 et. seq., are incorporated by reference into this report as if set forth at length herein (the "April 11, 1985 minutes").

It is the opinion of the Acting Chief Financial Officer, based upon the description of the Facility and the major provisions of the various agreements to be executed as described in the April 11, 1985 minutes and upon supplemental information provided by the Director of the Economic Development Department and the Director of Engineering/Chief Engineer, that the Facility is financially viable and that its effectuation will not impair the credit or future borrowing capacity of the Port Authority. However, since the necessary permits have not as yet been issued, the agreements described in the April 11, 1985 minutes have not as yet been executed and the appropriate approvals or certifications in connection with the receipt of the proceeds of a \$15 million interest free loan originally from the Natural Resources Bond Act of 1980, received from the State of New Jersey, the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be determined, received from the Hackensack Meadowlands Development Commission (both pursuant to an amended consent judgment between the County, the Hackensack Meadowlands Development Commission and the New Jersey Department of Environmental Protection) and either (a) provision of the equivalent of a \$25 million grant received from the State of New Jersey or any of its agencies for the Facility or (b) certification by the Committee on Finance that the \$25 million has become available from other sources allocated for the State of New Jersey, have not as yet been made or received, this opinion is based upon the assumption that such permits are issued, such agreements are executed with terms and conditions to effectuate the major provisions summarized in the April 11, 1985 minutes and such approvals or certifications are made or received. It is therefore recommended that reaffirmation of this certification on or before November 30, 1985, be subject to the occurrence of the foregoing; provided, however, that there is no substantial adverse change in the economic basis for this certification prior to its reaffirmation.

While the Acting Chief Financial Officer has given an opinion that the Facility is financially viable and that its effectuation will not impair the credit or future borrowing capacity of the Port Authority, he has identified a substantial business risk related to the Facility which is unquantifiable and thus, has not been reflected in the Facility economics upon which his opinion is based. There is a risk that the Port Authority may be subjected to liability or other increased costs for certain environmental matters with respect to the site, the operation of the Facility or the composition of the solid waste delivered to the Facility, the risk of which is presently uninsurable and not amenable to guaranteed limitation. The Director of the Economic Development Department has advised that based on Port Authority staff analyses and that of independent experts retained by the Port Authority evaluating the technology to be used at the Facility and the methods to be used in site preparation, which he believes to be accurate, it is not probable that the Port Authority will incur material liabilities or other increased costs arising with respect to the foregoing environmental matters. The Director of the Economic Development Department has also advised that such experts believe that mass burning technology (which includes the system proposed by REF-FUEL for the Facility), which has been used in over 200 mass burning plants in Europe, Japan and North America, is considered to be a proven technology, and that the analyses prepared by these experts, including an environmental impact statement, and the testimony of independent parties, satisfactorily demonstrate that the Facility is environmentally sound.

The Facility will be an additional facility of the Port Authority and, therefore, in connection with the first issuance of any Consolidated Bonds (or Notes) for purposes which include capital expenditures in connection with the Facility, the Port Authority is required by covenants with its bondholders to make a certification relating to the financial effect upon the Port Authority of the effectuation of the Facility as an additional facility of the Port Authority. Thus, certification is necessary if any portion of the proceeds of Consolidated Bonds or Consolidated Notes, the issuance of which in connection with this Facility is expected in the near future, is to be used for purposes of capital expenditures in connection with such additional facility.

The Acting Chief Financial Officer has reviewed the projected overall financial standing and condition of the Port Authority and the economics of the Facility on the basis of the issuance of Consolidated Bonds (including Consolidated Notes) to finance the Port Authority's total capital expenditures of or related to the Facility or moneys provided for financing provided in connection therewith.

The Acting Chief Financial Officer has also reviewed with the Commissioners his formal opinion to them consistent with Section 7 of the resolutions establishing outstanding series of Consolidated Bonds (including Consolidated Notes), subject to the foregoing, that in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility, the application of any portion of the proceeds of any such Consolidated Bonds or Consolidated Notes will not, during the periods 1985 through 2020, the traditional term of Consolidated Bonds, and 1985 through 1995, the immediately ensuing ten-year period associated with Consolidated Bonds or Notes with a maturity of less than ten years, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds.

(Board - 5/9/85)

In reaching this conclusion, the Acting Chief Financial Officer considered the covenants with holders of Port Authority Consolidated Bonds (including Consolidated Notes) to establish charges in connection with the Port Authority's facilities to the end that at least sufficient net revenues may be produced therefrom to provide for the debt service on all Consolidated Bonds, including those issued for the Facility.

It was therefore recommended that the Board make the above-described certification required by Port Authority bond covenants.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that certification is hereby made that, in the opinion of the Port Authority in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Essex County Resource Recovery Facility (the Facility) to be located in the City of Newark, New Jersey, subject to the issuance of all necessary permits, execution of the agreements authorized by the Board, at its meeting on April 11, 1985, in connection with the Facility and appropriate approvals or certifications in connection with the receipt of the proceeds of a \$15 million interest free loan originally from the Natural Resources Bond Act of 1980, received from the State of New Jersey, the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be finally determined, received from the Hackensack Meadowlands Development Commission (both pursuant to an amended consent judgment between Essex County, the Hackensack Meadowlands Development Commission and the New Jersey Department of Environmental Protection) and either (a) provision of the equivalent of a \$25 million grant received from the State of New Jersey or any of its agencies for the Facility or (b) certification by the Committee on Finance that the \$25 million has become available from other sources allocated to the State of New Jersey, the issuance of such Consolidated Bonds or Consolidated Notes will not, during the periods 1985 through 2020 and 1985 through 1995, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and it is further

RESOLVED, that the Committee on Finance be and it hereby is authorized to reaffirm said certification on behalf of the Port Authority at such time, on or before November 30, 1985, as such Consolidated Bonds or Consolidated Notes are issued, provided that all necessary permits have been issued, the agreements authorized by the Board, at its meeting on April 11, 1985, in connection with the Facility have been executed and the above-mentioned approvals or certifications have been received or made and, provided further, that there is no substantial adverse change in the economic basis for said certification; and it is further

(Board - 5/9/85)

RESOLVED, that in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such issuance other than the Facility, until such time as the Facility may be certified.

(Board - 5/9/85)

Bathgate Industrial Park - Amendment to Agreement with Ampco Printing Corporation

It was reported that the Board, at its meeting on January 13, 1983, authorized the Executive Director to enter into an agreement with Ampco Printing-Advertisers Offset Corporation, now Ampco Printing Corporation, (Ampco) for the letting of the entire approximately 82,000 square feet industrial building and adjacent parking and truck dock areas on Block 2915 at the Bathgate Industrial Park for an initial term not to exceed 24 years, 9 months.

The Executive Director executed the lease with Ampco on July 14, 1983. The lease agreement provides, among other things, that the Port Authority would provide Ampco with \$950,000 worth of finishing work in the premises and, in addition, the Port Authority would advance up to \$2.6 million for the purchase of certain equipment and the performance of certain finishing work in excess of that included in the lease agreement, with such advance to be repaid at a 12% annual rate of interest over fifteen years on a self-liquidating basis.

The total cost of equipment and finishing work spent to date amounts to approximately \$5.8 million, of which the Port Authority has advanced \$3.5 million and Ampco has provided \$2.3 million from its own resources. Of the total, Ampco has spent approximately \$3.2 million to relocate its printing operation from Manhattan and for acquisition, transportation, refurbishing and installation of equipment at the Bathgate plant. Ampco has also spent about \$2.6 million for finishing work mostly in the manufacturing portion of the Port Authority-owned building.

Ampco began its relocation from midtown Manhattan in March 1984, and was scheduled to be in their new facility at Bathgate by July 1984. Due to construction delays, Ampco completed their transfer to Bathgate in October 1984, four months later than planned. During most of 1984, Ampco's management concentrated their time and effort on administrative, relocation and construction matters rather than on the management and expansion of the business. As a result, sales for the fiscal year ended March 31, 1985 declined from the prior year.

In the spring of 1984, Ampco arranged for additional financing of up to \$600,000 through an equipment lease financing which required a personal guarantee by the President and majority stockholder of the company, Mr. Seymour Udell. Prior to completion of that transaction, Mr. Udell passed away and the equipment lease financing was cancelled. The combined effect of the construction delays, which required Ampco to incur rent expenses at both the Manhattan and Bronx facilities, the higher cost of the new facility, the inexperience of the company with respect to construction and relocation matters, the time they devoted to these matters, and the death of its President, impaired Ampco's ability to generate the amount of cash needed to finish the entire building.

Staff has reviewed Ampco's situation and determined that it is in the Port Authority's interest to increase the amount of funds available to be advanced under the terms of the existing lease from \$2.6 million to \$3.2 million. The additional \$600,000 will be used for finishing the office and interior space including the purchase of furniture and fixtures, making payments to contractors and consultants for finishing work in the manufacturing space, and for the purchase and installation of environmental control equipment which is necessary to meet U.S. Environmental Protection Agency standards regarding emissions from their printing press dryer stacks.

(Board - 5/9/85)

This additional equipment and building finishes advance amount may be requested by Ampco over a 24-month period during which Ampco will pay additional monthly rental to the Port Authority, during this 24-month period, calculated by multiplying the cumulative amount advanced by .010833. At the conclusion of this 24-month period, Ampco will make additional annual rental payments to the Port Authority for fifteen years, calculated by multiplying the total amount advanced by .154742. The Port Authority's recovery of this new investment is financially self-sustaining.

Ampco Printing, our first tenant at the Bathgate Industrial Park, has been most cooperative in showing its space to Port Authority staff, municipal and economic development entities who are interested in the progress at Bathgate, and several of our tenant prospects who sought to interview our existing tenants. Ampco has become an excellent public relations arm of our industrial development program.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement with Ampco Printing-Advertisers Offset Corporation, now Ampco Printing Corporation, (AMPCO), amending its lease with the Port Authority on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to amend the existing lease agreement with Ampco Printing-Advertisers Offset Corporation, now Ampco Printing Corporation, (AMPCO) to advance to Ampco an additional sum not to exceed \$600,000 for payment to contractors and consultants for building finishes and for additional equipment in the Port Authority industrial building on Block 2915 at the Bathgate Industrial Park, with such advance to result in additional annual rental payments over a seventeen-year period; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 5/9/85)

The World Trade Center - Fund for Regional Development Lease with Lumbermens Mutual Casualty Company; Sublease by Lumbermens to The First Boston Corporation

It was reported that Lumbermens Mutual Casualty Company currently occupies approximately 58,000 square feet of office space in Five World Trade Center under a lease which commenced in 1977 and expires on January 31, 1998. The amount of space is now considerably more than is required for the recently re-organized Lumbermens New York City operation. Consequently, tentative agreement has been reached with Lumbermens, subject to the Board's approval, for the leasing by the Port Authority on behalf of the Fund for Regional Development of approximately 43,500 square feet of space recently vacated by New York State in Two World Trade Center and for the subleasing by Lumbermens of its present Five World Trade Center space to The First Boston Corporation which presently has a substantial leasehold in that building.

The Two World Trade Center space would be turned over to Lumbermens Mutual Casualty Company upon execution of the agreements with Lumbermens and First Boston so that Lumbermens could rebuild that space and then vacate its Five World Trade Center premises by approximately October 1, 1985 with the possibility that Lumbermens could sub-lease to First Boston a portion of its space, not exceeding 15,000 rentable square feet, prior to such date. Lumbermens would pay a basic rental rate of \$29 per rentable square foot per year, commencing four months after it moves into the space and commences business operations therein, through January 31, 1998. Charges for electricity and cleaning would be additional. Lumbermens would also pay additional rent to cover increases in operating costs at the rate of 8/10 cents per rentable square foot per year for each 1 cent increase in the Porters' wage rate without fringe benefits above the Porters' wage rate without fringe benefits in effect on January 1, 1985; Lumbermens would also pay additional rent to cover increases in payments in-lieu-of taxes. Lumbermens would receive an allowance of \$16.50 per rentable square foot toward the reconstruction of the premises which would include the installation of a sprinkler system and would also receive an additional payment of \$87,000 as reimbursement for its previously expended design costs associated with a similar (although more favorable) arrangement involving Lumbermens and First Boston which the Board authorized at its meeting on February 9, 1984. Due to timing problems, involving the availability of the Fund space, the agreements were never executed.

Lumbermens will sublease its present premises in Five World Trade Center to First Boston effective upon Lumbermens move into the Two World Trade Center space, approximately October 1, 1985, and continuing through January 1998. First Boston's sublease rent would be at the rate of \$30 per rentable square foot per year for years one to five, \$33 per rentable square foot per year for years six to ten and \$37 per rentable square foot per year for years eleven through January 1998 (approximately 2 1/3 years). Charges for electricity and cleaning will be additional. The First Boston Corporation would also pay additional rent to cover increases in operating costs at the rate of 1 cent per rentable square foot per year for each 1 cent increase in the Porters' wage rate with fringe benefits above the Porters' wage rate with fringe benefits in effect on January 1, 1985; First Boston would also pay additional rent to cover increases in payments in-lieu-of taxes above those payable for the 1984-1985 tax year.

(Board - 5/9/85)

In order to compensate Lumbermens for the substantially higher rent on the Two World Trade Center space, for approximately 2 1/3 years (until January 31, 1988) they will be permitted to retain all or most of the amounts paid by First Boston in excess of the amounts Lumbermens would have paid for the subleased premises; from that date through the end of the term of the letting in 1998, Lumbermens and the Port Authority will share equally the amounts paid by First Boston in excess of the amount Lumbermens' would have paid for the subleased premises.

Instead of a sublease of the Five World Trade Center space from Lumbermens to First Boston, the transaction may be effected either by an assignment of Lumbermens' lease to First Boston or by the cancellation of Lumbermens' lease and a direct lease from the Port Authority to First Boston Corporation. In the event of either of these alternatives, Lumbermens' share of the amounts payable by First Boston in excess of the amounts Lumbermens would have paid for the subleased premises may be paid in a single payment discounted to the time of payment.

A real estate brokerage commission will be payable by the Fund for Regional Development to Kenneth D. Laub & Co. for the Lumbermens Mutual Casualty Company lease at Two World Trade Center at rates not in excess of those authorized by the Board at its meeting on August 11, 1977.

It was therefore recommended that the Board, on behalf of the Fund for Regional Development authorize a lease with Lumbermens Mutual Casualty Company, and on behalf of the Port Authority authorize an arrangement whereby Lumbermens Mutual Casualty Company's existing space would be leased to The First Boston Corporation, all on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Port Authority, acting on behalf of the Fund for Regional Development, to enter into a lease with Lumbermens Mutual Casualty Company for approximately 40,000 rentable square feet of space on the 31st floor in Two World Trade Center recently vacated by the State of New York and approximately 3,500 rentable square feet on another New York State floor which will be determined; and it is further

RESOLVED, that the Board authorize an arrangement whereby Lumbermens Mutual Casualty Company's present space in Five World Trade Center would be leased to The First Boston Corporation; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 5/9/85)

Howland Hook Marine Terminal - Agreements with The City of New York, United States Lines, Inc. and other Appropriate Parties

It was reported that United States Lines, Inc. has been the lessor of the Howland Hook Marine Terminal under agreement with The City of New York since 1974 for a term now expiring August 30, 2006. United States Lines, Inc. is in the process of acquiring a new fleet of huge containerships with a capacity in excess of 4,200 20-foot equivalent containers. These ships have been positioned in United States Lines' new around-the-world service, implementing the load center concept in that they will only make two port calls on the East Coast, Savannah and New York.

In order for United States Lines to continue to use the Port of New York, substantial investment in the Terminal is required. United States Lines and the City have been discussing the necessary improvements over the past year. Both parties requested the Port Authority's involvement in arrangements for the Terminal improvements.

A Memorandum of Understanding dated April 17, 1985 has been signed with The City of New York and United States Lines, Inc., setting forth the understanding arrived at among the parties with respect to the Howland Hook arrangement. It specifically notes that all agreements necessary to implement the Memorandum are subject to the approval of the Port Authority Board of Commissioners, the New York City Board of Estimate and the Board of Directors of United States Lines. That Memorandum generally sets forth the understanding as follows:

United States Lines, Inc., with the consent of the City, will assign the Terminal lease to the Port Authority for a term ending 35 years following the third anniversary of its effective date, upon either a resolution by the Board of Estimate or upon approval by the Federal Maritime Commission, whichever is later. The action will constitute an effective term of 38 years. The Port Authority will pay the rent to the City which will be an amount not to exceed \$5.5 million per year. Rent to the City could be somewhat less if certain construction now covered by the lease is not completed. The Port Authority will sublease the Terminal to United States Lines including additional property which will have to be acquired from others and from the City for the new Terminal arrangement.

The Port Authority will reimburse United States Lines for on-site improvements to the Terminal in two phases. Phase I in the amount of approximately \$60 million and Phase II in the amount of approximately \$25.7 million. Phase I improvements will include demolition of existing structures to create necessary open area, construction of new facilities including LCL (less than container load), building, maintenance and repair building, administration building, installation of four new and improvement of two existing container cranes, deepening of berths and on-site rehabilitation. Phase I and the amounts set forth above also includes the acquisition of certain properties from others. Phase II will include expansion of the berthing area and development of additional upland. In addition, the project includes an allowance for 300,000 square feet of distribution buildings to serve the Howland Hook Terminal. Such buildings will be advanced as market conditions and rent/cost relationships indicate that they will be financially self-sustaining.

Upon commencement of the sublease, United States Lines will pay to the Port Authority the rental presently paid to the City, approximately \$5.5 million. Additional rentals up to \$5.5 million per year are payable and are based upon reimbursement by the Port Authority of \$60 million during Phase I and up to \$1.375 million based upon reimbursement of \$25.7 million during Phase II. Upon completion of Phase I and Phase II, United States Lines will pay to the Port Authority a basic rental of \$6,187,500 per year plus a rental based upon a unit fee of \$22.50 per container with an agreed minimum annual rental based on throughput of 275,000 containers. The unit fee will be escalated by 7½% on each third anniversary of the completion of Phases I and II. The minimum rental following the completion of Phases I and II and dredging of a 40-foot channel to Howland Hook would be \$12,375,000.

If at the time of the completion of Phases I and II, the channel leading to Howland Hook has not been dredged to 40 feet below mean low water, then the basic rental will be \$4,812,500 and the unit fee \$17.50 until the dredging is completed. Under the terms of the Memorandum, the Port Authority will assure the dredging of access channels to Howland Hook and the berths of the Terminal to a depth of 40 feet and will maintain the berths of the Terminal to that depth. The dredging of berths is part of Phase I work. The parties recognize that it is the Port Authority's intention to pursue Congressional and other governmental approval, including Federal reimbursement for the access channel work. The Memorandum provides that should additional funds be necessary to complete the Phase I and II construction, all parties will not unreasonably withhold approvals for additional funds to be reimbursed with United States Lines incurring additional rental based on the Port Authority's then cost of borrowing used therefore times 1.0 coverage plus 7½%.

As part of the total above stated, the Port Authority will pay the acquisition costs of the specific properties to implement the improvements to the Terminal. The Port Authority will transfer all property acquired to the City at no cost on or before the expiration of the lease. Additional City owned lands are to be included as part of the lease at no additional rent.

The City shall implement a traffic study at its own cost to determine the improvements necessary for access and egress to and from the Terminal and movement of Terminal traffic on proximate streets and thoroughfares and for essential utilities. The Port Authority shall reimburse the City for up to the first \$5 million of the cost of such necessary traffic and utility improvements. The City will pay the balance of such improvement costs.

The assignment of the lease and the sublease with United States Lines shall not be effective until the Federal Maritime Commission either approves or denies jurisdiction over the agreements or upon a resolution of the Board of Estimate, whichever is later. It will be the City's responsibility to fund the project until the agreement is effective.

Authorization is being sought from the Board to grant to the Executive Director the authority to negotiate and enter into the necessary agreements, applications and other documents with The City of New York, United States Lines, Inc. and other appropriate parties with respect to the final terms and provisions of the agreements which would effectuate the arrangements set forth in the Memorandum and take such appropriate actions to implement the same and authorize the expenditure of such monies as may be deemed appropriate. It being understood that the amounts to be expended with respect to the project outlined above, excluding any amounts which may be required for the dredging of the access channels for which separate authorization shall be sought, shall not exceed \$110 million. Appropriate certifications, including those necessary to affect the project to be undertaken and in connection with the holders of Port Authority obligations, will be presented to the Board as they are developed.

(Board - 5/9/85)

It was therefore recommended that the Board authorize the project for the development and modernization of New York City's Howland Hook Container Terminal and that the Board authorize the Executive Director on behalf of the Port Authority to enter into various agreements and take such actions as set forth above with respect to the Terminal on the terms and conditions as outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for the development and modernization of New York City's Howland Hook Container Terminal in Staten Island, including new cranes, buildings, berth expansions and rail intermodal improvements at an estimated cost of \$100-\$110 million be authorized; and it is further

RESOLVED, that the Board authorize the Executive Director to: (a) enter into an agreement or agreements with The City of New York and United States Lines, Inc. covering the assignment to the Port Authority of its lease covering the Howland Hook Marine Terminal, with appropriate amendments; (b) enter into a sublease with respect to the Terminal with United States Lines, Inc.; (c) enter into agreements with United States Lines, Inc., or others, or both, with respect to improvements and acquisitions to and for the Terminal; (d) enter into an agreement or agreements with The City of New York to reimburse the City for off-site improvements and (e) enter into such other agreements and take such other actions as may be necessary and appropriate to accomplish the foregoing; and it is further

RESOLVED, that the form of all the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 5/9/85)

Port Authority Employment Relations Panel - Appointment of New York Member, Philip J. Ruffo, Esq.

It was reported that the Board, at its meeting on September 29, 1976, adopted a revised Port Authority Labor Relations Instruction, subsequently amended on December 8, 1983, which provided for the establishment of a Port Authority Employment Relations Panel with responsibility for resolving disputes arising from the designation of managerial and confidential and supervisory employees, assisting in resolving negotiating impasses, processing improper labor practice charges and processing petitions for certification or decertification of employee organizations as negotiating representatives of Port Authority employees.

The Labor Relations Instruction further provides for the members of the Panel to be appointed for overlapping, three-year terms. The term of the New York Member of the Panel expired on December 31, 1984 and his successor is to be appointed for a term to expire on December 31, 1987, upon the written recommendation of the Chairman of the New York Public Employment Relations Board (PERB).

On March 14, 1985, Harold R. Newman, Chairman of PERB, after consultation with representatives of employee organizations, recommended that Philip J. Ruffo, Esq., a distinguished labor neutral and Professor of Law at New York Law School, be reappointed as New York Member for the new three-year term. Mr. Ruffo was first appointed as the New York member of the Panel on July 14, 1983, to serve the remainder of the term of Joseph R. Crowley, Esq., the New York Member of the Panel since February 1, 1982, who was appointed Chairman of the Panel on May 12, 1983.

Professor Crowley, Associate Dean of Fordham University School of Law, continues to serve as Chairman of the Panel until December 31, 1985, while John J. Pearce, Jr., former Executive Director of the New Jersey State Board of Mediation, continues as the New Jersey Member until December 31, 1986.

Members of the Panel, who are subject to removal or dismissal only upon charges and after a hearing before a hearing officer appointed jointly by the Chairman of PERB and its New Jersey counterpart, the Public Employment Relations Commission, may also appoint hearing officers, mediators, factfinders, attorneys or others, to assist them in their functions and to provide for their reimbursement and compensation at rates set pursuant to the Labor Relations Instruction. The Panel members themselves are compensated for each day spent in attendance at meetings or consultation or in the preparation of reports of determinations and are reimbursed for expenses actually incurred by them in the performance of their duties, all of which are further specified in the Labor Relations Instruction.

It was therefore recommended that the Board appoint Philip J. Ruffo, Esq., as New York Member of the Port Authority Employment Relations Panel for a term expiring December 31, 1987, in accordance with the Port Authority Labor Relations Instruction.

(Board - 5/9/85)

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that Philip J. Ruffo, Esq., be and he hereby is appointed New York Member of the Port Authority Employment Relations Panel for a term expiring December 31, 1987.

Whereupon, the meeting was adjourned.

Thomas C. Young, Jr., Principal Information Officer, Public Affairs

The Meeting was called to order by the Acting Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of May 9, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on June 13, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on June 13, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on June 13, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on June 13, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 6/13/85)

Howland Hook Marine Terminal - Facility Certification

It was reported that the Board, at its meeting on May 9, 1985, authorized a project for the development and modernization of New York City's Howland Hook Marine Terminal in Staten Island, the City of New York, New York (the Facility), at an estimated cost of \$100 to \$110 million. The Executive Director was authorized to negotiate and enter into agreements necessary to effectuate the project, including agreements with the City of New York (the City), United States Lines, Inc. (U.S. Lines), and others as may be necessary and appropriate.

It was reported to the Board at its May 9, 1985 meeting that the property known as the Howland Hook Marine Terminal was leased by U.S. Lines from the City of New York since 1974. However, as the Marine Terminal is in need of substantial investment, U.S. Lines and the City requested the Port Authority's involvement in the management and improvement of the Marine Terminal in order for U.S. Lines to continue to use the Port of New York and New Jersey.

U.S. Lines is the single largest carrier for shipping on the New York side of the Port of New York and New Jersey and had been considering relocating part of its operations to another port as substantial improvements were needed to the Marine Terminal in order for it to handle the company's newly acquired fleet of large capacity containerships. In view of the foregoing, the Port Authority has decided to proceed with the modernization of the Facility, which would be part of the proposed Bi-State Port Development Program. While the project will not be provided on a financially self-sustaining basis, it is expected to solidify the Port's position as a load center for decades to come.

On April 17, 1985 a Memorandum of Understanding was signed among the City, U.S. Lines and the Port Authority, setting forth the parties' understanding with respect to the Port Authority's leasing, management and improvement of the Marine Terminal. U.S. Lines, with the consent of the City, is to assign its Marine Terminal lease to the Port Authority for a term which is to extend to 35 years following the third anniversary of the effective date of the lease assignment, and sublease, which shall be effective after all documents are executed and upon either a resolution of consent by the City's Board of Estimate or approval or denial of jurisdiction by the Federal Maritime Commission, whichever occurs later. The Port Authority is to sublease the Marine Terminal to U.S. Lines along with additional property which may be acquired by the Port Authority from others and from the City for the new arrangement.

Total capital expenditures for the Facility are estimated at \$100 to \$110 million for new cranes, land acquisition, buildings, berth expansions and rail intermodal improvements. Of this total the Port Authority is to reimburse U.S. Lines approximately \$85.7 million for land acquisition and on-site improvements to the Facility in two phases, reimburse the City up to \$5 million for the cost of necessary traffic and utility improvements, and, consistent with any necessary amendments to the City lease, spend approximately \$13 million for land acquisition, if necessary, and development/construction of up to 300,000 square feet of distribution buildings to serve the Facility as market conditions and rent/cost relationships indicate that they will be financially self-sustaining.

Should additional funds be necessary to complete the Phase I and Phase II construction, further approval by the Board will be sought, although the Memorandum provides that all parties will not unreasonably withhold approvals. If additional funds are authorized to be reimbursed to U.S. Lines, U.S. Lines would pay additional rental to the Port Authority.

(Board - 6/13/85)

The Port Authority has further agreed that it will assure the dredging of access channels in the Kill Van Kull and the Arthur Kill to Howland Hook and the berths of the Facility to a depth of forty feet and will maintain the berths of the Facility to that depth. The costs for this channel dredging are not included as part of the Facility's costs. Board authorization for this work will be sought as part of the proposed Bi-State Port Development Program. The Port Authority will pursue reimbursement of any funds expended for access channel work from the United States Government. To cover the Port Authority share of the dredging cost which may not be reimbursed by the United States Government, the Port Authority also plans to take advantage of any port-wide user charges which may be authorized by future Port legislation.

The Acting Chief Financial Officer, has submitted his formal opinion reviewing the Facility based upon the description of the Facility and the major provisions of the various agreements to be executed as described in the Board minutes of May 9, 1985 and, the Memorandum of Understanding of April 17, 1985, and upon supplemental information provided by the Director of the Port Department and the Director of Engineering/Chief Engineer. However, since the resolution of necessary actions by either the Federal Maritime Commission or the City's Board of Estimate have not as yet been made and the agreements described in the minutes of the Board's May 9, 1985 meeting have not as yet been executed, this opinion is based upon the assumption that such agreements are executed with terms and conditions to effectuate the major provisions summarized in the May 9, 1985 minutes and such necessary actions are taken. It is therefore recommended that reaffirmation of this certification, on or before December 31, 1985, be subject to the occurrence of the foregoing, provided that there is no substantial adverse change in the economic basis for this certification prior to its reaffirmation.

The Facility will be an additional facility of the Port Authority and, therefore, at the time of the first issuance of any Consolidated Bonds (or Notes) for purposes which include capital expenditures in connection with the Facility, the Port Authority is required by covenants with its bondholders to make a certification relating to the financial effect upon the Port Authority of the effectuation of the Facility as an additional facility of the Port Authority. Thus, certification is necessary if any portion of the proceeds of Consolidated Bonds or Consolidated Notes, the issuance of which in connection with this Facility is expected in the near future, is to be used for purposes of capital expenditures in connection with such additional facility.

The Acting Chief Financial Officer has reviewed the projected overall financial standing and condition of the Port Authority and the economics of the Facility on the basis of the issuance of Consolidated Bonds (including Consolidated Notes) to finance the Port Authority's total capital expenditures of or related to the Facility or moneys provided for financing provided in connection therewith.

The Acting Chief Financial Officer has also reviewed with the Commissioners his formal opinion to them consistent with Section 7 of the resolutions establishing outstanding series of Consolidated Bonds (including Consolidated Notes), subject to the foregoing, that in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures for the Facility, the application of any portion of the proceeds of any such Consolidated Bonds or Consolidated Notes will not, during the periods 1985 through 2020, the

(Board - 6/13/85)

traditional term of Consolidated Bonds, and 1985 through 1995, the immediately ensuing ten-year period associated with Consolidated Bonds or Notes with a maturity of less than ten years, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds.

In reaching this conclusion, the Acting Chief Financial Officer considered the covenants with holders of Port Authority Consolidated Bonds (including Consolidated Notes) to establish charges in connection with the Port Authority's facilities to the end that at least sufficient net revenues may be produced therefrom to provide for the debt service on all Consolidated Bonds, including those issued for purposes of capital expenditures in connection with the Facility.

It was therefore recommended that the Board:

1. certify that, in the opinion of the Port Authority in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures for the Howland Hook Marine Terminal to be located in Staten Island, the City of New York, New York (the Facility), subject to appropriate approvals, the resolution of necessary actions by either the Federal Maritime Commission or the Board of Estimate of the City of New York and execution of the agreements authorized by the Board at its meeting on May 9, 1985, in connection with the Facility, the issuance of such Consolidated Bonds or Consolidated Notes will not, during the periods 1985 through 2020 and 1985 through 1995, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds;

2. authorize the Committee on Finance to reaffirm said certification on behalf of the Port Authority at such time, on or before December 31, 1985, as such Consolidated Bonds or Consolidated Notes are issued, subject to the above-mentioned approvals and agreements and, provided that there is no substantial adverse change in the economic basis for said certification; and

3. provide that in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such issuance other than the Facility, until such time as the Facility may be certified.

(Board - 6/13/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that certification is hereby made that, in the opinion of the Port Authority, the issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures for the Howland Hook Marine Terminal, to be located in Staten Island, the City of New York, New York (the Facility), subject to appropriate approvals, the resolution of necessary actions by either the Federal Maritime Commission or the Board of Estimate of the City of New York and execution of agreements authorized by the Board at its meeting on May 9, 1985, will not, during the periods 1985 through 2020 and 1985 through 1995, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and it is further

RESOLVED, that the Committee on Finance be and it hereby is authorized to reaffirm said certification on behalf of the Port Authority at such time, on or before December 31, 1985, as such Consolidated Bonds or Consolidated Notes are issued, subject to the above-mentioned approvals and agreements, and provided that there is no substantial adverse change in the economic basis for said certification; and it is further

RESOLVED, that in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes, and the proceeds thereof shall be used for the stated purposes of such issuance other than the Facility, until such time as the Facility may be certified.

(Board - 6/13/85)

Port Newark - Interamerican Juice Co., Inc. - Additional Port Authority Investment

It was reported that the Board, at its meeting on April 12, 1984, authorized a twenty-five year lease with Interamerican Juice Co., Inc., for a 135,000 square feet site at Berth 24, Port Newark, with reimbursement by the Port Authority of up to \$4 million for the cost of the realty portion of construction of a bulk orange juice concentrate tank farm. At that time, Interamerican estimated the project to cost \$7 million, which was a preliminary planning estimated for a complex installation which is the first of its kind in the United States. Interamerican's contractor's final project estimate of August 1984 was \$10.5 million, which has now increased to \$11.9 million. Interamerican has requested an additional investment by the Port Authority of up to \$3 million to cover the cost of completing the building, storage tanks and other equipment.

This arrangement would provide for the repayment over a ten-year period of up to \$3 million plus imputed interest during construction for which Interamerican would pay an additional monthly rental of \$.014784 for each dollar of Port Authority investment. In order for the tenant to take advantage of certain tax benefits, at the end of the ten-year period, Interamerican will pay the Port Authority an additional \$1,000 as the full purchase of the equipment and, thereafter, the lessee shall be the owner of the equipment. Interamerican would have the right to accelerate the rental payments related to the Port Authority investment and in consideration of the acceleration would pay between the first and third year an additional amount equal to .03 of the accelerated rental; and between the fourth and sixth year with the additional amount to be .02 of the accelerated rental; and seven and ninth year .015 of the accelerated rental.

The Interamerican facility, which will be operational June 1, 1985, is expected to receive 100,000 tons of orange juice concentrate in its first year of operation, which is a 67% increase over its original projection of 60,000 tons per year.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease with Interamerican Juice Co., Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement with Interamerican Juice Co., Inc., providing for an additional investment by the Port Authority in the Port Newark orange juice concentrate storage facility of up to \$3 million which would be repaid by Interamerican over a ten-year period commencing June 1, 1985, at an additional monthly rental of \$.014784 for each dollar of Port Authority investment; the said lease to be in accordance with the foregoing; the form of the lease to be subject to the approval of General Counsel or his designated representative.

(Board - 6/13/85)

Port Newark/Elizabeth-Port Authority Marine Terminal - Lease with Cargill, Inc.

It was reported that Cargill Citro-American, Inc. is involved in the marketing, handling and processing of bulk commodities on a worldwide basis. With over 700 plants or offices in 48 countries and 40,000 employees, Cargill handles commodities as diverse as scrap metal, molasses, cotton, fertilizer and orange juice. Cargill entered the fruit juice business in 1977 with the purchase of an orange grove in Brazil and were the first to export Brazilian orange juice concentrate in bulk to the United States. They are presently shipping directly to Tampa, Florida, and wish to establish a facility at the Port Newark/Elizabeth-Port Authority Marine Terminal for the storage, blending and distribution of Brazilian orange juice concentrate, as well as other fruit juices and corn sweeteners. This facility follows the Interamerican Juice project and together should generate an estimated 160,000 tons per year of orange juice concentrate, a commodity new to the Port of New York/New Jersey. The proposed Cargill project, estimated to bring in approximately 60,000 tons per year, would include a building of approximately 25,650 square feet accommodating fourteen storage tanks with a capacity of approximately 2½ million gallons, a blending room and administrative offices, at an estimated cost of approximately \$6 million. Title to the equipment at Cargill's option will pass to Cargill at the end of the lease or upon termination.

The agreement with Cargill would provide for the following:

1. A 25 year lease commencing upon completion of construction but not later than September 1, 1986, unless the Executive Director authorizes an extension of the construction period;

2. A total annual rental of approximately \$815,504 with subsequent increases every two years based on the following:

a) repayment over the 25-year term of a maximum of \$6 million at a monthly rent of \$.009801 for each dollar of Port Authority investment;

b) \$77,832.50 per year for the 155,665 square foot leasehold;

c) \$.70 per ton on all the lessee's cargo loaded or unloaded at Berth 50 with an annual guarantee of \$28,000; and

d) \$.10 per gross registered ton per day of vessels loading or unloading the lessee's cargo at Berth 50.

The above land, cargo, and vessel rates shall be increased every two years by 50% of the percentage in the Regional Consumer Price Index between the lease commencement and the effective date of the increase.

(Board - 6/13/85)

3. In addition to the above, Cargill would also rent a small building of approximately 1,350 square feet located on the site for use as an administrative office during the construction period. The lease would be for a one-year term at an annual rental of \$7,425, with the right to either demolish the building upon expiration or extend for a term coterminous with the basic lease at a rate subject to negotiation. This building is presently leased by the Archdiocese of Newark for use as a chapel, which will be relocated to another site at Port Newark.

The lease would provide that both parties will conduct negotiations for an extension of the lease subject to all terms and conditions being mutually agreed upon by the 24th anniversary. Cargill shall have the right to terminate the letting at the end of fifteen years upon two years' written notice and the Port Authority shall have the right to terminate if the tenant is prevented from making use of the facilities substantially for waterborne products for a period of eighteen months or longer. In the event of termination by either party as described above, the tenant shall pay the balance of the unamortized investment; remove all improvements at the Port Authority's option; and, pay an amount equal to the basic land rent for two years at the rate in effect at the time of termination.

Like Interamerican Juice, a significant factor in attracting Cargill to this location was the Port Authority's flexibility in being able to offer Foreign-Trade Zone status at any site within the Port Newark/Elizabeth-Port Authority Marine Terminal. Foreign-Trade Zone activation of the Berth 50 site will enable Cargill to defer Customs' duties on the Brazilian orange juice concentrate, eliminate the payment of duties on any re-exported cargo and possibly reduce duty on certain blended projects.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into a Lease with Cargill, Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director on behalf of the Port Authority to enter into a twenty-five year lease with Cargill, Inc., with a simultaneous assignment to Cargill Citro-American, Inc., for approximately 3.6 acres at Berth 50 commencing upon completion of construction but not later than September 1, 1986 at an initial annual rental of \$815,504 and that the agreement provide for an investment by the Port Authority of up to \$6 million for the construction of a bulk juice concentrate storage facility; the said lease to be in accordance with the foregoing; the form of the lease to be subject to the approval of General Counsel or his designated representative.

(Board - 6/13/85)

Trans-Hudson Program - Increasing Public Transit Capacity to Lower Manhattan

It was reported to the Board, that the institution of a ferry service from Hoboken to lower Manhattan can be a strategic element in providing a significant new, high quality Trans-Hudson capacity for over 55,000 peak-period PATH and ferry commuters expected to travel to lower Manhattan each day. Such a ferry service could not only provide added capacity in the Hoboken-World Trade Center corridor, but could also permit improved flexibility in the entire PATH operation to better serve PATH's commuters destined to the World Trade Center and midtown areas.

The ferry service under consideration is a unique "system" patterned after the successful Sea-Bus operation in Vancouver, British Columbia. Commuter terminals with the capacity for up to an eight-vessel fleet would be located in the existing Hoboken Ferry Terminal and on the lower west side of Manhattan in the vicinity of the World Trade Center. The vessel and terminal system would be designed for very rapid loading and unloading (under one minute) and each double-ended catamaran vessel would accommodate 600 seated passengers. The travel time between Hoboken and lower Manhattan would be comparable to PATH and the fleet of vessels would permit rush hour service every four minutes. Operating during the peak weekday commuting hours, the ferry system alone would have an ultimate capacity to handle more than 9,000 people per hour.

With the tremendous capacity and flexibility of the ferry system, PATH would then be able to move appropriately and quickly to balance train allocations on the system to provide a higher quality of service (less crowding) than is possible today, maximizing benefits for all downtown transit commuters.

The next steps in the planning process for this series of downtown transportation capacity and quality improvements involve several items which need to move forward expeditiously. These include: alternative design configurations of the ferry vessels and terminals; negotiation of agreements with respective property owners of the terminal areas, and other necessary parties in New Jersey and New York and obtaining their concurrence on the recommended terminal design; preparation and submission of applications for regulatory and environmental permits and applications and, a formal process of solicitation of private operator interest in aspects of operation of the Hoboken to lower Manhattan ferry service. In addition, staff will develop a financial plan for the ferry system to address operating costs within the context of the entire Trans-Hudson System.

The cost for staff and professional advisory services for these next steps is estimated at \$8.5 million.

It was therefore recommended that the Board authorize the Executive Director to take the following steps related to the continued planning and design for a Hoboken to lower Manhattan ferry service at a cost not to exceed \$8.5 million:

1. preparation of detailed Stage I and II vessel and terminal engineering designs and capital cost estimates and appropriate operational analyses, including the retention of appropriate professional advisory services;
2. subject to final approval by the Board, negotiation of agreements on behalf of the Port Authority to obtain approvals and appropriate rights and property interests for potential ferry terminal facilities;

(Board - 6/13/85)

3. preparation and submission of applications for regulatory and environmental permits and approvals;

4. determination of interest of various operators in the whole or joint operation of a Hoboken to lower Manhattan ferry service; and,

5. exploration with the two states as to how most responsibly to manage the operating costs of a potential ferry system within the context of the entire Trans-Hudson system.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized to take the following steps related to the continued planning and design for a Hoboken to lower Manhattan ferry service at a cost not to exceed \$8.5 million: (1) preparation of detailed Stage I and II vessel and terminal engineering designs and capital cost estimates and appropriate operational analyses, including the retention of appropriate professional advisory services; (2) subject to final approval by the Board, negotiation of agreements on behalf of the Port Authority to obtain approvals and appropriate rights and property interests for potential ferry terminal facilities; (3) preparation and submission of applications for regulatory and environmental permits and approvals; (4) determination of interest of various operators in the whole or joint operation of a Hoboken to lower Manhattan ferry service; and (5) to proceed with further analysis on the issue of operating costs within the overall context of the Trans-Hudson system with awareness of the need for full exploration of the different opinions on this issue by the Board.

(Board - 6/13/85)

Trans-Hudson Program - Retention of Professional Services and Agreements with other Agencies for Planning Improvements

It was reported that in response to the forecast of continued growth in Trans-Hudson travel demand on top of current congestion at the Trans-Hudson crossings, staff, in conjunction with professional advisory firms and other agencies, has been conducting research and developing solutions designed to improve travel time and/or increase capacity. The Board, at its meeting on June 14, 1984, authorized Parsons, Brinckerhoff, Quade and Douglas, Inc., to undertake a preliminary analyses of such short and mid-term solutions. The study, which concentrated on lower Manhattan crossings, has been completed. In addition, staff of the Port Authority and other agencies have identified other potential projects to increase capacity of the systems including its feeder network. Staff resources are not sufficient to support the multiple feasibility analyses and physical planning efforts required to advance these potential projects, as well as the research necessary to support the program at a level and pace required.

The Trans-Hudson transportation network, composed of a feeder network as well as the Hudson River Crossings, is the responsibility of a number of public agencies and private companies. Therefore, at times, it will be appropriate for the Port Authority to pool resources with others to advance the planning of specific projects. In other instances it will be more appropriate for the Port Authority, independently, to retain professional services for planning a specific project while coordinating the effort with other agencies and private transit companies. This offers the opportunity to increase mass transit's share of the travel market through increased carrying capacity of the entire Trans-Hudson network.

The research conducted thus far has formed the basis for pursuing a number of planning initiatives. Further research work is required in order to detect changes which may affect planning efforts underway, to develop initiatives, and to provide more refined analyses required for specific projects. Items of work include (a) maintaining and improving Trans-Hudson data base as part of a monitoring program and to support specific projects, and (b) developing a profile of reverse (New York to New Jersey) commuters using the Trans-Hudson network. Also, a program of qualitative research will be performed to gauge underlying factors and attitudes with regard to choice of transportation mode. This research, which may include focus groups, indepth interviews and other qualitative techniques, will assess current travel behavior factors and probe reactions to new transit services and promotional efforts related to the Employee Liaison Transportation Program and other efforts.

The bulk of this new body of work will concentrate on improving access to midtown Manhattan, where a high concentration of Bergen County and Rockland County commuters still rely heavily on the auto as their mode of Trans-Hudson travel, and the Exclusive Bus Lane to the Lincoln Tunnel, which may be reaching capacity. Other portions of this effort will be devoted to exploring projects designed to increase capacity into lower Manhattan. Examples of projects include expansion of express bus lane service to the Lincoln Tunnel, park and ride lots, improved bus services to Trans-Hudson facilities and a bus ferry system. The bulk of the requested monies will be used to fund these projet planning efforts, specifically: physical and operational feasibility analysis and plans, and, an analysis and evaluation of the effectiveness of particular projects.

(Board - 6/13/85)

Where a firm is to be retained by the Port Authority, an interdepartmental panel will consider the qualifications of several firms and make a recommendation for retention of a specific firm based on the experience and the ability of the firm to undertake the planning effort within the required time frame. In addition to seeking minorities and women business enterprises as principals, the contracts will include provisions that the firm will make a good faith effort to meet set goals of MBE and WBE participation.

It was therefore recommended that the Board authorize the Executive Director to (a) retain one or more professional advisory service firms to undertake project planning and research activities in conjunction with the Trans-Hudson study and (b) enter into agreements with other public agencies for the purpose of jointly funding feasibility analyses and physical planning studies of short and intermediate term projects to reduce travel times and/or to increase capacity of the Trans-Hudson systems, where the total expenditure under a specific agreement provided for in (a) or (b) does not exceed \$250,000; and (c) enter into agreements provided for in (a) or (b) where the total expenditure under a specific agreement exceeds \$250,000, with the concurrence of the Chairman of the Port Planning Committee; the total expenditure by the Port Authority under all agreements entered into by the Executive Director under this authorization shall not exceed \$1,350,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to (a) retain one or more professional advisory service firms to undertake project planning and research activities in conjunction with the Trans-Hudson study, and (b) enter into agreements with other public agencies for the purpose of jointly funding feasibility analyses and physical planning studies of short and intermediate term projects to reduce travel times and/or to increase capacity of the Trans-Hudson systems, where the total expenditure under a specific agreement provided for in (a) or (b) does not exceed \$250,000; and (c) enter into agreements described in (a) or (b) where the total expenditure under a specific agreement exceeds \$250,000 with the concurrence of the Chairman of the Committee on Port Planning; the total expenditure by the Port Authority under all agreements entered into by the Executive Director under this authorization not to exceed \$1,350,000; and it was further

RESOLVED, that the form of the agreements shall be subject to the approval of General Counsel or his authorized representative.

(Board - 6/13/85)

Contract HW-4 Multi-Facility Contract for the Furnishing of Services for Removal and Disposal of Polychlorinated Biphenyl (PCB) Fluids, Contaminated Devices and Solid Waste - Award

It was reported that Contract HW-4 provides for the furnishing of services for the removal and disposal of polychlorinated biphenyl (PCB) fluids, contaminated devices and solid waste at various Port Authority and PATH facilities for a one-year period.

The Port Authority has the right to order extra work during the term of the contract period in an amount not to exceed 10% of the total estimated contract price established for the one-year period.

The work under this contract is required as part of the Port Authority's replacement program of equipment that contains PCB fluids, including electrical transformers and capacitors. In addition, the work includes the removal and disposal of contaminated material that may be generated in the course of normal operation procedures and mitigation work at industrial park sites.

Contract HW-4 provides for continuation of PCB removal and disposal begun under Contract EXD-100.338, authorized by the Executive Director on November 7, 1983, and which is now due to expire on July 27, 1985. Contract HW-4 was publicly advertised as a two-year contract. Three bids were received on February 27, 1985. All bids were rejected as being incomplete or excessive in costs. The contract was rewritten as a one-year contract since changes in regulatory requirements affect costs to such an extent that contractors will not quote beyond a one-year commitment.

Contract HW-4 was rebid and bids were received on May 30, 1985. All bids again were rejected as being incomplete because all bidders took exceptions to terms and conditions within the contract. Since (1) bid prices were within the engineer's estimate; (2) the exceptions from all bidders are similar with respect to risks assumed by the contractor and cannot be addressed in a standard form of contract suitable for bidding; (3) bids were received from the leading contractors in the industry; and (4) the present contract expires on July 27, 1985, it is requested that authority be granted to negotiate and award the contract on the basis of the Proposals submitted, so as to assure continuity of the removal program.

It was therefore recommended that the Board authorize the Executive Director to:

1. negotiate with Cecos International, Transformer Services, Chemical Waste Management and Ensco Inc. (contractors); and

2. enter into a contract with the contractor offering the most advantageous combination of terms, conditions and price for Contract HW-4, Multi-Facility Contract for the Removal and Disposal of Polychlorinated Biphenyl (PCB) Fluids, Contaminated Devices and Solid Waste, at an estimated contract price of \$3,430,000 based on projected requirements, exclusive of extra work, for a one-year period subject to termination, at any time, without cause on 30 days notice, and to order extra work under the contract during the contract term in an amount not to exceed 10% of the total estimated contract price.

(Board - 6/13/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to negotiate with Cecos International, Transformer Services, Chemical Waste Management and Ensco Inc. (contractors); and enter into a contract with the contractor offering the most advantageous combination of terms, conditions and price for Contract HW-4, Multi-Facility Contract for the Removal and Disposal of Polychlorinated Biphenyl (PCB) Fluids, Contaminated Devices and Solid Waste, at an estimated contract price of \$3,430,000 based on projected requirements, exclusive of extra work, for a one-year period subject to termination, at any time, without cause on 30 days notice, and to order extra work under the contract during the contract term in an amount not to exceed 10% of the total estimated contract price; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 6/13/85)

George Washington Bridge - New York Anchorage - Replacement of Granite Fascia Panels -
Contract GWB-194 - Award

It was reported that under contracts awarded in 1980 and 1983, granite fascia panels at the New York Anchorage of the George Washington Bridge were removed and stored to investigate deterioration of steel anchors and filler concrete. Deteriorated concrete and anchors were subsequently identified and removed.

Contract GWB-194 provides for the replacement of the granite fascia panels, with new anchors and filler concrete as required, and, at the option of the contractor, either installation of all new granite panels or reinstallation of previously removed panels combined with installation of new panels in the place of missing or damaged panels.

In addition, the contract provides for additional concrete removal at the buttresses on a net cost basis, estimated at \$50,000.

Portions of the work under this contract may be performed during weekend and nighttime hours so as to minimize interference with traffic flow. Additionally, the contract provides for the winter suspension of work if weather conditions do not permit further performance of the contract.

The contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and the following bids were received on May 30, 1985:

	CLASSIFIED WORK	UNCLASSIFIED WORK	ESTIMATED TOTAL AMOUNT
Ardsley Construction Co., Inc. Scarsdale, New York	\$492,000	\$4,023,750	\$4,515,750
Beaver Concrete Breaking Co., Inc.	468,500	4,436,500	4,905,000
P. C. & G. Construction Co., Inc. South Orange, New Jersey	729,500	5,161,959	5,891,459
ENGINEER'S ESTIMATE			\$4,000,000

Ardsley Construction Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

(Board - 6/13/85)

It was therefore recommended that the Board authorize the Executive Director to award Contract GWB-194, Replacement of Granite Fascia Panels, New York Anchorage, George Washington Bridge, to Ardsley Construction Co., Inc. in the estimated total amount of \$4,515,750, to order extra work up to the amount of \$452,000 and to order net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract GWB-194, Replacement of Granite Fascia Panels, New York Anchorage, George Washington Bridge to Ardsley Construction Co., Inc. in the estimated total amount of \$4,515,750, to order extra work up to the amount of \$452,000 and to order net cost work.

(Board - 6/13/85)

Kennedy International Airport - North Cargo Area - Taxiway "X" - Contract JFK-220.055 - Award

It was reported that the Board, at its meeting on May 10, 1984, authorized the construction of a new taxiway, to be named Taxiway "X", parallel to and north of Runway 13L-31R, at Kennedy International Airport. The award of Contract JFK-220.055 falls within the scope of this authorization.

Contract JFK-220.055 provides for the construction of Taxiway "X" and the installation of a fuel line leak detection system on the existing airport fuel lines at Kennedy International Airport.

In addition, the contract provides for pumping oil contaminated ground water, removal of any unsuitable material and subsequent backfilling, on a net cost basis roughly estimated at \$150,000.

The proposed Taxiway "X" will provide direct access to and from Runway 13L-31R to the North Cargo Area with minimal or no delays. In addition, the construction of Taxiway "X" will increase the life of Runway 13L-31R and save the airlines, according to an FAA analysis, an estimated \$5 million in fuel costs per year by permitting Taxiway "X", instead of Runway 13L-31R, to be used for taxiing and queuing for Runway 22R and 22L departures.

Portions of work under this contract will be performed during nighttime hours and on an around-the-clock basis for three separate 72-hour periods to minimize interference with essential facility operations. Additionally, the contract also includes a provision for the winter suspension of work if weather conditions do not permit further performance of the contract.

The entire contract is eligible for Federal funds under the Airport Improvement Program (AIP).

In conjunction with AIP and in accordance with United States Department of Transportation regulations and the policy adopted by the Board, at its meetings on August 27, 1980 and June 14, 1984, the contract includes a provision that the bidder assure the Port Authority that it will meet the goal for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and the following bids were received on May 23, 1985:

	LUMP SUM AMOUNT
Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc. a joint venture Whitestone, New York	\$13,983,000
Willetts Point Contracting Corp. Flushing, New York	14,131,000
Naclerio Contracting Co., Inc. Bronx, New York	16,960,000
ENGINEER'S ESTIMATE	\$15,000,000

(Board - 6/13/85)

Anthony Grace & Sons, Inc., and Edenwald Contracting Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract JFK-220.055, Taxiway "X", North Cargo Area, Kennedy International Airport, to Anthony Grace & Sons, Inc., and Edenwald Contracting Co., Inc., a joint venture in the lump sum amount of \$13,983,000 and to order extra work up to the amount of \$1,399,000 and to order net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract JFK-220.055, Taxiway "X", North Cargo Area, Kennedy International Airport, to Anthony Grace & Sons, Inc., and Edenwald Contracting Co., Inc. a joint venture in the lump sum amount of \$13,983,000, plus an authorization of \$1,399,000 for extra work and a provision for net cost work.

(Board - 6/13/85)

**Kennedy International Airport - International Arrivals Building - East Ramp Paving -
Contract JFK-479 - Award**

It was reported that contract JFK-479 provides for pavement overlay at the east section of the International Arrivals Building Ramp, including repairs to taxi lanes, Taxiway "G", apron service roads, adjusting in-pavement utilities and installation of concrete pads at seven gate positions.

Portions of the work under this contract may be performed during nighttime hours so as to minimize interference with essential facility operations. In addition, all paving under the contract is to be completed by December 15, 1985.

The contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and the following bids were received on May 16, 1985:

	CLASSIFIED WORK	UNCLASSIFIED WORK	ESTIMATED TOTAL AMOUNT
Anthony Grace & Sons, Inc. Whitestone, New York	\$2,099,600	\$796,400	\$2,896,000
Willets Point Contracting Corp. Flushing, New York	2,184,350	772,929	2,957,279
ENGINEER'S ESTIMATE			\$2,400,000

Anthony Grace & Sons, Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract JFK-479, East Ramp Paving, International Arrivals Building, Kennedy International Airport, to Anthony Grace & Sons, Inc. in the estimated total amount of \$2,896,000 and to order extra work up to the amount of \$290,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to award Contract JFK-479, East Ramp Paving, International Arrivals Building, Kennedy International Airport to Anthony Grace & Sons, Inc. in the estimated total amount of \$2,896,000 and to order extra work up to the amount of \$290,000.

(Board - 6/13/85)

Kennedy International Airport - Transportation Brokerage Program - Retention of Professional Service Firm

It was reported that the Aviation Department is involved in a comprehensive effort to increase the role of public transportation in airport access. Substantial progress has been made in improving the standard of transportation for air passengers through projects such as the consolidated ground transportation counters, the Air TransCenter in the Port Authority Bus Terminal, and ground transportation informational programs. The Transportation Brokerage Office would address another important access component, commuting of airport employees.

Traffic created by employee vehicles arriving at and leaving Kennedy International Airport contributes significantly to congestion for both off- and on-airport roadways. During some peak hours, employee vehicles constitute a substantial portion of airport traffic, due to the fact that 92% of Kennedy's ground employees commute by single-occupant vehicles (SOV's). If the Port Authority could shift 20% of these employees to high occupancy vehicles (HOV's), total peak-hour traffic congestion would be reduced by 7%.

Public Transportation Brokers are individuals or companies that manage a client's public transportation needs. The Transportation Broker staffs an office and promotes and coordinates employee use of a "family" of transportation services, including carpooling, vanpooling and public transit.

The Transportation Brokerage Program at Kennedy International Airport would be accomplished in two phases. In the first phase, the Transportation Broker would inventory the transportation resources available to airport employees; analyze the market for existing, latent and future demand for share-a-ride transportation; identify institutional, financial, labor and other constraints that may hinder the establishment of a Transportation Brokerage Program and formulate alternatives which would address these problems including strategies designed to maximize employee use of HOV's; outline the probable financial and administrative commitments that would be required to demonstrate the utility of this program; and develop the program design. Following a review of the study, the Executive Director could, in his discretion, authorize a second phase, which would result in the implementation of a two-year demonstration program.

At its meeting on March 21, 1985 the New York Metropolitan Transportation Council, the designated Metropolitan Planning Organization for the New York Metropolitan Area, approved a total of \$63,750 in Federal Highway "PL Regional" funds (to be matched by \$11,250 in Port Authority funds or services-in-kind) - an 85%-15% matching basis - for the planning and program design phase of this Transportation Brokerage Program. It is currently estimated that the second phase of this project, the operation of a Brokerage Office for a two-year period, would involve an expenditure by the Port Authority of approximately \$250,000. The Port Authority would fund this phase of the project. The actual cost to operate the two-year demonstration will be dependent on the information gathered during the first phase of this project. If this cost exceeds the aforementioned estimate, additional authorization will be sought.

(Board - 6/13/85)

Because of the distinct phases attached to this project, and the need for a professional opinion with specific share-a-ride expertise and experience, staff recommended that outside assistance be sought. A Request for Proposal (RFP) was mailed to twelve consultants deemed qualified to provide the required expert services, and proposals were received from the following firms on May 15, 1985:

FIRM	PROPOSED BUDGET*
Kassner-Pierce Consulting Engineers Philadelphia, Pennsylvania	\$259,400
Island Rides, Inc. Melville, New York	271,778
The Rideshare Company Hartford, Connecticut	328,800
People Ridesharing Systems, Inc. Newark, New Jersey	432,600
Moran, Stahl & Boyer New York, New York	436,500

*Includes both phases of the program

A Selection Committee, which consisted of representatives of the Aviation and Planning and Development Departments, evaluated the proposals against pre-determined and weighted criteria and concluded that the Rideshare Company is best qualified to perform the project. Included in the criteria were factors such as responsiveness to the RFP, previous experience, quality of staff to be assigned, work program and project costs.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with The Rideshare Company to analyze the need for and the feasibility of establishing a Transportation Brokerage Program at Kennedy International Airport;

2. accept \$63,750 of Federal Highway Administration "PL Regional" funds which were approved by the New York Metropolitan Transportation Council to defray the expenses of the study phase and which are to be matched by \$11,250 in Port Authority funds or services-in-kind; and,

3. in his discretion, authorize The Rideshare Company to establish a pilot Transportation Brokerage Program at Kennedy International Airport for a two-year period at an expenditure currently estimated at \$275,000.

(Board - 6/13/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director:

1. to enter into an agreement with The Rideshare Company, to analyze the need for and the feasibility of establishing a Transportation Brokerage Program at Kennedy International Airport, at an expenditure presently estimated at \$75,000;

2. to accept \$63,750 of Federal Highway Administration "PL Regional" funds which were approved by the New York Metropolitan Transportation Council to defray the expenses of the study phase and which are to be matched by \$11,250 in Port Authority funds or services-in-kind; and

3. in his discretion to authorize the Rideshare Company to establish a pilot Transportation Brokerage Program at Kennedy International Airport for a two-year period at an expenditure currently estimated at \$250,000 and it was further

RESOLVED, that the form of the agreements with the Rideshare Company and for acceptance of Federal Highway Administration be subject to the approval of General Counsel or his authorized representative.

(Board - 6/13/85)

Newark International Airport - International Departures Facility Host Services of New York, Inc. -
Revision to Agreement ANA-158

It was reported that the Board, at its meeting on April 12, 1984, authorized a project for the construction of an International Departures Facility in Terminal C at Newark International Airport, to complement the International Arrivals Facility which opened in June 1984. The International Departures Facility, now approaching completion, is scheduled to commence serving international flights on or about July 1, 1985.

Host Services of New York, Inc. currently is authorized to operate two temporary eating and beverage facilities in Terminal C under terms of an interim month-to-month agreement (ANA-158) which contains a 30-day termination right without cause. It is contemplated that this agreement will continue in effect while People Express is constructing its permanent Terminal C facility in C-1 and C-2, which is expected to extend into 1987.

One of the existing Host food and beverage facilities in Terminal C is a snack bar/cocktail lounge located in the People Express temporary passenger terminal on the Departures Level. The other, a mobile cart, is available to serve the Port Authority's International Arrivals Facility when the need exists.

Staff has now determined that an additional snack bar/cocktail lounge facility is needed in the Port Authority's International Departures Facility.

Neither of the existing temporary food and beverage facilities was designed nor located to serve travelers using the International Departures Facility. Furthermore, the International Departures Facility is separated from the People Express portion of Terminal C by a demising wall which is to remain in place during construction by the carrier. The proposed food and beverage facility is therefore required to meet the needs of the travelling public using the International Departures Facility. The future disposition of this food and beverage installation will depend on the level of activity within the International Departures Facility and the overall development of Terminal C following the removal of the demising wall.

Because of the limited amount of space and the need to accommodate as many passengers as possible in the waiting areas of the International Departures Facility, the proposed snack bar/cocktail lounge will be a basic type of facility providing a simple menu. The area is quite restricted, containing little storage space and virtually no "back of the house" kitchen capabilities. There will be a total of 130 seats. Food, for the most part, will have to be prepared elsewhere and delivered to the site. Due to the demising wall, no free circulation of passengers in Terminal C currently is planned on the Departures Level during the two-year construction period, thereby restricting potential customers in the International Departures Facility essentially to passengers departing on international flights, and to their relatives and friends.

(Board - 6/13/85)

In the context of these circumstances, an arrangement has been worked out with Host whereby the operator, under the proposed revision to existing Agreement ANA-158, will construct and provide interior finishes for the snack bar/cocktail lounge consisting of approximately 2,000 square feet using common seating with an "outdoor" patio type of environment. Tentative agreement has been reached with Host for its expenditure of monies required to develop and equip the proposed facility, including architectural and design fees, general contractor costs and extra work, new furniture, fixtures and equipment. Host's cost to develop this facility is estimated by the operator to be \$165,000.

The agreement with Host would continue to be subject to termination without cause and, in addition, the Port Authority would have the right to separately terminate the agreement as to the added space. In either of such events, the Port Authority would reimburse the permittee for the unamortized portion of its costs for constructing the facility on a seven-year straight line basis for furniture, fixtures and equipment and one a ten-year straight line basis for improvements, to the extent that such costs do not initially exceed \$165,000.

Under existing terms of the agreement with Host Services of New York, Inc., which would apply to this operation as well, gross sales from ANA-158 are additive to sales generated at Host facilities in Terminals A and B at Newark International (Agreement AN-684), the Main Passenger Terminal at LaGuardia Airport (AG-700), and the International Arrivals and Wing Buildings at Kennedy International Airport (AYA-700); and the established, applicable percentage fees approved previously by the Board and which are part of all these agreements will be applied to the gross sales from all these facilities combined and the amounts they represent paid by Host to the Port Authority.

It was therefore recommended to the Board, that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement with Host Services of New York, Inc., amending its Permit agreement with the Port Authority on the terms and conditions outlines above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a revision to Permit Agreement ANA-158 with Host Services of New York, Inc., to add to the space under the Permit approximately 2,000 square feet of space on the Departures Level of the Port Authority's International Departures Facility at Newark International Airport for the development and operation of a snack bar/cocktail lounge facility therein at the permittee's sole cost and expense, estimated at \$165,000, The Port Authority to have the right to terminate the agreement separately as to the added space without cause, and to continue to have the right to terminate the agreement in its entirety without cause, and in either of such events the permittee would be reimbursed for the unamortized portion of its cost for constructing the facility to the extent that such cost does not initially exceed \$165,000; and it is further

RESOLVED, that the form of the Agreement be subject to the approval of General Counsel or his designated representative.

(Board - 6/13/85)

Leasing and Rehabilitation of Additional Office Space - 84 Sip Avenue, Journal Square, Jersey City, New Jersey

It was reported that additional office storage space is required in New Jersey for a number of reasons. These include office space for staff to develop a Port Authority operations center, and for those assigned to the Transportation Operations Coordinating Committee (TRANSCOM). In addition, basement space is needed for staging areas for units that are relocating in or to the Journal Square area, such space ultimately to be used as a storage area when such moves have been completed. Finally, office space may be needed to accommodate projected staff growth in units assigned to the Journal Square area.

The Port Authority plans to develop an operations center that would have as its purpose coordinating and facilitating the flow of transportation information at Port Authority facilities and on main access routes to and from those facilities.

Approximately 5,500 rentable square feet of office space is available on the first floor to meet needs of staff offices for the Port Authority operations center and to provide for a "situation room" to coordinate New Jersey traffic information, an important complement to a similar one established in Long Island City by the New York City Traffic Bureau. In addition, this space will also accommodate Port Authority staff assigned to TRANSCOM for staff offices, a conference room to accommodate the large numbers of representatives of member agencies who meet regularly, and testing rooms for prototype communication equipment proposed for a Regional Traffic Information Center. Office space at the 84 Sip Avenue building will provide especially convenient access to personnel and communications equipment located in the adjacent Journal Square Transportation Center (JSTC).

Approximately 4,000 rentable square feet of basement space is also needed to provide staging areas and flexibility during office relocation for units presently or planned to be located in the Journal Square vicinity.

In addition, approximately 4,800 rentable square feet of office space is available and may be leased, depending upon Port Authority needs for office space, upon exercising an option in the proposed lease agreement.

Under the proposed lease, the Port Authority will pay a total of \$17.25 per square foot for approximately 5,500 rentable square feet of office space on the first floor and \$7 per square foot for approximately 4,000 rentable square feet of basement space. In addition, the Port Authority will be responsible for tenant electricity. The rental rate for the first year includes a proportional share of building operation and maintenance costs including security; cleaning; heating, air conditioning and the other utilities; and real estate taxes.

In order to make the space suitable for offices, provide for construction, moving and relocation services, purchase equipment and office furnishings and install a telephone and telecommunications service, expenses of approximately \$265,000 will be incurred.

(Board - 6/13/85)

The Board, at its meeting on November 8, 1984, authorized execution of a lease with Margulies Associates for approximately 32,500 rentable square feet of office space and 5,000 rentable square feet of basement space in the same building to meet the interim space needs of the Port Authority. Combined with this previous authorization, the Port Authority will now occupy 38,000 rentable square feet of office space and 9,000 rentable square feet of basement space and will occupy over 90% of the building's available space.

It is expected that occupancy will begin on approximately August 1, 1985.

It was therefore recommended that the Board authorize the Executive Director to execute a lease with Margulies Associates for 5,500 rentable square feet of office space and 4,000 rentable square feet of basement space in a building located at 84 Sip Avenue in the Journal Square area of Jersey City, New Jersey and secure an option to lease an additional 4,800 rentable square feet of office space and incur expenses for construction, moving and relocation services, purchase of equipment and office furnishings and the provision of telephone services.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to execute a lease with Margulies Associates for 5,500 rentable square feet of office space and 4,000 rentable square feet of basement space in a building located at 84 Sip Avenue in the Journal Square area of Jersey City, New Jersey, for a period of five years, for a term commencing on or about August 1, 1985, with options for a three-year extension and for additional space to meet the interim space needs of the Port Authority. The rental rate is \$17.25 per square foot for the office space and \$7 per square foot for the basement space; these rental rates for the first year include all operations and maintenance costs, real estate taxes, janitorial services and utilities (except for tenant electricity); thereafter, the Port Authority would be required to pay its proportionate share of such cost increases only; if the option for the three-year extension is exercised, the rental rate for the office space would increase to \$20.36, and for the basement space to \$7.84; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to secure an option to lease an additional 4,800 rentable square feet of office space available in the building at the same rates and conditions, if required, and execute the option within six months to accommodate staff growth of units now located at or scheduled to move to Journal Square; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to incur expenses of approximately \$265,000 for construction, moving and relocation services, purchase of equipment and office furnishings and the provision of telephone services; and it is further

RESOLVED, that all documents required to consummate the aforesaid transaction be subject to approval as to form by General Counsel or his authorized representative.

(Board - 6/13/85)

The World Trade Center - Fund for Regional Development - Lease with Guy Carpenter & Company, Inc.

It was reported that, subject to approval by the Board, staff has reached agreement with Guy Carpenter & Company, Inc., an international re-insurance brokerage firm, for the initial leasing of approximately 320,000 rentable square feet on floors 47 through 54, all of which are currently occupied by New York State in Two World Trade Center. The premises will be delivered in several agreed upon stages. The 53rd floor (Area A) is to be delivered on July 1, 1985 and floors 50, 51, 52 and 54 (Area B) are to be delivered on November 1, 1985; the 49th floor (Area C) is to be delivered March 1, 1986; the 48th floor (Area D) would be delivered on the fifth anniversary of the date payment of rental commences for Area B, and the 47th floor (Area E) would be delivered on the tenth anniversary of such date, all subject to postponement.

In order to insure timely delivery of the premises and to protect the tenant from holdover costs at his present location, Guy Carpenter will be entitled to a rent credit equal to two days rent for each day delivery of each area is delayed. In addition, Carpenter will have the right to cancel the lease if Area B has not been vacated by New York State on or before May 1, 1986. If the lease is not cancelled on such date, and if Area B has not been vacated by August 1, 1986, the lease would be automatically cancelled. In the event of either of these cancellations, Carpenter would be entitled to liquidated damages as a reimbursement for its costs in an amount equal to three days rent for Areas A, B and C in the event the lease is cancelled in May, or two days rent for Areas A, B and C in the event it is cancelled in August, multiplied by the number of days from the scheduled delivery date for the areas to the effective cancellation date. If the letting has commenced as to Area B but Area C (49th floor) is not yet available, Carpenter will be given temporary use of a different floor on a rent-free basis until that floor is available. If, in the Port Authority's opinion, Area C cannot be made available for inclusion in the premises, other contiguous floors in Two World Trade Center will be substituted therefor, and for Areas D & E (47 and 48) in which event, the basic rent stated below for these areas will be reduced by \$1 per rentable square foot per year for the initial term of the lease. If any of these rent credits, liquidated damages, rent reductions, and free rent amounts are triggered by New York State's failure to fully vacate the floors on the dates promised, these amounts will be deducted from relocation and rent subsidy payments due to New York State, pursuant to the Fund Agreement. Further, New York State has agreed to pay the costs of any interim relocations, of its own agencies, needed to make the floors available as promised.

Rent for Areas A, B and C would commence one year following delivery of each area to the tenant. This period includes time for the tenant to reconstruct the space. The rent for the first three years following the rent commencement date for each such area would be \$26 per rentable square foot per year; thereafter the rent would be \$28 per rentable square foot per year for years 4 and 5; \$31 per rentable square foot per year for years 6-10; \$37 per rentable square foot per year for years 11-15 and \$43 per rentable square per year for the balance of the initial term. Rent for Area D & E will be payable at the rate applicable to the balance of the premises at the time each such area becomes a part of the premises. Rent for these areas will commence four months following delivery thereof to the tenant. Guy Carpenter & Company, Inc. will also

(Board - 6/13/85)

pay additional rent to cover cleaning, electricity, increases in operating costs (at the rate of .55 cents per 1 cent increase in Porters wage), and payments in-lieu-of taxes using as a base whatever the 1984-85 annual per rentable square foot factor is finally determined to be, in the interim the base will be set at \$2.60. The lease would contain an option to extend the letting for one ten-year period at fair-market rental. Carpenter would be granted rights to lease two additional floors at fair-market rentals should they become available at any time during the lease. If The World Trade Center is sold, the tenant would be protected from major initial real estate tax increases resulting from the sale. In addition, in the event the Port Authority should enter into an amendment to the City Agreement increasing the payment in lieu of taxes payable under the 1967 agreement or an agreement with another taxing authority to make payments in-lieu-of taxes, Carpenter would not be required to pay any amounts which would be in excess of full real estate taxes which would be payable if The World Trade Center were privately owned, however, if such an amendment to the City Agreement is made as part of a sale transaction, Carpenter would not be required to pay any amounts in excess of the 1967 agreement as amended, prior to such amendment.

The space will be delivered "as is" and Guy Carpenter will receive an allowance of \$22 per rentable square foot toward its costs of construction in Areas A, B and C and an allowance of \$14 per rentable square foot towards the cost of construction in Area E including the installation of a sprinkler system in Areas A, B and C. This allowance may be taken in the form of reduction in the basic rent, during the initial lease term, using an interest rate approximating the Port Authority's bond borrowing rate.

There will be a real estate brokerage commission payable on this transaction at rates not to exceed the schedule of rates authorized by the Board at its meeting on August 11, 1977.

It was therefore recommended that the Board authorize the Port Authority, acting on behalf of the Fund for Regional Development, to enter into a lease agreement with Guy Carpenter & Company, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Port Authority, acting on behalf of the Fund for Regional Development, to enter into a lease with the firm of Guy Carpenter & Company, Inc. for approximately 320,000 square feet of office space in Two World Trade Center to be vacated by the State of New York for an initial term expiring approximately sixteen years and three months from the commencement thereof, with an option to extend the letting for an additional ten years from the expiration of the initial term; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 6/13/85)

**Reimbursement Agreement with Newark Economic Development Corporation - Port Authority
Contribution Toward Cost of Land Acquisition in Condemnation Proceeding Brought by
the Housing Authority of The City of Newark**

It was reported that the Port Authority's participation in a project for development of an office building in the downtown Newark riverfront area emanates from the Governors' Bi-State Agreement and its related Board authorization from the Board's special meeting on June 29, 1983. The Board subsequently authorized the Executive Director to proceed with further planning of an office building of approximately 300,000 net rentable square feet at an approximate total cost of \$40 million on June 14, 1984, and, at the Board meeting on November 11, 1984, the Legal and Communications Center was certified as a facility of the Port Authority.

The development of this project has proceeded in accordance with Board authorizations. Based on the Port Authority's tentative agreement with the City of Newark and the Newark Economic Development Corporation (NEDC), dated June 15, 1984, acquisition and any required condemnation of land would be the responsibility of the Housing Authority of the City of Newark. All but one parcel of the site's Phase I 2.7 acres has now been acquired by the Housing Authority and, in fact, demolition of existing structures has begun on those parcels for which title has been cleared. The Housing Authority's condemnation of the remaining parcel, owned by Robert DiStasio and Joseph DiStasio, d.b.a. Sunoco-Penn Service Station, was contested by the owners. Discussions between the Housing Authority and the Sunoco-Penn Service Station owners has progressed to the point of a settlement. It is expected that the DiStasios will accept a sum of approximately \$400,000 to dispose of their fee interest in the premises. The total amount of NEDC's contribution is that part of the sum to be paid to Robert DiStasio, et. al. as settlement of DiStasio's litigation claim against the Housing Authority which exceeds the amount to be paid by the Housing Authority in accordance with its statutory limitations.

Without title to the remaining parcel, the City would be forced to halt demolition progress and the project's construction schedule may be seriously delayed. The Port Authority needs access to this land with the least delay possible so that construction may begin and the overall project schedule maintained. It is therefore necessary for the Housing Authority to agree to a settlement sum, even though that sum is expected to exceed the amount which the Housing Authority is empowered to pay for the dimensions of that parcel. In this case, the Housing Authority will be limited under Federal statutes to a payment of approximately \$250,000 of the expected \$400,000 settlement. NEDC and the Port Authority will agree to share equally the remaining cost, amounting to approximately \$75,000, but no more than \$100,000, from each organization. To facilitate this transaction, the Port Authority's payment will take the form of a reimbursement to NEDC for one-half of NEDC's expenditure in this connection. The agreement will provide that, in the event the Agreement dated June 15, 1984 does not become effective, or if for any reason the Port Authority does not go forward with this project, the NEDC will reimburse the Port Authority for the above-mentioned payment.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the Newark Economic Development Corporation (NEDC) providing for reimbursement by the Port Authority to NEDC of an amount estimated at \$75,000 (but not to exceed \$100,000) representing one-half of the contribution by NEDC toward the total property acquisition cost resulting from pending condemnation proceedings brought by the Housing Authority of the City of Newark against Robert DiStasio, et. al., owners of the Sunoco service station on the site of the planned Port Authority Legal and Communications Center.

(Board - 6/13/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be authorized to enter into an agreement with the Newark Economic Development Corporation (NEDC) providing for reimbursement by the Port Authority to NEDC of an amount estimated at \$75,000 (but not to exceed \$100,000) representing one-half of the contribution by NEDC toward the total property acquisition cost resulting from pending condemnation proceedings brought by the Housing Authority of the City of Newark against Robert DiStasio, et al., owners of the Sunoco service station on the site of the planned Port Authority Legal and Communications Center.

(Board - 6/13/85)

Port Authority Employees - Retirement Policy for Non-Police Employees

It was reported that effective January 1, 1985, the New York Retirement and Social Security Law does not permit mandatory retirement on the basis of age for members of the New York State Employees' Retirement System, in which the Port Authority is a participating employer and of which all permanent Port Authority non-police employees must be members. This change, part of a broader statement of the public policy of the State of New York which became law in August 1984, supplements the Federal Age Discrimination in Employment Act of 1967, as amended, which currently protects workers between ages 40 and 70 from discrimination in employment (including, generally, mandatory retirement) on the basis of age. In March 1985, a similar public policy statement affecting public employees became law in the State of New Jersey.

A Port Authority policy prescribing a mandatory retirement age was originally adopted by the Board in 1936. Over the years, as staffing requirements, organizational needs, workload, economic pressures and applicable legislation changed, the mandatory retirement age was set at varying levels. Effective January 1, 1979, consistent with Federal legislation, the mandatory retirement age for non-police employees was adjusted from age 65 to 70, with the exception of bonafide executive or high policymaking employees who have held such a position for the two years immediately before retirement and who are entitled to an immediate non-forfeitable annual retirement benefit to which they have made no contribution of at least \$27,000 (the regulations would now require a \$44,000 benefit). These employees, who appear on a list designated by the Executive Director, have been subject to mandatory retirement at age 65, consistent with Federal law and regulations. Similarly, the Executive Director has also been authorized to designate those titles for which earlier mandatory retirement ages are appropriate because age is a bonafide occupational qualification for the position.

In conformity with the provisions of the New York Retirement and Social Security Law, it is therefore recommended that, effective January 1, 1985, the Port Authority discontinue the requirement that non-police employees retire at age 70 or, in the case of executive or high policymaking employees designated by the Executive Director, at age 65. The Executive Director would still be authorized to designate those titles for which mandatory retirement ages are appropriate because age is a bonafide occupational qualification reasonably necessary for the performance of the duties thereof. Any such designations made from time to time by the Executive Director would be filed consistent with existing policy, and requests for extensions beyond the mandatory retirement date would be subject to approval by the Committee on Operations upon recommendation of the Executive Director.

It was therefore recommended that the Board amend the resolution of the Board of Commissioners with respect to compulsory retirement adopted on March 12, 1936, as most recently amended by resolution of November 16, 1979, effective January 1, 1985, to provide as follows:

1. subject to exception provided below, no employee of The Port Authority of New York and New Jersey (other than a member of the Police Force) shall be retired on the basis of attaining a specified age;

(Board - 6/13/85)

2. any employee of The Port Authority of New York and New Jersey (other than a member of the Police Force) who holds a position in a title designated by the Executive Director as provided below for which a mandatory retirement age is appropriate because age is a bonafide occupational qualification shall be retired effective no later than the last day of the month in which such appropriate age is attained; provided, however, that the Committee on Operations may, in its discretion, suspend said compulsory retirement in individual cases upon recommendation of the Executive Director; and

3. that the Executive Director be authorized to designate, from time to time, those titles consistent with law and regulations prohibiting discrimination in employment based on age, for which mandatory retirement ages are appropriate because age is a bonafide occupational qualification (and to fix the appropriate ages in such cases), such designations to be filed with the Committee on Operations and the Secretary.

Whereupon, the following resolution was adopted, Commissioner H. Carl McCall voted "Nay":

RESOLVED, that the resolution of the Board of Commissioners with respect to compulsory retirement adopted on March 12, 1936, as most recently amended by resolution on November 16, 1979, be and the same hereby is amended, effective January 1, 1985, to provide as follows:

RESOLVED, that, subject to exception provided below, no employee of The Port Authority of New York and New Jersey (other than a member of the Police Force) shall be retired on the basis of attaining a specified age; and it is further

RESOLVED, that any employee of The Port Authority of New York and New Jersey (other than a member of the Police Force) who holds a position in a title designated by the Executive Director as provided below for which a mandatory retirement age is appropriate because age is a bonafide occupational qualification shall be retired effective no later than the last day of the month in which such appropriate age is attained; provided, however, that the Committee on Operations may in its discretion suspend said compulsory retirement in individual cases upon recommendation of the Executive Director; and it is further

(Board - 6/13/85)

RESOLVED, that the Executive Director be and he hereby is authorized to designate from time to time those titles, consistent with law and regulations prohibiting discrimination in employment based on age, for which mandatory retirement ages are appropriate because age is a bonafide occupational qualification (and to fix the appropriate ages in such cases), such designations to be filed with the Committee on Operations and the Secretary.

Whereupon, the meeting was adjourned.

Secretary

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, July 11, 1985, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Alan Sagner, Chairman
 Robert V. Van Fossan
 Philip D. Kaltenbacher
 William K. Hutchison
 Henry F. Henderson, Jr.

NEW YORK

Robert F. Wagner, Vice-Chairman
 James G. Hellmuth
 Howard Schulman
 John G. McGoldrick

Patrick J. Falvey, General Counsel/Assistant Executive Director
 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Acting Director of Tunnels, Bridges and Terminals
 Gwendolyn K. Crider, Administrative Assistant
 Sidney Frigand, Assistant Executive Director/Director of Public Affairs
 Gene Gill, Director of General Services
 Jeffrey S. Green, Chief, Finance Division, Law
 Daniel M. Hahn, Assistant Chief Engineer for Design and Research
 James J. Kirk, Deputy Director of Rail Transportation
 Louis J. LaCapra, Assistant Director of Personnel
 Lillian C. Liburdi, Director of Management and Budget
 Katharine B. MacKay, Assistant Executive Director/Director of State Relations
 Mark Marchese, Assistant Director, Information Services, Public Affairs
 John R. Moran, Assistant Director of Audit
 James H. Mullen, Administrative Trainee
 James J. O'Malley, Director of Management Information Services
 Rosemary Scanlon, Assistant Director of Planning and Development/Chief Economist
 Robert N. Steiner, Deputy Port Director
 Victor T. Strom, Director of Public Safety
 Guy F. Tozzoli, Director of World Trade
 Joseph L. Vanacore, Executive Officer for Capital Programs
 Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Treasurer
 Thomas C. Young, Jr., Principal Information Officer, Public Affairs
 Gerard Fernandez, Jr., Bond Counsel, Hawkins, Delafield & Wood
 Donald J. Robinson, Bond Counsel, Hawkins, Delafield & Wood

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of June 13, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on July 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its Special meeting on June 26, 1985 and at its meeting on July 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on July 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on July 11, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Nominating Committee - Appointment of Acting Executive Director

Commissioner Van Fossan, Chairman of the Nominating Committee, reported that the Nominating Committee, at its meeting held earlier this afternoon, recommended that in light of the resignation of Peter C. Goldmark, Jr. from the position of Executive Director as of August 17, 1985, and pending submission of a report of the Selection Committee which is continuing its work, Patrick J. Falvey should be designated as Acting Executive Director, effective August 17, 1985, to serve until the appointment of an Executive Director.

It was the unanimous decision of the Commissioners that the recommendation of the Nominating Committee to designate Patrick J. Falvey as Acting Executive Director be approved.

(Board - 7/11/85)

La Guardia Airport - Contract PSE-425 - General Cleaning Central Terminal Building - Award to Aetna Maintenance, Inc.

It was reported that the Board, at its meeting on June 11, 1981, authorized the Executive Director to award Contract PSE-345 for the cleaning of the Central Terminal Building at LaGuardia Airport to Unified Services, Inc., a minority contractor, for a two-year term and to authorize two additional one-year extensions. Each of these extensions having been authorized, the current contract will expire on July 31, 1985.

Contract PSE-425 would be for a two-year period commencing August 1, 1985 and subject to termination by the Port Authority without cause on 30 days' notice. The term of the contract is subject to extension for two additional one-year periods, with the compensation due the contractor in each of the extension periods being subject to adjustment based on mutually agreed-upon cost increases or decreases related to the cost of labor. The price adjustment will be established as of the beginning of each extension period and will be computed based on the difference between the actual cost for wages, applicable taxes, insurance required by law, and supplemental benefits for employees incurred by the contractor for employees in the second year of the contract or the first extension year, as applicable. If the parties fail to agree on the adjusted compensation for any renewal period, or if for any other reason either of the parties refuses to execute an extension agreement, then the contract will expire at the end of the original term, or the first extension period, as the case may be.

The Port Authority would have the right to order extra work during the initial two-year term of the contract, and during each extension period, in an amount not to exceed 15% of the lump sum price agreed to for the said term. The Contract also provides that the contractor must pay at least the wages and benefits specified therein.

The following bids were received on June 12, 1985:

Company	Bid Price
Aetna Maintenance, Inc. East Hanover, New Jersey	\$2,062,783
Cleaning Emporium Westville, New Jersey	2,083,356
Unified Services, Inc. Washington, D. C.	2,122,780
Motley's Shampooing Co. Bloomfield, New Jersey	2,202,430
Urban Cleaning Contractors Bronx, New York	2,249,611
Hispanic Maintenance White Plains, New York	2,301,069

(Board - 7/11/85)

Company	Bid Price
Ebon Services Newark, New Jersey	\$2,403,433
Organized Maintenance Woodside, New York	2,427,048
Cycle Building Maintenance, Inc. Garden City, New York	2,466,902
Servair Maintenance, Inc. Jamaica, New York	2,493,761
Allied Maintenance Corp. New York, New York	2,631,490
Pritchard Services New York, New York	2,676,738
ISS Prudential Maintenance Corona, New York	2,803,015
Temco Services, Inc. Montclair, New Jersey	3,035,344

Staff has determined that Aetna Maintenance, Inc. is fully qualified to perform the requirements of the contract.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to award Contract PSE-425 for general cleaning in the Central Terminal Building at LaGuardia Airport to Aetna Maintenance, Inc. at the bid price of \$2,062,783, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to award Contract PSE-425, General Cleaning Central Terminal Building, for a two-year term effective August 1, 1985, to Aetna Maintenance, Inc., the lowest qualified bidder, at its bid price of \$2,062,783 for the two-year term; and it is further

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized at his descretion, to order extra work up to 15% of the entrie contract price; and it is further

RESOLVED, that the Executive Director for and on behalf of the Port Authority, be and he hereby is authorized, at his descretion, to extend the contract, and to authorize the expenditure for extra work up to 15% of the estimated contract price for each extension period.

(Board - 7/11/85)

La Guardia Airport - Contract LGA-220.030 - Aircraft Parking West of Runway 4-22

It was reported that the existing aircraft parking facilities at LaGuardia Airport are inadequate. Among other factors, deregulation of the airline industry has increased the number of early morning departures from LaGuardia, necessitating the need for additional overnight parking facilities. As a result, it is frequently necessary to remove active taxiways from operational status for utilization as overnight aircraft parking sites.

Staff therefore recommends that new parking facilities be constructed at a site west of Runway 4-22, south of Taxiway "E", north of Taxiway "F", and East of the Employee Parking Lot 10E. The proposed site would accommodate four B 727-200 and DC 9-80 aircraft. It is anticipated that construction would commence in November, 1985 and continue for approximately six months, with a provision for a winter suspension of construction.

Contract LGA-220.030 provides for the construction of an aircraft parking area at LaGuardia Airport and will include all paving, drainage and other related work for this construction. Contract LGA-220.030 will be publicly advertised and bids are scheduled to be received by September 30, 1985.

It was therefore recommended that the Board authorize:

1. a project for construction of an additional aircraft parking area west of Runway 4-22 at LaGuardia Airport, at an expenditure presently being estimated at \$3.6 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; and
2. the Executive Director, in his discretion, either to award Contract LGA-220.030, Aircraft Parking West of Runway 4-22, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for construction of an additional aircraft parking area west of Runway 4-22 at LaGuardia Airport, at an expenditure presently being estimated at \$3.6 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, either to award Contract LGA-220.030, Aircraft Parking West of Runway 4-22, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids.

(Board - 7/11/85)

La Guardia Airport - Surrender of Premises on Finger No. 2 and Port Authority Investment in Improvements to Finger No. 3; Supplements to Republic Airlines, Inc., United Airlines, Inc., New York Airlines, Inc., and USAir, Inc., Month-to-Month Leases

It was reported that Republic Airlines, Inc., United Air Lines, Inc., New York Airlines, Inc., and USAir, Inc., currently operate at LaGuardia Airport under month-to-month leases. To accommodate the demand, desirable growth and additional schedules of Republic Airlines, New York Airlines and USAir, all tenants on Finger No. 2, it was deemed necessary, for better utilization and development of the Airport, to relocate Republic from its two gates and related holdroom operations and space on Finger No. 2 to Finger No. 3, where it would lease Gates 22 and 23 and related holdroom operations and space previously surrendered by Trans World Airlines and currently operated by the Port Authority, and to have Republic construct an expansion of the holdroom space at these two gates and the expansion of certain related operations space. The estimated cost of this construction, scheduled to be completed by December 1985, is \$1.8 million up to which amount the Port Authority will make periodic payments to Republic, with Republic to repay, in addition to the basic rental under the lease, an additional monthly rental based on an annual factor of \$.149861 for each dollar so invested by the Port Authority including interest during construction, over a fifteen-year period. In addition, Republic would have the right to schedule four flights per day on Finger No. 3 Gates operated by the Port Authority at the current turn-around charge under a separate 30-day Use Agreement. In the event the Port Authority terminates Republic's month-to-month lease other than for cause, or does not offer to extend the term of the letting thereunder, Republic's obligation to pay this additional rental shall be released. In any other event, Republic would remain liable, it being expected, however, that the incoming tenant or tenants would assume Republic's obligation to repay the Port Authority for the full amount still outstanding.

The surrender by Republic of Gates 19, 19A and the related premises on Finger No.2 and the making of the aforesaid investment by the Port Authority are subject to the execution by New York Airlines, USAir and United of appropriate Supplements to their respective month-to-month Airport Leases incorporating the following changes to their respective premises: Gates 19A and one-half of Republic's Finger No. 2 operations and holdroom space will be added to USAir's premises; Gate 19 and the remaining one-half of the operations and holdroom space will be added to United's premises; United will surrender Gate 15 and a portion of its operations and holdroom space approximately equal to that added to United's lease and adjacent to New York Airlines's premises and said Gate and space will be added to New York Airlines's premises. United, therefore, is not expanding its Finger No. 2 leasehold, while USAir and New York Airlines are doing so, in order to accommodate their expanded service.

The Board that, at its meeting on May 13, 1982 authorized an investment in an improvement project on Finger No. 2 totalling \$3,100,000 involving construction by Republic, New York Airlines and United Airlines, with monthly repayments to be made by Republic and New York Airlines over a fifteen-year period. The beneficiaries of Republic now vacating its Finger No. 2 premises are USAir and New York Airlines which will lease additional Gates and related space. Therefore, these two lessees will assume Republic's obligation to repay the remaining balance of the amount due the Port Authority on the Finger No. 2 improvement project as will be set forth in the Supplements to their respective leases.

(Board - 7/11/85)

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into separate supplemental agreements to the month-to-month Leases with Republic Airlines, Inc., United Air Lines, Inc., New York Airlines, Inc. and USAir, Inc. at LaGuardia Airport, all in accordance with the foregoing.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into separate supplemental agreements to the month-to-month Leases with Republic Airlines, Inc., United Air Lines, Inc., New York Airlines, Inc. and USAir, Inc. at LaGuardia Airport, whereby, with respect to Republic, it will surrender to the Port Authority Gates 19 and 19A and their related operations and holdroom space on Finger No. 2 upon completion of the construction by Republic of similar space at Gates 22 and 23 on Finger No. 3 at an estimated construction cost of \$1.8 million to the Port Authority, said Finger No. 3 space and Gates to be added to Republic's premises under its month-to-month Airport Lease. In addition to the basic rental, Republic will repay an additional annual rental equivalent to \$.149861 for each dollar so invested by the Port Authority, including interest during construction, over a fifteen-year period and in the event the Port Authority terminates Republic's Lease other than for cause or does not offer to extend the term of the letting under the Lease, Republic would be released from its obligation to pay the additional rental; in addition to Republic's relocation to Finger No. 3, United will surrender certain space and have other space added to its Lease, and New York Air and USAir will have space added to their respective Leases, all on Finger No. 2; and it is further

RESOLVED, that the form of said agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

Kennedy International and La Guardia Airports - Consolidated Ground Transportation Counter Program

It was reported that as part of the Aviation Department's efforts to reduce dependence upon the private vehicle for airport access, to improve ground transportation services to its airport customers and to simplify Port Authority administration of agreements with ground transportation permittees, a consolidated ground transportation counter program was instituted for trial periods at each of the three airports. At their meetings on April 12, 1984, and November 8, 1984, the Board and the Committee on Operations, respectively, authorized the permanent establishment of the consolidated counter program at Newark International at an estimated cost of \$1,225,000 and LaGuardia Airport at an estimated cost of \$1,758,000. On December 10, 1984, the Executive Director authorized the establishment of a program to test the consolidated counter concept in the International Arrivals Building at Kennedy International Airport at an estimated cost of \$242,000.

To staff the counters at each airport, agreements were entered into with the Council for Airport Opportunity (CAO). The CAO is a local agency, with offices in Queens, New York and Newark, New Jersey, which promotes minority employment opportunities in the New York/New Jersey metropolitan area.

The authorization for the operation of the counters at LaGuardia Airport provided \$1,758,000 for the period June 1, 1984 through May 28, 1986. The recommended increase in the authorization will cover unanticipated costs for additional counter agents and the computerized information system. Although original staff analysis indicated a need for 35 counter agents, factors such as space constraints that precluded the establishment of an orderly queuing system, peaking characteristics, and the number of people seeking detailed information on transportation alternatives have required the addition of 29 counter agents to provide an acceptable level of service. Additionally, since plans for the computerized information system were not complete at the time of the original authorization, no expenditure for computer services was included then. An addition of \$1,130,000 to the estimated operating expenses associated with this program is therefore necessary, bringing the total estimated two-year expenditure to \$2,888,000. Approximately \$700,000 of the increase, plus an additional amount for extra work, will be required for payments to CAO for staffing of the counters.

The test program at the International Arrivals Building at Kennedy International Airport has been closely monitored and staff has concluded that this operation should be extended for a ten-month period. This recommendation is based upon observed improvement in the day-to-day standard of service provided to ground transportation patrons, including a reduction of hustling activities in the counter area. The estimated expenditures for the additional ten-month period is \$541,000, which includes the salaries of both the counter agents provided by the CAO and Port Authority supervisors, as well as the costs for the operation of the computerized information system. Annual ground transportation revenues at the two airports are estimated to total approximately \$3,130,000. This revenue figure represents percentage permit fee charges on limousine operations estimated at \$2,660,000 and incremental revenues derived from the consolidated counter program fees estimated at \$470,000. Counter fees are based upon the number of customers processed at the counters, and this program helps staff to insure that fees due are accurately calculated.

(Board - 7/11/85)

Observations by Port Authority staff and the results of informal surveys have indicated that the counters are functioning well and are being favorably received by most users. However, staff are continuing to investigate procedures that would improve service and allow responsible operators as much direct interaction with their customers as possible. Extensive patron surveys are therefore being deferred until staff arrives at a final configuration for the counters.

Over the next few months, an alternative counter arrangement will be tested at four or five locations at Kennedy International, Newark International and LaGuardia Airports. This modified system will combine staffed information booths with adjacent direct-line telephones, to be under Port Authority control, which will enable patrons to communicate directly with ground transportation permittees. This system will provide many of the service benefits of the original program and also allow patrons who know which operator they want to make reservations with to do so more expeditiously. Individuals needing information or assistance would still be able to seek the help of counter agents. The agents also would be able to book reservations for patrons and to provide assistance if there is a problem with the transportation arrangements.

A side-by-side evaluation of the original and modified programs will be conducted, and based on these results, additional counters may be converted to the alternative arrangement. This alternative system could cost significantly less than the present system, and the trial period will allow an economic as well as a service evaluation. At the end of the CAO contract period, staff will make a determination as to which alternative is most effective from the perspectives of both cost and patron service, and appropriate program authorization will be sought at that time.

It was therefore recommended that the Board authorize:

1. an increase in the total estimated project expenditure for the operation of consolidated ground transportation counters at LaGuardia Airport from \$1,757,500 to \$2,888,000, including payments to the Council for Airport Opportunity (CAO), an allowance for extra work and administrative and miscellaneous expenses; and
2. an increase in the total estimated amount of the existing agreement with CAO for staffing of the consolidated ground transportation counters at LaGuardia Airport from \$718,750 to \$1,418,750, and the Executive Director to order work up to the amount of \$105,000; and
3. an increase in the total estimated project expenditure for the operation of a consolidated ground transportation counter at the International Arrivals Building at Kennedy International International Airport from \$242,000 to \$783,000, including payments to the CAO, an allowance for extra work and administrative and miscellaneous expenses; and
4. the Executive Director to enter into an extension to May 28, 1986 of the existing agreement with CAO for staffing of the consolidated ground transportation counter at the International Arrivals Building at Kennedy International Airport, in the total estimated amount of \$290,000, and to order extra work up to the amount of \$43,500.

(Board - 7/11/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that an increase in the total estimated project expenditure for the operation of consolidated ground transportation counters at LaGuardia Airport from \$1,757,500 to \$2,888,000, including payments to the Council for Airport Opportunity (CAO), an allowance for extra work and miscellaneous expenses, is authorized; and it is further

RESOLVED, that an increase in the total estimated amount of the existing agreement with CAO for staffing of the consolidated ground transportation counters at LaGuardia Airport from \$718,750 to \$1,418,750, is authorized, and the Executive Director is authorized to order extra work up to the amount of \$105,000; and it is further

RESOLVED, that an increase in the total estimated project expenditure for the operation of a consolidated ground transportation counter at the International Arrivals Building at Kennedy International Airport from \$242,000 to \$783,000, including payments to the CAO, an allowance for extra work and administrative and miscellaneous expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized to enter into an extension to May 28, 1986 of the existing agreement with CAO for staffing of the consolidated ground transportation counter at the International Arrivals Building at Kennedy International Airport, in the total estimated amount of \$290,000, and to order extra work up to the amount of \$43,500; for form of the extension to be subject to approval as to form by General Counsel or his authorized representative.

(Board - 7/11/85)

Kennedy International Airport - Lease with Prosegur, Inc. - High-Security Cargo Storage Facility

It was reported that the Board, at its meeting on February 9, 1984, authorized the Executive Director to enter into a lease agreement with a term of ten years, plus a period for construction not to exceed twelve months, with Prosegur, Inc., to be effective on or about April 1, 1984 for a site of approximately 1.4 acres at Kennedy International Airport, at an annual rental of \$25,968 on commencement of the lease and \$31,740 effective five years from completion of construction or six years from commencement of the lease, whichever occurs sooner, upon which Prosegur would construct, at its expense, a high-value cargo storage facility of approximately 5,000 square feet to be used for the reception, temporary storage and distribution of high-value cargo transported by air.

At the time the Board authorized said Lease, Prosegur, Inc., a New York-based Delaware corporation whose principal business is the ground transportation of high-value cargo shipped via various scheduled international airlines, intended to construct and finance a one-story, high-security facility on a 1.4 acre site at a cost of approximately \$500,000. Prosegur subsequently advised that a larger market existed for its services and that a two-story facility at an approximate cost of \$1.326 million may be required initially or at some time during the term. Staff believes Port Authority investment therein would be desirable. Periodic payments would be made to Prosegur as portions of the facility or phase are completed and repayment of the amounts so paid, plus interest during construction would commence one month after substantial completion of the facility, based upon 360 equal monthly payments. Prosegur shall pay an additional amount monthly on the unpaid balance of said principal and accrued interest at 90% of Citibank's prime rate, to be adjusted according to any changes in the prime rate. There would be provisions for the payment of the unpaid balance of the Port Authority's investment, and accrued interest, upon the expiration of the lease term, without extension, upon terms and conditions to be agreed upon with Prosegur, in the discretion of the Executive Director.

It has become necessary to change the commencement date of the lease from April 1, 1984 to a date on or about November 1, 1985, because Prosegur was unable to finalize its plans for the facility in a timely manner and also because the site area had to be revised.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to revise the proposed lease with Prosegur, Inc. at Kennedy International Airport, all in accordance with the foregoing.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he is hereby authorized to (1) amend Lease AYB-639 with Prosegur, Inc. (formerly Prosecurity), whereby periodic payments would be made to pay the costs of the construction of Prosegur's high-security cargo storage facility initially, and if necessary, at a subsequent phase at Kennedy International Airport of approximately \$1.35 million to be repaid by Prosegur at 90% of

Citibank's prime rate to be adjusted according to any changes in the prime rate and all in accordance with the foregoing, (2) revise the effective date of Prosegur's lease, from a date on or about April 1, 1984 as previously approved by the Board, to a date on or about November 1, 1985, all in accordance with the foregoing; and it is further

RESOLVED, that the form of said agreement be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

Kennedy International Airport - Building 178 - Lease with U.S. General Services Administration -
U.S. Customs Service

It was reported that negotiations have now been substantially completed with the U.S. General Services Administration (GSA) which would call for U.S. Customs to move out of Building 80 and into Building 178 at Kennedy International Airport. U.S. Customs currently occupies approximately 49,900 square feet of space in Building 80 and approximately 42,000 square feet of outside area at a monthly rental of \$40,527. The lease expires on July 31, 1985. Other tenants in Building 80 and firms currently located off-airport, have indicated the desire to rent the space in Building 80 to be vacated by U.S. Customs' move.

Building 178 is located on a site of approximately 3.193 acres and the building contains approximately 60,000 square feet of space which equates to 45,000 square feet of usable office area. The proposed annual rental is \$900,000 for the initial term of approximately five years and \$876,000 during a five-year extension period. These annual rental rates equate to \$20 per usable square foot during the initial term and \$19.47 per usable square foot during the extension.

The reduction in rentals for the extension reflects the fact that the Port Authority will perform certain work for U.S. Customs, such as interior painting, repair of all interior lighting and relamping, replacement or new installation of carpeting, tiles, and drapes, to meet GSA requirements, and weatherproofing the outside of all window frames at an estimated cost of \$570,000 which will be written off over initial term of the proposed lease.

The Port Authority will also undertake other work prior to occupancy or during the initial lease term: including structural modifications to allow greater floor loadings in portions of the North Wing to meet GSA standards; construction of handicapped facilities to comply with Federal government standards; upgrading fire safety measures; replacement of the cooling tower of the North Wing and installation of a separate hot water heater.

Under the terms of the lease, the GSA will be responsible for the operation, maintenance and specified repairs of the premises, and building systems which will include air conditioning, elevators, heating, electrical and plumbing.

The Port Authority will have responsibility for other repairs to and replacement of building systems and parts thereof, if required, and will also retain responsibility for structural maintenance, including the foundation, supporting frame, roof and the exterior of the exterior walls (including windows and doors). To comply with GSA procedures, the Port Authority will perform monitoring tests for the presence of asbestos on a quarterly basis in Building 178. In the event that it is determined that there are levels of asbestos that exceed OSHA standards, the Port Authority and the GSA each have the option to correct the condition and in the event that neither corrects the condition, GSA can terminate the lease. Electricity and water will be metered by the Port Authority and billed separately to U.S. Customs at a small government discount for electricity.

(Board - 7/11/85)

Because of the extensive amount of work to be performed by the Port Authority to conform Building 178 to GSA requirements, U.S. Customs may move into the Building in stages at pro-rated rentals. In such event, the initial fixed lease term will be five years plus a period to be computed based on a formula set fourth in the lease. Because of the possibility of partial initial occupancy, it has been agreed to continue the same current monthly rental rate for U.S. Customs in Building 80 until its move into Building 178 is complete, or not later than twelve months after the proposed lease is cancelled or terminated because the Port Authority shall fail to make all of the Building 178 space available to the GSA or to complete construction as required. If the GSA should be in partial occupancy of Building 178 upon a termination of the proposed lease based upon failure of the Port Authority to make all the space available or to complete required construction, the GSA would also be permitted to maintain its existing occupancy in that Building at existing rentals or twelve months after termination. In no event will the agreement to continue GSA occupancy of Building 80 and/or Building 178 at existing rentals continue more than 2½ years after the date of execution of the lease. It is also contemplated that, if necessary, an agreement would be entered into with GSA for payment in settlement of any restoration obligations as to Building 80.

The Port Authority maintains the option to recover .395 acre or 17,208 square feet of outside property on the south side of Building 178 in the event future rail right-of-way or roadway construction demands require it. This may result in a loss of approximately 27 parking spaces to U.S. Customs. If that should happen, the rent will be reduced appropriately.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement with the United States General Services Administration at Kennedy International Airport all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be authorized for and on behalf of the Port Authority to enter into a lease with the United States General Services Administration (GSA) for use by the U.S. Customs Service of Building 178 and associated areas at Kennedy International Airport for a term consisting of (1) a possible initial period of partial occupancy at prorated rentals because of performance of certain Port Authority construction in the premises plus (2) a period of five years commencing on a date to be fixed in accordance with the lease, at an annual rental of approximately \$900,000 with provision for an option for the GSA to extend the term of the lease for another five-year period subject to the right of the GSA to terminate on 90 days notice at an annual rental rate of approximately \$876,000; and it is further

RESOLVED, that the Executive Director be authorized for and on behalf of the Port Authority in the event the proposed lease with GSA for space in Building 178 should be cancelled prior to complete occupancy thereof because the Port Authority fails to deliver the space or fails to complete required construction, within a specified period of time, to permit the U.S. Customs Service to remain in partial occupancy of existing space in Building 178, and/or Building 80, if any, at existing rentals for one year thereafter, but in no event beyond 2½ years after the execution of the lease; and it is further

(Board - 7/11/85)

RESOLVED, that the Executive Director be authorized for an on behalf of the Port Authority to enter into an agreement with GSA for payment in settlement of any restoration obligation the GSA may have in Building 80; and it is further

RESOLVED, that the form of the foregoing agreements be satisfactory to the General Counsel or his designated representative.

(Board - 7/11/85)

Kennedy International Airport - Surrender of Space in Cargo Building 83 and Related Outside Areas and Lease of Space in Cargo Building 81 and Related Outside Areas - Summit Airlines, Inc., Lease of Space in Cargo Building 83 and Related Outside Areas - Federal Express Corporation

It was reported that cargo Building 81 at Kennedy International Airport was constructed by the Port Authority in 1956 and since its completion has been rented to a variety of airlines engaged in the transportation of air cargo. The lease with the latest tenant in the building, Trans World Airlines, Inc., (TWA), has expired and TWA vacated the premises on April 1, 1985, relocating its cargo operation to Hangar 12, a portion of which has been converted to a cargo facility by TWA. In anticipation of TWA's departure from Cargo Building 81, staff held discussions with several potential tenants which had expressed interest in acquiring space in that building. The Board, at its meeting on March 14, 1985, authorized a lease with DHL Airways, Inc., for approximately 34,000 square feet of space in Cargo Building 81 and related outside areas.

Summit Airlines, Inc., has occupied 20,600 square feet of space in Cargo Building 83 since November 1, 1981 under lease AYB-477. However, on April 1, 1985, Summit moved its cargo hub from Philadelphia to Kennedy International Airport. As a result of this shift in corporate activity, Summit now requires increased cargo space and ramp area, and Building 81 meets these new requirements. Negotiations have now been substantially completed with Summit Airlines, Inc., to surrender its lease (AYB-477) in Building 83 on or about July 14, 1985, and to enter into a new lease (AYB-708) for approximately 32,400 square feet of space in building 81 and related outside areas for a term of three years at the following approximate annual rentals:

Effective Date	Building Area	Outside Area	Total Approximate Annual Rental
7/01/85 to 6/30/88	\$162,000 (32,400 sq. ft. @ \$5.00 per sq. ft.)	\$59,760 (119,520 sq. ft. @ \$.50 per sq. ft.)	\$221,760

Summit Airlines will also be responsible for any alterations to Building 81 which may be required to establish the area to be leased as an independent tenancy. These alterations would include installation of any required fire separation, separation of utility lines and installation of toilet and office areas.

Federal Express Corporation is a major carrier in the rapidly growing air courier field and is currently constructing a major facility at Newark International Airport. Federal Express Corporation has determined that the Newark facility is not conveniently located to service its Long Island operation. At the present time, Federal Express services its Long Island market from a facility at Islip but has determined that that operation can be served more efficiently from a base at Kennedy International Airport. Space in Cargo Building 83 is ideally suited to Federal Express' needs, which include the requirement to be able to service two B-727 aircraft per day as well as helicopter operations. Approximate annual rentals for Federal Express (AYB-709) are as follows:

(Board - 7/11/85)

Effective Date	Building Area	Outside Area	Total Approximate Annual Rental
7/15/85 to 7/31/88	\$103,000 (20,600 sq. ft. @ \$5.00 per sq. ft.)	\$43,064 (86,120 sq. ft. @ \$.50 per sq. ft.)	\$146,064

The proposed leases between the Port Authority and both Summit Airlines and Federal Express will be multi-occupancy leases, with Summit and Federal Express assuming responsibility for maintenance and operation costs associated with their respective premises, with the exception of property insurance on the building, structural integrity and responsibility for maintenance of the roof, which will be retained by the Port Authority. The Port Authority will provide electricity and cold water to both premises on a metered basis.

In addition, the leases will contain provisions for mutual termination rights, in the event future terminal expansion makes it necessary for the Port Authority to relocate taxiways in a way that diminishes access to ramps at the Summit and Federal leaseholds.

Summit Airlines will also have the option to terminate its lease if it becomes an approved sub-lessee in the proposed King Cargo Building Project if the same is constructed at Kennedy International Airport.

Summit was permitted to occupy premises in Building 81 on July 1, 1985, and Federal Express will be permitted to occupy premises in Building 83 on or about July 15, 1985, in each case subject to termination by the Port Authority, pending Board approval and Gubernatorial review of the proposed three-year lease agreement.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into agreements into Summit Airlines, Inc. and with Federal Express Corporation, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized (1) to enter into an agreement with Summit Airlines, Inc. accepting the surrender by Summit Airlines, Inc., of its existing lease in Cargo Building 83 at Kennedy International Airport, (2) to enter into a three-year lease with Summit Airlines, Inc., for space in Building 81 and related outside areas at Kennedy International Airport, commencing on or about July 1, 1985, at an approximate annual rental of \$221,760, and (3) to enter into a three-year lease with Federal Express Corporation for the existing Summit Airlines space in Building 83 at Kennedy International Airport, commencing on or about July 15, 1985, at an approximate annual rental of \$146,064; and it is further

RESOLVED, that the form of said agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

Pan American World Airways, Inc. - U.S. Department of Transportation Investigation into the Sale of its Pacific Division to United Air Lines - Intervention by the Port Authority

It was reported that on June 13, 1985, the Department of Transportation, by Order 85-6-44, instituted an investigation, the Pacific Division Transfer Case, to decide whether approval should be granted authorizing the transfer of Pan American Pacific Division route authority, aircraft and other assets to United for \$750 million and whether to impose any terms, conditions and limitations on the transaction. The order also directed that all additional requests to intervene be filed not later than June 17, 1985. Interim authority for intervention was approved by the Executive Director subject to ratification by the Board to file a petition to intervene in the proceeding in order to protect the competitive position of the Port of New York and New Jersey. The Port Authority filed a petition to intervene on June 17 and it was granted by the Chief Judge on June 19, 1985.

Staff supports Department of Transportation approval of the transfer of Pan American's Pacific Division to United upon the condition that United continue to provide, at minimum, the number and pattern of non-stop Kennedy International-Tokyo flights that Pan American is currently providing. According to information submitted by the applicants, Pan Am is the dominant carrier in the market with 13 of 27 weekly non-stop flights and according to official statistics, approximately 400,000 passengers travelled in this market during the first eleven months of 1984. While United has indicated it will serve Pan Am's route as Pan Am now serves them, the possibility of changes in service patterns exist and United may seek to substitute service through West Coast gateway cities since its domestic network is oriented toward the West rather than the East.

The U.S.-Pacific market is expected to continue to grow significantly and the metropolitan area must have the opportunity to participate in this growth. One of the keys to this participation is adequate non-stop air service; the absence of such service would be detrimental to the regional economy.

It was therefore recommended that the Board approve the action of the Executive Director authorizing the intervention and participation in this proceeding and authorize the Executive Director and General Counsel to arrange for intervention and participation in any other administration or judicial proceedings arising therefrom.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the action of the Executive Director authorizing the intervention and participation by the Port Authority in the proceeding now pending before the United States Department of Transportation under Docket No. 43065, a proceeding seeking approval of an agreement between Pan American World Airways, Inc., and United Air Lines, Inc., for an acquisition of assets and a transfer of Pan American's Pacific route authority to United be and is hereby approved and the Executive Director and General Counsel be and they are hereby authorized to arrange for intervention and participation in any other administrative or judicial proceeding arising therefrom.

(Board - 7/11/85)

Settlement with Fugazy Express, Inc. and Affiliates - Aviation Ground Transportation Fee Obligations

It was reported that Fugazy Continental Corporation of New Jersey, Inc., Fugazy New Yorker Limousine Co., Inc., Fugazy International Corp., Fugazy Continental Corp., Fugazy Continental, Inc., Fugazy Express, Inc., Fugazy Express of Connecticut, Inc., and Fugazy Express of New Jersey, Inc., (such corporations being collectively referred to as the "Fugazy Parties"), each of the Fugazy Parties being a party to an Agreement dated September 27, 1983 (the "Interim Agreement") and a Letter Agreement dated September 19, 1984, (the "Letter Agreement"), have in the past had or been operating as if they had been granted various privilege and other permits from the Port Authority covering ground transportation services to, at and from the Port Authority airports to the public and to airlines for their personnel.

Port Authority staff has conducted extensive discussions with the Fugazy Parties over a period of years concerning unpaid fees and other sums due the Port Authority. Nevertheless, the Port Authority has revoked such privilege and other permits as the Fugazy Parties had and obtained warrants of eviction of the Fugazy Parties from certain counters located in the passenger terminals at Kennedy International and LaGuardia Airports. The Board has from time to time been advised of the status of this dispute and that the Fugazy Parties have continued to operate to, at and from the airports, with permittee status.

The Interim Agreement provides, among other things, that the Port Authority would forbear from executing its warrants of eviction and continue permittee status for the Fugazy Parties provided that the Fugazy Parties make certain current and past due payments and contemplates that the parties would proceed to negotiate a comprehensive payment arrangement. When it appeared that the parties had failed to reach agreement on such an arrangement, the Port Authority served on the Fugazy Parties a "Notice of Eviction, Termination and Acceleration" (the "Notice") of the Interim Agreement, dated April 30, 1984. After further negotiations, the Fugazy Parties and the Port Authority entered into the Letter Agreement delaying the enforcement of the Warrant of Eviction and the Notice. The Letter Agreement provides, among other things, that the Fugazy Parties agree to be liable for, or to irrevocably offer to the Port Authority to be liable for, a total sum of approximately \$1.6 million as of November 17, 1984, which amount, in the aggregate, represents an estimate of all sums due the Port Authority from the commencement of the Fugazy Parties' relationship with the Port Authority through October 20, 1984, other than for certain obligations specified below, together with accrued interest thereon, utilizing rates of 11% per year and 14% per year for accrued interest. The Fugazy Parties had certain rights in the Letter Agreement to challenge the amount fixed by the Port Authority pursuant to methods provided for in the Letter Agreement which they did not exercise in a timely manner.

Concurrently, the Fugazy Parties and their then principal, William D. Fugazy, made efforts to obtain outside financing which resulted in the purchase of a controlling ownership interest by Metromedia, Inc. in each of the Fugazy Parties. Discussions continued among representatives of Metromedia, the Fugazy Parties and the Port Authority concerning the obligations of the Fugazy Parties.

(Board - 7/11/85)

Port Authority staff and counsel to the Fugazy Parties have reached agreement to settle the above-described obligations and certain other obligations estimated to be less than \$100,000 by entering into a proposed Payment Agreement. Such Payment Agreement would provide for the payment of a principal amount of \$1.3 million, together with ongoing interest from October 31, 1984 and for the mutual settlement and release of the parties' claims. Payment is to consist of \$100,000 to be made upon execution of the Payment Agreement with the remainder to be paid in 60 equal monthly installments of principal and ongoing interest at an annual rate of 11%. The Port Authority would receive a letter of credit or other acceptable security for 12 such monthly installments, effective during the five-year term of the Payment Agreement.

The Port Authority would, among other things, issue a ground transportation permit or permits, each to be revocable by either party on 30 days' notice to the other, to one or more of the Fugazy Parties. A portion of the fee for the privilege of operation service to the public to, at and from the airports would be measured on the basis of a flat monthly charge to the permittee for the operation of certain vehicles in-lieu-of a fee of 10% of the permittee's gross receipts from airport ground transportation departures by the public.

It was therefore recommended that the Executive Director or the Director of Aviation be authorized for and on behalf of the Port Authority to accept an irrevocable offer and also to enter into an agreement, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director or the Director of Aviation is authorized to accept the irrevocable offer of each of the Fugazy Parties (which term collectively refers to Fugazy Continental Corporation of New Jersey, Inc., Fugazy New Yorker Limousine Co., Inc., Fugazy International Corp., Fugazy Continental Corp., Fugazy Continental, Inc., Fugazy Express, Inc., Fugazy Express of Connecticut, Inc., and Fugazy Express of New Jersey, Inc.) to be liable for the sum of approximately \$1.4 million (in addition to its other liabilities of approximately \$300,000) as fixed by the Port Authority and hereinafter set forth, under the terms of a Letter Agreement with the Fugazy Parties and also to, should the Fugazy Parties and the Port Authority so agree, enter into a Payment Agreement which would provide for the payment of \$1.3 million from the Fugazy Parties over a five-year period together with ongoing interest and would provide for a mutual settlement and release of the claims of the parties; the form of the Payment Agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

Outerbridge Crossing - Roadway Resurfacing and Deck Rehabilitation - Contract AKO-120.004 - Award

It was reported that Contract AKO-120.004, which is the only contract to be awarded in connection with this project, provides for the removal of the asphalt surface, repair of the concrete deck, and the installation of a new asphalt surface, all at the Outerbridge Crossing.

All of the work under this contract will be performed during nighttime hours so as to minimize interference with traffic flow.

The contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and the following bids were received on July 2, 1985:

	Classified Work	Unclassified Work	Estimated Total Amount
Bellezza Company, Inc. S. Kearny, New Jersey	\$ 7,906,410	\$2,513,245	\$10,419,655
Perini Corporation Hastings-on-Hudson, New York	6,378,200	4,327,780	10,705,980
Schiavone Construction Co., Inc. Secaucus, New Jersey	10,757,550	4,161,000	14,918,550
ENGINEER'S ESTIMATE			\$ 9,700,000

Bellezza Company, Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project at the Outerbridge Crossing for roadway resurfacing and deck rehabilitation at an expenditure presently being estimated at \$16,670,000 including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; and,
2. the Executive Director to award Contract AKO-120.004, Roadway Resurfacing and Deck Rehabilitation, Outerbridge Crossing, to Bellezza Company, Inc. in the total estimated amount of \$10,419,655, to order extra work up to the amount of \$2,080,000.

(Board - 7/11/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at the Outerbridge Crossing for roadway resurfacing and deck rehabilitation, the expenditure therefore presently being estimated at \$16,670,000 including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract AKO-120.004, Roadway Resurfacing and Deck Rehabilitation, Outerbridge Crossing, to Bellezza Company, Inc. in the total estimated amount of \$10,419,655, to order extra work up to the amount of \$2,080,000.

(Board - 7/11/85)

Greenville Rail Yard - Brooklyn Eastern District Terminal - Purchase of Tugboat, "Brooklyn III" -
New York Cross Harbor Railroad Terminal Corp. - Charter of Tugboat, "Brooklyn III"

It was reported that the Board, at its meeting on May 10, 1984, authorized the Executive Director to enter into an agreement with Conrail for the purchase of the Greenville carfloat rail yard and floatbridge in Jersey City, New Jersey, and, at its meeting on October 11, 1984, the Board certified the rail yard and rail car floatbridge, to be acquired as the Greenville Yard-Port Authority Marine Terminal, as an additional facility of the Port Authority. It has been reported to the Board that New York Cross Harbor Railroad Terminal Corp. (NYCHRR) is the sole provider of cross harbor carfloat service between New Jersey and Brooklyn. This service saves 275 additional miles of transportation costs and transit time for receivers and shippers in Brooklyn, Queens and Long Island whose southern freight would otherwise have to be routed through Selkirk, New York, a major rail classification yard approximately fifteen miles south of Albany. The route to and from Selkirk east of the Hudson River further restricts certain freight because of low overhead bridge and tunnel clearances. NYCHRR currently floats about 3,500 cars per year of freight and has concluded an agreement with the Long Island Rail Road and Conrail, effective February 1, 1985, under which an additional 4,000 or more cars annually of Long Island Rail Road freight will be handled through the Greenville facility. Thus, it is of immediate importance that a second maneuvering tugboat be acquired to augment use of NYCHRR's own vessel and to handle its new Long Island freight.

Two independent marine survey/appraisal consultants retained by the Port Authority have estimated the value of the tugboat Brooklyn III, at \$160,000 and \$175,000, respectively, and have recommended specific repairs totalling about \$130,000. One of the consultants will be retained by the Port Authority to supervise the performance of the repair work and to certify the repairs as complete prior to the use of the tugboat under the charter party.

The Port Authority will purchase the tugboat Brooklyn III, from Brooklyn Eastern District Terminal, at a price of \$150,000.

The Port Authority's costs associated with the acquisition and repair of the tugboat will be limited to \$120,000. All costs in excess of such amount will be borne by NYCHRR. According to the survey/appraisal consultants, after the repairs are completed, the tugboat should have a market value of approximately \$300,000.

The Port Authority would enter into a charter party with NYCHRR covering the charter of the tugboat to NYCHRR. The rental payable by NYCHRR at a monthly rate of .014784 for each dollar of Port Authority investment represents the repayment, over the ten-year charter period, of the Port Authority's investment in the tugboat which shall not exceed \$270,000 including the purchase price, repairs, survey/appraisals, consultants' fees, drydock and other associated expenses and fees. NYCHRR would have the right to purchase the tugboat at any time during the charter period at a price equal to the Port Authority's unamortized investment. Title to the tugboat will be delivered to NYCHRR at the expiration of the charter period.

During the charter period, NYCHRR would be responsible for all operating and maintenance expenses, including the purchase of adequate insurance coverage.

(Board - 7/11/85)

It was therefore recommended that the Board authorize the purchase of the tugboat, Brooklyn III from Brooklyn Eastern District Terminal and the charter of the tugboat to New York Cross Harbor Railroad Terminal Corp. on the foregoing terms and conditions.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to: (1) enter into a contract of sale with Brooklyn Eastern District Terminal providing for the purchase of the Port Authority of the tugboat, "Brooklyn III," at a purchase price of \$150,000; (2) expend up to \$120,000 to effect repairs to the tugboat including survey, drydock and other costs associated with the acquisition and repair of the tugboat; and (3) enter into a charter party with New York Cross Harbor Railroad Terminal Corp. (NYCHRR) providing for the charter of the tugboat, "Brooklyn III," by NYCHRR for a ten-year period commencing on or about October 1, 1985 at a monthly rental of .014784 for each dollar of Port Authority investment, with NYCHRR having the right at any time during the charter period to purchase the tugboat by paying the Port Authority's unamortized investment in the tugboat, and be it further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

Greenville Property - Payment In-Lieu-Of Taxes - City of Jersey City

It was reported that the Board, at its meeting on January 14, 1982, November 10, 1982, April 14, 1983, and May 10, 1984, authorized the payment, for each of the years 1981-1984, to the Cities of Jersey City and Bayonne, New Jersey, of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties, respectively. Pending completion of negotiations concerning an in-lieu-of tax agreement, it is recommended that payment be made to the City of Jersey City for the year 1985 of an amount equal to the real estate taxes assessed against the Greenville property for the year 1981, the year of purchase of this property, in the approximate amount of \$489,000.

It was therefore recommended that the Board authorize the payment for the year 1985 to the City of Jersey City, New Jersey, in connection with the Greenville property acquired from the Penn Central Corporation, of an amount equal to the real estate taxes assessed on the properties for the year 1981.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive, Director be and he hereby is authorized to make payment for the year 1985 to the City of Jersey City in connection with the Greenville properties acquired from the Penn Central Corporation of an amount equal to the real estate taxes assessed on the properties for the year 1981.

(Board - 7/11/85)

Port Jersey Properties - Payment In-Lieu-Of Taxes - Cities of Bayonne and Jersey City

It was reported that the Board, at its meetings on January 14, 1982, November 10, 1982, April 14, 1983, and May 10, 1984, authorized the payment, for each of the years 1981-1984, to the Cities of Bayonne and Jersey City, New Jersey, of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties. Negotiations are now proceeding with several marine interests for possible development of the Port Jersey property as a traditional marine terminal. If these negotiations are successful, staff will attempt to negotiate an individual payment in-lieu-of taxes agreement with the two municipalities on the Port Jersey property. In the interim, it is recommended that payment be made to the Cities of Bayonne and Jersey City of an amount equal to the assessed the real estate taxes against the Port Jersey properties for the year 1982 in the approximate amount of \$104,000 and \$406,000 respectively.

It was therefore recommended that the Board authorize payment for the year 1985, to the Cities of Bayonne and Jersey City, New Jersey, in connection with the Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America, of an amount equal to the real estate taxes assessed on the properties for the year 1982.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to make payment for the year 1985 to the Cities of Jersey City and Bayonne in connection with Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America of an amount equal to the real estate taxes assessed on the properties for the year 1982.

(Board - 7/11/85)

Conrail Volume Shipper Agreement

It was reported that the Staggers Act of 1980 deregulated Trailer-On-Flatcar (TOFC) and Container-On-Flatcar (COFC) movements between ports in the United States and inland points. Conrail, a leader in rail TOFC and COFC movements, established an innovative marketing program of wholesaling transportation services through a Volume Shipper Agreement (VSA) with Shippers' Agents and steamship lines. The VSA, which excludes individual shippers/vendors, requires a minimum tender of not less than 300 trailers each calendar quarter; the employment of a sales force and/or customer service organization soliciting and obtaining freight for rail movements; and, the maintaining of a satisfactory credit arrangement to pay all charges within twenty days after containers have been billed. The Shippers' Agent, who is a party to the VSA, obtains the low line-haul rate on freight described as freight-all-kinds from Conrail and establishes its own level of rates with the shipper/vendor based on market demands plus a management fee.

Conrail's wholesale rate program is under pressure from the Chessie and Norfolk Southern railroads which have reduced their rates below the wholesale level. Conrail, due to the pending sale, is unable to meet the competition because it is required to operate all services at a profit. In order to compete with the lower Norfolk Southern rates, the Port Authority has encouraged Conrail to establish a new train service between Portside Yard at Port Elizabeth and Chicago, with intermediate points of Cleveland and Toledo, employing the new technology of double-stacking containers. Conrail is currently moving, from West Coast ports, similar types of trains carrying minibridge cargo from the Far East to the New York-New Jersey region. At present, railroad car clearances for double-stack cars are only available in the North Atlantic region via Conrail to or from New York. It has been estimated that use of this new technology will reduce the cost of handling containers from 20 - 25%. Conrail has ordered 200 of the COFC platform cars and will commence the new service on July 15, 1985, with daily trains in each direction. The service will be separate and distinct from its TOFC service which will be maintained. Conrail will reduce its wholesale rates for this service an average of \$150 per container, \$50 below the Norfolk Southern's rate. The \$50 differential is in consideration of the drayage cost in New York and is intended to equalize shipper/vendor costs at Norfolk. The new double-stack rates will not be increased for the first year of service or until mid-1986.

The Port Authority will be aggressively advertising and promoting this program to build volume for the double-stack service. Steamship lines with VSA's will be encouraged to use the train service. There are only four carriers presently participating in the VSA program in New York. The majority of steamship lines do not have the volume to move 300 boxes a quarter and must use the services of a Shippers' Agent. Shippers' Agents serving the New York region concentrate on domestic movements for individual shippers/vendors and have good control over billing and payment of services. Most Shippers' Agents do not have the cash flow to handle rail service payments beyond Conrail's credit arrangements. Previous arrangements with steamship lines by agents have established that steamship lines are slow payers and agents could not afford to maintain their accounts.

(Board - 7/11/85)

In order to encourage the majority of steamship lines in the Port to use the new double-stack train and discharge containers in the Port of New York/New Jersey, staff recommends that the Port Authority become a Shippers' Agent. As a Shippers' Agent, the Port Authority would co-load container shipments with Keystone Terminals under Keystone's agreement. Keystone's present movements exceed the quarterly volume minimums and co-loading would exempt the Port Authority from the quota. Keystone Terminals, an experienced Shippers' Agent, also operates Matco Trucking Company and has been in business over 30 years. Total corporate employment is approximately 150 and 60 percent of these are minorities. Keystone would handle all operations required by the railroad and would bill the shipper/vendor on Port Authority billing for services. Charges to the shipper/vendor will be established by the Port Authority and will include Conrail's line-haul rates, a management fee for Keystone's services, and a penalty provision for delinquent payments. The Port Authority will collect all charges from the shipper/vendor. Keystone will maintain all records of cargo movements, handle all customer service calls, and provide credit information on shippers/vendors when requested. The agreement with Keystone will contain provisions for cancellation on short notice if the performance or arrangement is not satisfactory to the Port Authority.

To permit close evaluation of the costs and benefits associated with this program, the Port Authority would enter into the Volume Shipper Agreement with Conrail and Keystone Terminals for a period not to exceed six months initially.

The program will be initiated on a trial basis to be re-evaluated by the Board at the earliest of the following: six months; billings to shippers/vendors exceed \$1 million; or, delinquent accounts of shippers/vendors reach 30% of total billing.

It was therefore recommended that the Board authorize the Port Authority to become a Shippers' Agent by entering into a Volume Shipper Agreement, for a period not to exceed six months initially, with Consolidated Rail Corporation (Conrail) and Keystone Terminals to arrange for the inland transportation of containers on Conrail's new double-stack container train.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Port Authority is authorized to become a Shippers' Agent by entering into a Volume Shipper Agreement, for a period not to exceed six months initially, with Consolidated Rail Corporation (Conrail) and Keystone Terminals to arrange for the inland transportation of containers on Conrail's new double-stack container train.

(Board - 7/11/85)

Red Hook Container Terminal Expansion - Amendment to the Lease with The City of New York and the State of New York

It was reported that the Board, at its meeting on September 1, 1978, authorized an agreement with The City of New York and the State of New York for the construction of the Red Hook Container Terminal. For the original terminal, the City and the State contributed \$24 million for construction costs. The City also acquired and contributed ten acres of land with the Port Authority contributing an additional 30 acres of land, including Piers 10 and 11. Under the terms of the original agreement, revenues derived from the terminal were to be used to pay Port Authority operating and maintenance costs which include payments in-lieu-of taxes; an annual payment of \$100,000 to New York City; and an annual payment of \$400,000 to the Port Authority. After debt service was satisfied on the City's last \$4 million contribution to the project, all excess funds were to be deposited in a development fund for a future Red Hook expansion and shall provide certain easements required by the City's Department of Environmental Protection.

The Board, at its meeting on December 8, 1983, authorized a project for the Port Authority to expand the Red Hook Container Terminal at an approximate cost of \$14.5 million and the conduct of negotiations with the City and the State for a new agreement. An agreement has now been reached with the City and the State whereby the Port Authority will provide the construction funds and 26 acres consisting of Piers 9A and 9B and upland, with the City providing an additional ten acres consisting of three city blocks needed for expansion of the terminal. The City will be granted additional maintenance easements.

The Port Authority will be responsible for the construction of the expanded terminal and operation and maintenance therefore. Revenues from the expanded terminal will be used to pay for all operating and maintenance costs, including payment in-lieu-of taxes for Port Authority realty, originally Piers 9A, 9B and 10 and 11. Remaining net revenues will be divided equally between the City and the Port Authority.

Following construction completion on the original and expanded terminal, the City will have contributed about \$12 million and 20 acres of land; the Port Authority's share would be \$11.5 million for construction, \$3 million for a crane, under a separate agreement with Universal Maritime Service and approximately 56 acres consisting of Piers 9A, 9B, 10, and 11 and adjacent upland. The terms of this amendment will supersede those of the original agreement.

The Port Authority, State and City will jointly promote and market the expanded Red Hook Container Terminal at an estimated annual cost of \$100,000. Direct marketing costs shall become a portion of the operating and maintenance costs.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into an agreement amending the Agreement between the Port Authority, the City of New York and the State of New York covering the construction and operation of the Red Hook Container Terminal to provide for the expansion thereof in accordance with the foregoing.

(Board - 7/11/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director on behalf of the Port Authority to enter into an amendment to the Agreement with the City of New York and the State of New York for the expanded Red Hook Container Terminal; the said agreement of amendment to be in accordance with the foregoing; the form of the Agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 7/11/85)

All Risk Property Damage and Loss of Revenue Insurance - Increase in Premium

It was reported that the Board, at its meeting on May 10, 1984, authorized the purchase of \$200 million excess of a \$100,000 self-insured retention, per occurrence, of All Risk Property Damage and Loss of Revenue insurance covering all properties of the Port Authority and Port Authority Trans-Hudson (PATH), other than bridges and tunnels, effective June 1, 1984, through Hamond & Regine, Inc., and C. E. Heath & Co., Ltd., as follows:

1. \$10 million excess of a \$100,000 self-insured retention, per occurrence, for a period of three years (June 1, 1984 to June 1, 1987) at a prepaid premium of \$1.1 million and for an additional period of three years (June 1, 1987 to June 1, 1990) at a prepaid premium equal to the premium for the first three years, adjusted in proportion to the change in insurable values occurring during the first three-year period; and

2. \$190 million excess of \$10 million excess of a \$100,000 self-insured retention, per occurrence, for a period of three years (June 1, 1984 to June 1, 1987) at a prepaid premium of \$675,000, and for an additional period of two years (June 1, 1987 to June 1, 1989) at a prepaid premium equal to two-thirds the premium for the first three years, adjusted in proportion to the change in insurable values occurring during the first three-year period.

In mid-1984, the long anticipated tightening of world insurance markets began, taking the form of severe reinsurance market capacity contraction and higher premium pricing. This, in turn, has dictated that primary insurers reduce their underwriting capacity or seek substantially higher premium rates than in the past, resulting in numerous cancellations and non-renewals in order to rewrite business at more profitable levels. All evidence points to a continuation of this market tightening and substantial repricing, on a worldwide basis, in order to reverse the prolonged period of industry-wide underwriting losses.

The aforementioned restrictive worldwide market conditions have had and continue to have adverse effects on all major insurance placements. Staff in conjunction with EBASCO Risk Management Consultants, Inc., feel that the impact on the Port Authority has not been as severe as that experienced by other major insureds.

In accordance with the policy provisions providing for cancellation of the policy on 120 days' prior notice, various participants in the All Risk Property Damage and Loss of Revenue Insurance program issued cancellation notices creating a \$32.05 million shortage in the \$200 million program effective June 1, 1985. \$7.5 million of this shortage was within the \$10 million primary insurance layer. These shortages were deemed significant enough to renegotiate the entire program to reflect current market realities. Insurance industry practice dictates that all underwriters in the same layers enjoy the same terms and conditions and that substantial changes in terms and conditions at any layer be identified to all underwriters to give them each an opportunity to renegotiate at rates commensurate with the level of risk taken. Staff feels that renegotiating the entire placement at this time is to the Port Authority's advantage as it not only maintains the integrity of the coverage at most reasonable rates but also holds out the best opportunity for continuing the placement intact through the extension period.

(Board - 7/11/85)

In soliciting replacement coverage, staff learned that the London market continued to show no interest in participating in the primary layer of this program due to the extremely low premium obtained in the 1984 renewal process. At that time our annual premium rate per \$100 of insurable value was reduced from 2.1 cents to 1.2 cents. (See Exhibit I attached showing annual rates for the last three placements of this program). As a result, the broker proceeded to renegotiate coverage with the existing domestic underwriters who appeared interested in withdrawing their cancellations for a moderate increase in premium.

After extensive negotiations, 95% of the replacement coverage has been completed at a revised premium of \$2,276,180 for the three years beginning on June 1, 1984. This represents an increase of \$501,180 for the second and third years of this policy. The revised premium translates to a rate of 1.6 cents per \$100 of insurable values which is still lower than the 2.1 cents rate in force in 1981 and dramatically lower than the nearest competitive quotation of 4.3 cents received in 1984 despite the recognized soft market. Staff is confident that the entire placement will be completed. However, should this be impossible at current price levels, the Port Authority will self-insure up to 5% of this risk at a proportional reduction in premium.

In addition, although the negotiations required the Port Authority to accept some changes in the policy form, (most significantly, the establishment of a provision allowing for cancellation at anytime on 90 days' notice replacing the current provision for cancellation effective on an anniversary date on 120 days' prior notice; elimination of pollution coverage unless such pollution is caused by a risk otherwise covered by the policy; and establishment of annual aggregate limits of coverage for flood and earthquake losses) staff deemed these modifications as acceptable in light of the current deteriorating insurance market. Staff was able to retain the extension privilege of the original policy. However, because of the changes in the premiums in the second and third years of the first three-year period (June 1, 1984 through June 1, 1987) the two and three-year extensions will be recalculated using the premiums for the last year of coverage. Staff in conjunction with EBASCO, the Port Authority's risk management consultant, recommends the acceptance of these proposals.

Recommendation was made that the Board authorize:

1. an increase of \$501,180 in premiums, from the previously authorized amount of \$1,775,000, to \$2,276,180 for the All Risk Property Damage and Loss of Revenue insurance covering all properties of the Port Authority and Port Authority Trans-Hudson Corporation (PATH), other than bridges and tunnels, purchased from various domestic and London insurers through Hamond & Regine, Inc., and C. E. Heath & Co., Ltd., for a three-year period commencing June 1, 1984; and

2. the payment of premiums for the three-year extension of the first \$10 million layer and the two-year extension of the \$190 million layers excess of the \$10 million layer, authorized by the Board, at its meeting on May 10, 1984, at a rate equal to the last year's premium times the number of years in the extension and adjusted in proportion to the change in insurable values occurring during the first three-year period.

Approved.

Public Liability and Property Damage Insurance (Parasol Program) - Reduction in Limits

It was reported that the Board, at its meeting on June 14, 1984, authorized the purchase from the London market and various U.S. insurance underwriters through the brokers, Hamond and Regine, Inc. and C.E. Heath and Co., Ltd., of up to \$300 million per occurrence Excess Liability and Property Damage Insurance, commencing June 15, 1984 for a three-year term, at a three-year prepaid premium of up to \$1,250,000 less a credit of up to \$416,708 for the return premium for the early cancellation of the coverage authorized by the Board on May 13, 1982 and on December 9, 1982 for the period from June 15, 1984 to June 15, 1985; with such coverage to be provided over the \$200 million per occurrence Public Liability Policy, and the \$200 million per occurrence All Risk Property Damage and Loss of Revenue Policy and the \$300 million per occurrence by Bridge and Tunnel All Risk Property Damage and Loss of Revenue Insurance Policy.

As a result of major underwriting losses incurred by the world insurance industry, a severe tightening of insurance markets has taken place causing substantial price increases, severe reductions in coverages and a drastic contraction in capacity. This tightening, which started sometime last year, has already forced previously the Port Authority to self insure \$43 million of coverage previously provided by U.S. insurance companies as reported to the Board on June 14, 1984. Further deterioration has now caused the remaining \$57 million of U.S. coverage to disappear leaving us with \$200 million of coverage spaced out evenly throughout the \$300 million program. In addition, certain London markets also provided us with cancellation notices creating further gaps in coverage as of June 15, 1985.

After extensive negotiations and as a result of the excellent relationships staff has maintained with foreign underwriters, the London market has agreed to collapse its coverage from two-thirds of \$300 million to 100% of \$200 million at a prepaid premium cost of \$416,667 per year, the same amount previously authorized for the \$300 million program. Staff considers, and EBASCO, our risk management consultants, agree that retention of this difficult coverage, which includes coverage for both property and liability, at the new premium is a significant achievement in this marketplace. The Port Authority, after consideration of the Parasol, will enjoy a total of \$500 million in coverage per occurrence for its tunnels and bridges, \$400 million of coverage per occurrence for its liability exposures.

The existence of this program will also aid in future negotiations relating to the annual review of the public liability coverages which are currently underway.

More than 90% of the Parasol program has already been completed. U.S. and London brokers are continuing their efforts to attract additional capacity up to 100% at the agreed premium level. While these efforts continue, the Port Authority may find it necessary to co-insure as much as 10%, or up to \$20 million, of the Parasol risk on a pro-rata basis at a proportionate reduction in total premium.

Recommendation was made that the Board authorize a reduction in coverage in the Parasol Program from \$300 million to \$200 million with no change in premium from that previously authorized by the Board on June 14, 1984.

Approved.

(Board - 7/11/85)

Report on Public Hearing - Consolidated Bonds, Fifty-fourth Series - Consolidated Notes, Series KK, Series LL, and Series MM - Bank Loan of 1985 - The Port Authority Commercial Paper Program - Port Authority Operating Equipment - Lease Financing Program - Amendments

It was reported to the Board that, on July 10, 1985, public hearings in connection with the issuance and sale of bonds, notes and other obligations of the Port Authority as provided by Section 103(k) of the Internal Revenue Code of 1954, as added by the Tax Equity and Fiscal Responsibility Act of 1982, and the regulations promulgated thereunder, were conducted by the Treasurer of the Port Authority at the offices of the Port Authority at One World Trade Center and at the offices of the Port Authority at the Journal Square Transportation Center, pursuant to public notice published on June 25, 1985, in The New York Times, a newspaper of general circulation in the New York portion of the Port District, and in The Star Ledger, a newspaper of general circulation in the New Jersey portion of the Port District. In pertinent part, the notice contained the following description of the above obligations, the Authority's facilities and projects: "Previously approved Consolidated Bonds of The Port Authority of New York and New Jersey, presently denominated as the Fifty-fourth Series; previously approved Consolidated Notes, Series KK, Series LL and Series MM; a previously approved Bank Loan; and the previously approved Port Authority Commercial Paper Program, all to be issued and sold in connection with a plan of financing, which also includes the Port Authority Operating Equipment--Lease Financing Program, various capital and other expenditures at certain of the facilities of the Port Authority located in the Port of New York District, to wit, the Holland Tunnel, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, Port Authority Bus Terminal, Port Authority Bus Programs, Hudson Tubes portion of the Port Authority Trans-Hudson System, New York Union Motor Truck Terminal, LaGuardia Airport, John F. Kennedy International Airport, Newark International Airport, Teterboro Airport, Port Authority-West 30th Street Heliport, Port Authority-Downtown Manhattan Heliport, Oak Point Rail Freight Link, a rail freight improvement project in The Bronx, N.Y., Port Newark, Hoboken-Port Authority Marine Terminal, Brooklyn-Port Authority Marine Terminal, Erie Basin-Port Authority Marine Terminal, Elizabeth-Port Authority Marine Terminal, Columbia Street Marine Terminal, Howland Hook Marine Terminal, New York City Passenger Ship Terminal, World Trade Center, a facility of commerce in Manhattan, N.Y., Bathgate Industrial Park, an industrial park in The Bronx, N.Y., Elizabeth Industrial Park, an industrial park in Elizabeth, N.J., Yonkers Industrial Park, an industrial park in Yonkers, N.Y., and Teleport, a satellite communications center at the Staten Island Industrial Park, Staten Island, N.Y., a foreign trade zone/distribution center and industrial development project or facility in the Howland Hook Marine Terminal Area of Staten

(Board - 7/11/85)

Island, N.Y., a bank for regional development project or facility in the New Jersey and New York portions of the Port of New York District, a pre-development site acquisition project or facility for acquisition of real property in the New Jersey and New York portions of the Port of New York District, a port improvement homeport project or facility in the vicinity of the pier area of Stapleton, Staten Island, N.Y., a legal and communications center project or facility in Newark, N.J., a resource recovery project or facility in Essex County, N.J., a resource recovery project or facility in the City of New York, N.Y., a waterfront development project or facility to be located in each of Hunters Point, Queens, N.Y., and Hoboken, N.J., a marine terminal project or facility consisting in part of a float bridge associated with transportation of rail freight between the Greenville freight yard in Jersey City, N.J. and the Brooklyn, N.Y. waterfront, to be authorized by the Port Authority. The initial owner, operator or manager of these facilities is or will be the Port Authority. The major projects presently authorized or which may be authorized by the Port Authority to be undertaken at these facilities include at LaGuardia Airport, general runway and roadway modification, paving, Central Terminal Building expansion; John F. Kennedy International Airport, general runway, taxiway and roadway modification, paving, modification to the International Arrivals Building, multi-tenant air cargo services building, passenger distribution system and related improvements; Newark International Airport, general runway and roadway modification, paving, construction of a general aviation services center and cargo building in the Southwest development area, maintenance building, completion of Terminal C; a Bi-State Port Development Program in New York and New Jersey, including certain dredging, Howland Hook Marine Terminal, acquisition, improvement, expansion, Port Newark, channel dredging, berth deepening, terminal improvements, Elizabeth-Port Authority Marine Terminal, channel dredging, berth deepening, building construction, paving, Erie Basin-Port Authority Marine Terminal, fishport project, Brooklyn-Port Authority Marine Terminal, Red Hook Container Terminal expansion, distribution buildings; Oak Point Rail Freight Link project; miscellaneous capital improvements at the World Trade Center, including continued installation of a sprinkler system; Bathgate Industrial Park project; Elizabeth Industrial Park project; Yonkers Industrial Park project; Port Authority Bus Terminal, extension, improvement, modernization; the Teleport project; Port Authority Bus Programs; capital improvements related to safety, maintenance, rehabilitation or improvement at the Hudson Tubes portion of Port Authority Trans-Hudson System, the George Washington Bridge, Lincoln Tunnel, Holland Tunnel, Goethals Bridge, Bayonne Bridge, Outerbridge Crossing; Howland Hook project; Bank for Regional Development project; Pre-development Site Acquisition Program project;

Homeport project; Legal and Communications Center project; Essex County resource recovery project; New York City resource recovery project; Hunters Point waterfront project; Hoboken waterfront project; Greenville yard marine terminal and float bridge project; ferries; and other miscellaneous capital improvements and replacements and operating equipment lease financing in connection with the facilities of the Port Authority. The said series of obligations of the Port Authority would be issued for purposes of capital or other expenditures with respect to the facilities and projects noted above and in the maximum aggregate principal amounts noted below: the said Series of Bonds would be in principal amount of up to \$100,000,000, each of said Series of Notes would be in principal amount of up to \$50,000,000 (provided, however, that the total aggregate principal amount of all said Series of Notes sold would not exceed \$95,000,000), the Bank Loan would be in a principal amount of up to \$100,000,000, the Port Authority Commercial Paper Program would be in principal amounts of up to \$150,000,000 outstanding at any one time, and the Port Authority Operating Equipment--Lease Financing Program would be in principal amounts of up to \$10,000,000 at any one time."

It was further reported that the Board, at its meeting on October 11, 1984, adopted separate resolutions establishing Consolidated Bonds, Fifty-fourth Series, Due 2020, authorizing the issuance of such Series and authorizing the sale of such Series in a principal amount not to exceed \$100 million, establishing and authorizing the issuance of each of Consolidated Notes, Series JJ, Series KK, Series LL, and Series MM, and, in each case, authorizing the sale of each such Series of Notes in a principal amount not to exceed \$25 million, and establishing and authorizing the execution and delivery of a Bank Loan of 1985 in a principal amount not to exceed \$100 million. The issuance of each such Series of Bonds and Notes, and the Bank Loan, was authorized, in each case subject to limitation by the Committee on Finance, for purposes of capital expenditures in connection with the Port Authority's facilities.

The Board, at its meeting on September 9, 1982, authorized the establishment of the Port Authority Commercial Paper Program; this Program was extended by the Board on October 13, 1983, when the Board authorized the issuance of obligations thereunder in an unlimited aggregate amount, provided that the aggregate principal amount of obligations outstanding at any one time would not be in excess of \$150 million. The issuance of such obligations was authorized, subject to limitation by the Executive Director, for purposes of payment for capital expenditures in connection with the Port Authority's facilities, including, inter alia, airports, docks and wharves.

(Board - 7/11/85)

At its meeting on April 11, 1985, the Board authorized a program of lease-financing transactions to facilitate the purchase of portions of operating equipment for use at the Port Authority's facilities, with the aggregate principal amount financed at any one time not to exceed \$10 million. The authorization provides that expenses incurred with respect to each letting of equipment would be operating expenses of the Port Authority payable in the same manner and out of the same revenues as all other such expenses.

These original authorizations were sought so that capital (or other) funds might be obtained expeditiously and at the most favorable interest cost to the Authority. On December 10, 1984, \$5 million in principal amount of Consolidated Notes, Series JJ, dated as of December 17, 1984, due December 17, 1985, were sold to Shearson Lehman/American Express at a net interest cost to the Authority of 5.80 percent. Therefore, of the original authorizations contained in the resolutions of October 11, 1984, relating to Consolidated Notes in a total aggregate principal amount of \$100 million, only \$75 million remains authorized.

It was therefore recommended that, in order to maintain maximum flexibility for obtaining funds through the issuance of short-term obligations, the resolutions relating to Consolidated Notes should be amended to permit the sale of Consolidated Notes, Series KK, Series LL, and Series MM, each in a principal amount of up to \$50 million, provided, however, that the aggregate principal amount of such Series of Consolidated Notes sold would not exceed \$95 million, for a total for the four Series of Consolidated Notes originally authorized on October 11, 1984, not to exceed the \$100 million then authorized.

In view of the fact that the Howland Hook Marine Terminal has recently been certified by the Board as an additional facility of the Port Authority (which certification has been reaffirmed by the Committee on Finance), and to more accurately reflect the purposes of the Port Authority Operating Equipment--Lease Financing Program, it would now be appropriate to amend the foregoing resolutions to make it clear that the terms facilities or airports, docks and wharves, as used in such resolutions include, without limitation, the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof) and that specified operating equipment contemplated to be included under the Port Authority Operating Equipment--Lease Financing Program may be used by the Port Authority or others at all such airports, docks and wharves which are facilities of the Port Authority. Although a portion of the proceeds of the recently issued Consolidated Bonds, Fifty-third

(Board - 7/11/85)

Series, Due 2020, have been allocated to certain infrastructure improvement projects in the vicinity of the Howland Hook Marine Terminal, action to clarify the authorizations, subsequent to public hearings, is now appropriate.

In all other respects, the resolutions relating to Consolidated Bonds, Fifty-fourth Series, Consolidated Notes, Series KK, Series LL, and Series MM, the Bank Loan of 1985, the Port Authority Commercial Paper Program, and the Port Authority Operating Equipment--Lease Financing Program would remain unchanged.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that Section 4 of the resolution of October 11, 1984 (appearing at page 455 of the Official Minutes of that date), which resolution relates to the authorization of issuance of Consolidated Bonds, Fifty-fourth Series, Due 2021, be amended to read as follows:

"SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority, which term applies, inter alia, without limitation, to the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof), and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions."

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 467 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series KK, be amended to read as follows:

"SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series KK" (hereinafter called the "Series KK Notes" or "notes of this Series") and the issuance of up to Fifty Million Dollars (\$50,000,000) in principal amount of such Series KK Notes is hereby authorized. Said KK Notes shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED, that Section 3 of the aforesaid resolution of October 11, 1984 (appearing at pages 467 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series KK, be amended to read as follows:

"SECTION 3. The proceeds of such Series KK Notes shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority, which term applies, inter alia, without limitation, to the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof), and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding, at

maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions."

and it is further

RESOLVED, that Section 1 of the resolution of October 11, 1984 (appearing at pages 475-476 of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series KK, be amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Fifty Million Dollars (\$50,000,000) in principal amount of Consolidated Notes, Series KK (hereinafter called the "Series KK Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before October 15, 1986, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series KK Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Ninety-five Million Dollars (\$95,000,000)."

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 477 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance of Consolidated Notes, Series LL, be amended to read as follows:

"SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series LL" (hereinafter called the "Series LL Notes" or "notes of this Series") and the issuance of up to Fifty Million Dollars (\$50,000,000) in principal amount of such Series LL Notes is hereby authorized. Said LL Notes shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED, that Section 3 of the aforesaid resolution of October 11, 1984 (appearing at pgs 477 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series LL, be amended to read as follows:

"SECTION 3. The proceeds of such Series LL Notes shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority, which term applies, inter alia, to airports, docks and wharves, including, without limitation, the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof), and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions."

and it is further

RESOLVED, that Section 1 of the resolution of October 11, 1984 (appearing at page 485 of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series LL, be amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Fifty Million Dollars (\$50,000,000) in principal amount of Consolidated Notes, Series LL (hereinafter called the

"Series LL Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before October 15, 1986, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series LL Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Ninety-five Million Dollars (\$95,000,000)."

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 486 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series MM, be amended to read as follows:

"SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series MM" (hereinafter called the "Series MM Notes" or "notes of this Series") and the issuance of up to Fifty Million Dollars (\$50,000,000) in principal amount of such Series MM Notes is hereby authorized. Said MM Notes shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED, that Section 3 of the aforesaid resolution of October 11, 1984 (appearing at pages 486 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series MM, be amended to read as follows:

"SECTION 3. The proceeds of such Series MM Notes shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority, which term applies, inter alia, without limitation, to the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof), and for purposes incidental thereto; provided, however, that subject to agreements

with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions."

and it is further

RESOLVED, that Section 1 of the resolution of October 11, 1984 (appearing at page 494 of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series MM, be amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Fifty Million Dollars (\$50,000,000) in principal amount of Consolidated Notes, Series MM (hereinafter called the "Series MM Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before October 15, 1986, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series MM Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Ninety-five Million Dollars (\$95,000,000)."

and it is further

RESOLVED, that the first paragraph of Section 2.04 of the resolution of October 11, 1984 (appearing at pages 495 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of execution and delivery of a Bank Loan of 1985, be amended to read as follows:

"Section 2.04. Application of Proceeds. The proceeds of the Bank Loan shall be used for (a) purposes of capital expenditures in connection with any one or more of the facilities of the Authority, which term applies, inter alia, without limitation, to the Howland Hook Marine Terminal (including certain infrastructure improvement projects in the vicinity thereof), and for purposes incidental thereto, provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the Bank Loan to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the Bank Loan; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the delivery of the Bank Loan Agreement and the Promissory Note; and (c) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions."

and it is further

RESOLVED, that the first paragraph of Section 2.04 of the resolution of October 13, 1983 (appearing at pages 395 et seq. of the Official Minutes of that date), which resolution is known as the Port Authority Commercial Paper Resolution, be amended to read as follows:

"Section 2.04. Application of Proceeds. The proceeds of each Port Authority Commercial Paper Note shall be used for purposes of payment for capital expenditures in connection with the Authority's facilities, as follows: bridges and tunnels; airports, docks and wharves (including port-related railroad freight projects related or of benefit to Port Authority

marine or air terminals or to the protection or promotion of the commerce of the Port District, and which terms shall include, without limitation, the Howland Hook Marine Terminal, including infrastructure improvement projects in the vicinity thereof); mass commuting facilities (consisting of bus terminals, buses, ancillary bus facilities and the Hudson Tubes portion of the Port Authority Trans-Hudson System); parking facilities; storage or training facilities directly related to any of the foregoing; industrial development projects or facilities including but not limited to the Bathgate Industrial Development Project and the Teleport; and for the purpose of refunding, at a Maturity Date, any Port Authority Commercial Paper Notes; provided, however, that no more than ten per centum (10%) of the amount of the proceeds of each Port Authority Commercial Paper Note which proceeds are not expended to refund all or any part of any Port Authority Commercial Paper Notes, the proceeds of which Port Authority Commercial Paper Notes were authorized to be used for purposes of capital expenditures in connection with the construction of structures or buildings at an industrial development project or facility other than structures or buildings incidental to the development of the land for such project or facility, may be used for the purposes of capital expenditures in connection with the construction of structures or buildings at an industrial development project or facility other than structures or buildings incidental to the development of the land for such project or facility."

and it is further

RESOLVED, that the first paragraph of the resolution of April 11, 1985 (appearing at pages 150 et seq. of the Official Minutes of that date), which resolution relates to the Port Authority Operating Equipment--Lease Financing Program, be amended to read as follows:

"RESOLVED, that the Executive Director is hereby authorized on behalf of the Port Authority to enter into lease-financing transactions no earlier than May 1, 1985 and no later than June 30, 1988, to facilitate the purchase of portions of the Port Authority's operating equipment including, but not limited to: automotive vehicles; telephone, radio and computer equipment; and office furnishings, all of which vehicles, equipment and furnishings may be purchased for use by the Port Authority or others at any of its facilities, including

its airports, docks and wharves, in an aggregate principal amount not to exceed \$10 million at any one time at an interest rate to the lessor-investor or investors equal to 60% of Bank of America's variable Reference Rate of interest publicly announced as such for the agreement with the proposed initial lessor-investor, and in the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in market conditions, the Port Authority and the lessor-investor or investors may agree to a rate not to exceed 85% of Bank of America's Reference Rate; the term of each letting of equipment not to exceed the useful life of the equipment included therein; the rental obligation for each letting of equipment to be divided into components of principal and interest and to be an operating expense of the Port Authority, payable in the same manner and out of the same revenues as all other such expenses of the Port Authority; and it is further"

Whereupon, the meeting was adjourned.

Thomas C. Young, Jr., Principal Information Officer, Public Affairs

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of July 11, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on August 8, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on August 8, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on August 8, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on August 8, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 8/8/85)

Tribute to Peter C. Goldmark, Jr.

The following resolution was unanimously adopted, expressing the appreciation of the Commissioners of The Port Authority of New York and New Jersey to Peter C. Goldmark, Jr.

WHEREAS, Peter C. Goldmark, Jr. has served as Executive Director of The Port Authority of New York and New Jersey since August 3, 1977 and has left an indelible imprint on the Port Authority and the region; and

WHEREAS, Mr. Goldmark has brought great credit to the Port Authority by reinvigorating the agency's reputation for excellence in management and imaginative ideas; and

WHEREAS, under Mr. Goldmark's leadership, the Port Authority has continued to carry out its commitment to the movement of people and goods and to the promotion and protection of this great Port of New York/New Jersey; and

WHEREAS, Mr. Goldmark has guided the Port Authority into new and innovative endeavors including industrial parks, resource recovery, infrastructure renewal and financing and has made the Port Authority an essential force for regional growth; and

WHEREAS, Mr. Goldmark has given to the agency his own high degree of integrity, honesty, openness and steadfast dedication to achieving excellence in the public service; and

WHEREAS, Mr. Goldmark has always had a generous and thoughtful and fair approach to his colleagues and the unique ability to bring out the very best in the people with whom he has worked;

NOW, THEREFORE, be it

RESOLVED, that the Commissioners of The Port Authority of New York and New Jersey do hereby express to Peter C. Goldmark, Jr. their deep appreciation for his tireless efforts and outstanding achievements in shaping, directing and managing the policies and activities of the Port Authority, and further express to him their warmest respect and affection; and be it further

RESOLVED, that the Commissioners hereby direct that this resolution be suitably engraved and presented to Peter C. Goldmark, Jr. as a token of the high esteem and warm affection in which he is held by the Commissioners and by his fellow staff members.

(Board - 8/8/85)

**Elizabeth-Port Authority Marine Terminal - East of McLester Street - Paving and Utilities -
Contract EP-220.013 - Award**

It was reported that Contract EP-220.013 provides for the construction of paving and utilities in an area generally south of Bay Avenue between McLester Street and the Sea-Land Terminal at the Elizabeth-Port Authority Marine Terminal.

The contract includes a provision requiring the bidder to use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract will be publicly advertised and bids are scheduled to be received on August 12, 1985. Board authorization of the award of Contract EP-220.013 is being requested at this time in order to facilitate completion of the paving work before winter to ensure the availability of the site to a Port Authority tenant, as specified in the lease agreement.

It was therefore recommended that the Board authorize the Executive Director to award Contract EP-220.013, Paving and Utilities, East of McLester Street, Elizabeth-Port Authority Marine Terminal, to the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract EP-220.013, Paving and Utilities, East of McLester Street, Elizabeth-Port Authority Marine Terminal, to the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

(Board - 8/8/85)

**Erie Basin-Port Authority Marine Terminal - Fishport - Renovation of Buildings 300 & 302 -
Contract EBP-110.014 - Authority to Award**

It was reported that the Board, at its meeting on December 8, 1983, authorized, in connection with the first phase of the Port Authority's bi-State fisheries programs, a project for the development of the Port Authority Fishport, a fish harvesting, processing and distribution center located at the Erie Basin Marine Terminal, at a total estimated project cost of \$27 million. The award of Contract EBP-110.014 falls within the scope of this authorization.

Contract EBP-110.014 provides for design and construction of modifications to Building 300, an existing cargo shed, and Building 302, an existing administration building, including the furnishing and installation of equipment required for fish handling, processing and storage, all at the Erie Basin-Port Authority Marine Terminal.

In addition, the contract will provide for any needed roofing, sprinklers and structural repairs, finishing of tenant areas, and the purchase and installation of certain additional fish handling, processing and storage equipment with the contractor to be compensated on a net cost basis.

The contract will also include a provision requiring the bidder to use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Bids will be solicited from prequalified contractors because of the nature of the work and are scheduled to be received on September 6, 1985. Authorization of the award of Contract EBP-110.014 is required at this time in order to meet the Fishport project schedule and to facilitate completion of the work prior to tenant occupancy, which is now scheduled for Spring, 1986.

It was therefore recommended that the Board authorize the Executive Director, in his discretion, either to award Contract EBP-110.014, Renovation of Buildings 300 & 302, Erie Basin-Port Authority Marine Terminal, Fishport, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to the amount of 10% of the amount of the bid accepted and to provide for net cost work, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, in his discretion, either to award Contract EBP-110.014, Renovation of Buildings 300 & 302, Erie Basin-Port Authority Marine Terminal, Fishport, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to the amount of 10% of the amount of the bid accepted and to provide for net cost work, or to reject all bids.

(Board - 8/8/85)

Industrial Development Program - Port Authority Industrial Park, Yonkers - Acquisition of Appurtenant Area - Lease and Easement Agreements with Metro-North Commuter Railroad Company - Award of Contract YIP-240.001 - Rail Car Test Track

It was reported that pursuant to Board authorization of November 11, 1984, and Committee on Operations authorization of December 13, 1984, the Port Authority purchased the former Otis Elevator Company Plant in Yonkers, New York, on May 8, 1985 and is proceeding with the development at the site of the Port Authority Industrial Park, Yonkers.

An agreement, dated as of December 20, 1984, meeting the requirements of the Port Authority's Industrial Development Projects and Facilities statute has been entered into by the City of Yonkers, the Yonkers Community Development Agency and the Port Authority.

Pursuant to Board authorization of December 13, 1984, Nissho Iwai American Corporation (NIAC) will lease Building No. 9 and other premises within the Yonkers Industrial Park for the purpose of assembling and manufacturing rail cars for the PATH system. This activity necessitates the use of rail car test track facilities involving an electrified test track and storage tracks. In order to meet PATH's car replacement schedule, installation of these test track facilities must begin in the fall of 1985.

In working out design details for the test track facilities, NIAC and Port Authority staff have concluded that the optimum alignment requires use of lands, generally part of an area which was an appurtenance to the former Otis Elevator Company tracts via side track agreements or other agreements with the New York Central Railroad Company and/or other entities including the Metropolitan Transportation Authority (MTA) or a subsidiary thereof. The lands required (for the sake of reference hereafter referred as the "Appurtenant Area") are located easterly of the elevated MTA Metro-North Commuter Railroad Company (Metro-North) railroad right-of-way and alongside the premises purchased from the Otis Elevator Company, and as an appurtenance thereto fall within the scope of the Yonkers Industrial Park site approved by the Board at its meeting on November 8, 1984. The minutes of the Committee on Operations meeting on December 13, 1984, note on page 2 with regard to land and appurtenances thereto which may be acquired for the Yonkers Industrial Park that "Appurtenances to such property may include, among other things, parcels of land required now or in the future for various purposes such as rail access".

The Port Authority, through the award of Contract YIP-240.001, described in detail below, will install the test track facilities as well as perform modifications to Building No. 9. The Appurtenant Area will be graded under this contract so that a test track can be installed thereon to connect with and provide rail access to the adjacent elevated railroad right-of-way on which Amtrak, ConRail and Metro-North operate their trains.

The MTA Real Estate Department advises that Metro-North is capable of granting the Port Authority a lease to the Appurtenant Area, since Metro-North itself has received a sub-lease of the area from the MTA which received a lease of the area from the reputed fee owner, The Trustees of the Penn Central Transportation Company. In addition to securing a lease on the Appurtenant Area, Port Authority staff deems it advisable to acquire the underlying fee interest in this land as part of the Port Authority Industrial Park, Yonkers.

(Board - 8/8/85)

However, the Appurtenant Area was formerly below the original high water mark of the Hudson River. In view of the Port Authority's experience of finding title deficiencies within lands formerly tide flowed, Ticor Title Guarantee Company has been asked to render the Port Authority a report on title as to the ownership of the Appurtenant Area. The New York State Office of General Services, which is in charge of records relating to claims of the State within lands now or formerly tide flowed, has also been contacted in our efforts to clarify title and ownership to the land in question. However, examination of this complex title not being complete, the title company has not yet issued a certification of title. In the event that private parties on the basis of grants from New York State or otherwise may have a title claim, and a reasonable settlement cannot be reached with such parties on a voluntary basis, condemnation of outstanding interests within the Appurtenant Area may be necessary. Accordingly, Board authorization to acquire title by condemnation or the exercise of the power of eminent domain is being requested.

If research conducted by the title company confirms the MTA's and/or Metro-North's ability to lease the Appurtenant Area, the arrangement contemplated is as follows. Without charge, MTA or Metro-North would lease the Port Authority the Appurtenant Area (approximately 44,000 square feet in size) for a term of approximately 46 years. The Port Authority, without charge, would grant Metro-North, a public benefit subsidiary corporation of MTA, an easement, for a term of approximately 99 years, on approximately 12,000 square feet of the Port Authority's Yonkers Industrial Park. The easement would have an upper limiting plane 30 feet above grade, would be located on the southeasterly corner of the vacant 70,382 square foot (1.6 acres) lot bounded by Babcock Place, the railroad right-of-way, Ashburton Avenue and Alexander Street. The easement will be for the purpose of Metro-North's constructing and operating an electrical sub-station which is essential to Metro-North's plans for upgrading the electrical service of its commuter railroad. The Port Authority will retain the air-rights above the easement, and reserve the ability to place and maintain supports and footings within certain areas on the surface and within the subsurface of the easement area, which easement area will revert to the Port Authority if Metro-North ceases operating of the sub-station.

Staff has begun discussions with MTA and Metro-North for the installation of track work within and/or adjacent to the Appurtenant Area, the electrification of the track, rail connections to the active elevated railroad right-of-way and other work associated with the completion of fully operational test track facilities for NIAC. Various agreements will be required between the Port Authority and Metro-North such as for work performed by Metro-North forces, for materials supplied by Metro-North to the Port Authority, and for reimbursement of costs associated with the above.

Contract YIP-240.001, Rail Car Test Track, provides for the installation of rail car test track facilities including rail modifications to Building No. 9, a catenary system and a car inspection area.

The contract will include a provision requiring the bidder to meet a mandatory goal of Minority Business Enterprise participation of 15% for firms owned and controlled by minorities and 3% for firms owned and controlled by women.

The contract will be publicly advertised and bids are scheduled to be received on October 3, 1985. Board authorization of the award of Contract YIP-240.001 is required at this time in order to begin installation of the test track facilities in the fall of 1985, thereby keeping the rail car manufacturing process on schedule with respect to on-site testing of the completed new rail cars.

(Board - 8/8/85)

It was therefore recommended that the Board:

1. find and determine that it is necessary for a public use to acquire a fee simple or lesser interest in certain lands in the City of Yonkers, State of New York, generally bounded by Wells Avenue on the south, Ashburton Avenue on the north, the elevated railroad right-of-way on the west and the Port Authority's Yonkers Industrial Park on the east for industrial development project or facility purposes, such lands hereafter referred to as the "Appurtenant Area";

2. authorize the Executive Director to acquire a fee simple or lesser interest in the Appurtenant Area, by purchase at a cost of approximately \$250,000 or by condemnation or the exercise of the power of eminent domain, and to incur all expenses necessary or incidental thereto, provided that no property vested in or held by the State of New York or any municipality, public authority, agency or commission shall be acquired without the authority or consent of such entity or by appropriate legislation, pursuant to Section 8 of the Port Authority's Industrial Development Projects and Facilities Statute;

3. authorize General Counsel, subject to the foregoing requirement of said Port Authority Statute, in the name of and on behalf of the Port Authority, to conduct a condemnation proceeding to acquire a fee simple absolute or lesser interest in all or part of said Appurtenant Area, to do all things required by law in connection therewith and to incur all expenses necessary or incidental to the conduct of proceedings for the acquisition of said property;

4. authorize the Executive Director to enter into agreements for work at the Port Authority's expense, including but not limited to agreements, with Metro-North Commuter Railroad Company (Metro-North) for installation of track work within or adjacent to the Appurtenant Area, the electrification of track facilities, rail connections to the elevated railroad right-of-way and other work associated with the completion of fully operational test track facilities for Nissho Iwai American Corporation at the Port Authority's Yonkers Industrial Park;

5. authorize the Executive Director to convey to Metro-North, by means of an appropriate agreement, an easement for the purpose of constructing, reconstructing, operating, maintaining, and for access to, an electrical sub-station to provide electrical service to the adjacent railroad right-of-way, the area of such easement to be approximately 12,000 square feet with an upper limiting plane measured approximately 30 feet from finished grade and located at the southeasterly corner of Port Authority property bounded by Babcock Place, the railroad right-of-way, Ashburton Avenue and Alexander Street in the City of Yonkers, State of New York; and

6. authorize the Executive Director, in his discretion, either to award Contract YIP-240.001, Rail Car Test Track, Yonkers Industrial Park, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

(Board - 8/8/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby finds and determines that it is necessary for public use to acquire a fee simple or lesser interest in certain lands in the City of Yonkers, State of New York, generally bounded by Wells Avenue on the south, Ashburton Avenue on the north, the elevated railroad right-of-way on the west and the Port Authority's Yonkers Industrial Park on the east for industrial development project or facility purposes, such lands hereafter referred to as the "Appurtenant Area"; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to acquire a fee simple or lesser interest in the Appurtenant Area, by purchase at a cost of approximately \$250,000 or by condemnation or the exercise of the power of eminent domain, and to incur all expenses necessary or incidental thereto, provided that no property vested in or held by the State of New York or any municipality, public authority, agency or commission shall be acquired without the authority or consent of such entity or by appropriate legislation, pursuant to Section 8 of the Port Authority's Industrial Development Projects and Facilities Statute; and it is further

RESOLVED, that General Counsel be and he hereby is authorized, subject to the foregoing requirement of said Port Authority Statute, in the name of and on behalf of the Port Authority, to conduct a condemnation proceeding to acquire a fee simple absolute or lesser interest in all or part of said Appurtenant Area, to do all things required by law in connection therewith and to incur all expenses necessary or incidental to the conduct of proceedings for the acquisition of said property; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to enter into agreements for work at the Port Authority's expense, including but not limited to agreements, with Metro-North Commuter Railroad Company (Metro-North) for installation of track work within or adjacent to the Appurtenant Area, the electrification of track facilities, rail connections to the elevated railroad right-of-way and other work associated with the completion of fully operational test track facilities for Nissho Iwai American Corporation at the Port Authority's Yonkers Industrial Park; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to convey to Metro-North, by means of an appropriate agreement, an easement for the purpose of constructing, reconstructing, operating, maintaining, and for access to, an electrical sub-station to provide electrical service to the adjacent railroad right-of-way, the area of such easement to be approximately 12,000 square feet with an upper limiting plane measured approximately 30 feet from finished grade and located at the southeasterly corner of Port Authority property bounded by Babcock Place, the railroad right-of-way, Ashburton Avenue and Alexander Street in the City of Yonkers, State of New York; and it is further

(Board - 8/8/85)

RESOLVED, that the Executive Director, be and he hereby is authorized in his discretion, either to award Contract YIP-240.001, Rail Car Test Track, Yonkers Industrial Park, to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% to the amount of the bid accepted, or to reject all bids; and it is further

RESOLVED, that all documents required to effectuate the foregoing be subject to approval as to form by General Counsel or his authorized representative.

(Board - 8/8/85)

Waterfront Development Program - Hunters Point, Queens, New York-Acquisition of Daily News Site

It was reported that at its meeting on October 11, 1984, the Board authorized the Pre-Development Site Acquisition Program (the Program), a centralized program of up to \$75 million at any one time permitting the Port Authority to acquire real property in connection with the development of additional Port Authority facilities prior to the actual formal certification of those facilities. A major purpose of the program was to avoid the possibility that the economic viability of a particular project or program which requires extensive lead time prior to the recommendation of a formal facility certification might be foreclosed by the unavailability or increased cost of a site. It was reported at the Board meeting on October 11, 1984 that real property acquisitions in connection with the Hunters Point Waterfront Development were expected.

The boundaries of the Hunters Point Waterfront Development are described in the bi-state legislation which authorized the Port Authority's Waterfront Development Program. The work of the various physical planning, environmental impact analysis and market research advisors retained during the past year, based on prior Board authorizations, is progressing on schedule. The New York City agencies involved in this development - the Department of City Planning, Public Development Corporation and the Office of the Deputy Mayor for Economic Development - and Port Authority staff are working closely on a Waterfront Development Business Agreement between the Port Authority and the City.

During the past year, Port Authority staff have had discussions with the owners and/or long-term lessees of the properties in the Hunters Point site area. In this connection, staff have tentatively negotiated an agreement to purchase the Daily News site, (the Site), which is comprised of approximately 24.5 acres of land (including approximately 3.4 underwater) owned by the News Building, Inc. or its parent, Tribune Co., Inc., and also plans to acquire any outstanding riparian interests of New York State therein, at a total price of approximately \$17 million.

Norval, Inc., a cement operation, currently leases approximately 5.4 acres from the News Building, Inc. at the Site, under four separate leases, the longest terms of which extend to the year 2005. Current annual rental income from the Norval, Inc. leases is represented to be \$200,000. The primary Norval net/net lease provides for the direct payment of real estate taxes to New York City by the tenant. In order to maintain the benefits of this net lease, the acquisition arrangement anticipates assignment to the Port Authority of the Norval leases with an option in the Port Authority to purchase the fee from the seller at any time in the future for \$1.

The total acquisition cost is supported by independent appraisals from Messrs. Jerome Hains and Rodger Darby pursuant to agreements authorized by the Board at its meeting on October 11, 1984.

It will be necessary to remove to grade, at the Port Authority's expense, excess unsuitable soils/construction debris existing on the site. These materials have been tested, as part of an overall environmental audit of the Waterfront Development site, and the New York State Department of Environmental Conservation (NYSDEC) has informed staff that the levels of contaminants found in the materials do not exceed hazardous materials standards; therefore, their removal would not require disposal at a hazardous waste site.

(Board - 8/8/85)

The groundwater test results show levels of heavy metals in excess of New York State and City discharge standards which NYSDEC has informed staff will require pretreatment of groundwater during construction.

Authorizations for such expenses will be part of total project authorization. Finally, there exist on site, in the vacant Daily News printing plant, various storage containers, including drums, vats, waste water/oil separation equipment, which currently contain printing ink, solvents and other materials which will be removed and/or purged by News Building, Inc., or its parent, at their expense, directly or by contract as part of the sale transaction.

The proposed property acquisition cost of \$17 million, together with the \$12.2 million of properties acquired or held within the Pre-Development Site Acquisition Program, will not exceed the Program's authorized amount of \$75 million at any one time.

It was therefore recommended that the Board take the following actions:

1. pursuant to the Pre-Development Site Acquisition Program, authorize the Executive Director to acquire the property described below, which is part of the legislatively designated Hunters Point Waterfront Development site and which encompasses approximately 24 acres, including lands under water, together with structures, improvements, and leasehold interests therein, and any outstanding riparian interests of the State of New York for approximately \$17 million, and to incur necessary expenses related to such acquisition:

In the County of Queens, State of New York, all of the seller's right, title and interest in that parcel generally bounded on the east by the westerly line of Second Street, on the south by the northerly United States Pierhead and Bulkhead Line of Newton Creek approved by the Secretary of War on July 22, 1916, on the west by the westerly United States Bulkhead Line of the East River approved by the Secretary of War on November 7, 1917, on the north by the southerly line of the Botnix Realty Corp. property, excluding therefrom that parcel of the Long Island Railroad Company on the easterly perimeter of the site and shown on the Official Tax Maps of the City of New York for the Borough of Queens as Lot 3 in Block 6; and together with the lands between the United States Pierhead Line and the United States Bulkhead Line of the west shore of the East River bounded on the north by the centerline of 54th Avenue and on the south by the centerline of 55th Avenue, which lands are contiguous to the westerly boundary described aforesaid; and together with the bed of Second Street from the southerly line of 55th Avenue to the northerly United States Pierhead and Bulkhead Line of Newtown Creek and the beds of any streets abutting or interior to the above described parcel; the precise perimeter of the foregoing property being subject to adjustment based on final survey and title information; and

2. authorize an increase in the 1985 Budget of \$17 million in connection with this acquisition.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that pursuant to the Pre-Development Site Acquisition Program, the Executive Director be and hereby is authorized to acquire the property described below, which is part of the legislatively designated Hunters Point Waterfront Development site and which encompasses approximately 24 acres, including lands under water, together with structures, improvements, and leasehold interests therein, and any outstanding riparian interests of the State of New York for approximately \$17 million and to incur necessary expenses related to such acquisition:

(Board - 8/8/85)

In the County of Queens, State of New York, all of the seller's right, title and interest in that parcel generally bounded on the east by the westerly line of Second Street, on the south by the northerly United States Pierhead and Bulkhead Line of Newtown Creek approved by the Secretary of War on July 22, 1916, on the west by the westerly United States Bulkhead Line of the East River approved by the Secretary of War on November 7, 1917, on the north by the southerly line of the Botnix Realty Corp. property, excluding therefrom that parcel of the Long Island Railroad Company on the easterly perimeter of the site and shown on the Official Tax Maps of the City of New York for the Borough of Queens as Lot 3 in Block 6; and together with the lands between the United States Pierhead Line and the United States Bulkhead Line of the west shore of the East River bounded on the north by the centerline of 54th Avenue and on the south by the centerline of 55th Avenue, which lands are contiguous to the westerly boundary described aforesaid; and together with the bed of Second Street from the southerly line of 55th Avenue to the northerly United States Pierhead and Bulkhead Line of Newtown Creek and the beds of any street abutting or interior to the above described parcel; the precise perimeter of the foregoing property being subject to adjustment based on final survey and title information; and it is further

RESOLVED, the 1985 Budget be increased by \$17 million in connection with this acquisition; and it is further

RESOLVED, that all documents and agreements necessary to effectuate the aforesaid be subject to approval as to form by the General Counsel or his duly designated representative.

(Board - 8/8/85)

Elizabeth Industrial Park - Granting of a Permanent Easement - Award of Contracts and Acceptance of Federal Funds

It was reported that the Board, at its meeting on March 12, 1981, authorized an industrial development project in Elizabeth, New Jersey, at an approximate 125-acre site located at the southern end of the Port Newark/Elizabeth facility, involving an estimated financial participation by the Port Authority of \$16.8 million, including payments to contractors, an allowance for extra work, any acquisition and related costs and engineering, administrative and financial expenses. Subsequently, on November 18, 1981, the Port Authority and the City of Elizabeth executed an agreement setting forth the arrangements to develop the industrial park site.

At its meeting on June 14, 1984, the Board certified the Elizabeth Industrial Park as an additional facility of the Port Authority and approved the award of contracts providing for the installation of systems for the mitigation of the PCB contamination and for paving and utility construction at the site.

The installation of the mitigation system has been completed and the contract for the paving and utilities which will provide access to the site and the development's infrastructure has been awarded and field work is in progress.

The Paving and Utilities Contract provides for the installation of a drainage detention pond in the area of an existing PSE&G pole line along the eastern perimeter of the site. This pole line must be relocated to allow for the construction of the detention pond. Agreement has been reached with PSE&G with respect to the location of the 10-foot easement (between Bay Avenue and a point approximately 800 feet north of North Avenue East in the vicinity of the eastern boundary line of the site prolonged northerly) and PSE&G has agreed to bear the costs associated with the relocation of the pole line. The easement will enable PSE&G to have permanent access for maintenance and will commit the Port Authority to pick up the costs associated with any future relocation of the pole line. In order to avoid excavation in potentially contaminated refuse, sleeves have been installed by the Port Authority to accept PSE&G's new poles and the cost of the sleeves was borne by the Port Authority under Contract MFP-156.

The United States Department of Commerce Economic Development Administration has approved the Port Authority's grant request for award of a Public Works Grant for the future grading, fencing and landscaping of the site Elizabeth Industrial Park, and it is anticipated that the grant award will be forthcoming shortly.

It was therefore recommended that the Board authorize the Executive Director to:

1. execute a deed granting to the Public Service Electric & Gas Company a permanent easement for an electrical pole line at the Elizabeth Industrial Park; and
2. accept grant monies from the United States Department of Commerce, Economic Development Administration for a portion of construction costs and engineering costs incurred in connection with future site preparation contracts for the Elizabeth Industrial Park.

(Board - 8/8/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and hereby is authorized to execute a deed granting to the Public Service Electric & Gas Company a permanent easement for an electrical pole line at the Elizabeth Industrial Park; and it is further

RESOLVED, that the Executive Director be and hereby is authorized to accept grant monies from the United States Department of Commerce, Economic Development Administration, for a portion of construction costs and engineering costs incurred in connection with future site preparation contracts for the Elizabeth Industrial Park; and it is further

RESOLVED, that all documents and agreements necessary to effectuate the aforesaid be subject to approval as to form by General Counsel or his duly designated representative.

(Board - 8/8/85)

The World Trade Department - The Teleport - Lease with Merrill Lynch & Co.

It was reported that staff has reached agreement in principle with Merrill Lynch & Co., for the leasing of approximately 275,000 square feet of land on which Merrill Lynch or a subsidiary or affiliate thereof, will design, construct, finance and occupy a 110,000 square foot combined data center/office building for its own use. The agreement also provides that the tenant has the right, for a three-year period from the date of execution, to lease an additional contiguous site of approximately 225,000 square feet which would support the development of an additional building of approximately 90,000 square feet to be used for the same purpose.

The arrangement agreed to contemplates an annual rental rate of approximately \$440,000 for the initial 275,000 square feet of land which recoups the amortization of the Port Authority's infrastructure costs therefor. In addition, the tenant will pay its proportionate share of the Port Authority's cost to operate and maintain The Teleport, which is currently estimated at \$220,000 annually. If the additional parcel is included in the letting the tenant would pay a basic rental therefor at the rate of \$360,000 per year plus its proportionate share of common Teleport operation and maintenance expense. The foregoing rentals will be reduced at the conclusion of the 30th anniversary of the lease by an amount representing the portion of the rent which amortizes the Port Authority's investment in the infrastructure. The tenant will also receive a rent credit of approximately \$275,000 against the first years rental for the initial parcel and the Port Authority will be responsible for bringing utilities to each site included in the premises as well as site preparation.

The term of the letting would be for approximately 38 years following the completion of the initial building constructed but not later than the day preceding the expiration date of the Port Authority's lease with The City of New York. The Executive Director or staff would negotiate the terms of the agreement with respect to the foregoing, and among the matters to be included in the agreement are provisions governing sublease, assignment, mortgaging, refinancing and cancellation.

There will be no real estate broker commissions payable on the transaction. The material terms of any arrangement finally agreed to would be subject to approval by the Committee on Operations and by the Mayor of The City of New York.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into negotiations with Merrill Lynch & Co. on a lease in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into negotiations with Merrill Lynch & Co., on a lease covering the letting of approximately 275,000 square feet of land at The Teleport for a term of approximately 38 years for the development of a 110,000 square foot office building, with the tenant to have certain rights with respect to the leasing of an additional site, the material terms of the lease finally agreed to being subject to approval by the Committee on Operations and the Mayor of The City of New York; the form of the lease to be subject to the approval of General Counsel or his designated representative.

(Board - 8/8/85)

Kennedy International Airport - Taxiway "PC" Stub - Contract JFK-220.057 - Project Authorization and Contract Award

It was reported that at present, if an aircraft landing on Runway 31L at Kennedy International Airport passes Taxiway "PA", it must proceed 3,500 feet down the runway to exit at Taxiway "PD", effectively reducing the runway's capacity. When Taxiway "PD" is obstructed or closed due to aircraft operations or maintenance, delays are experienced by other aircraft waiting to take-off from this runway. Due to departure traffic being held on both Taxiway's "P" and "Q", other traffic desiring to go to and from adjacent hangar areas also experience delays. The construction of the Taxiway "PC" stub would permit aircraft to bypass Taxiway "PD" and enter and exit the runway sooner, thereby increasing the capacity of Runway 31L, saving fuel and decreasing aircraft taxiing time.

Contract JFK-220.057, which is the only contract to be awarded in connection with this project, provides for the construction of a new Taxiway PC between Runway 13R-31L and Taxiway P, including payment, utilities, lighting and signing.

The contract also provides for the excavation of unsuitable material, below the elevation of pavement subgrade, and subsequent backfilling with suitable material, all on a net cost basis presently estimated at roughly \$70,000.

Additionally, the contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and bids were solicited from 76 contractors, 18 of which picked up bid documents. The following bids were received on July 11, 1985:

	Lump Sum Amount
Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture Whitestone, New York	\$1,364,000
Willetts Point Contracting Corp. Flushing, New York	1,462,000
ENGINEER'S ESTIMATE	\$1,410,000

Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project at Kennedy International Airport for construction of a new Taxiway "PC" between Runway 13R-31L and Taxiway P, the expenditure therefor presently being estimated at \$2,093,300 including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses; and
2. the Executive Director to award Contract JFK-220.057, Taxiway "PC" Stub, Kennedy International Airport, to Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, in the amount of \$1,364,000, to order extra work up to the amount of \$137,000 and to provide for net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at Kennedy International Airport for construction of a new Taxiway "PC" between Runway 13L and Taxiway P, the expenditure therefor presently being estimated at \$2,093,300; including payments to contractors, allowances for extra work and net cost work and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract JFK-220.057, Taxiway "PC" Stub, Kennedy International Airport, to Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, in the amount of \$1,364,000, to order extra work up to the amount of \$137,000 and to provide for net cost work.

(Board - 8/8/85)

Kennedy International Airport - Hangar 5 and Related Outside Areas - Surrender of Lease by Trans Mediterranean Airways S.A.L. - Reimbursement by the Port Authority of TMA's Investment in the Leased Premises and New Ten-Year Lease Agreement with Air Express International Corporation for the Premises

It was reported that the Board, at its meeting on November 8, 1984, adopted a resolution which authorized the surrender of Trans Mediterranean Airways (TMA's) lease in Hangar 5 at Kennedy International Airport and a new ten-year lease with Air Express International Corporation (AEI) for Hangar 5, effective January 1, 1985 on terms and conditions as specified therein.

Air Express International was not able to execute the lease prior to the proposed execution date of January 1, 1985 due to the purchase of \$5 million of a new AEI stock issue by Pittston Industries and the resulting change in AEI's management. In addition, the Port Authority determined that it required the entire second floor lean-to area of Hangar 5, which was to be included as part of the leased premises, in order to install the computer system for the Port Authority's Air Cargo Fast Flow system, now under development. Negotiations have been substantially completed with TMA for the surrender of its lease on or about October 31, 1985, and with AEI for the commencement of its new lease on or about November 1, 1985 for the reconfigured space for a ten-year lease upon the same terms and conditions as previously authorized, including the payment of additional facility rental at the annual rate of \$112,792 to amortize the \$600,000 payment to TMA for its surrender; and the Port Authority's agreement to reimburse AEI an amount of up to \$400,000 for improvements to the premises, with AEI obligated to pay to the Port Authority over the remaining term of the lease and commencing no later than the end of the second year of the lease, extra facility rental based upon the amount, if any, invested by the Port Authority for this work. As part of this agreement, the Port Authority would also offer rent relief and utilities to TMA for the period February 1 through May 31, 1985 because of the unanticipated delay TMA experienced while AEI, due to a management change, reviewed the lease.

The revised annual rentals, due to the diminished space, exclusive of facility rental and extra facility rentals, are as follows:

Approximate Annual Rentals

		Eff. 11/1/85 - 10/31/90		Eff. 11/1/90 - 10/31/95	
		Annual Sq. Ft. Rate	Yearly Rental	Annual Sq. Ft. Rate	Annual Rental
Cargo Area	66,515 sq. ft.	\$5.00	\$332,575	\$6.25	\$415,718
First Floor	13,355 sq. ft.	5.00	66,775	6.25	83,468
Aircraft Ramp	102,192 sq. ft.	.50	51,096	.60	61,315
Truck Parking	133,380 sq. ft.	.50	66,690	.60	80,028
Total Building & Land Rental			\$517,140		\$640,536

(Board - 8/8/85)

The above rentals are approximately \$169,308 per year higher than those which would have been received from TMA through April 1990 when its lease would have expired (a total of about \$761,886 over a four and one-half year period). AEI would continue to have the right upon the sale of the cargo handling system installed in the premises to apply the proceeds thereof up to the amount of \$600,000, to have its additional facility rental in the amount of \$112,792 per year diminished and it would also have the right to dismantle, store or alter parts or all of the system if AEI deemed this desirable for the proper utilization of the premises.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into agreements with Air Express International Corporation and Trans Mediterranean Airways S.A.L. at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the resolution adopted by the Board, at its meeting on November 8, 1984, authorizing the Executive Director to enter into an agreement for and on behalf of the Port Authority with Trans Mediterranean Airways (TMA) Societe Anonyme Libanaise (S.A.L.) providing for the surrender of TMA's lease for Hangar 5 and related outside areas at Kennedy International Airport and the payment to TMA of the sum of \$600,000 for its investment in improvements and equipment at the leased premises; be amended to provide that the effective date of surrender be on or about October 31, 1985, and also to provide that as a part of that agreement TMA may be relieved of its rental obligations, including utilities, for the months of February through May 1985 in the total amount of approximately \$250,000 and to settle any restoration obligation of TMA with respect to the premises and further amended with respect to the lease agreement with Air Express International Corporation (AEI) for premises in Hangar 5 to provide a ten-year term commencing on or about November 1, 1985; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

Kennedy International Airport - Lease with The King Interests, Corp. - Multi-Occupancy Air Cargo Building

It was reported that over the past fifteen months, Aviation Department staff have been engaged in preliminary discussions with a number of third-party developers who have expressed an interest in the construction and operation of a multi-occupancy air cargo building at Kennedy International Airport. Based on staff analysis and a comprehensive evaluation of the background and experience of the various developers, the Aviation Department was authorized by the Executive Director, on January 7, 1985, to enter into negotiations with The King Interests, Corp.

After much discussion with The King Interests, Corp., general agreement has been reached on the terms and conditions of a lease. Based upon these discussions it is proposed that a lease be entered into with The King Interests, Corp. for a term of approximately 28 years, including a period for the design and construction of two multi-occupancy air cargo facilities, commencing on or about September 1, 1985. Under the terms of the lease, the lessee will have complete responsibility for design, construction, maintenance, repair, operation and subleasing of the facilities.

Development of the site, which includes the demolition of existing structures including Hangar 11 will be in stages. Stage I, the easterly building, involving 50% of the site area, will be completed no later than two years from commencement of the lease. Stage II, the westerly building, will be completed no later than three years from commencement of the lease.

Payment of ground rentals for Stage I will commence upon completion of construction, first occupancy by a subtenant, or two years from the commencement of the lease, whichever occurs first. Payment of ground rentals for State II will commence upon completion of construction, first occupancy by a subtenant or three years from the commencement of the lease, whichever occurs first. Ground rentals prior to the completion of construction or outside dates would be pro-rated in the event of partial occupancy. From commencement of ground rental payments, the following rates are applicable:

First 5 years	\$20,000 per acre
Years 6 - 10	\$25,000 per acre
Years 11 - 15	\$30,000 per acre
Years 16 - 20	\$35,000 per acre
Years 21 to Expiration	\$40,000 per acre

In addition, once ground rentals commence for each stage, the agreement will provide for the Port Authority to receive 10% of rental revenues, as defined in the lease, in excess of ten times the applicable ground rentals for each year of the lease term.

Port Authority payments to King, of up to a maximum investment of \$20 million, shall be made as portions of construction are completed and payments are made to the contractors, but not later than four years after commencement of the lease, with King obligated to pay a monthly Facility Rental commencing upon the earlier of completion of both stages of construction or three years after commencement of the lease term at a factor of .01109 for each dollar of Port Authority investment, including an amount imputed monthly at a factor of .010625 on all sums prior to the commencement of the payment of Facility Rental. The monthly Facility Rental Factor, as aforesaid, is based on a 25-year Facility Rental payment period and would be subject to adjustment for any different Facility Rental period.

(Board - 8/8/85)

The Port Authority will be responsible for providing paving and utilities to the site, currently estimated to cost approximately \$1 million. The lessee may perform all or a portion of such paving and utilities and would be reimbursed therefor by the Port Authority. In addition, certain other utilities on the site may require relocation by the lessee, the cost of which would be part of the lessee's cost of construction and will be eligible for Port Authority payments.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into an agreement of lease with The King Interests, Corp. at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he is hereby authorized to enter into a lease with a term of approximately 28 years, commencing on or about September 1, 1985, with The King Interests, Corp. for the design, construction, subleasing to appropriate subtenants, operation and maintenance of two multi-occupancy air cargo buildings totaling approximately 400,000 square feet in two separate stages, on a site of approximately 26 acres comprised of two building sites, at Kennedy International Airport, at an annual ground rental of \$20,000 per acre increasing to \$40,000 per acre over the term of the lease, commencing separately as to each site on the earlier of completion of construction, occupancy by first subtenant, or two years after commencement for Stage I and three years after commencement for Stage II (with ground rentals prior to the completion of construction or outside dates to be pro-rated in the event of partial occupancy) plus 10% of rental revenues in excess of ten times the applicable ground rental for each year of the lease term, and with the Port Authority obligated to make periodic payments to The King Interests, Corp., not to exceed a \$20 million investment, to pay the costs of the design and construction of the multi-occupancy air cargo buildings, and with King obligated to pay a monthly Facility Rental commencing upon the earlier of completion of both stages of construction or three years after commencement of the lease term at a factor of .01109 for each dollar of Port Authority investment including an amount imputed monthly at a factor of .010625 on all sums prior to the commencement of the payment of Facility Rental; being based on a 25-year Facility Rental payment period, would be subject to adjustment for any different Facility Rental period; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 8/8/85)

Settlement of Claim of The Port Authority of New York and New Jersey v. Biscayne Maritime Monrovia Et. Al.

It was reported that there is presently pending in the United States District Court for the Southern District of New York an action entitled **The Port Authority of New York and New Jersey vs. Biscayne Maritime Monrovia, Orion and Global Chartering Company, Dimitrios Logothetis, Lynn P. Van De Waters, Jr., Moran Towing and Transportation Company, Inc. and George Fagerstrom** bearing Index Number 82 Civ. 6565 (CSH) in which the Port Authority seeks to recover for property damage sustained as a result of the ship "Vronti" striking a cofferdam at the Outerbridge Crossing, Richmond County.

The collision occurred on October 13, 1979 at approximately 2:00 a.m. when the ship "Vronti" was proceeding north in the Arthur Kill in dense fog. The "Vronti" was assisted at the time and place of the accident by tugs from Moran Towing and Transportation. When approaching the Outerbridge Crossing, the "Vronti" failed to make the turn in channel and struck a cofferdam head-on. The cofferdam, or protective cell, was destroyed and sunk.

The total Port Authority damages claimed were \$629,836 consisting of \$437,505 in contract costs and an additional \$192,031 in overhead. However, approximately \$46,000 of the contract costs represented the cost of a fender system which was placed on the new cofferdam but which was not on the destroyed cofferdam. Thus, such a fender would constitute a betterment and defendants would not be liable for the cost.

In addition, the Port Authority's claim overhead exceeded the permissible limit set by case law and was uncollectable in light of the fact that the Port Authority used the same plans to construct the new cofferdam that had been used to build the old one. Thus, the Court would only have allowed approximately \$79,000 in overhead as per the established case precedent.

Defendants would also be entitled to a reduction in replacement costs for depreciation. Although at the settlement conference they contended that the depreciation should be anywhere from 40% to 60% and they had an expert witness to so testify, the excellent maintenance of the cofferdam served to reduce the depreciation allowed after negotiation to under 20%.

The Court recommended that all parties agree to a settlement of \$395,000 to avoid the additional costs of experts and a trial. This amount allows the Port Authority to recover virtually all of the actual, attributable contract costs in reconstructing the cofferdam (without the fender). It also comprises the overhead and avoids the possibility of more depreciation being allowed by the Court at trial thereby reducing the recovery further. Based on all the facts, such a settlement is fair and reasonable.

It was therefore recommended that the Board authorize General Counsel to settle the claim of The Port Authority of New York and New Jersey now pending in the United States District Court for the Southern District of New York entitled **The Port Authority of New York and New Jersey vs. Biscayne Maritime Monrovia, Orion and Global Chartering Company, Dimitrios Logothetis, Lynn P. Van De Waters, Jr., Moran Towing and Transportation Company, Inc. and George Fagerstrom**, bearing Index Number 82 Civ. 6565 (CSH) by receiving from defendants, Biscayne and Moran, the sum of \$395,000 in full satisfaction of said claim.

(Board - 8/8/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that General Counsel be and he hereby is authorized to settle the claim of The Port Authority of New York and New Jersey now pending in the United States District Court for the Southern District of New York entitled **The Port Authority of New York and New Jersey vs. Biscayne Maritime Monrovia, Orion and Global Chartering Company, Dimitrios Logothetis, Lynn P. Van De Waters, Jr., Moran Towing and Transportation Company, Inc. and George Fagerstrom**, bearing Index Number 82 Civ. 6565 (CSH) by receiving from defendants, Biscayne and Moran, the sum of \$395,000 in full satisfaction of said claim.

(Board - 8/8/85)

The World Trade Center - North and South Tower Buildings and Below Grade - Electrical -
Contracts WTC-601.00 and WTC-602.00 - Settlement of Claims

It was reported that the Board, at its meeting on February 15, 1968 and September 17, 1968, authorized the award of Contracts WTC-601.00 and WTC-602.00, respectively, to the Nager Electric Company, Inc. The contracts included the major electrical work in the North and South Tower Buildings and Below Grade Areas of The World Trade Center. The total amount authorized for both contracts, including extra materials and extra work allowances, was \$30,251,000.

Because of the inability of the contractor to obtain and assign to The World Trade Center the numbers of workers required to maintain the construction schedule, the Board, at its meeting on January 13, 1972, authorized Supplemental Agreement 3 to Contract WTC-601.00 and Supplemental Agreement 1 to WTC-602.00 with Nager Electric Company, Inc., to provide for the following: (a) revised payments under Contracts WTC-601.00 and WTC-602.00 to be made in the approximate amount of \$35,684,000 subject to audit adjustment, inclusive of the price of the base contracts, existing supplemental agreements, extra materials and extra work previously ordered or pending as of November 4, 1971, all standby and overtime payments up to December 31, 1973, and a waiver by the contractor of all claims against the Port Authority by the contractor which were known or should have been as of November 4, 1971; (b) the elimination of the assessment of backcharges against the contractor after November 1, 1971 and (c) a revised accelerated completion schedule under which the contractor agreed to employ overtime. The Board also authorized payment to the contractor of \$300,000 of the contract price allocable to work performed which otherwise would not have been due until final payment, \$450,000 for extra materials and extra work for the two contracts in addition to the funds included in the above and the expenditure under the two contracts of all funds required for reimbursable tenant electrical work in the North and South Tower Buildings and Below Grade Area of The World Trade Center.

On May 8, 1972 the Port Authority received a letter from Nager Electric which alleged that the Port Authority had, in several respects, breached Contract WTC-601.00. The letter notified the Port Authority that because of the alleged breaches, the contractor would withdraw its entire work force as of the end of the May 8 workday from operations under the contract. It also indicated that Nager Electric would reconsider its intention to abandon further performance of the contract only if the Port Authority would agree to pay for all remaining work and sale under the contract on a cost-plus basis. After a meeting held on May 8, 1972 in an attempt to explore whether the matter could be amicably resolved, the Port Authority notified the contractor that the Port Authority was, in the exercise of its rights under the contract, and at the contractor's expense, taking over the contract as agent for the contractor. The contractor's bonding company for the contract, Maryland Casualty Company, was also so advised and notified that the Port Authority would look to it for all damages covered by the bond. Subsequently, an agreement was reached with Forest Electric Corporation, the electrical contractor for the Northeast Plaza Building, to take over the Nager Electric work on a cost-plus basis.

(Board - 8/8/85)

On May 3, 1973 suit was instituted against the Port Authority and Tishman Realty and Construction Co., Inc. in the Supreme Court of the State of New York, New York County, by Nager Electric Co., Inc. The suit sought damages amounting, under alternate theories of recovery, to \$20.1 million or \$26.2 million in connection with Contract WTC-601.00. Tishman was the Port Authority's agent-general contractor for the bulk of The World Trade Center construction. Nager Electric alleged that the Port Authority had breached the contract in several respects, viz. the Port Authority (a) had failed properly to schedule and coordinate the construction site operations of the various contractors performing work on The World Trade Center project, (b) had failed to make payments to the contractor as required by the contract, and (c) had prevented the contractor from performing its work in an efficient and economical manner. In addition, it alleged that the Port Authority broadcast to the construction industry allegations that Nager Electric had defaulted in its work and that it was incompetent and unreliable, thereby causing the contractor a loss of reputation and a loss of business. Moreover, it alleged that the Port Authority so materially breached the contract as to entitle the contractor to a rescission of the agreement and to payment for all damages sustained by the contractor from the contract's inception, or alternatively, to the recovery of the cost of all of the work, labor and services performed and materials furnished by the contractor, together with overhead and profit, as well as all monies withheld, after deducting therefrom the gross amount of payments approved by the Port Authority. The complaint also asked punitive damages in the amount of \$34,365,000.

The Port Authority alleged damages of approximately \$18 million as a result of Nager Electric's alleged breach of contract and advised the bonding company it would look to it for all damages covered by the bond. On July 9, 1974, another suit was instituted by Nager Electric Co., Inc. against the Port Authority for \$750,578.28. The complaint alleged damages for breach of contract to perform certain electrical construction work and supply certain electrical materials and equipment at The World Trade Center, under Contract WTC-602.00. On January 25, 1975, the Port Authority moved to dismiss the action relating to Contract WTC-601.00. On January 14, 1976, by stipulation, the motion was stayed to permit further discussion between the parties.

After extensive negotiations with the contractor, staff has reached a tentative settlement which provides for payment to the Port Authority of the amount of \$3,408,968, consisting of the amount of \$2 million, plus the amount of \$1,408,968 presently in the possession of the Port Authority. Of the aforesaid \$2 million, \$1 million would be paid by Maryland Casualty Company and \$1 million would be paid by Nager Electric. The \$1 million from Maryland Casualty would be paid on the date of closing of the agreement and release reflecting the proposed settlement. The \$1 million from Nager Electric would be payable in equal installments over a two and one-half year period after the closing date and would bear interest from such date computed at a rate equal to that which the Port Authority pays for money, which rate would be adjusted quarterly. The \$1 million payable by Nager Electric would be collateralized by an assignment from Nager Electric to the Port Authority of \$705,000 in Housing Authority bonds which are presently deposited with General Electric. General Electric's consent to such assignment would be obtained by Nager Electric prior to execution of the settlement agreement and release. The settlement agreement and release would contain appropriate releases of all claims which the parties may have against each other. Any release in favor of the Port Authority would also extend to Tishman and the agreement would be for the benefit of Tishman as well. However, notwithstanding Nager Electric's continuing liability, Maryland Casualty Company would be released from all liability upon payment of the \$1 million to be paid by it.

(Board - 8/8/85)

Staff is of the opinion that the proposed settlement is fair and equitable and that it is in the best interests of the Port Authority to settle these claims now.

It was therefore recommended that the Board authorize a settlement with Nager Electric Company, Inc. of all claims between Nager Electric Company, Inc. and the Port Authority, arising out of or in connection with Contracts WTC-601.00 and WTC-602.00, such settlement to be in the form of an agreement and release providing for:

1. payment to the Port Authority of the amount of \$3,408,968 consisting of the amount of \$2 million, \$1 million of which is to be paid by Maryland Casualty Company and \$1 million of which is to be paid by Nager Electric Company, Inc., plus the amount of \$1,408,968 presently in the possession of the Port Authority, the \$1 million from Maryland Casualty Company to be paid on the date of closing of said agreement and release and the \$1 million from Nager Electric Company, Inc. to be paid in equal installments over a two and one-half year period, to bear interest at a rate equal to that which the Port Authority pays for money, adjusted quarterly, and to be secured by collateral in the form of an assignment from Nager Electric Company, Inc. to the Port Authority of \$705,000 in New York City Housing Development Corporation bonds, 9 1/8%, due June 1, 2021;

2. such agreement and any release therein in favor of the Port Authority to extend to and be for the benefit of Tishman Realty and Construction Co., Inc.; and

3. the the release of Maryland Casualty Company from all liability upon its payment of \$1 million, notwithstanding the continuing liability of Nager Electric Company, Inc.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a settlement with Nager Electric Company, Inc. of all claims between Nager Electric Company, Inc. and the Port Authority, arising out of or in connection with Contracts WTC-601.00 and WTC-602.00, is authorized, such settlement to be in the form of an agreement and release providing for:

1. payment to the Port Authority of the amount of \$3,408,968 consisting of the amount of \$2 million, \$1 million of which is to be paid by Maryland Casualty Company and \$1 million of which is to be paid by Nager Electric Company, Inc., plus the amount of \$1,408,968 presently in the possession of the Port Authority, the \$1 million from Maryland Casualty Company to be paid on the date of closing of said agreement and release and the \$1 million from Nager Electric Company, Inc. to be paid in equal installments over a two and one-half year period, to bear interest at a rate equal to that which the Port Authority pays for money, adjusted quarterly, and to be secured by collateral in the form of an assignment from Nager Electric Company, Inc. to the Port Authority of \$705,000 in New York City Housing Development Corporation bonds, 9 1/8%, due June 1, 2021;

(Board - 8/8/85)

2. such agreement and any release therein in favor of the Port Authority to extend to and be for the benefit of Tishman Realty and Construction Co., Inc.; and

3. the release of Maryland Casualty Company from all liability upon its payment of \$1 million, notwithstanding the continuing liability of Nager Electric Company, Inc.;

such agreement and release to be subject to approval as to form by General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Katharine B. MacKay, Assistant Executive Director/Director of State Relations
Mark Marchese, Assistant Director, Information Services, Public Affairs
Rino M. Monti, Director of Engineering/Chief Engineer
James H. Mullen, Administrative Assistant
Edward J. O'Malley, Director of Personnel
James J. O'Malley, Director of Management Information Services
Martin E. Robins, Director of Planning and Development
Victor T. Strom, Director of Public Safety
Guy F. Tozzoli, Director of World Trade
Joseph L. Vanacore, Executive Officer for Capital Programs
Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer

The meeting was called to order by the Chairman.

(Board - 9/12/85)

Election of Chairman, Vice-Chairman and Executive Director

Chairman Alan Sagner announced that in accordance with the requirements of the By-Laws the election of officers was in order and requested Commissioner Van Fossan, Chairman of the Nominating Committee, to submit the report of that Committee. Commissioner Van Fossan submitted the following report:

“On behalf of the Nominating Committee, I desire to report that at its meeting held earlier today, in accordance with the provisions of the By-Laws, the Committee, by unanimous action, submits the nominations for election to the office of Chairman of The Port Authority of New York and New Jersey of Commissioner Philip D. Kaltenbacher, and for the office of Vice-Chairman of The Port Authority of New York and New Jersey of Commissioner Robert F. Wagner.

“By unanimous action, the Committee also submits the nomination of Stephen Berger as Executive Director effective October 1, 1985.”

Commissioner Ronan thereupon moved the adoption of the report of the Nominating Committee. The motion was seconded by Commissioner English and unanimously carried.

On motion of Commissioner Ronan, seconded by Commissioner English, it was unanimously voted that nominations be closed and that the Secretary be directed to cast one ballot for the election of Commissioner Philip D. Kaltenbacher as Chairman, Commissioner Robert F. Wagner as Vice-Chairman and Stephen Berger as Executive Director, all for the ensuing year.

The Secretary reported that the ballot had been cast, whereupon Commissioner Sagner announced the election of the following: Philip D. Kaltenbacher as Chairman, Robert F. Wagner as Vice-Chairman and Stephen Berger as Executive Director effective October 1, 1985, all for the ensuing year.

(Board - 9/12/85)

Tribute to Chairman Sagner

Whereupon, Commissioner McGoldrick read the following resolutions, which were unanimously adopted by the Commissioners:

RESOLVED, that the Minutes of this meeting record and reflect the universal and profound appreciation for the significant contribution of Alan Sagner to The Port Authority of New York and New Jersey, its Board of Commissioners and the entire Port Authority family, to the Port District and to the States of New Jersey and New York in his role as Chairman of the Authority; and

FURTHER RESOLVED, that the Minutes also record and reflect this Board's sincere gratitude to Alan Sagner for his generous, talented and effective service as Chairman, and the great personal respect in which its members hold him.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of August 8, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on September 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on September 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on September 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on September 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 9/12/85)

The World Trade Department - Newark Legal and Communications Center - Project Implementation

It was reported that the Board, at its Special meeting on June 29, 1983, authorized the Executive Director to commence appropriate studies and planning, at a cost not to exceed \$600,000, in connection with the proposed development of a new commercial center in the City of Newark (City).

At its meeting on June 14, 1984, the Board authorized the Executive Director to proceed with the development of a project to be known as the Newark Legal and Communications Center, consisting of an office building of approximately 300,000 net usable square feet and its related infrastructure in the City of Newark, New Jersey, adjacent to Penn Station, Newark and the PATH terminus, at an estimated total cost of \$40 million, and to enter into an agreement with the City of Newark and the Newark Economic Development Corporation providing for the construction by the Port Authority, using Federal grant monies, of an elevated pedestrian walkway connecting the aforementioned office building to Penn Station and a parking garage which will be located beneath the building. As required by covenants with bondholders, certification of the project as an additional facility was made by the Board, at its meeting on October 11, 1984, and reaffirmed by the Committee on Finance on December 8, 1984.

Staff has proceeded with the planning for the development of the office building and related facilities in accordance with the aforesaid authorization. An agreement required in connection with the City's application to the U.S. Department of Housing and Urban Development for a \$9.8 million Urban Development Action Grant (UDAG) to be used for the construction of the aforesaid garage and walkway was entered into on June 15, 1984 among the Port Authority, the City and NEDC Financial Management Corporation, a subsidiary of Newark Economic Development Corporation, generally setting forth the various rights and obligations of the parties relating to the anticipated development. The City received approval of the grant from HUD on October 1, 1984.

Further authorization is required at this time to enter into a more detailed agreement with the City and NEDC Riverfront Corporation (a wholly-owned subsidiary of Newark Economic Development Corporation (NEDC) which was incorporated to perform Newark Economic Development Corporation's functions in connection with this development) which is necessary to permit the Department of Housing and Urban Development to transfer the grant funds to the City for the aforesaid purposes and which will more specifically describe the rights and obligations of the parties with respect to the development which were generally defined in the June 15, 1984 agreement. The agreement was approved by the City Council of the City of Newark at its meeting on September 4, 1985.

The proposed agreement among the Port Authority, the City and NEDC calls for the Port Authority to provide approximately \$40 million for the development of the office building and its related infrastructure and for the Port Authority to be responsible for its management and operation. The agreement will further provide for NEDC to acquire title to the site required for the project and to convey to the Port Authority such property interests as the Port Authority may require to permit construction of the office building and enable the Port Authority to convey title to or lease space in the building to occupants. Another agreement is to be entered into between NEDC and the Port Authority pursuant to which the planned parking garage and walkway will be constructed. Even though the Port Authority will agree to implement an affirmative action plan which conforms generally to Newark's affirmative action plan and will monitor and enforce the performance by contractors our actual intent is to exceed the Newark affirmative action plan by doing the following.

(Board - 9/12/85)

The Port Authority will solicit proposals from Minority Business Enterprises (MBE's) only for a contract that will provide for construction management services and general conditions work for the construction of the Legal and Communications Center.

If the MBE selected for construction management services and general conditions work is not from the New York/New Jersey region, it will be required to establish a regional office or joint venture with an MBE from the region.

In addition, the Port Authority will use its best efforts to assist MBE's in obtaining subcontracting work. The Port Authority will set its goal for achieving MBE participation higher than the City of Newark's 25% goal. With no sacrifice to standards of prequalification, performance, and budget, the Port Authority will, where feasible, set aside subcontracts of work for minorities through competition limited to prequalified MBE (select list) firms or through direct negotiation (subject to Board approval) in order to achieve higher overall levels of participation in this project.

In the event the Port Authority is unable to retain or contract with an MBE for a specific contract, then proposals will be solicited from majority firms. However, all contracts that are awarded to majority firms will contain affirmative action requirements that will generally conform to the City of Newark's affirmative action plan which provides for a range of 25%-50% minority-employee participation, depending on craft.

The agreement with the City and NEDC will also provide that the Port Authority will be responsible for the operation and maintenance of the elevated walkway and that NEDC and the Port Authority will enter into an agreement covering the management of the parking garage, including provisions relating to selection and grounds for termination of an independent garage operator, on terms which will assure high standards of security, maintenance and general operation, consistent with the operation of a first class office building.

So that Newark will not be unduly deprived of revenue because of the Port Authority's ownership and use of any portion of the usable space within the office building, and in consideration of the agreements made by the City of Newark and NEDC relating to the garage and walkway, the Port Authority will agree to pay annually to NEDC for the account of the City an amount calculated by multiplying by \$2 the average number of usable square feet in the office building which are owned by the Port Authority or other tax exempt entities and which are not subject to installment contracts of sale with purchasers, plus an additional area which represents the proportionate share of common areas attributable to the space so owned by the Port Authority or other tax exempt entities, which multiplier will, after the termination of applicable tax abatements, be changed to the average real estate taxes per usable square foot which would be paid by private owners. During the first three years after completion of the office building, vacant space owned by the Port Authority shall not be subject to such payments. It is anticipated that the City will assess purchasers' space directly for real estate tax purposes, subject to applicable abatement benefits which the City will agree to provide.

Finally, the agreement provides for the Port Authority to implement an affirmative action plan conforming generally to the goals of the Newark Affirmative Action Program as adopted by the Newark Municipal Council on December 19, 1984 and to comply with applicable Federal labor standards and administrative decisions.

(Board - 9/12/85)

Current project costs, inclusive of engineering, administrative and Port Authority financial costs, are estimated at approximately \$38 million, exclusive of any tenant fit-up allowance. It is anticipated that usable space, of which there is approximately 300,000 square feet available for sale or lease, will be sold in the Legal and Communications Center building at a per-usable-square-foot rate of approximately \$126, but in no event will the rate exceed the sum of \$133 per usable square foot. In order to progress marketing efforts and obtain commitments from prospective purchasers of space, it was necessary, in staff's judgment, to agree to cap the proposed purchase at a figure which is 5% over the estimated \$126 per square foot figure. As of this date, three law firms presently located in Newark have expressed their intention to purchase a combined total of 5¼ floors in the building.

As presently contemplated, the Port Authority will acquire from the City, at a cost estimated to be \$250,000, fee title to lands underlying the building, subject to whatever interests must be reserved to the City and NEDC for the garage and walkway. Installment contracts will be entered into with private entities for the conveyance of title to space in the proposed office building at prices to be determined as stated above, with purchasers agreeing to make annual payments to the Port Authority sufficient to produce net operating revenues which will cover the Port Authority's financial requirements. These contracts will provide that, upon payment in full to the Port Authority of all monies owing under all installment contracts, the Port Authority will convey to the purchasers all of the Port Authority's interest in the building and underlying lands except such interests as may be attributable to the Port Authority's ownership of usable space in the building which the Port Authority may elect to retain. Should market conditions dictate that a portion of the space in the Legal and Communications Center be made available for lease, staff will endeavor to lease said space, at rentals to be no less than an amount sufficient to recover Port Authority capital and operating costs attributable to such space, including payments to be made to the City with respect to space owned by the Port Authority and not subject to installment sale contracts.

After acquisition of the building site and prior to executing any contracts of sale for space, it will be necessary for the Port Authority to execute and record a Declaration of Easements, Covenants, Conditions and Restrictions affecting the property which will govern the relationships among the Port Authority and various purchasers of space during the period that the Port Authority will be responsible for the operation of the building. The agreement will provide generally that the Port Authority will operate and manage the building and that the purchasers will reimburse the Port Authority for all costs and expenses of operation, maintenance and repair of the building attributable to their respective space, on a dollar-for-dollar basis.

In order for the Port Authority to be competitive with the Newark real estate market, the Port Authority has agreed, subject to Board approval, to provide the cost of tenant finishes over and above the base sales price. The initial \$14.79/sq. ft. of such cost will be provided as an addition to the base sales price set forth in the installment contracts of sale, under the same terms and conditions, and the remainder will be provided separately at an additional cost of one-fourth of 1% (0.25%). The total cost for initial finishes is presently estimated at \$4.2 million. While the agreements will provide that purchasers' liability for the payment of the base sales price plus the first \$14.79 of finishes will not extend beyond their property interest in the space, the purchasers will be personally liable for the cost of additional finishes.

(Board - 9/12/85)

The development site on which the Legal and Communications Center building will be constructed contains a utility corridor that essentially runs through the middle of the site in the bed of existing River Street which abuts the building property. In order for future development to be contiguous with the first phase of development (the Legal and Communications Center), these utilities will have to be relocated and essentially re-routed around the site. While the first phase of the project can be built without the relocation of utilities, future development potential for the remainder of the site will be greatly enhanced if these utilities are relocated now. Such development is essential to any plans for the renaissance of the downtown riverfront area.

Funds which may become available for the cost of relocation of the River Street utilities, estimated to be \$3.5 million, would be reimbursed as each subsequent phase of the development of the site occurs. Legal and Communications Center purchasers would pay their pro rata share of utility relocation costs, estimated to be 20% of total cost or \$700,000, in their proportionate share of project costs. The balance of \$2.8 million needed for utility relocations will be provided by the Port Authority through a loan from the Fund for Regional Development, which would be repaid by the Port Authority within five years of drawdown of the loan. Pursuant to an agreement between the Port Authority and NEDC, NEDC will use its best efforts to assure that this amount is repaid to the Port Authority by the future developers of the site.

In order for the Port Authority to obtain, for the purchasers of space in the building, such limited term real estate tax abatements as are presently available under applicable New Jersey urban renewal legislation, it may be necessary for the Port Authority to develop this project through a wholly-owned subsidiary corporation to be incorporated at a later date. Under such statutes, municipalities can provide tax abatements only to a qualified urban renewal entity as defined therein and the Port Authority does not, as the law presently exists, come within such definition.

It was therefore recommended that the Board:

1. authorize the Acting Executive Director to: (a) proceed to implement a project for the development of an office building of approximately 300,000 net usable square feet, to be known as the Newark Legal and Communications Center, and its related infrastructure on lands situated in the City of Newark, New Jersey, adjacent to Pennsylvania Station and the PATH terminus, at an estimated total cost of \$44.2 million, for construction of the office building, including approximately \$4.2 million to provide for initial office finishes and (b) enter into appropriate agreements for the provision of a loan through the Fund for Regional Development of \$2.8 million in costs and expenses for relocation of existing River Street utilities in addition to utility relocation costs included within overall project costs;
2. find and determine that it is necessary for public use for the aforesaid purposes to acquire fee title and required lesser property interests in lands of NEDC Riverfront Corporation (NEDC) which are comprised of parts of Lots 36, 32, 30 and 52 in Block 136 as shown upon the tax assessment map of the City of Newark; and
3. authorize the Acting Executive Director, in implementation of the project, to: (a) enter into an agreement with the City of Newark and NEDC which will define the various rights and obligations among the parties with respect to the development and operation of the project and related facilities and which is prerequisite to the transfer by the Department of

(Board - 9/12/85)

Housing and Urban Development to NEDC of Urban Development Action Grant funds to be used for the construction of a structured parking garage within the office building and elevated pedestrian walkway connecting the building to Penn Station, and such other agreements as may be necessary to effectuate the aforementioned agreement; (b) acquire from NEDC fee title to the project site and such other property interests as may be required at a cost estimated to be \$250,000 and to incur all expenses necessary or incidental thereto; (c) execute and record in the Office of the Essex County Register a Declaration of Easements, Covenants, Conditions and Restrictions affecting the aforesaid property which will govern the legal relationships among the Port Authority and purchasers of space in the building and provide for the payment by purchasers of a proportionate share of operating and maintenance expenses; (d) enter into installment contracts of sale with purchasers of space in the aforesaid building at a consideration equal to the project cost divided by the number of usable square feet to be sold, the price per usable square foot being estimated to be \$126, but which will in no event exceed \$133, and to also include an appropriate factor to reflect Port Authority debt service coverage requirements; (e) enter into agreements for the leasing of space in the aforesaid building at rentals presently estimated at \$23 per square foot (the current market rate), but which shall not be less than an amount sufficient to recover the Port Authority's capital and operating costs attributable to such space, including a proportionate share of amounts to be paid by the Port Authority to the City as additional consideration relating to space owned by the Port Authority and not subject to installment contracts of sale with purchasers; (f) enter into agreements to provide tenant finishes: \$14.79 per square foot for initial finishes shall be provided under the same terms as the purchase price under the contracts of sale and the remainder shall be provided with an additional factor of one-fourth of 1% (0.25%) and (g) form a wholly-owned subsidiary corporation to effectuate the project if required by existing law to obtain real estate tax abatement benefits for purchasers of the space in the building, and execute such agreements with the City of Newark as may be required to secure such benefits.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Acting Executive Director be and he hereby is authorized to: (a) proceed to implement a project for the development of an office building of approximately 300,000 net usable square feet, to be known as the Newark Legal and Communications Center, and its related infrastructure on lands situated in the City of Newark, New Jersey, adjacent to Pennsylvania Station and the PATH terminus, at an estimated total cost of \$44.2 million, for construction of the office building, including approximately \$4.2 million to provide for initial office finishes and (b) enter into appropriate agreements for the provision of a loan through the Fund for Regional Development of \$2.8 million in costs and expenses for relocation of existing River Street utilities in addition to utility relocation costs included within overall project costs; and it is further

RESOLVED, that it be and is hereby found and determine that it is necessary for public use for the aforesaid purposes to acquire fee title and required lesser property interests in lands of NEDC Riverfront Corporation (NEDC) which are comprised of parts of Lots 36, 32, 30 and 52 in Block 136 as shown upon the tax assessment map of the City of Newark; and it is further

(Board - 9/12/85)

RESOLVED, that the Acting Executive Director be and he hereby is authorized to implement the project, to: (a) enter into an agreement with the City of Newark and NEDC which will define the various rights and obligations among the parties with respect to the development and operation of the project and related facilities and which is prerequisite to the transfer by the Department of Housing and Urban Development to NEDC of Urban Development Action Grant funds to be used for the construction of a structured parking garage within the office building and elevated pedestrian walkway connecting the building to Penn Station, and such other agreements as may be necessary to effectuate the aforementioned agreement; (b) acquire from NEDC fee title to the project site and such other property interests as may be required at a cost estimated to be \$250,000 and to incur all expenses necessary or incidental thereto; (c) execute and record in the Office of the Essex County Register a Declaration of Easements, Covenants, Conditions and Restrictions affecting the aforesaid property which will govern the legal relationships among the Port Authority and purchasers of space in the building and provide for the payment by purchasers of a proportionate share of operating and maintenance expenses; (d) enter into installment contracts of sale with purchasers of space in the aforesaid building at a consideration equal to the project cost divided by the number of usable square feet to be sold, the price per usable square foot being estimated to be \$126, but which will in no event exceed \$133, and to also include an appropriate factor to reflect Port Authority debt service coverage requirements; (e) enter into agreements for the leasing of space in the aforesaid building at rentals presently estimated at \$23 per square foot (the current market rate), but which shall not be less than an amount sufficient to recover the Port Authority's capital and operating costs attributable to such space, including a proportionate share of amounts to be paid by the Port Authority to the City as additional consideration relating to space owned by the Port Authority and not subject to installment contracts of sale with purchasers; (f) enter into agreements to provide tenant finishes: \$14.79 per square foot for initial finishes shall be provided under the same terms as the purchase price under the contracts of sale and the remainder shall be provided with an additional factor of one-fourth of 1% (0.25%) and (g) form a wholly-owned subsidiary corporation to effectuate the project if required by existing law to obtain real estate tax abatement benefits for purchasers of the space in the building, and execute such agreements with the City of Newark as may be required to secure such benefits; and it is further

RESOLVED, that all documents which may be required to effectuate the aforesaid project be subject to approval as to form by Deputy General Counsel or his authorized representative.

**Elizabeth-Port Authority Marine Terminal - Berths 78 through 86 - Maher Terminals, Inc. -
Construction of Container Crane Rails - Amendment to Lease**

It was reported that the Board, at various meetings between May 13, 1971 and November 12, 1981, authorized the letting to Maher Stevedoring Co. (now Maher Terminals, Inc.) of a 235-acre terminal at Berths 78 through 86 at the Elizabeth-Port Authority Marine Terminal, for a term expiring September 30, 2000, at an annual rental presently amounting to \$5,807,995. The terminal is now handling more than thirteen steamship lines including Zim Lines, Trans-Freight Line, Hapag Lloyd, Evergreen Line, Yang Ming Line and five Japanese lines; N.Y.K. Line, Mitsui-O.S.K. Line, Japan Line, K. Line and Y.S. Line.

Maher has determined that efficiency would be increased by extending container crane rails into Berth 78 approximately 750 feet. In addition to the four container cranes previously servicing the 2400 feet of container berth, Maher recently acquired and modified three container cranes. Presently, Berth 78 is not serviceable for container ship operations and was used for lumber and steel operations which have been relocated to Berth 17, Port Newark.

Under the amendment to the Maher Terminal lease, the lessee shall be reimbursed for the cost of construction up to an amount not to exceed \$2.9 million. The construction includes extending and improving the terminal's container crane rails, associated electric distribution system, relocation of utilities, resurfacing and other related work.

Maher will begin repayment over a fifteen-year period commencing on October 1, 1985. Maher will pay an additional monthly rental of \$.013 for each dollar of Port Authority investment bringing their annual rental for the Tripoli Street Terminal to approximately \$6,273,361. Additionally, Maher pays \$3,040,000 per year for the Fleet Street Terminal and \$1,665,857 per year for the lumber/steel terminals in Port Newark.

It was therefore recommended that the Board authorize the Acting Executive Director on behalf of the Port Authority to enter into an agreement with Maher Terminals, Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Acting Executive Director on behalf of the Port Authority to enter into an amendment to the lease with Maher Terminals, Inc. to provide for reimbursement not to exceed \$2.9 million for the installation of container crane rails and other related work; and for repayment by Maher over a fifteen-year period commencing on October 1, 1985, as additional monthly rental of \$.013 for each dollar of Port Authority investment; the form of the agreement to be subject to approval of Deputy General Counsel or his designated representative.

(Board - 9/12/85)

Retention of Professional Service Firms to Furnish Professional and Technical Personnel on an As-Needed Basis

It was reported that the Management Information Services Department (MIS) was created in October 1984 to provide an improved structure for the management of corporate information and telecommunication resources — resources instrumental in optimizing organizational efficiency and providing information systems for management control and timely decision making.

There has been a significant growth in the demand for MIS services, and a review of the workload for the balance of 1985 and the full year 1986 indicates a substantial demand which cannot be completely handled by the department's permanent staff. Rather than satisfying this entire requirement through the addition of permanent staff, it is proposed that MIS' permanent staffing be supplemented by the retention of temporary professional and technical personnel on an as-needed basis as the best means of providing the flexibility required to effectively respond to this demand and to expedite development of computer systems. This approach was recommended by the Port Authority Productivity Improvement Steering Committee as a means of accelerating the rate of development of essential management information systems, thus enhancing organizational productivity.

This workload consists of a significant backlog of requests for the development of new systems as well as the needed replacement of existing antiquated systems that no longer meet the needs of the organization. Several of the new systems requested will deliver improved management information in such areas as capital program monitoring, revenue forecasting, overtime expenditures, and financial analysis and control. Many of these systems have been targeted for completion in a relatively limited timeframe to gain the anticipated benefits of these systems in terms of cost avoidance, revenue enhancement or improved managerial control.

In addition to the aforementioned systems analysis and development workload, the demand created by increased user involvement has produced peak workload requirements and significant backlogs for computer terminal and personal computer installations, supporting software installations, and user education. The retention of professional service firms to supplement permanent data entry staff will also help to efficiently satisfy a highly fluctuating scheduled workload on a timely basis, along with servicing unscheduled high volume projects such as Trans-Hudson surveys.

A list of qualified professional service firms will be developed and a good faith effort will be made to ensure participation by Minority Business Enterprises and Women Business Enterprises. Proposals will be solicited from these firms with a request to submit pertinent information on their capabilities and their ability to meet the specified requirements. The respondents' proposals will be reviewed and the selection of professional service firms will be made on the basis of technical capability, cost, availability and qualification as Minority and Women Business Enterprises. In general, the type of personnel that will be provided by the service firms will be Programmer/Analysts, Systems Analysts, Systems Programmers, Technical Training Specialists, Terminal Installers, Data Entry Clerks, and Network Control Analysts. Selected personnel will work under the direct supervision of permanent staff.

(Board - 9/12/85)

In addition to retaining professional and technical personnel under this authorization, MIS anticipates seeking Board approval in several months for the retention of a consulting firm to assist staff in an assessment of Port Authority telecommunications needs at all facilities as well as the potential telecommunications needs of our patrons and tenants. The consultant will also assist staff in developing the design of a modern and efficient Port Authority telecommunications network to satisfy the needs identified. A Request for Proposals to supply these telecommunications consulting services is currently being prepared by staff.

It was therefore recommended that the Board authorize the Acting Executive Director to retain various professional service firms to furnish professional and technical personnel to augment the permanent staff of the Management Information Services Department (MIS) on an as-needed basis at a total expenditure not to exceed \$2.75 million for a period of approximately eighteen months.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Acting Executive Director to retain various professional service firms to furnish professional and technical personnel to augment the permanent staff of the Management Information Services Department on an as-needed basis at a total expenditure not to exceed \$2.75 million for a period of approximately eighteen months, the form of the agreements to be subject to the approval of Deputy General Counsel or his authorized representative.

(Board - 9/12/85)

Port Authority Technical Center - Construction of Cafeteria, Medical Clinic and Installation of a Teleconference Center

It was reported that the Board, at its meetings on August 9, 1984 and October 11, 1984, authorized the Executive Director to enter into lease agreements for a total of 188,500 square feet of space in the Jersey Plaza Building (now referred to as the Port Authority Technical Center) for a variety of field units located primarily in New Jersey who required relocation and for staff offices to meet the interim space needs of the Port Authority. It was reported that a total of 430 staff would eventually be housed there and to date approximately 230 staff have relocated to the Technical Center. It is anticipated that up to 200 additional staff will relocate by 1986.

The Board also authorized agreements with the owners for modification of the rented areas to meet the specialized technical, mechanical and office space needs of the units being relocated to the building. Now, in view of the need of employees for better food service facilities which have emerged since staff moved into the building, the operational requirements of the Lincoln Tunnel which will require the relocation of a medical clinic, and the anticipated needs of design engineers to communicate with the Engineering Department's headquarters at The World Trade Center, additional improvements will be required.

1. Cafeteria

Because the area surrounding the Technical Center provides no easily accessible restaurants, the General Services Department has operated a limited employee lunch room in a temporary location at the Technical Center since April 1985 when the first employees moved in. This lunch room, which does not have a food preparation or kitchen area, provides a limited menu of packaged foods similar to a take-out service.

These items include coffee, prepackaged breakfast items, cold sandwiches and canned foods and juices. The facility also serves hot entrees that are prepared daily at the cafeteria kitchen at either the Holland or Lincoln Tunnels and which are then transported to the Technical Center. Transporting food in this manner has been less than optimal, and will become impractical during inclement weather. Customer patience with this arrangement is deteriorating. Further, this temporary lunch room, with its limited menu, will not be able to accommodate the larger volume of employees (430) who will be potential customers when the Technical Center is fully staffed. In addition, some staff assigned to the Technical Center are permitted only a 30-minute lunch period. Thus, a full service cafeteria capable of providing fast, hot and cold breakfasts and lunch as prepared at the point of order, along with a suitable dining area, is necessary.

Similar full service cafeterias are currently provided at the Holland and Lincoln Tunnels, George Washington Bridge and Kennedy International Airport. The completed cafeteria will seat approximately 170 staff during one shift, 6:30 a.m. to 1:30 p.m., to cover both breakfast and lunch. In addition, the cafeteria will also meet the catering needs of staff at the Technical Center. The estimated construction cost for this full service cafeteria is \$675,000.

(Board - 9/12/85)

2. Medical Clinic

The Lincoln Tunnel Medical Clinic currently provides as needed and emergency medical services to over 1,600 Port Authority employees assigned to the George Washington Bridge, the Holland and Lincoln Tunnels, Newark International Airport, Port Newark and Port Elizabeth. However, the space the clinic currently occupies at the Lincoln Tunnel is needed to meet facility operating requirements, principally the expansion of facility Operation and Police Units. To continue to meet the needs for medical services of the 1,600 employees assigned to the New Jersey facilities enumerated above, and to serve the additional staff who were or will be assigned to the Technical Center, it is proposed to construct and equip a replacement medical clinic at the Technical Center.

In addition to providing as-needed and emergency medical services, the new medical clinic at the Technical Center will offer annual physical examinations and follow-up examinations required for all of the approximately 3,700 employees based in New Jersey. This is a departure from current practice, which requires all staff to travel to The World Trade Center for annual physical examinations. It is expected that there will be considerable savings in time spent away from work for these employees due to reduced travel time. To provide full health services, the new clinic will include necessary testing equipment as required for the comprehensive annual physical examination, examination and treatment rooms and medical offices. A major effort will be made to prevent on the job injuries and reduce employee medical absences, particularly for those employees in operational positions, and in general, to promote the overall medical well-being of all staff. To this end, a cardiac fitness pilot program is planned and will be made available to all employees. The fitness program requires space for physical exercise and related equipment and machines and for showers and locker rooms. Use of the fitness center will be supervised by trained medical and technical personnel and will be consistent with similar installations in other organizations. Evaluations of the results of employee use of the facility will be made periodically. The estimated construction cost for this medical clinic fitness center is \$800,000.

In addition to the construction costs enumerated above, equipment and furnishings will be required for the cafeteria and the medical clinic. This will include food preparation equipment, cafeteria furnishings and dining room furniture at an estimated cost of \$390,000; and X-ray, and other diagnostic and medical fitness equipment, as well as furnishings for medical treatment and examination rooms at an estimated cost of \$340,000. Telephone and relocation services are estimated at \$20,000.

3. Teleconference Center

In order to meet the interim space needs of the Port Authority, approximately 200 staff of the Maintenance Engineering Design Division from The World Trade Center will be relocated to the Technical Center. One element that makes possible the operation of general offices in two locations is the improvement in telecommunications technology. A teleconferencing system is one such improvement. The proposed system would operate between the Engineering Department headquarters offices on the 72nd floor of The World Trade Center and the design engineers who will be located on the third floor of the Technical Center. Specifically, it will provide for visual and audio "live" person to person conferences of up to twenty people, enable

(Board - 9/12/85)

staff to transmit drawings and sketches made during a conference between the two locations and provide for hard copy facsimile transmission when required. Special telecommunication rooms will be required at each location. The estimated cost of construction for the teleconferencing installation will be \$250,000; in addition, the estimated cost of equipment, primarily for equipment such as color transmission devices, cameras, monitors and audio system with table microphones, document-graphic cameras, electrical writing pads and facsimile machines will be \$500,000. This cost also covers maintenance of the system for five years.

It was therefore recommended that the Board authorize the Acting Executive Director to:

1. enter into an agreement with Trends Urban Renewal Association Limited, owners of the building now referred to as the Port Authority Technical Center (formerly Jersey Plaza Building) at 241 Erie Street, Jersey City, New Jersey, for the construction of a full service employee cafeteria, a medical clinic and a two-way teleconference center, between the Technical Center and The World Trade Center, in the estimated amount of \$1,725,000; and
2. enter into agreements for the purchase necessary equipment and furnishings and the provision of telephones for these newly constructed facilities and any relocation services associated with the move to the new facilities at a total estimated amount of \$1.25 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Acting Executive Director is authorized to enter into an agreement with Trends Urban Renewal Association Limited, owners of the building now referred to as the Port Authority Technical Center (formerly Jersey Plaza Building) at 241 Erie Street, Jersey City, New Jersey, for the construction of a full service employee cafeteria, a medical clinic and a two-way teleconference center between the Technical Center and The World Trade Center, in the estimated amount of \$1,725,000, such agreement to be subject to approval as to form by Deputy General Counsel or his designated representative; and it is further

RESOLVED, that the Acting Executive Director is authorized to enter into agreements for the purchase of necessary equipment and furnishings and the provision of telephones for these newly constructed facilities and for any relocation services associated with the move to the new facilities at a total estimated amount of \$1.25 million, such agreements to be subject to approval as to form by Deputy General Counsel or his designated representative.

(Board - 9/12/85)

Kennedy International Airport - Revision to Schedule of Charges - Employee Parking Lot 7

It was reported that on August 1, 1967 in response to growth in traffic in the Central Terminal Area (CTA) at Kennedy International Airport, the Port Authority eliminated employee parking privileges in the lots in the CTA, relocated employee parking to a new Lot 7 adjacent to Hangar 8 where the North Service Road connects with the Van Wyck Approach Road, and instituted a contract bus service from Lot 7 to points in the CTA. The use of Lot 7 is restricted to employees of organizations which hold permit or contract agreements with the Port Authority and whose organization's place of business at Kennedy International Airport is located in the Central Terminal Area.

With spaces for 2,900 vehicles, Lot 7 has operated successfully since 1967 using an automated gate control system activated by identification cards sold to agreement holders whose place of work for their employees is in the Central Terminal Area. These identification cards permit not only entry to the Lot, but also use of a shuttle bus service under contract to the Port Authority. Cards are sold to employers for the use of named employees on a monthly basis. Terms and conditions for the use of the Lot are published in Airport Operations Bulletins issued by the General Manager.

From 1967 to September 30, 1977 the fee per employee per month was \$10. The Committee on Operations, at its meeting on August 31, 1977, approved an increase in the fee to its current \$15 per month per employee in order to maintain cost-recovery. The Board, at its meeting on February 10, 1983, authorized a new two-year bus service contract with Schenk Tours, Inc. for Lot 7 shuttle bus service. The contract provided the Port Authority with the option to extend the term for three additional periods of one year each with provisions for increased costs based on future increases in appropriate Department of Labor Price Indexes.

On April 24, 1985 the Director of the General Services Department exercised her authority to extend the term of the contract for the first one-year option period at a 4.0% increase in total cost over the previous year of the contract. In addition, it was necessary earlier this year to replace the obsolete employee parking lot computer with an updated system at an investment of \$275,000. In view of these and other rising costs associated with security and maintenance of the lot, it is recommended that the monthly fee be raised to \$20 effective October 1, 1985.

It was therefore recommended that the Schedule of Charges for Use of Public Vehicular Parking Areas at Kennedy International Airport be revised in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Schedule of Charges for Use of Public Vehicular Parking Areas at Kennedy International Airport for parking automotive vehicles in Employee Parking Lot 7 adopted by the Committee on Operations by resolution of August 31, 1977 be amended effective October 1, 1985 to increase the fee from \$15 to \$20 per vehicle each month; and it is further

RESOLVED, that the Acting Executive Director amend from time to time the Schedule of Charges for Use of Public Vehicular Parking Areas at Kennedy International Airport, as hereby amended, to revise the fee for parking automotive vehicles in Employee Parking Lot 7 to maintain cost recovery of the operation of the lot.

(Board - 9/12/85)

Waterfront Development Program - Hunters Point, Queens, New York - Retention of Professional Assistance to Provide Development Theme Analysis

It was reported that at its meeting on April 11, 1985, the Board authorized the Executive Director to enter into an agreement with Kalba Bowen Associates, Inc., to provide analysis and recommendations as to the feasibility of a World Media Center as a potential theme for the Hunters Point Waterfront Development, at an estimated amount of \$65,000.

Staff had previously reported that a critical element in creating a world-class, mixed-use development at Hunters Point, and particularly in providing anchor uses for the office space component of the project, is the establishment of an overall development theme which will create a unique focus or thrust for all or part of the development. Staff, in consultation with representatives of the Governor's office, Department of City Planning and Public Development Corporation, identified the video/media industry as one of two logical and attractive theme concepts meriting feasibility analysis. The video/media industry is under increasing pressure to relocate or find additional space outside of Manhattan and, at the same time, there is a strong desire to keep its proximate location close to Manhattan. Long Island City has already captured three major video/film production studios and the area surrounding the Hunters Point site is very suitable to the expansion of these activities as well as for hosting a number of ancillary production activities.

The concept of a Media Center would be to create in one location many of the media activities which gain benefit from being "under one roof," as well as more attractive cost factors than currently available in Manhattan. It would attempt to attract such industry groupings as small and medium advertising firms, graphic art studios, commercial artists, photographers, layout specialists, production company headquarters, cable/network/radio systems, marketing/research firms, publishing firms, etc. Because of the critical nature of communications to this group of industries, an inherent part of the theme would be to make the site adaptable to the very latest in communications and information processing technologies.

The analysis of the alternative theme, a Center For Life Sciences focusing on biomedical and biotechnology industries, has been undertaken by A. D. Little based on prior Board authorization and proposals submitted by three firms. The results of the feasibility analyses are needed as input to the work being performed by the Gruzen Partnership Beyer, Blinder, Belle on the development of the site Master Plan.

Based on Kalba Bowen Associates, Inc. 1983 N.Y. Video/TV industry study provided by representatives of the Governor's office and well regarded by UDC, staff had entered into discussions with Kalba Bowen for the purpose of developing a mutually acceptable Scope of Services based on the firm's original estimate of costs to undertake the outlined Hunters Point media study. During that time the consultant's methodologies were examined and refined in light of the site specific nature of the proposed study. That factor necessitated a higher degree of familiarity and experience with media industry real estate requirements than the consultant anticipated in its initial proposal. As a consequence, Kalba Bowen is unable to undertake the prescribed study either in total or at the authorized amount. Staff, therefore, feels that Kalba Bowen Associates, Inc. should not be retained for this study.

(Board - 9/12/85)

Since the two firms originally considered with Kalba Bowen had been measurably below that firm's capacity, staff believed that there was no merit in reconsidering those companies.

This market demand analysis will be an important input to the physical planning process for the overall Hunters Point Waterfront Development, which is scheduled for completion in late 1985. It is critical that work on this study begin without further delay.

Therefore, it is recommended that the study go forward under separate agreements of approximately \$22,500 each to TKS Associates and the Conway Company which, in collaboration, offer a unique blending of expertise in the media industry in the first instance and media industry real estate analysis in the second.

TKS Associates is a New York City based company. Its president and owner, Theodora K. Sklover, is the former Executive Director of the Governor's Office for Motion Picture and Television Development for the State of New York. As such, Ms. Sklover was intimately involved in the development planning for Kaufman/Astoria and Silvercup Studios -- two production facilities in the immediate Hunters Point area and important linkages to the potential World Media Center. During that time Ms. Sklover also had direct responsibility for investigation of the film, video and television industries in New York and on the West Coast and for making recommendations to the state for future development. As a consultant, she has contributed to feasibility studies for proposed media centers in Boston and Miami. She has also served as an industry expert to such clients as MTI-TV City, New York State Cable Commission, ABC, and the Ford Foundation. In June of this year, Ms. Sklover served as Chairperson of Production East, a three-day East Coast media industry conference.

The Conway Company, Inc. is a New York City based firm which specializes in research and consultation on large mixed-use real estate developments. The firm has performed feasibility and demand analyses for commercial sites both locally, including several in the New York City area for the real estate subsidiary of Sears Roebuck, nationally and in three European countries. The firm's current clients include the H.J. Heinz Company, Allegheny International and the Cities of Denver, Colorado and Charlotte, North Carolina. Most recently, the firm's president, William G. Conway, served as subconsultant to the Port Authority's physical planning consultant on the Hunters Point Waterfront Development. In this effort, Mr. Conway provided review of the Project's market potential and contributed to the various development scenarios and the sensitivity modeling for the preferred scenarios. He is intimately familiar with both the project and the Hunters Point area. The Conway Company also recently completed a significant real estate analysis of the New York City area, including segments of the media industry to be analyzed under this contract.

Staff recommends the retention of both TKS Associates and the Conway Company based on their unique combination of knowledge of and access to the media and real estate industries both locally and nationally.

(Board - 9/12/85)

Staff intends to commence the subject analysis with two studies, one with TKS Associates and one with Conway Company, Inc., as authorized by the Executive Director at a maximum compensation of \$10,000 each. The reports from these two studies will contribute to the product of the larger effort and each study will present a discrete and needed body of information in and of itself. Total expenditure for the four studies, including the two authorized by the Executive Director will be within the estimated \$65,000 originally authorized by the Board at its meeting on April 11, 1985.

Performance of the above services is necessary and desirable in order for the Port Authority to maintain its schedule in progressing the Hunters Point Waterfront Development.

It was therefore recommended that the Board authorize the Acting Executive Director to enter into two agreements: one with TKS Associates of New York, New York and one with the Conway Company, Inc., of New York, New York to provide analysis and recommendations as to the feasibility of a World Media Center as a potential theme for the Hunters Point Waterfront Development each at an estimated amount of \$22,500, which together with two other agreements recently authorized by the Executive Director with TKS Associates and Conway Company, Inc., each in an amount not to exceed \$10,000, brings the total estimated amount to be paid to TKS Associates and Conway Company, Inc. for services related to the feasibility of a World Media Center as a potential Hunters Point Waterfront Development theme to approximately \$65,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Acting Executive Director is authorized to enter into two agreements: one with TKS Associates of New York, New York and one with Conway Company, Inc., of New York, New York to provide analysis and recommendations as to the feasibility of a World Media Center as a potential theme for the Hunters Point Waterfront Development, each at an estimated amount of \$22,500, which together with two other agreements recently authorized by the Executive Director with TKS Associates and Conway Company, Inc. each in an amount not to exceed \$10,000, brings the total estimated amount to be paid to TKS Associates and Conway Company, Inc. for services related to the feasibility of a World Media Center as a potential Hunters Point Waterfront Development theme to approximately \$65,000; the form of such agreements to be subject to approval of Deputy General Counsel or his authorized representative.

(Board - 9/12/85)

Bayonne Bridge - Connection with New Jersey Route 169 - Approval of Plan and Authorization for Port Authority Participation

It was reported that the New Jersey Department of Transportation (NJDOT) has been advancing a comprehensive highway improvement program in the Bayonne-Jersey City corridor for over a decade. Estimated to cost the State approximately \$100 million, the program entails three elements — extension of Route 169 from its present terminus in the vicinity of 30th Street, Bayonne, south to the Bayonne Bridge and from its northern terminus in the vicinity of New Jersey Turnpike Interchange 14A west to Route 440; widening and rehabilitation of the original section of Route 169; and the construction of a new highway, New Jersey Route 185, in Jersey City from Route 169 to Caven Point Road in the vicinity of New Jersey Turnpike Interchange 14B. These improvements will provide much needed access to adjacent industrial areas and future waterfront development projects along the Hudson River and will remove truck and other traffic from local streets. The plan was recommended in the "Bayonne/Southern Jersey City Corridor Transportation Needs Assessment Study" authorized by the Committee on Port Planning on October 14, 1982.

Staff have been working closely with the NJDOT on this proposed highway improvement program and in particular on the extension of Route 169 where it connects with the Bayonne Bridge. By providing access to and from Route 169 from Station 8+00 (Margaret Street) to Station 76+00 (vicinity of East 19th Street), the project will enhance the movement of through bridge traffic as well as provide a direct highway connection between the Bayonne Bridge and the industrial area on the east side of the Bayonne peninsula. The project also retains all present movements between the bridge and the local street system. The construction of Route 169 will complete the New Jersey portion of the highway connections to the Bayonne Bridge begun with the construction of New York 440 (Willowbrook Expressway) on Staten Island and the consequent relocation and expansion of the tolls plaza and service building by the Port Authority in the early 1960's.

The NJDOT will be responsible for the design and construction of the project. It is proposed that the Port Authority pay 100% of the cost of construction for that portion of the project providing new approaches and connections to and from the bridge estimated to cost \$3.6 million plus 10% of this amount for engineering services related thereto and approximately \$160,000 of the consultant's fee for the redesign of the NJDOT's initial functional plan.

The State of New Jersey has requested that its share of the remainder of the project, which is estimated to cost up to \$27.0 million including any future direct engineering costs, be constructed using funds made available for New Jersey projects from the 1984 tolls increase. The final cost of this segment of the entire project will be subject to adjustment based on bids to be received, with any amount in excess of \$27.0 million to be provided by the State of New Jersey. The cost participation for the project is shown on Drawing PD-577, dated September 12, 1985.

Although the reconstruction of the existing Bayonne Bridge ramps to and from local streets will be the responsibility of the State, the Port Authority will maintain its traditional jurisdiction over them. Upon completion of the project, the Port Authority will have jurisdiction for the operation, maintenance and repair and reconstruction of those roadways, ramps and supporting structures which directly connect with the approaches and connections of the Bayonne Bridge as shown on Drawing PD-576, dated September 12, 1985.

(Board - 9/12/85)

None of the construction to be accomplished by NJDOT involves the Bayonne Bridge structure. However, the Port Authority staff has determined that it will be necessary to extend the southbound improvements onto the bridge structure under a separate Port Authority contract to provide greater acceleration and merging length for the local on-ramp from Avenue A at an additional project cost to the Port Authority of \$2.8 million.

Funds for the new connections to the Bayonne Bridge will be made available in the 1986 Budget and will be provided in subsequent years' budgets. Funds for those sections of New Jersey Route 169 to be under the jurisdiction of the NJDOT and the reconstruction of the existing ramps to the local streets from the Bayonne Bridge will be from funds made available for New Jersey projects by the 1984 tolls increase. The total amount made available for New Jersey projects from the 1984 tolls increase is \$137.5 million. The Route 169 project would be the first use of these funds by New Jersey, and would leave \$111.1 million available for other projects. Staff's recommendation that such funds be used for this project is based upon the State's assurance that the comprehensive highway improvement program hereinabove referred to will be completed by the State.

It was therefore recommended that the Board:

1. approve the functional plan for the approaches and connections to the Bayonne Bridge from New Jersey Route 169 and local streets and approve the expanded jurisdictional limits of the Port Authority as shown on Drawing No. PD-576, dated September 12, 1985;
2. authorize the Acting Executive Director to enter into an agreement with the New Jersey Department of Transportation (NJDOT) providing for the engineering, construction, financing, acquisition and exchange of interests in real property and the definition of jurisdictional responsibilities on New Jersey Route 169 between Station 8+00 (Margaret Street) at the Bayonne Bridge and Station 76+00 (vicinity of East 19th Street) on New Jersey Route 169;
3. authorize the Acting Executive Director to pay the NJDOT approximately \$3.6 million for the construction of new approaches and connections to the Bayonne Bridge from New Jersey Route 169 plus engineering costs for those portions of the approaches and connections which are generally shown in the single line hatching on Drawing No. PD-577, dated September 12, 1985. This amount is subject to adjustment based on bids to be received;
4. authorize the Acting Executive Director to provide up to \$27.0 million including any future direct engineering costs from the funds made available for New Jersey projects by the 1984 toll increase for the remainder of the project, as generally shown without hatching on Drawing No. PD-577, dated September 12, 1985; and
5. authorize a Port Authority project for modification of the New Jersey Viaduct of the Bayonne Bridge to lengthen the southbound acceleration lane at the estimated total project cost of \$2.8 million which includes payments to contractors, and allowance for extra work, engineering, administrative and financial expenses.

(Board - 9/12/85)

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the functional plan for the approaches and connections to the Bayonne Bridge from New Jersey Route 169 and local streets and the expanded jurisdictional limits of the Port Authority as shown on Drawing No. PD-576, dated September 12, 1985 be and are hereby approved; and it is further

RESOLVED, that the Acting Executive Director be and he is hereby authorized to enter into an agreement with the New Jersey Department of Transportation (NJDOT) providing for the engineering, construction, financing, acquisition and exchange of interests in real property and the definition of jurisdictional responsibilities on New Jersey Route 169 between Station 8+00 (Margaret Street) at the Bayonne Bridge and Station 76+00 (vicinity of East 19th Street) on New Jersey Route 169; and it is further

RESOLVED, that the Acting Executive Director be and he is hereby authorized to pay the NJDOT approximately \$3.6 million for the construction of new approaches and connections to the Bayonne Bridge from New Jersey Route 169 plus engineering costs for those portions of the approaches and connections which are generally shown in the single line hatching on Drawing No. PD-577, dated September 12, 1985, which amount is subject to adjustment based on bids to be received; and it is further

RESOLVED, that the Acting Executive Director be and he is hereby authorized to provide up to \$27.0 million including any future direct engineering costs from the funds made available for New Jersey projects by the 1984 toll increase for the remainder of the project, as generally shown without hatching on Drawing No. PD-577, dated September 12, 1985; and it is further

RESOLVED, that a Port Authority project be and it is hereby authorized for modification of the New Jersey Viaduct of the Bayonne Bridge to lengthen the southbound acceleration lane at the estimated total project cost of \$2.8 million which includes payments to contractors and allowance for extra work, engineering, administrative and financial expenses; and it is further

(Board - 9/12/85)

RESOLVED, that all documents required to consummate the aforesaid transaction be subject to approval as to form by Deputy General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Secretary

Katharine B. MacKay, Assistant Executive Director/Director of State Relations
Mark Marchese, Assistant Director, Information Services, Public Affairs
Edwin McKeever, Manager, Office of Strategic Planning, Planning and Development
Stuart Millendorf, Manager, Freight Services Improvement Conference, Planning and Development
Rino M. Monti, Director of Engineering/Chief Engineer
James H. Mullen, Administrative Assistant
Edward J. O'Malley, Acting Assistant Director of Administration
James J. O'Malley, Director of Management Information Services
Morris Sloane, Deputy Director of Aviation
Victor T. Strom, Director of Public Safety
Guy F. Tozzoli, Director of World Trade
Joseph L. Vanacore, Executive Officer for Capital Programs
Barry Weintrob, Director, Finance Department/Comptroller, Acting Chief Financial Officer
Marshal L. Wilcox, Jr., Treasurer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of September 12, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on October 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on October 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on October 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on October 10, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 10/10/85)

Tribute to Patrick J. Falvey

Whereupon, Commissioner Hutchison read the following resolutions, which were unanimously adopted by the Commissioners:

RESOLVED, that the Minutes of this meeting record and reflect the Commissioners' very great appreciation for the splendid service rendered by Patrick J. Falvey to The Port Authority of New York and New Jersey, its Board of Commissioners and the entire Port Authority family, and to the Port District as Acting Executive Director of the Authority; and

FURTHER RESOLVED, that the Minutes also record and reflect the Commissioners' heartfelt thanks to Patrick J. Falvey for his excellent, professional and effective service as Acting Executive Director; and their warmest respect and affection for him as a friend and valued colleague.

(Board - 10/10/85)

Oak Point Rail Freight Link - Harlem River Yard Project - Port Authority Participation

It was reported that the Oak Point Link Project and the Harlem River Yard Project are both part of the State's Full Freight Access Program and represent a critical investment in the renewal of New York City's rail freight infrastructure. The State's Full Freight Access Program, which has been underway for about five years, is intended to improve overhead clearances between Albany and New York City and Long Island, so as to permit access of larger, efficient conventional rail cars as well as intermodal equipment. Funding for elements of this \$128 million program are being provided from (a) three separate State bond issues; (b) the Port Authority and (c) the City of New York.

At its meeting of December 11, 1980, the Board authorized the Oak Point Rail Freight Link at a total cost to the Port Authority not to exceed \$38.75 million, subject to the requirement that the certifications required by Port Authority bond resolutions in connection with additional facilities of the Port Authority be given with respect to the project, and subject to the execution with the State of New York of (a) an agreement under which the Port Authority would pay to New York State approximately \$685,000 toward the cost of environmental impact studies in connection with the project and (b) a definitive agreement with New York State relating to disbursement of Port Authority funds to the State for the project. Appropriate certifications, as required by agreements with the holders of Port Authority bonds, were made in 1981, and the Oak Point Rail Freight Link Project became an additional Port Authority facility. The required agreements with the State of New York were executed in 1983.

New York State has indicated that an additional \$12.5 million will be required for the Oak Point Link Project owing to a reduction of \$8.5 million in the City's contribution to the Oak Point Link Project and an increased cost of \$4 million for the Oak Point Link Project.

Though it is anticipated that the \$12.5 million requested by the State is to be used in connection with the Oak Point Link Project, it is possible that a part or all of the funds will be used in connection with the Harlem River Yard Project, an intermodal freight-handling facility comprising the final element of the State's Full Freight Access Program, of which the Oak Point Link is a key part. Planning and design of the Harlem River Yard, to be located at the end of the Oak Point Link in the South Bronx, are underway and both the Oak Point Link and the Harlem River Yard are scheduled for concurrent completion in 1988. Since the State has not yet finally determined how available funds will be allocated between remaining elements of the Full Freight Access Program, the proposed supplemental agreement providing for payment of the additional \$12.5 million will include a provision permitting the use of any or all of the additional \$12.5 million for the Harlem River Yard Project, subject to any appropriate certifications, including those which may be required for the issuance of Port Authority bonds in connection with that project.

The total amount made available for regional development projects in New York State by the 1984 tolls increase is \$112.5 million. New York State has requested that the Port Authority allocate from these funds the amount of \$12.5 million for the South Bronx-Oak Point Link Project and/or the Harlem River Yard Project. The Board has previously authorized payments for projects in New York State of up to \$7.5 million for Yonkers Industrial Park and \$21,000 for a study of transportation availability and the Inner Ring labor market. Together with the State's \$12.5 million request for the Oak Point Link Project and/or the Harlem River Yard Project, total funds used for New York State projects would amount to \$20,021,000, leaving \$92,479,000 available for other projects in New York.

It was therefore recommended that the Board authorize the Executive Director, subject to any appropriate certifications, to:

1. provide up to \$12.5 million from the funds made available for New York State projects by the 1984 tolls increase for additional funding for the South Bronx-Oak Point Link Project and/or possible funding for the related Harlem River Yard Project; and

2. enter into a supplemental agreement to the South Bronx-Oak Point Link Agreement with the State of New York under which the additional \$12.5 million referred to in Recommendation "1" above would be paid to the State in connection with the South Bronx-Oak Point Link Project, or the related Harlem River Yard Project.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, subject to any appropriate certifications, is authorized to: (1) provide up to \$12.5 million from the funds made available for New York State projects by the 1984 tolls increase for additional funding for the South Bronx-Oak Point Link Project and/or possible funding for the related Harlem River Yard Project and (2) enter into a supplemental agreement to the South Bronx-Oak Point Link Agreement with the State of New York under which such additional \$12.5 million would be paid to the State in connection with the South Bronx-Oak Point Link Project, or the related Harlem River Yard Project; and it is further

RESOLVED, that the form of said supplemental agreement be subject to approval by General Counsel or his authorized representative.

(Board - 10/10/85)

Port Newark - Lease with Atlantic Gypsum Co., Inc.

It was reported that Atlantic Gypsum Co., Inc., is owned by the same persons who own American Drywall Supply Co. and Kahn Lumber and Millwork, Inc., major independent wholesale wallboard businesses in the region. Based on a strong forecast for wallboard sales and chronic market shortages, Atlantic plans to import gypsum and process it into wallboard at a facility to be located at Port Newark. The operation will be conducted in Buildings 265 and 267 at Port Newark, which will be leased from the Port Authority together with approximately 4.36 acres of related open area. Imported raw gypsum will be discharged from large bulk carriers at Berth 9 and transported through a high speed conveyor to a storage building, where the ore will be held until it is processed into wallboard by equipment to be installed in Buildings 265 and 267. Construction time for the project is estimated at eighteen months with a pre-opening testing period of up to six additional months commencing May 1, 1987 or the date the tenant's construction work is substantially completed, whichever shall first occur, and continuing to the day payment of rental for the premises commences, during which partial operations will be conducted for the purposes of training and operational development. Atlantic Gypsum has arranged for a guaranteed project cost from Process Design Associates, which has designed and built most of the wallboard plants in the United States. The proposed facility will employ approximately 175 people directly and it is estimated that it will generate approximately 150 additional jobs indirectly through local suppliers, truckers, etc.

The proposed facility will require an investment of approximately \$34 million. The Port Authority will pay the tenant an amount not to exceed \$9.5 million for the construction of a high speed bulk cargo discharge/storage/distribution system from Berth 9, the storage building, and the connecting structure between Buildings 265 and 267. The tenant will have the right to mortgage the leasehold to finance the balance of the initial cost of construction.

Payment of basic rental under the lease will commence on the earlier of (1) November 1, 1987 or (2) the date the testing period for the facility is complete. Basic rental will be payable at the rate of \$644,800 per year subject to escalation on November 1, 1989 and every two years thereafter based upon 50% of the percentage increase in the Consumer Price Index (all Urban Consumers New York and Northeastern New Jersey, 1967=100) at the end of each such two-year period over the Index for October 1987, with a minimum increase of 3% per year compounded annually. For each day during the testing period the tenant will be charged the sum of \$1,918. In addition to the basic rental of \$644,800 per year, the tenant will pay to the Port Authority an additional annual rental at the rate of \$81,200 per year to compensate the Port Authority for loss of rent during the construction period, and an additional monthly rental at a rate which is equivalent to 0.0112784 multiplied by the total of (1) the amount paid by the Port Authority to the tenant towards the construction of the facility, plus (2) an amount equal to .0003561643 multiplied by the product obtained by multiplying the amount of each payment made by the Port Authority to the tenant during the construction period by the number of days from the date of such payment to the date preceding the rent commencement date, which amount is equivalent to what the interest would be on the amount of money paid by the Port Authority to the tenant for the period during which the facility is being constructed and (3) the charge due the Port Authority for the testing period. Commencing on the first anniversary immediately following the date the lessee has paid off the cost of its private financing of the cost of the initial

(Board - 10/10/85)

construction, the lessee is obligated to make additional payments to the Port Authority in an amount equal to 20% of its annual net profits, as defined in the lease. When the amount of these payments exceeds the unpaid amount of the additional monthly rental, the lessee's obligation to pay such additional monthly rental shall cease. As a result, the Port Authority would receive payment of an amount equal to the amount of additional monthly rental earlier than it otherwise would have.

In addition to all other revenue to the Port Authority, the importation of raw gypsum will generate at least \$175,000 per year in wharfage revenues based on the minimum tonnage obligation of 250,000 tons per year. Vessels will discharge at Berth 9 on a preferential basis. Total revenue from the project after rental becomes payable for the first year is estimated at \$2.4 million.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into a lease agreement with Atlantic Gypsum Co., Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into a lease agreement with Atlantic Gypsum Co., Inc. providing for the letting of Buildings 265 and 267 and approximately 4.36 acres of related open area at Port Newark for the operation of a gypsum importing and processing facility for a term expiring on the day preceding the 25th anniversary of the day payment of rental for the premises commences, and further providing for the Port Authority to pay the tenant, as part of this arrangement, a sum not to exceed \$9.5 million towards the cost of construction of a high speed bulk cargo discharge/storage/distribution system and a structure connecting Buildings 265 and 267; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 10/10/85)

Elizabeth-Port Authority Marine Terminal - Lease with East Coast Warehouse and Distribution Corp. and Safeway Trucking Corp.

It was reported that East Coast Warehouse and Distribution Corp., the largest public warehousemen at the Port Newark/Elizabeth-Port Authority Marine Terminal, leases 690,000 square feet of distribution space as a co-tenant with its trucking subsidiary, Safeway Trucking Corp. The current leasehold includes 312,000 square feet of distribution space and approximately 12,200 square feet of garage space located within an area which might be required for terminal expansion in the implementation of the Port Plan. The lease for this space expires May 31, 2000, with no Port Authority termination rights.

Under the proposed arrangement, East Coast would surrender the buildings and open area in the Port Plan site and construct a 350,000 square foot warehouse on a 12.4-acre site in Elizabeth and pave a 2.92-acre area. The Port Authority would then have the surrendered building space and open area available for lease to other tenants at higher current market rates. The buildings would continue to be leased under short-term agreements until the site is required for the Port Plan. In consideration of the surrender, East Coast would receive an annual rent credit of \$250,000 from the commencement date of the lease for the new building through May 31, 2000.

The Port Authority will pay to East Coast up to \$10.5 million for construction of the new warehouse and the paving of open areas. The lease rent will commence on completion of construction as determined by the Executive Director. This is estimated to be December 1, 1986. East Coast and Safeway will pay rent as follows:

1. for the 12.4-acre site, \$378,000 per year with escalation every three years based on 50% of the percentage increase in the Consumer Price Index since the commencement of the lease with a minimum of 3% per year compounded annually; in the 22nd year, the annual rent will increase to \$1,350,000 with escalation every three years thereafter based on 50% of the percentage increase in the Consumer Price Index since the end of the 21st year with a minimum of 3% per year compounded annually;
2. for the separate parcel of 2.92 acres, \$12,716 per year to May 31, 2000; effective June 1, 2000, annual rent will increase to \$62,310 with escalation every three years thereafter based on 50% of the percentage increase in the Consumer Price Index with a minimum of 3% per year compounded annually;
3. additional rental for 20 years equal to \$0.009078 per month for each dollar paid by the Port Authority to the tenants for construction and related work; and
4. on the rent commencement date, a single payment of further additional rent computed by applying to each payment by the Port Authority to the tenants for construction and related work the daily rate of .000250 from the day the payment was made to the day before the rent commencement date.

To permit an orderly transition for East Coast to the new buildings, the tenant will be permitted up to six months' use of the surrendered buildings without rent.

(Board - 10/10/85)

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease with East Coast Warehouse and Distribution Corp. and Safeway Trucking Corp. of premises at the Elizabeth-Port Authority Marine Terminal and an agreement of surrender of a lease now in effect with East Coast Warehouse and Distribution Corp. and Safeway Trucking Corp., the lease and agreement of surrender to be in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a 40-year lease with East Coast Warehouse and Distribution Corp. and Safeway Trucking Corp. letting to them a 12.4-acre area at the Elizabeth-Port Authority Marine Terminal upon which the tenants will construct a 350,000 square foot cargo distribution building and also the letting of a separate unpaved parcel of approximately 2.92 acres, the rental to commence on completion by the tenants of the construction and related work, on or about December 1, 1986, and the lease to provide for payment by the Port Authority to the tenant of up to \$10.5 million for the construction of the new building and associated paving; the said lease to be in accordance with the foregoing and the form of the lease to be subject to the approval of General Counsel or his designated representative; and it is further

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement amending a lease now in effect with East Coast Warehouse and Distribution Corp. and Safeway Trucking Corp. to provide for surrender of 312,000 square feet of distribution building space, garages and open area; the agreement of surrender to be in accordance with the foregoing and the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/10/85)

Port Authority Annual Diesel and Fuel Oil Requirements - All Facilities - 1985-1986

It was reported that the Port Authority's diesel and fuel oil requirements for the 1985-1986 heating season is estimated to be approximately 2,750,000 gallons. This estimate represents an increase of approximately 3.3% over the requirements during the 1984-1985 heating season.

To preserve minority participation in supplying fuel oil, the Executive Director authorized solicitation from 35 minority suppliers for approximately 14% of the estimated annual requirements. Bids for the balance of the requirements were publicly advertised on July 22, 1985 and solicited from 130 prospective suppliers.

Bids were received for the minority and publicly advertised purchases on September 4, 1985, on a price per gallon basis subject to escalation based on changes to the posted "New York Tank Car Consumer" price as published daily in the Journal of Commerce. Six bids were received for the minority portion of the fuel oil requirements and 22 bids were submitted for the publicly advertised portion of the fuel oil requirements contract. Two proposals on the minority procurement and one proposal on the publicly advertised portion were received, which were deemed non-responsive. Awards are recommended to the following low, responsive, qualified minority bidders for the minority portion of the requirements, and the following low, responsive, qualified bidders for the publicly advertised portion of the requirements, for each type of fuel at each location based on estimated requirements at each facility.

1. LaForgia Fuel Oil Company, Brooklyn, New York, for No. 4 fuel oil at the Passenger Ship Terminal and Kennedy International Airport and No. 6 fuel oil at Kennedy International Airport in the total estimated amount of \$774,368.
2. Bayside Fuel Oil Corporation, Brooklyn, New York, for No. 2 diesel fuel at the Goethals Bridge, LaGuardia Airport, Passenger Ship Terminal, The World Trade Center and the Bayonne Bridge and No. 2 fuel oil at Kennedy International and LaGuardia Airports in the total estimated amount of \$482,775.
3. Lincoln Fuel Company, Inc., Middlesex, New Jersey, for No. 2 diesel fuel at the Holland and Lincoln Tunnels and Newark Seaport and No. 2 fuel oil at the Lincoln Tunnel and Newark International Airport in the total estimated amount of \$326,453.
4. Las Energy Corporation, Freeport, New York, a minority supplier, for No. 2 diesel fuel at Kennedy and Newark International Airports and George Washington Bridge and No. 2 fuel oil at the Brooklyn Marine Terminal, Holland and Lincoln Tunnels and Newark International Airport in the total estimated amount of \$291,109.
5. Vanguard Oil Corporation, Brooklyn, New York, a minority supplier, for No. 2 diesel fuel at the Port Authority Bus Terminal, the Outerbridge Crossing and Brooklyn Marine Terminal in the total estimated amount of \$4,385.

(Board - 10/10/85)

6. The Belcher Company of New York, Maspeth, New York, for No. 2 fuel oil at the Outerbridge Crossing and No. 6 fuel oil at Yonkers Industrial Park in the total estimated amount of \$84,634.

TOTAL ESTIMATED AMOUNT FOR ALL REQUIREMENTS – \$1,963,704

STAFF ESTIMATE FOR ALL REQUIREMENTS – \$2,211,000

The term of the contracts is for one year, November 1, 1985 through October 31, 1986, with the Port Authority having options to extend for an additional one-year period.

It was therefore recommended that the Board authorize the Executive Director to:

1. award the annual requirements contracts for diesel and fuel oil for the 1985-1986 season, on a unit price basis, to the low bidders, LaForgia Fuel Oil, Bayside Fuel Oil Corporation, Las Energy Corporation, Vanguard Oil and Service Company, Inc., Lincoln Fuel Company, Inc. and The Belcher Company of New York, Inc.; and
2. exercise options to extend these contracts for an additional one-year period under the same terms and conditions.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to: (1) award the annual requirements contracts for diesel and fuel oil for the 1985-1986 season, on a unit price basis, to the low bidders, LaForgia Fuel Oil, Bayside Fuel Oil Corporation, Las Energy Corporation, Vanguard Oil and Service Company, Inc., Lincoln Fuel Company, Inc., and The Belcher Company of New York, Inc. and (2) exercise options to extend these contracts for an additional one-year period under the same terms and conditions.

(Board - 10/10/85)

Port Authority Industrial Park at Elizabeth - Lease Agreement with Radiation Technology, Inc.

It was reported that the Board, at its meeting on March 12, 1981, among other things, authorized an industrial development project in Elizabeth, New Jersey, of an approximate 125-acre site located at the southern end of the Port Newark/Elizabeth facility, involving an estimated financial participation by the Port Authority of \$16.8 million, including payments to contractors, an allowance for extra work, any acquisition and related costs, and engineering, administrative and financing expenses. Subsequently, on November 18, 1981, the Port Authority and the City of Elizabeth executed an agreement setting forth the arrangements to develop the industrial park site.

At its meeting on June 14, 1984, the Board certified the Elizabeth Industrial Park as an additional facility of the Port Authority and approved the award of contracts for paving and utility construction and the installation of systems for the mitigation of the PCB contamination at the facility. All of the authorized contract work has been undertaken.

Staff has completed negotiations with Radiation Technology Inc. (RTI), a New York corporation with corporate headquarters in Rockaway, New Jersey, and additional facilities in Arkansas and North Carolina. RTI provides totally integrated service irradiation processing ranging from research and development to production contract sterilization. Service irradiation is a process which involves the controlled emission of gamma rays from Cobalt-60 to reduce the bacterial contamination and/or improve the physical properties of products such as chemicals, food, textiles and medical instruments. Cobalt-60 is the radioactive material most commonly used for the commercial processing of medical products and foodstuffs.

Gamma radiation from Cobalt-60 shares many similarities with x-rays, but is of average shorter wavelength. Like x-rays, gamma radiation is used for certain types of medical treatment, including treatment of some cancer and has also proven useful for a variety of industrial applications. It is expected that this project at Elizabeth will generate 35 jobs within two years and will become their corporate headquarters.

The lease agreement with RTI provides that:

1. The Port Authority lease to RTI approximately 3.68 acres in the southeast quadrant of the Port Authority Industrial Park at Elizabeth for the purpose of service irradiation of goods for an initial term of approximately 21 years and three months with RTI to have the right to extend the lease for an additional term of 20 years.

2. Fifteen months after the site availability date, (or such earlier date as the lessee commences service irradiation operations in the premises) and for the next five years, RTI will pay an annual basic rental of \$64,501 which annual basic rental will increase to \$134,501 for the balance of the initial lease term. The commencement of payment of rental may be postponed if the Port Authority fails to review the lessee's construction plans within specified periods set forth in the lease.

(Board - 10/10/85)

3. RTI will be obligated to construct a building of approximately 40,000 square feet within fifteen months from the site availability date. The Port Authority will invest up to \$3.5 million for the design, construction and equipping of said building. Fifteen months from the site availability date, RTI will pay an annual building rental equal to the product of the amount paid by the Port Authority to the lessee plus interest amounts accruing during construction multiplied by the following factors:

Year 1	.080000
Year 2	.090000
Year 3	.100000
Year 4	.114286
Year 5	.130000
Years 6 - 20	.152857

4. RTI may elect to buy the land and improvements by making a single payment in year 12 from the basic rental start date in the amount of \$6,130,000 or in year 16 from the basic rental start date for \$6 million.

5. RTI will also pay a percentage rental in any year that its gross sales for contract irradiation at the Elizabeth facility exceed \$4 million.

The percentage rental will equal 1% of the first \$5 million of gross sales.

On gross sales in excess of \$5 million and less than \$7 million the percentage rental will be 1¾%.

On gross sales in excess of \$7 million the percentage rental will be 2%.

The percentage rental payment will not exceed \$125,000 annually during the first ten years of operations and \$250,000 annually during the balance of the initial lease term.

6. RTI will pay an operating expense rental based on its pro-rata share of the common operating and maintenance expenses of the park.

7. At the end of the initial lease term, RTI will have an option to extend the lease for an additional 20-year term. The renewal rental amount for the first three years of the renewal period will equal 114% of the annual basic rental in effect in the last year of the initial term plus 114% of the annual building rental in effect in the last year of the initial term. Each rental will increase 10% in the 4th, 7th, 10th, 13th, 16th and 19th year of the renewal period. The percentage rent payment will continue and the maximum annual percentage rental payment will not exceed \$375,000 during the first ten years of the renewal period and \$500,000 annually thereafter. The Operating Expense Rental will continue as during the initial term.

8. In addition to the initial building of 40,000 square feet, RTI will also be required to construct a 26,000 square foot addition to their basic building 42 months from the date the site is made available, at least 13,000 square feet of that addition must be completed within 30 months of site availability.

9. RTI will be responsible for managing, operating and maintaining the premises and making all repairs, structural and non-structural, as required during the term of lease.

(Board - 10/10/85)

10. During construction RTI will make every good faith effort to meet the Port Authority's Minority Business Enterprise (MBE) participation requirement of 20% and its Women Business Enterprise (WBE) requirement of 5%.

11. The Port Authority will indemnify RTI for any riparian rights claims that the State of New Jersey may make to the premises.

12. A security deposit is required.

The Port Authority's recovery on the investment is financially self-sustaining.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority to enter into a lease agreement with Radiation Technology, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with Radiation Technology, Inc. (RTI) to cover the letting of approximately 3.68 acres of land for an initial term of approximately 21 years and three months with an option to extend for an additional 20-year term, for the construction of a building of approximately 66,000 square feet for its service irradiation operations at the Port Authority Industrial Park at Elizabeth; provide for investment by the Port Authority of up to \$3.5 million for the design, construction and equipping of an industrial building of approximately 40,000 square feet (to which RTI, at their own expense, will add another 26,000 square feet) and adjacent parking and truck dock areas and other site improvements for a period of 20 years; and provide for a purchase of the land and improvements by RTI on the basis of a single payment of \$6,130,000 in year 12 from the basic rental start date or \$6 million in year 16 from the basic rental start date; and it is further

RESOLVED, that the form of lease be subject to the approval of General Counsel or his designated representative.

(Board - 10/10/85)

Freight Services Improvement Conference - Continuation of Port Authority Participation -
Agreement with States of New York and New Jersey

It was reported that the Board, at its meeting on March 12, 1981, authorized the Executive Director to enter into the initial agreement with New York and New Jersey for the Port Authority to participate in the Freight Services Improvement Conference (FSIC) and to provide funding for the Port Authority's share of the joint effort. The Board, at its meeting on October 13, 1983, authorized the Executive Director to extend the Port Authority's participation in the FSIC through June 30, 1984, and the Board authorized a further extension of such participation, through June 30, 1985, at its meeting on November 8, 1984.

Establishment of the FSIC was a direct result of recognition of the two states and the Port Authority that the bi-state region's important freight transportation industry had not previously received sufficient public attention or financial support. The FSIC was created as a public/private mechanism to identify problems in the area's major freight modes - truck, rail, air and marine - and to actively develop and organize support for improvements. The FSIC is jointly funded and staffed by its three sponsoring participants and guided by an advisory board composed of prominent individuals drawn primarily from the private freight sector. Overall direction is provided by a steering committee comprised of the Commissioner of Transportation from each of the two states and the Executive Director of the Port Authority.

Since its inception, the Freight Services Improvement Conference has developed into an effective liaison through which private-sector freight carriers and shippers have been brought together with public-sector transportation agencies to address critical freight issues facing the region. The FSIC has developed the Bi-State Harbor Carriers Conference, an organization of motor carriers serving the Port District. The Conference has convinced several terminal operators to improve gate operations which has already resulted in significant time savings for truckers. For the first time, truckers, terminal operators, steamship lines and government are sitting down to solve cooperatively a full range of mutual problems, including truck safety.

The FSIC has compiled information on and clarified the complex taxes levied on motor carriers in New York and New Jersey, helping state tax administrators and motor carriers for the first time to understand each other's concerns. The FSIC was invited to serve as an active participant in a New York State Industry/Government task force on truck taxes. This task force has already succeeded in eliminating a requirement to place tax stickers on all trailers and will be developing a comprehensive truck tax improvement bill for legislative action.

Anticipating the impacts of proposed changes in truck size and weight regulations, the FSIC quickly assembled detailed information and advised the two states and the Port Authority as they grappled with the tough questions resulting from these Federally mandated changes. The FSIC then brought government and industry together to set regulations which reflected safety and economic concerns. Air cargo operations are heavily dependent on these longer, wider trucks; the FSIC is assisting the Port Authority in its efforts to persuade New York City to permit access for these trucks to Kennedy International Airport.

As a result of an FSIC survey of regional truck operating problems, the two states have placed new emphasis on freight movement in their capital and operating decisions. For example, the New Jersey Department of Transportation contracted with the FSIC to identify the key freight routes which will then receive priority in allocating construction funds.

(Board - 10/10/85)

Under the terms of the proposed agreement, and as provided for in each of the previous Board authorizations, the Port Authority would contribute three full-time staff members to the FSIC and provide office space and other administrative support items. Financial support for the FSIC for the period ending June 30, 1986 will be approximately matched by the contributions of the States of New York and New Jersey. The \$150,000 for the Trans-Brooklyn Freight Movement Study was authorized by the Board at its meeting October 11, 1984.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the States of New York and New Jersey or their designees, under which the Port Authority will continue its participation in the Freight Services Improvement Conference (FSIC), a public/private sector research, planning and advocacy organization for improved freight systems in the New York/New Jersey region, for the period July 1, 1985 to June 30, 1986, at a total estimated cost of \$432,000, which includes \$150,000 previously authorized by the Board for the Trans-Brooklyn Freight Movement Study.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the States of New York and New Jersey or their designees, under which the Port Authority will continue its participation in the Freight Services Improvement Conference (FSIC), a public/private sector research, planning and advocacy organization for improved freight systems in the New York/New Jersey region, for the period July 1, 1985 to June 30, 1986, at a total estimated cost of \$432,000, which includes \$150,000 previously authorized by the Board for the Trans-Brooklyn Freight Movement Study.

(Board - 10/10/85)

Newark International Airport - Allied Aviation Service Company of New Jersey, Inc. - Extension of Contract AN-652 - Operation and Maintenance of the Aviation Fuel System

It was reported to the Board that the Newark International Airport Fuel Storage and Distribution System ("System") consists of fuel storage tanks, with a capacity of approximately ten million gallons, connected to an underground pipeline distribution network which delivers aviation fuel to underground hydrant valves on the terminal building apron areas where mobile fuel hydrant carts transfer the fuel from the network into aircraft. Aviation fuel is delivered by truck to those aircraft operating from the north side of the airport and to those commuter aircraft which cannot be fueled by hydrant cart. The Master Airline Leases at Newark International Airport provide for the Port Authority to operate and maintain the System directly or through the services of an independent contractor selected by the Port Authority either through negotiation or by bid procedure. Prior to the commencement of the operation of the System, the present contractor, Allied Aviation Service Company of New Jersey, Inc., ("Allied") was selected by competitive bid and a three-year contract was authorized for award by the Board at its April 12, 1973 meeting. The Board, at its meetings on June 10, 1976, July 12, 1979 and August 12, 1982, extended the contract for additional three-year periods to April 30, 1979, April 30, 1982 and April 30, 1985, respectively. The Board, at its meeting on April 11, 1985, authorized a six-month interim extension of the contract to October 31, 1985 pending completion of negotiations for an additional three-year period. The contract is supported by a guarantee by Allied Maintenance Corporation, the parent company of Allied Aviation Service Company of New Jersey, Inc. The extension agreement will provide for the continuation of the guarantee.

The Master Airline Leases provide that if the Port Authority and a majority of the Lessee Airlines are satisfied with the existing contractor's performance, the Port Authority shall proceed to negotiate with the same contractor for a three-year extension of the contract with the same procedure to be followed for each succeeding renewal. The Lessee Airlines have requested that the Port Authority continue Allied's service as operator. Pursuant to the Lessee Airlines request for a more active role in the extension process, procedures were developed whereby the Lessee Airlines were permitted to participate in the Port Authority's review of Allied's projected costs and the airlines retained the services of the same fuel consultant they retained at Kennedy International Airport to assist them in their review. Consequently, the Lessee Airlines are fully aware of and concur in the details of the proposed extension.

The prior three-year extension of Allied's contract resulted in payments of approximately \$25.1 million including additional payments authorized by the Board, at its meeting on May 10, 1984. It is expected that payments to Allied under the current proposed three-year extension will be approximately \$43.7 million. The estimated increase of approximately \$18.6 million stems from an anticipated 81% increase in fueling volumes and increases in costs for labor, materials and supplies. The current extension will continue the interest factors recognized as part of Allied's costs as was contained in the prior extension.

(Board - 10/10/85)

Allied has furnished the Port Authority with a projection of specified costs for each of the three years of the proposed extension commencing May 1, 1985. Allied will submit monthly statements comparing actual costs to projected costs. A copy of the monthly statement will be sent to the Lessee Airlines for their review and comment. Under the proposed extension, Allied would be paid monthly its projected costs which payment will be adjusted the following month based on Allied's actual costs incurred in operating and maintaining the System. Allied's management fee for each contract year would be 4.35% of the total projected costs as agreed to by the Port Authority. In addition, the total projected costs for the second year of the extension shall be subject to review and adjustment prior to the end of the first year and the total projected costs for the third year of the extension shall be subject to review and adjustment prior to the end of the second year. Allied's management fee for the second and third year of the extension would be 4.35% of the adjusted projected costs for the respective year. The Lessee Airlines will be permitted to participate in the review of the projected costs for the second and third years of the extension.

Of the estimated \$43.7 million payable for the three-year extension, it is expected that approximately \$41.6 million would be costs and management fee for the operation and maintenance of the System, including amounts to be agreed to by the Port Authority for payments to consultants retained by the airlines such as the fuel consultant and legal fees; approximately \$615,000 represents amortization of Allied's maintenance garage and applicable interest and approximately \$1.5 million is for other specified services and materials including refurbishment of system pumps and replacement of tank valves and rental of refuelers from Allied to be paid for separately to Allied. In the event of the termination of the contract, including its expiration after the proposed three-year extension, the Port Authority is obligated to reimburse Allied for the remaining unamortized cost of the maintenance garage, the total of which unamortized amount is approximately \$1.8 million as of April 30, 1985.

Under the Master Airline Leases at Newark International Airport, the amounts payable by the Port Authority to the operator of the System plus the amortization of the Port Authority's investment in the System are payable by the airlines. After each contract year the Port Authority will audit Allied's actual costs of the types specified in its projections for the preceding contract year. In the event that Allied's audited actual costs of the types specified in its projections for any contract year are less than its reported costs for said year, the amount of the difference would be returned to the Port Authority, if the audited costs are higher the Port Authority will pay Allied the unpaid amount. Any reduction in the Port Authority's costs of the operator's service, based on audited costs would, of course, reduce the amount payable by the airlines to the Port Authority.

Pursuant to the resolution of the Board, adopted at its meeting on November 8, 1984, the contract as extended will also contain provisions covering Affirmative Action/Equal Employment Opportunity and the use of Minority Business Enterprises and Women Owned Business Enterprises.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement for a three-year extension commencing May 1, 1985 of the contract with Allied Aviation Service Company of New Jersey, Inc. for the operation and maintenance of the Aviation Fuel System at Newark International Airport, all in accordance with the foregoing.

(Board - 10/10/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an agreement extending and making other appropriate changes to Contract AN-652, in accordance with the provisions outlined above, for a three-year period, effective May 1, 1985 and ending April 30, 1988, covering the operation and maintenance of the Aviation Fuel System at Newark International Airport, with Allied Aviation Service Company of New Jersey, Inc.; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/10/85)

The World Trade Center - Contract WTC-312 - Trash Haulage - Award

It was reported that Contract WTC-312 requires the contractor to remove from The World Trade Center all trash, garbage, debris and other waste materials (wet or dry) placed by others in containers provided by the contractor. The proposed contract is for a three-year period commencing December 1, 1985, with options for the Port Authority to renew for two additional one-year periods, and is subject to termination by the Port Authority without cause upon 60 days notice. The compensation due the contractor under the contract is subject to annual adjustment based upon any cost increase or decrease directly related to the costs of labor or materials for the performance of the contract which is of general application to the commercial waste removal industry in the New York-New Jersey metropolitan area. The price adjustment is established as of each anniversary of the commencement date and is firm for the ensuing year. The price adjustments are computed based on the difference between the estimated cost for labor and materials for the ensuing year, and the contractor's actual costs for labor and materials during the previous year. The Port Authority Audit Department will verify the actual costs and review the estimated costs for reasonableness.

The existing contract for trash haulage, Contract WTC-199.61, will expire on November 30, 1985. Proposals on Contract WTC-312, Trash Haulage, The World Trade Center, are scheduled to be received on or about October 18, 1985.

In order to provide continuity of service, staff recommends that the Board authorize the Executive Director to award Contract WTC-312 to the contractor submitting the lowest proposal, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable and to order extra work up to an amount of 5% of the proposal accepted, or to reject all proposals.

It was therefore recommended that the Board authorize the Executive Director to award Contract WTC-312, Trash Haulage, The World Trade Center, to the contractor submitting the lowest proposal, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable and to order extra work up to an amount of 5% of the proposal accepted, or to reject all proposals.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-312, Trash Haulage, The World Trade Center, to the contractor submitting the lowest proposal, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable and to order extra work up to an amount of 5% of the proposal accepted, or to reject all proposals.

(Board - 10/10/85)

Port Newark - Lease with Norse Terminal Corp. - Amendment

It was reported that effective April 1, 1982, the Port Department entered into a one-year lease with Norse Terminal Corp. and co-lessee, Norse Energy Corp., for two acres of open area at a rental rate of \$.40 per square foot. In addition to basic land rental, the lease made provision for an additional guaranteed minimum rental of \$96,000 to be credited against wharfage charges incurred, the guaranteed rental representing wharfage on a projected movement of approximately 150,000 tons of export coal at a wharfage rate of \$.65 per ton.

After the first year, although the additional rental of \$96,000 had already been paid, only 64,030 tons had been shipped. The receiver of the remaining amount of guaranteed coal, the Korean Government, required Norse's customer, Samsung Trading Co., to defer deliveries beyond the first year. As a result, Norse was experiencing financial hardship in that it had to continue storing a significant amount of coal at the leasehold and was unable to deliver the coal to the Korean consignee. In addition, the Port Authority was being exposed to a possible abandonment of the coal on Port Authority property.

Consequently, an arrangement was agreed to between the Port Authority and Norse to extend the lease term for a further eighteen-month period with an increased total wharfage guarantee of 250,000 tons over the entire term of the lease, as extended, with provision that the portion of the additional rental paid during the first year which was not creditable against wharfage charges in that period would be credited against wharfage charges incurred during the extended period of the letting. This was reflected in an extension agreement prepared for execution by the parties. However, because one of the co-lessees had withdrawn from the operation, the extension agreement could not be fully executed and in place thereof, a new lease was drawn and signed by the parties. In view of the fact that the tenant over the full period of the lease, as extended, has incurred and paid wharfage on 340,000 tons of cargo which is well in excess of the guarantee provided for in the agreement for extension of the arrangement, it would be inequitable to deny the tenant the credit which was inadvertently not reflected in the lease document and not discovered by either party.

It was therefore recommended that the Board ratify the arrangement in connection with the lease with Norse Terminal Corp. at Port Newark as described above and in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the arrangement made in connection with the lease with Norse Terminal Corp. to extend the application of a wharfage credit in the amount of \$54,380 from the first year of operation under the lease to operations occurring in a later period be and it is hereby ratified.

(Board - 10/10/85)

Port Authority Use of Discounted Long Distance Telephone Services at The World Trade Center

It was reported that presently, the Port Authority's long distance telephone services at The World Trade Center are supplied by TDX Systems, Inc., MCI Communications Corporation and AT&T Communications. The Port Authority's computerized least cost routing system at The World Trade Center provides for primary and alternate routing of long distance telephone calls to each of these carriers and/or resellers based on the destination of the call and the selection criteria programmed into the system.

In the Fall of 1984, as part of the Port Authority's on-going effort to reduce telephone costs, the Management Information Services Department reviewed a number of common carriers and resellers to determine the relative economics of their discounted long distance telephone services. Based on this review, the Management Information Services Department engaged TDX to provide long distance service. This agreement with TDX Systems, Inc. was authorized by the Executive Director at a cost not to exceed \$200,000. These funds have been expended because of increases in the Port Authority's use of long distance service.

Savings from using the services of TDX over those offered by AT&T have exceeded \$64,000 on billings from January 1985 through August 1985. In addition, due to terms of The World Trade Center tenant lease with TDX, the Port Authority's World Trade Department has received approximately \$23,500 in additional lease revenue as a result of the Port Authority's use of TDX services. At this time, it is planned to continue to utilize TDX for long distance services. A recent review of a number of common carriers and resellers determined that TDX still provides the most cost effective long distance service to meet Port Authority current needs.

The requested authorization of up to \$900,000 should be sufficient to provide long distance telephone services from TDX or another appropriate vendor for up to eighteen months. During this period, the Management Information Services Department will develop in conjunction with the General Services Department a formal procedure to periodically review the current rates and quality of service of available vendors. Based on the results of these periodic reviews, the Port Authority will engage the vendor then providing the most cost effective, high quality service. Other factors that will be considered in vendor selection will be installation costs for new service, installation lead times, quality of service during the change to any new vendor, and the potential effects on World Trade Department revenue.

This authorization for long distance telephone service, along with periodic reviews of available rates, will allow the Port Authority to take full advantage of the fluctuating long distance market place while insuring continued, high quality long distance telephone service.

It was therefore recommended that the Board authorize the Committee on Operations to authorize the Executive Director to enter into agreements to provide for long distance telephone services at the Port Authority's World Trade Center offices for a period of approximately eighteen months at an expenditure not to exceed \$900,000.

(Board - 10/10/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Committee on Operations is hereby authorized to authorize the Executive Director to enter into agreements to provide for long distance telephone services at the Port Authority's World Trade Center offices for a period of approximately eighteen months at an expenditure not to exceed \$900,000; the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

(Board - 11/14/85)

Memorial to Honorable David Van Alstyne, Jr.

The Chairman addressed the Board upon the death of the Honorable David Van Alstyne, Jr. The following Minute was unanimously adopted by a rising vote:

The Commissioners of The Port Authority of New York and New Jersey note with deep sorrow the death of former Commissioner David Van Alstyne, Jr. on Thursday, October 10, 1985.

David Van Alstyne, Jr. was appointed Commissioner of the Port Authority by Governor Alfred E. Driscoll on June 25, 1953 to fill the unexpired term of Commissioner John Borg. He served as a member of the Board until July 1, 1955. During this period, he served as a member of the Committee on Finance and of the Committee on Port Planning.

Commissioner Van Alstyne's public service included ten years as State Senator from Bergen County from 1943 to 1953. He was elected Senate Majority Leader in 1948 and President of the Senate in 1949. Commissioner Van Alstyne was particularly proud of his work as Chairman of the Commission on the Executive during the New Jersey Constitutional Convention which drafted a new State Constitution in the late 1940's. He was also a former Chairman of the New Jersey Regional Planning Association.

Commissioner Van Alstyne founded his own investment concern, Van Alstyne, Noel & Company in 1932; in addition, he served on the Boards of many other companies.

Commissioner Van Alstyne brought to the proceedings of the Committees on Finance and Port Planning and the Board itself the benefit of his experience in finance and business. He gave freely of the broad and diverse talents which made him a successful financier, industrialist, public servant and citizen.

The Commissioners of the Port Authority, now, therefore, in expressing both personal and official regret upon the death of a dedicated and distinguished public servant, direct that this tribute shall be spread in full upon the proceedings of the Board, and that a copy shall be suitably engrossed and sent to the family of former Commissioner David Van Alstyne, Jr.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of October 10, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on November 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on November 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted reports, for information, of action taken at its Special meeting on October 30, 1985 and at its meeting on November 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on November 14, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 11/14/85)

Essex County Resource Recovery Facility - Amendment of Certification

It was reported that the Board, at its meeting on October 13, 1981, directed the Executive Director to undertake all necessary planning for a resource recovery plant in Essex County, New Jersey; at its meeting on November 10, 1983, subject to the appropriate authorizations and amendments to the Industrial Development Master Plan setting forth potential industrial development sites and subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds, authorized a project for the development of a resource recovery plant located in the Blanchard Street area of the City of Newark, County of Essex; at its meeting on March 8, 1984, amended the Master Plan in connection with the Essex County Resource Recovery Facility (the Facility); and at its meeting on January 12, 1984, authorized the Executive Director to enter into an agreement concerning certain developmental design work in connection with the planning of the Facility at a cost to the Port Authority of approximately \$1.8 million. At its meeting on April 11, 1985, the Board was advised that the developmental design work pursuant to such authorization had been completed.

Further, at its meeting on April 11, 1985, the Board authorized, subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds, the increase of the total costs of or related to the Facility from \$260 million to approximately \$343 million with an increase in the Port Authority's expenditures or moneys provided for financing provided in connection therewith from \$165 million to an amount not to exceed \$236 million, including approximately \$23 million in connection with certain contingencies for up to one year of construction delays; additionally, the Executive Director was authorized to provide an amount presently estimated at \$61 million in 1985 dollars for capital costs resulting from the occurrence of unforeseen or other similar circumstances, which amount will be determined and adjusted based on a service fee increase limitation of up to \$7.50 per ton, at January 1, 1983, as adjusted for escalation until used, of acceptable solid waste, computed on the basis of 680,000 tons per year, to be paid by the Port Authority as a component of the service fee to American REF-FUEL Company of Essex County (REF-FUEL) for solid waste disposal services with a correspondingly increased tipping fee to be paid by the County of Essex (the County) to the Port Authority. The Executive Director was further authorized to enter into agreements necessary to effectuate the Facility, including agreements with the City of Newark, the County, REF-FUEL, an escrow agent, and others as appropriate including those agreements necessary to effectuate the purchase of the site. The major provisions of these agreements to be entered into and the relationship of the various parties to such agreements are described in the Minutes of the April 11, 1985 meeting of the Board, entitled "Industrial Development Program - Essex County Resource Recovery Facility - Authority to Enter into Agreements and Acquire Site", at pages 161 et. seq.

At its meeting on May 9, 1985, the Board certified that, in the opinion of the Port Authority in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility, subject to the issuance of all necessary permits, execution of the agreements authorized by the Board, at its meeting on April 11, 1985, in connection with the Facility and appropriate approvals or certifications in connection with the receipt of the proceeds of a \$15 million interest free loan originally from the Natural Resources Bond Act of 1980, received from the State of New Jersey, the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be finally determined, received from the Hackensack Meadowlands Development Commission (both pursuant to an amended consent judgment between the County, the Hackensack Meadowlands

(Board - 11/14/85)

Development Commission (the Commission) and the New Jersey Department of Environmental Protection) and either (a) provision of the equivalent of a \$25 million grant received from the State of New Jersey or any of its agencies for the Facility or (b) certification by the Committee on Finance that the \$25 million has become available from other sources allocated to the State of New Jersey, the issuance of such Consolidated Bonds or Consolidated Notes will not, during the period 1985 through 2020 and 1985 through 1995, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds. In addition, the Board authorized the Committee on Finance to reaffirm said certification on behalf of the Port Authority at such time, on or before November 30, 1985, as such Consolidated Bonds or Consolidated Notes are issued, provided that all necessary permits have been issued, the above-mentioned agreements have been executed and the above-mentioned approvals or certifications have been received or made and, provided further, that there is no substantial adverse change in the economic basis for said certification.

Staff does not presently expect that negotiations between the Commission and the County regarding provision by the Commission of the equivalent of interest on \$15 million of tax-exempt debt (assumed to be approximately \$4.5 million during the three year construction period and thereafter, during the next seventeen years, an amount in each year approximately equivalent to the interest on the unamortized principal of such tax-exempt debt amortized in seventeen equal annual installments, with interest calculated on the basis of outstanding principal) will lead to the provision of these funds by the Commission. The Hackensack Meadowlands Development Commission has submitted a petition to the New Jersey Board of Public Utilities (BPU) for an increase in the Meadowlands landfill tipping fees to fund the provision of the equivalent of interest on \$15 million of tax-exempt debt. The BPU rate increase process is underway and a final determination is not expected until the Spring of 1986. Therefore, it is recommended that the Board's certification and the Committee's reaffirmation thereof be amended to provide that said certification and said reaffirmation not be subject to provision of these funds by the Commission. In the event that the Commission does not provide such funds, the County will be contractually required to provide the funds either directly or through an acceptable alternate source.

In addition, at this time it is uncertain whether the central ditch on the Facility site (which must be filled for Facility construction) is a water of the United States over which the United States Department of the Army, Corps of Engineers (the Corps) has jurisdiction and if so, what type of permitting process must be undertaken. These matters, which raise complex considerations, are under review at the headquarters and local District level of the Corps. Staff does not expect these matters to be resolved prior to November 30, 1985, at which time the Board's authorization to the Committee on Finance with respect to reaffirmation of the Board's above-described certification would expire. Furthermore, although staff has made substantial progress in the negotiation of the agreements necessary to effectuate the Facility, it is not expected that the execution of these agreements and the necessary reviews and approvals will take place prior to November 30, 1985. Therefore, it is recommended that the Board's certification be amended to provide that the November 30, 1985 date be eliminated in order to allow additional time to obtain all necessary permits and to allow for execution of the agreements required to effectuate the Facility.

(Board - 11/14/85)

The Acting Chief Financial Officer has reviewed the foregoing recommended amendments to the Board's May 9, 1985 certification and it is his opinion that said amendments would not result in a substantial adverse change in the economic basis for said certification. Further, at the present time, the Acting Chief Financial Officer would not alter his opinion of May 9, 1985.

It was therefore recommended that the Board amend its May 9, 1985 certification with respect to the Essex County Resource Recovery Facility (the Facility) to provide that:

1. the Committee on Finance is authorized to rescind the condition to said certification and the reaffirmation thereof by the Committee on Finance with respect to an appropriate approval or certification in connection with the receipt of the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be finally determined, received from the Hackensack Meadowlands Development Commission;

2. the authorization to the Committee on Finance with respect to the reaffirmation of said certification on or before November 30, 1985, be rescinded; and

3. the Committee on Finance be authorized to reaffirm said certification, as amended, at the time of the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility subject to the complete satisfaction of the conditions to said certification, as amended, and, provided that there is no substantial adverse change in the economic basis for said certification.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the resolution of May 9, 1985 (appearing at pages 215 et seq. of the Official Minutes of that date), entitled "Essex County Resource Recovery Facility - Certification" be and it is hereby amended to provide that: (1) the Committee on Finance is authorized to rescind the condition to said certification and the reaffirmation thereof by the Committee on Finance with respect to an appropriate approval or certification in connection with the receipt of the equivalent of interest on \$15 million of tax-exempt debt, at an interest rate to be finally determined, received from the Hackensack Meadowlands Development Commission; (2) the authorization to the Committee on Finance with respect to the reaffirmation of said certification on or before November 30, 1985, be and it is hereby rescinded; and (3) the Committee on Finance be and it is hereby authorized to reaffirm said certification, as amended, at the time of the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Essex County Resource Recovery Facility subject to the complete satisfaction of the conditions to said certification, as amended, and provided that there is no substantial adverse change in the economic basis for said certification.

(Board - 11/14/85)

Restructure of Port Authority and PATH Public Liability and Parasol Insurance Programs

It was reported that the Board, at its meeting on October 13, 1983, authorized the purchase of \$200 million excess of a \$2 million self-insured retention of public liability insurance covering all operations of the Port Authority and Port Authority Trans-Hudson Corporation (PATH), effective October 27, 1983, on a per occurrence basis, at a combined total premium of up to \$5.6 million, through Hamond & Regine, Inc. and C.E. Heath & Co., Ltd., as follows:

1. \$30 million excess of a \$2 million self-insured retention for a period of up to five years at a maximum premium of \$5 million payable in annual installments of \$1 million each; with an experience rated annual return premium of up to 76%; and
2. \$170 million excess of \$30 million for a three-year term at a prepaid premium of up to \$600,000.

As part of the policy provisions, underwriters of the \$30 million excess of \$2 million self-insured retention layer could cancel coverage only on a policy anniversary date upon written notice of cancellation given one year in advance of such cancellation. Furthermore, if the underwriters issued a notice of cancellation, the premium would be at 50% of the stated rate.

The Board, at its meeting on June 14, 1984, also authorized the purchase of up to \$300 million per occurrence Liability and Property Damage (Parasol) Insurance effective for a three-year period commencing June 15, 1984 at a three-year prepaid premium of \$1,250,000. Such coverage was provided over the \$200 million per occurrence Public Liability Policy, the \$200 million per occurrence All Risk Property Damage and Loss of Revenue Policy and the \$300 million per occurrence Bridge and Tunnel All Risk Property Damage and Loss of Revenue Insurance Policy. Subsequently, the Board, at its meeting on July 11, 1985, authorized a reduction in coverage in the Parasol Program from \$300 million to \$200 million with no change in premium from that previously authorized by the Board on June 14, 1984. This reduction was a result of the long anticipated tightening of world insurance markets which began in mid-1984, taking the form of severe reinsurance market capacity contraction and higher premium pricing.

In accordance with policy cancellation provisions, numerous participants in the Public Liability Insurance program issued cancellation or non-renewal notices, effective October 27, 1985, for coverages which represent approximately 75% of the \$200 million program. Part of this 75% pertains to a problem previously reported to the Commissioners concerning underwriting and financial difficulties experienced by certain insurers in the \$30 million primary layer, which required replacement of 40% of this layer on a one-year basis at no change in premium. As a result, the favorable cancellation terms described above were restricted to carriers participating in 60% of the \$30 million primary layer. The remaining carriers were planning to cancel before October 27, 1985 (effective October 27, 1986). In order to avoid this cancellation and to reflect current market conditions, the 60% participation was renegotiated to provide coverage through October 27, 1988 at an increase in premium. In exchange, underwriters agreed not to issue cancellation notices in 1985 and also agreed not to issue a notice in 1986 cancelling coverage effective on October 27, 1987 except for circumstances beyond their control. In the event of a 1986 cancellation, the 50% penalty on premium earned would be imposed.

(Board - 11/14/85)

Discussions with our brokers and lead U.S. and London underwriters; a thorough and continuing review of the literature; consultations with our insurance advisors; and comparisons with risk managers of other major public agencies clearly indicate that the tightening of the insurance markets continued to create severe problems for all major insureds. Although staff did not expect such dramatic set-backs in the Port Authority's Public Liability insurance program, large reductions in capacity and coverage and major increases in price were anticipated as previously reported prior to the renegotiation of the placement. These circumstances required a complete restructuring of the program to reflect current market realities.

As a result of staff's negotiation efforts, the Port Authority and PATH Public Liability coverage has been restructured as follows:

A. Airport Operations are covered with a \$400 million per occurrence limit subject to a \$2 million self-insured retention. \$398 million of the \$400 million limit has already been completed and efforts continue to fill the existing \$2 million gap in coverage.

B. PATH operations are covered with a \$125 million per occurrence limit. 60% of the primary \$30 million layer is subject to a \$2 million self-insured retention with the remaining 40% of the primary layer subject to a \$5 million self-insured retention. All but approximately \$15 million of the coverage for PATH operations is presently in place and efforts continue to fill the existing gaps in coverage.

C. All other Port Authority operations are covered to a limit of \$125 million per occurrence, subject to a \$2 million self-insured retention. At the present time over \$98 million of the \$125 million coverage has been secured and efforts to complete the placement are being made.

It is very likely that, despite efforts to complete the entire placement, some gaps in coverage may remain and the Port Authority will co-insure these areas at proportional reductions in premiums (See Exhibit II). In addition to the reduction in the limits of the program most of the coverage written will no longer be in the present Port Authority manuscript policy form, as many of the insurers have dictated the use of their standard coverage form. However, 60% of the \$30 million primary layer will follow the present Port Authority manuscript form. Terms and conditions of coverage are further being limited as a result of new exclusions relating to seepage, pollution and contamination, Workers' Compensation and FELA, asbestos, discrimination and humiliation, ERISA and professional liability.

It is anticipated that the premium for the restructured Public Liability program, when and if the placement of all coverage is 100% complete, will not exceed \$5,630,000 for a one-year period. Despite the substantial increase in premium, decreases in coverage capacity and policy form concessions, the Port Authority fared much better than most other major insureds under the present turbulent conditions in the insurance marketplace.

As previously indicated herein, renegotiations with lead London Underwriters also resulted in the continuation of coverage in the amount of \$18 million of the \$30 million in excess of the \$2 million self-insured retention through October 27, 1988. At a modest increase in premium, this coverage provides assurance from underwriters that they would not cancel in 1986 unless extreme circumstances prevailed. In such event, the imposition of the penalty provision would apply.

(Board - 11/14/85)

Because of the overall lack of liability insurance capacity, it was necessary to utilize all liability insurance coverage in the existing Parasol program in order to complete a major portion of the restructured Public Liability Insurance program. This, in turn, required a restructuring of the Parasol Program which will now cover all Port Authority and PATH liability exposures for \$60 million excess of \$40 million underlying coverage. The Parasol Program will continue to respond in excess of underlying property insurance policies to a limit of \$200 million per occurrence.

The details of the newly restructured Port Authority and PATH Public Liability and Parasol Insurance programs have been reviewed with EBASCO Risk Management Consultants Inc. who view our success as a remarkable accomplishment under such adverse worldwide insurance market conditions.

Recommendation was made that the Board authorize:

1. the purchase of the following insurance coverages for a one-year period, effective October 27, 1985, from various foreign and domestic insurers through the brokers, Hamond & Regine, Inc. and C.E. Heath & Co., Ltd.:

a. Public Liability and Parasol insurance on a per occurrence basis covering the operations of the Port Authority and PATH, as outlined below at a total premium cost not to exceed \$5,630,000 (See Exhibit I):

A. Airports - \$400 million excess of a \$2 million self-insured retention.

B. PATH - \$125 million excess of a self-insured retention which will vary from \$2 million to \$5 million depending upon the insurer.

C. All Other Operations - \$125 million excess of a \$2 million self-insured retention.

b. Property Parasol Insurance in limits of \$200 million per occurrence in excess of the existing underlying Port Authority and PATH all risk property damage and loss of revenue insurance programs, at a total premium cost not to exceed \$520,000.

2. the purchase of \$18 million of Public Liability Insurance covering all Port Authority and PATH operations in the \$30 million layer excess of \$2 million self-insured retention for the year beginning October 27, 1986 at a premium of \$900,000 and for the year beginning October 27, 1987 at a premium of \$1,050,000. Underwriters cannot cancel the coverage for the year beginning October 27, 1987 without a one-year notice and a 50% reduction in premium for the one year between the notice and the effective date of cancellation.

Approved.

The Port Authority of NY & NJ and PATH
 General Public Liability and Parasol Insurance Program -
 Cost Summary Effective 10/27/85 **
 (In Thousands)

<u>Layer</u> (Million)	<u>All Facilities</u>	<u>Airports</u>	<u>PATH*</u>	<u>Other</u>	<u>Total</u>	<u>Board Authorization</u>

(Board - 11/14/85)

Erie Basin-Port Authority Marine Terminal - Fishport - Columbia Street Bulkhead - Contract EBP-110.010B - Award

It was reported that the Committee on Construction, at its meeting on October 11, 1984, authorized the Executive Director to award Contract EBP-110.010, Columbia Street Bulkhead, to the lowest qualified bidder on the basis of bids to be received after public advertisement and to order extra work up to the amount of 10% of the bid accepted.

Contract EBP-110.010 provided for the construction of a steel sheetpile bulkhead along Columbia Street, Brooklyn, adjacent to the Fishport. Contract EBP-110.010 was publicly advertised and bids were received on February 14, 1985. The low bid of \$2,672,200 submitted by Tern Star Incorporated and North Star Contracting Corp., a joint venture, exceeded the Engineer's Estimate of \$2,093,000.

The design of the bulkhead was changed from a steel sheetpile bulkhead to a stone dike bulkhead and Contract EBP-110.010A was prepared. Contract EBP-110.010A was publicly advertised and three bids were received on August 22, 1985. The low bid of \$2,883,000 submitted by Great Lakes Dredge & Dock Company exceeded the Engineer's Estimate of \$2,200,000 for Contract EBP-110.010A.

Modifications were made to the design of the stone dike bulkhead and Contract EBP-110.010B was prepared. Rather than publicly advertise Contract EBP-110.010B, staff deemed it prudent to request proposals from the same three contractors who submitted proposals on Contract EBP-110.010A. Since the basic design of the bulkhead was the same, the bidding period could be shortened by this approach, thereby permitting construction to start before the extremes of the winter season.

Contract EBP-110.010B includes a provision for placing fill material in voids behind the existing bulkhead below elevation 299 on a net cost basis, estimated at roughly \$21,000.

Contract EBP-110.010B also includes a provision that the bidder use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

On November 6, 1985, the following bids were received on Contract EBP-110.010B:

	Classified Work	Unclassified Work	Estimated Total Amount
Weeks Dredging and Contracting Inc. Cranford, New Jersey	\$1,521,025	\$ 589,093	\$2,110,118

	Classified Work	Unclassified Work	Estimated Total Amount
Gates Construction Corp. Little Ferry, New Jersey	1,683,500	641,500	2,325,000
Great Lakes Dredge & Dock Company Staten Island, New York	1,325,000	1,018,000	2,243,000
ENGINEER'S ESTIMATE			\$2,361,500

Weeks Dredging and Contracting Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract EBP-110.010B, Columbia Street Bulkhead, Erie Basin-Port Authority Marine Terminal, Fishport, to Weeks Dredging and Contracting Inc., the low bidder, in the estimated total amount of \$2,110,118, to order extra work up to the amount of \$211,000, and to order net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract EBP-110.010B, Columbia Street Bulkhead, Erie Basin-Port Authority Marine Terminal, Fishport, to Weeks Dredging and Contracting Inc., the low bidder, in the estimated total amount of \$2,110,118, to order extra work up to the amount of \$211,000, and to order net cost work.

(Board - 11/14/85)

METROTECH - Center for Advanced Technology in Telecommunications - Port Authority Participation

It was reported that the Center for Advanced Technology in Telecommunications is one component of the proposed Metropolitan Technology Center, also known as, Metrotech, (the Project), in downtown Brooklyn, New York. The Project, a sixteen-acre business-university redevelopment, is being undertaken by agreement among Polytechnic Institute of New York (Polytechnic), Forest City Enterprises of Cleveland, the New York City Public Development Corporation and the City of New York, which provides that the following facilities must be fully committed to the satisfaction of the participants for the Project's development to commence:

- Polytechnic Institute Library of Technology and Science (Library)

- Two commercial facilities totalling at least 500,000 square feet (or one commercial building and a hotel/office building complex) (Commercial Facilities). The Board of Directors of the Securities Industry Automation Corporation ("SIAC"), a subsidiary of the New York and American Stock Exchanges, is expected to act favorably on a proposal for their tenancy in the Project and it is expected that The Brooklyn Union Gas Company will also enter into a lease agreement in the near future for space in the Project.

- Center for Advanced Technology in Telecommunications, provided financing for it can be obtained.

New York State has requested the Port Authority, subject to (1) METROTECH satisfactorily demonstrating to the Port Authority firm commitments to proceed with the Library and Commercial Facilities and (2) METROTECH and/or Polytechnic and the Port Authority negotiating detailed implementation agreements, to provide up to \$14 million, with provision for repayment without interest over a 40-year period, from New York's share of the funds made available for New York State projects by the 1984 tolls increase, per the Governors' Bi-state agreement of June, 1983, for construction of an approximately 100,000 square foot building that will house the Center for Advanced Technology in Telecommunications (CATT). The agreement will provide that the building will be equipped, at an estimated cost of \$8 million, operated and maintained by Polytechnic.

The CATT will provide a range of services to support the users and producers of telecommunications technologies within the Project - primarily research which will help businesses and the training of technology professionals in the newest advances in telecommunications. The Port Authority will, from the \$14 million, advance the funds necessary to do preliminary architecture and design in an amount to be negotiated between the Port Authority and Polytechnic, subject to agreement by Polytechnic to repay such amount to the Port Authority should the Project not go forward.

(Board - 11/14/85)

The total amount made available for regional development projects in New York State by the 1984 tolls increase, per the Governor's Bi-state agreement of June, 1983, is \$112.5 million. The Port Authority has previously authorized the amount of \$12.5 million for the South Bronx-Oak Point Link Project and/or the Harlem River Yard Project; up to \$7.5 million for Yonkers Industrial Park and \$21,000 for a study of transportation availability for the Inner Ring labor market. The Board is currently considering a request of \$200,000 for the New York State World Trade Council and this \$14 million request for the Center for Advanced Technology in Telecommunications. Total funds used for New York State projects, pending approval of both items, would amount to \$34,221,000, leaving \$78,279,000, plus such amounts as have been repaid to the Port Authority for CATT, available for other projects in New York.

It was therefore recommended that the Board authorize Port Authority participation in the proposed Metropolitan Technology Center in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, be and he is hereby authorized for and on behalf the Port Authority, subject to any appropriate authorizations or certifications, to enter into the appropriate agreements with Polytechnic Institute of New York and/or METROTECH to provide up to \$14 million from the funds made available for New York State projects by the 1984 tolls increase, per the Governors' agreement of June 1983, for construction of a building which will house the Center for Advanced Technology in Telecommunications; the said agreements to be in accordance with the foregoing terms and conditions and the form of the agreements to be subject to the approval of the General Counsel or his designated representative.

(Board - 11/14/85)

The World Trade Department - Newark Legal and Communications Center - Agreements for Utility Relocation

It was reported that the Board, at its Special meeting on June 29, 1983, authorized the Executive Director to commence appropriate studies and planning, at a cost not to exceed \$600,000, in connection with the proposed development of a new commercial center in the City of Newark.

At its meeting on June 14, 1984, the Board authorized the Executive Director to proceed with the development of a project to be known as the Newark Legal and Communications Center, consisting of an office building of approximately 300,000 net usable square feet and its related infrastructure in the City of Newark, New Jersey, adjacent to Penn Station, Newark and the PATH terminus, at an estimated total cost of \$40 million, and to enter into an agreement with the City of Newark and the Newark Economic Development Corporation (NEDC) providing for the construction by the Port Authority, using Federal grant monies, of an elevated pedestrian walkway connecting the aforementioned office building to Penn Station and a parking garage which will be located beneath the building. As required by covenants with bondholders, certification of the project as an additional facility was made by the Board, at its meeting on October 11, 1984, and reaffirmed by the Committee on Finance on December 8, 1984.

As a result of the Board's authorization of project implementation at its September 12, 1985 meeting, a detailed agreement with the City and NEDC Riverfront Corporation (a wholly-owned subsidiary of Newark Economic Development Corporation which was incorporated to perform NEDC's functions in connection with this development) was entered into which outlines the rights and obligations of the aforesaid parties.

The Board action on September 12, 1985 also authorized the funding for the relocation of a utility corridor running through the site such that the future development potential of the site would be greatly enhanced. Purchasers of space in the office building will pay their share of the utility relocation costs and the funding for the relocation costs attributable to the future phases of development will be provided by the Port Authority through a loan of \$2.8 million from New Jersey's share of the Fund for Regional Development, which is to be repaid by the Port Authority within five years of drawdown of the loan. NEDC has agreed to use its best efforts to assure that the amount of the loan will be repaid to the Port Authority by future developers of the site as each subsequent phase of development occurs.

Staff has received the necessary cost estimates in order to proceed with the major portion of the utility relocations. Public Service Electric & Gas Company (PSE&G) has estimated the costs for moving the gas and electric lines at approximately \$2.2 million. Authorization is necessary at this time in order to enter into the appropriate agreements with PSE&G which is responsible for relocation of the gas and electric systems of the utility corridor.

In order to begin excavation for the building as soon as possible, it is necessary to temporarily relocate a major gas main prior to the peak heating season, so the Executive Director, on October 22, 1985, authorized an agreement with PSE&G for this work in the estimated amount of \$250,000.

(Board - 11/14/85)

It was therefore recommended that the Board authorize the Executive Director to enter into the appropriate agreements with Public Service Electric & Gas Company for the relocation of natural gas and electric lines at an estimated cost of \$2.2 million, of which \$1,760,000 is to be paid out of the proceeds of a loan of \$2.8 million obtained by the Port Authority from New Jersey's share of the Fund for Regional Development.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into the appropriate agreements with Public Service Electric & Gas Company for the relocation of natural gas and electric lines in the total estimated amount of \$2.2 million, of which \$1,760,000 is to be paid out of the proceeds of a loan of \$2.8 million obtained by the Port Authority from New Jersey's share of the Fund for Regional Development; such agreements to be subject to approval as to form by General Counsel or his designated representative.

(Board - 11/14/85)

Regional Development - New York Projects - Request for Use of Funds Made Available by the 1984 Toll Increase - World Trade Council

It was reported that a request has been received from New York State that \$200,000 be provided for the New York State World Trade Council from the funds made available for New York State projects by the 1984 tolls increase to fund the Council's activities for a period of one year from November 1, 1985 to October 31, 1986. Staff has reviewed the Council's expenditure plan.

The New York State World Trade Council, of which the Executive Director of the Port Authority is an *ex officio* member, was established to review and recommend improvements in State policies and programs regarding exports and exports markets, to improve inter-agency and regional coordination of trade activities, to develop promotional programs and to identify "underutilized" resources that could be directed towards such improvements and programs.

The total amount made available for regional development projects in New York State by the 1984 toll increase, per the Governors' bi-State agreement of June 1983, is \$112.5 million. The Port Authority has previously authorized the amount of \$12.5 million for the South Bronx-Oak Point Link Project and/or Harlem River Yard Project; up to \$7.5 million for Yonkers Industrial Park and \$21,000 for a study of transportation availability and the Inner Ring labor market. The Board is currently considering a request of \$14 million for the Center for Advanced Technology in Telecommunications (CATT) and this \$200,000 request for the New York State World Trade Council. Therefore, total funds made available for New York State projects, including the proposed allocation for CATT and the World Trade Council, would amount to \$34,221,000, leaving \$78,279,000, plus any amounts that may be repaid to the Port Authority for CATT, available for other projects in New York.

It was therefore recommended that the Board authorize the Executive Director to expend up to \$200,000 of New York State's share of the funds made available by the 1984 tolls increase to fund the activities of the New York State Governor's World Trade Council in accordance with the Council's expenditure plan for Fiscal Year November 1, 1985-October 31, 1985.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to expend up to \$200,000 of New York State's share of the funds made available by the 1984 tolls increase to fund the activities of the New York State World Trade Council in accordance with the Council's expenditure plan for a period of one year from November 1, 1985-October 31, 1986.

(Board - 11/14/85)

Kennedy International, Newark International and LaGuardia Airports - Revision to Schedule of Charges - Public Aircraft Parking and Storage Area Charges

It was reported that, at its meetings on July 12, 1984 and December 13, 1984, the Board authorized a combined investment of approximately \$7.6 million for additional aircraft parking at Newark International Airport. The proposed location for the additional aircraft parking is an eight-acre site south of Taxiway "Y" just west of the Control Tower. There has been a substantial increase in the use of wide-body aircraft at Newark International Airport, and this area will provide parking for up to four wide-body aircraft.

At its meeting on July 11, 1985, the Board authorized an expenditure of \$3.6 million for the construction of additional public aircraft parking at LaGuardia Airport on a three-acre site west of Runway 4-22. The proposed site will accommodate up to four large aircraft for additional overnight parking resulting from the increased number of early morning departures at LaGuardia. It will also accommodate commuter and other smaller aircraft during the day.

Construction of the additional public parking areas at Newark International and LaGuardia Airports was authorized to alleviate the current shortage of public aircraft parking facilities. At Newark International Airport, there are only two other aircraft parking areas where wide-body aircraft can be stored. In recent months it has been necessary to park aircraft on active taxiways at both airports, thus reducing operational efficiency.

At Kennedy International Airport, it is anticipated that there will be an increased demand for space required for public aircraft parking and a need to relocate existing public aircraft parking areas. Ways to accommodate this demand are currently under study.

The cost of providing, operating and maintaining the Public Aircraft Facilities largely determines each airport's flight fee. Revenues derived from the Public Aircraft Parking and Storage Area facilities (via charges to the specific users) are deducted from the flight fee calculation resulting in no incremental revenue generation at the airports.

The charges currently in effect for use of Public Aircraft Parking and Storage Areas at the three airports became effective in October 1983. In 1984, the revenue from Public Aircraft Parking and Storage at the three airports was approximately \$736,000. The proposed charges would increase the Schedule of Charges for use of Public Aircraft and Storage Areas at Kennedy International and Newark International Airports for all aircraft and at LaGuardia Airport for aircraft not exceeding 125,000 pounds maximum gross weight for take-off by approximately 50% and would establish incremental charges for aircraft in excess of 125,000 pounds maximum gross weight for take-off at LaGuardia Airport to conform the charges for such aircraft to those at Kennedy and Newark International Airports.

It was therefore recommended that the Board authorize these revisions to the Schedule of Charges for Public Aircraft Parking and Storage Areas at Kennedy International, Newark International and LaGuardia Airports.

(Board - 11/14/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Schedule of Charges for the use of the Public Aircraft Parking and Storage Areas at Kennedy International, Newark International and LaGuardia Airports be, and the same is hereby amended, effective January 1, 1986, as follows:

	For First Eight Hours or Fraction Thereof	For Each Additional Eight Hours or Fraction Thereof
For each aircraft not exceeding 50,000 pounds maximum gross weight for take-off	\$15.00	\$15.00
50,001 - 75,000 lbs.	16.00	15.00
75,001 - 100,000 lbs.	18.00	15.00
100,001 - 125,000 lbs.	23.00	20.00
125,001 - 150,000 lbs.	26.00	23.00
150,001 - 175,000 lbs.	30.00	27.00
175,001 - 200,000 lbs.	33.00	30.00
200,001 - 225,000 lbs.	40.00	38.00
225,001 - 250,000 lbs.	48.00	45.00
For each additional 25,000 lbs. or fraction thereof over 250,000 lbs. an additional charge of	8.00	8.00

and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to revise any and all of the foregoing from time to time when such revisions are necessary to recover capital and operating costs.

(Board - 11/14/85)

Retention of Financial Advisor:

It was reported that changes in the Municipal Finance Market have resulted in the use of rapidly evolving non-traditional financing instruments. In order to assist staff in evaluating these instruments, it would be helpful for the Port Authority to have available the assistance of a financial advisor. John Tamagni, a partner at Lazard Freres, has been financial advisor to the Municipal Assistance Corporation for the City of New York where he helped structure their financings. Also while at Lazard Freres he was co-lead underwriter for the Metropolitan Transportation Authority on new complicated revenue bond financings. He has acted as financial advisor to various other municipalities, states and authorities. During 1977 and 1978, he was co-financial advisor with John Thompson on advance refunding proposals being considered by the Port Authority.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Lazard Freres to provide for Mr. John Tamagni to act as financial advisor to the Port Authority at a fee of approximately \$25,000 for a three-month period with an option to extend the agreement for a period of up to one year.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with Lazard Freres to provide for Mr. John Tamagni to act as financial advisor to the Port Authority at a fee of approximately \$25,000 for a three-month period with an option to extend the agreement for a period of up to one year.

(Board - 11/14/85)

Retention of Financial Organization Advisor

It was reported that as a result of organizational changes throughout the Port Authority anticipated because of a major emphasis on the Port Authority's capital spending plan, the Executive Director has requested that a study be done of the organization of the financial departments. Edward M. Kresky, a recognized expert in municipal finance, has been identified by the Executive Director as an individual possessing the knowledge and expertise to accomplish this study in a short period of time. It is proposed that Mr. Kresky be retained for a period of approximately two months, ending December 31, 1985 at a compensation not to exceed \$20,000.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Mr. Edward M. Kresky to act as an advisor to the Port Authority to study the organizational structure of the financial departments at a fee not to exceed \$20,000 for a two-month period ending December 31, 1985.

Whereupon, based upon the foregoing report, the following resolution was adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with Mr. Edward M. Kresky to act as an advisor to the Port Authority to study the organizational structure of the financial departments at a fee not to exceed \$20,000 for a two-month period ending December 31, 1985.

Port Authority Commercial Paper Program - Modification and Extension - Report

It was reported that gross capital expenditures are expected to total more than \$3 billion over the next several years. It is contemplated that scheduled projects presently authorized or to be authorized by the Board in connection with then existing facilities of the Authority or those under study would make necessary the issuance of new debt obligations of the Authority over the next several years. Under these circumstances, and in view of the continuing volatility in the credit markets, it is considered desirable to continue to use diversified sources of financing while at the same time preserving and enhancing the acceptability of the principal means of such financing, the Authority's Consolidated Bonds. It is considered desirable for the Authority to continue its practice of financing portions of its capital expenditures through a combination of long-, intermediate- and short-term obligations. It is believed that these results could be accomplished in part by continuing and modifying the Port Authority Commercial Paper Program (the "Program") established by the Board at its meeting on September 9, 1982, and extended and increased by the Board at its meeting on October 13, 1983, as the same has been amended, as well as by establishing and authorizing the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015. The Program is scheduled to terminate on December 31, 1985.

The proposed extension would provide that the Authority would be able to continue to issue Port Authority Commercial Paper Notes ("Notes") after an effective date (the "Effective Date") to be prior to December 31, 1985, for a period ending December 31, 1990, in an unlimited aggregate principal amount, provided that the aggregate principal amount of the Notes outstanding at any one time would not be in excess of \$150 million; each of the Notes would continue to have a maturity date no later than 270 days from its date of issue, but in no event later than December 31, 1990, the final permissible maturity date of all Notes; the Notes would continue to be issued in bearer form, in the minimum amount of \$100,000, unless required to be issued in registered form to comply with applicable Federal law or regulations; the Notes would continue to bear interest at rates fixed by the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Assistant Director, Finance Department; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority not in excess of 10% per annum with interest payable on maturity; and the Notes would not be subject to redemption prior to maturity. The requirement that the Notes not have a maturity date later than the last day of the calendar year in which such Notes are issued would be eliminated for all Notes issued after the Effective Date.

The principal of and interest on each of the Port Authority Commercial Paper Notes shall be a special obligation

(Board - 11/14/85)

the Authority payable from the proceeds of Port Authority Commercial Paper Notes or other obligations of the Authority issued for such purposes, including Consolidated Bonds issued in whole or in part for such purposes, or from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such proceeds or Net Revenues are insufficient therefor, from other moneys of the Authority legally available for such payments when due.

The principal of and interest on any Port Authority Commercial Paper Notes shall not be payable from the Special Reserve Fund in Trust or the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions, (ii) the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes, and (iii) the payment of debt service on Variable Rate Demand Bonds as required in the applicable provisions of the Variable Rate Demand Bond Resolution.

Additionally, so long as any Notes issued on or after the Effective Date of the extended Commercial Paper Program remain outstanding, the Port Authority, at such time or times as it makes the computations called for by Section 3 of the Consolidated Bond Resolution, would, only for purposes of such computation, consider the principal amount of Consolidated Bonds outstanding to include an amount equal to the amount necessary to refund the principal of and interest on Notes whose principal amount would be equal to the actual (as opposed to maximum potential) commitment of the banks as of the date of such computation to make advances under the stand-by credit facility under the Program.

The proceeds of the Notes would be used (a) for purposes of payment for capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, all or any portion of the unspent proceeds of the Notes may be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of such Notes; and (b) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations, and contractual provisions.

Commercial Paper Notes issued prior to the Effective Date would continue to be subject to the Port Authority Commercial Paper Resolution adopted by the Authority on October

(Board - 11/14/85)

13, 1983, as the same has been amended, and agreements made pursuant thereto, and, accordingly, such Commercial Paper Notes will have maturity dates on or before December 31, 1985. It is expected that a substantial portion of the Port Authority Commercial Paper Notes issued prior to the Effective Date will be refunded on or prior to their Final Maturity Date (December 31, 1985) with proceeds of Port Authority Commercial Paper Notes issued on or after the Effective Date. It is also expected that the Commercial Paper Notes issued on or after the Effective Date not refunded with the proceeds of Commercial Paper Notes, would be refunded with the proceeds of Consolidated Bonds or Notes.

It was reported that it continues to be necessary, in order to sell tax-exempt commercial paper, for issuers to have an outside credit source providing a credit facility to ensure liquidity in the event such commercial paper cannot be refunded (by being "rolled over") at maturity due to market conditions. This is accomplished through either a bank letter of credit or a line of credit. In view of the Authority's continued strong financial rating, a line of credit in the form of a stand-by credit facility continues to be sufficient.

The extended Program would continue to utilize a stand-by credit facility of up to \$150 million which it is presently anticipated would be provided by Marine Midland Bank, N.A. (Marine), with the participation of other New York and New Jersey banks; it is also expected that these banks would provide a revolving credit and stand-by purchase facility of \$202 million in connection with Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015. It is anticipated that the terms of the stand-by credit agreement under the extended commercial paper program would be on substantially similar terms and conditions as the terms and conditions of such agreement currently in effect although changes in the participating banks are expected.

Goldman Sachs & Co. (Goldman) has offered to continue as the exclusive dealer for the Notes and Morgan Guaranty Trust Company of New York (Morgan) has offered to continue as issuing and paying agent for the Notes. It is anticipated that the terms of these agreements would be on substantially similar terms and conditions to those currently in effect.

Finally, continuation of the separate line of credit for interim funding of those capital expenditures which are included in the purposes for the issuance of Notes would facilitate the extension of the Program, allowing accumulation of capital expenditures and permitting Notes to be issued in larger principal amounts. The line of credit would remain in an aggregate principal amount so that borrowings thereunder outstanding at any one time would not be in excess of \$15 million and further provide that so long as the line of credit is available or borrowings thereunder remain unpaid, the total cumulative principal amount of Notes, any borrowings under the

(Board - 11/14/85)

revolving credit agreement and any borrowings under the line of credit would not be in excess of \$150 million outstanding at any one time. The payment of any borrowings under the line of credit would continue to be a special obligation of the Authority payable solely from the sources of payment for the Notes described above (except that the line of credit would not be repayable from advances under the revolving credit agreement) and would be subject to the same conditions for payment thereof. Marine has offered to continue to provide the separate line of credit.

Disbursement accounts for the Port Authority and Port Authority Trans-Hudson Corporation would be continued with Marine on a zero balance basis, with checks drawn on these accounts continuing to be treated as loans to the Authority payable on demand or from the proceeds of Notes (except from the proceeds of Notes required to refund maturing Notes or from advances in connection with the revolving credit agreement), whichever occurs first.

The Board would provide that no part of the proceeds of the Notes shall be invested directly or indirectly in such manner as to cause the interest on the Notes to be subject to Federal income taxes under the Internal Revenue Code or the regulations promulgated thereunder.

In addition to the customary certification, determinations, statements and other documents necessary or desirable in connection with the issuance of Authority obligations, the Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Assistant Director, Finance Department; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority would be authorized expressly to certify on behalf of the Authority as to the need for issuance of the Notes, as to the status of the projects or purposes for which the proceeds of said Notes are to be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized.

It was recommended that the Board authorize the Committee on Finance, in connection with the extension of the Commercial Paper Program, to authorize or approve any and all agreements as may be required or necessary to effectuate the extension, modification or continuance of the Port Authority Commercial Paper Program authorized in this Resolution and to take such other action as in the opinion of the Committee on Finance may be necessary in connection with such effectuation.

Port Authority Commercial Paper Program - Modification and Extension - Port Authority Commercial Paper Resolution

Pursuant to the foregoing report the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter referred to as "the Authority") has been authorized and empowered to issue bonds, notes, securities or other obligations or evidences of indebtedness to provide capital funds for the financing of its facilities; and

WHEREAS, on September 9, 1982, the Authority established and authorized an issue of Port Authority Commercial Paper (such term and any other terms of special meaning shall have the meanings as set forth in Article I of this Resolution) with an unlimited aggregate principal amount, provided that the aggregate principal amount thereof outstanding at any one time was not to exceed One Hundred Million Dollars (\$100,000,000); and

WHEREAS, on September 9, 1982, the Authority authorized the sale of Port Authority Commercial Paper Notes, subject to the foregoing, with the proceeds derived from the sale thereof, from time to time, to be used for financing for any and all purposes for which the Authority is or shall be authorized to issue bonds, notes, securities or other obligations or evidences of indebtedness and provided that no such Port Authority Commercial Paper Note would be outstanding subsequent to December 30, 1983; and

WHEREAS, on October 13, 1983, the Authority authorized an extension of the issue of Port Authority Commercial Paper for the period commencing on December 30, 1983, and ending on December 31, 1985, with an unlimited aggregate principal amount during the extension, provided that the aggregate principal amount thereof outstanding at any one time during such period would not exceed One Hundred Fifty Million Dollars (\$150,000,000); and

WHEREAS, the Authority has determined to authorize an extension of the issue of Port Authority Commercial Paper covering Port Authority Commercial Paper Notes issued on or after the Effective Date for a period ending on December 31, 1990, and with an unlimited aggregate principal amount during the extension; provided, however, that the aggregate principal amount thereof outstanding at any one time during such period shall not exceed One Hundred Fifty Million Dollars (\$150,000,000); and

WHEREAS, Port Authority Commercial Paper shall continue to be a special obligation of the Authority; and

WHEREAS, Port Authority Commercial Paper shall be payable as to principal and interest from the proceeds of Port Authority Commercial Paper Notes or other obligations of the Authority issued for such purposes, including Consolidated Bonds issued in whole or in part for such purposes, or from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such proceeds or Net Revenues are insufficient therefor, from other moneys of the Authority legally available for such payments when due; and

WHEREAS, except as provided herein, the moneys of the Authority would not be pledged to the payment of interest on or the repayment of the principal of any Port Authority Commercial Paper Note at its Maturity Date; and

WHEREAS, on September 9, 1982, the Authority authorized a Revolving Credit Agreement in further support of the payment of any Port Authority Commercial Paper Note at its Maturity Date, if necessary; and

WHEREAS, on October 13, 1983, the Authority authorized an amendment and supplement to the Revolving Credit Agreement to conform to the provisions of the extension of the issue of Port Authority Commercial Paper authorized on October 13, 1983; and

WHEREAS, the Authority is to authorize a further amendment and supplement to the Revolving Credit Agreement to conform to the provisions of this modification and extension of the Port Authority Commercial Paper Program;

NOW, THEREFORE, after due consideration had, be it resolved by The Port Authority of New York and New Jersey that the resolution of September 9, 1982 (appearing at pages 263 et seq. of the Official Minutes of that date), establishing the issue of Port Authority Commercial Paper and authorizing, inter alia, the issuance and sale of Port Authority Commercial Paper Notes, as heretofore amended and supplemented by the resolution of October 13, 1983 (appearing at pages 395 et seq. of the Official Minutes of that date), with respect to Port Authority Commercial Paper Notes issued as of December 30, 1983 and thereafter, as the same has been amended, is hereby further amended and supplemented, with respect to Port Authority Commercial Paper Notes issued on or after the Effective Date, to read as follows:

ARTICLE I. DEFINITIONS.

As used in this Resolution and unless otherwise indicated or unless the context otherwise requires, the following terms shall have the following meanings (such meanings to be

equally applicable to both the singular and plural forms of the defined terms). As used in this Resolution, any words or phrases specially defined in the Consolidated Bond Resolution shall be read and construed in accordance with such special definitions. All accounting terms not specially defined in this Resolution shall be construed in accordance with generally accepted accounting principles consistently applied.

The term "Advance" shall mean an advance of moneys made to the Authority under the Revolving Credit Agreement in an amount requested by the Authority sufficient to prevent a Settlement Deficiency.

The term "Authorized Officer" shall mean any of one of the persons holding the office or exercising the duties of Chairman; Vice-Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, and any other person authorized by resolution of the Authority to perform the act or sign the document referred to.

The term "Bank Note" shall mean the promissory note or notes of the Authority, in substantially the form set forth in the Revolving Credit Agreement, issued on the terms set forth in the Revolving Credit Agreement to evidence the cumulative amount of any Advances and any repayment of principal on such Advances.

The term "Basic Resolution" shall mean the resolution adopted by the Authority on March 18, 1935, as amended March 25, 1935, September 16, 1943, March 6, 1947 and October 23, 1947, establishing General and Refunding Bonds.

The term "Bond Resolutions" shall mean (i) the Basic Resolution and (ii) the Consolidated Bond Resolution.

The term "Consolidated Bond Reserve Fund" shall mean the special fund by that name established by Section 7 of the Consolidated Bond Resolution.

The term "Consolidated Bond Resolution" shall mean the resolution adopted by the Authority on October 9, 1952, establishing Consolidated Bonds.

The term "Consolidated Bonds" shall mean the Authority's Consolidated Bonds (including Consolidated Notes) issued under the Consolidated Bond Resolution.

The term "Dealer" shall mean any dealer in sales of Port Authority Commercial Paper pursuant to an agreement with the Authority.

The term "Dealer Agreement" shall mean the agreement between the Authority and any Dealer for Port Authority Commercial Paper, in substantially the same form as the Dealer Agreement, between the Authority and Goldman Sachs & Co. dated Decemember 30, 1983, as the same may be or may have been amended and supplemented from time to time.

The term "Depository Agreement" shall mean the agreement between the Authority and any Issuing and Paying Agent for Port Authority Commercial Paper, in substantially the same form as the Depository Agreement between the Authority and Morgan Guaranty Trust Company of New York, made as of December 30, 1983, as the same may be or may have been amended and supplemented from time to time.

The term "Effective Date" shall mean the date the Revolving Credit Agreement becomes effective according to its terms.

The term "Final Maturity Date" shall mean the date established by the Authority in this Resolution beyond which Port Authority Commercial Paper is not authorized to be issued or outstanding.

The term "General and Refunding Bonds" shall mean the Authority's General and Refunding Bonds issued under the Basic Resolution.

The term "General Reserve Fund" shall mean the General Reserve Fund of the Authority authorized by the General Reserve Fund Statutes.

The term "General Reserve Fund Resolution" shall mean the resolution of the Authority adopted on March 9, 1931, as amended May 5, 1932, concerning the administration of the General Reserve Fund.

The term "General Reserve Fund Statutes" shall mean Chapter 5 of the Laws of New Jersey of 1931, as amended, and Chapter 48 of the Laws of New York of 1931, as amended.

The term "Issuing and Paying Agent" shall mean any bank or trust company appointed by the Executive Director of the Authority for and in connection with the issuance and redemption of Port Authority Commercial Paper Notes. Said bank or trust company shall be a bank or trust company organized under the Laws

of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms.

The term "Maturity Date" shall mean the date on which the principal of and interest on any Port Authority Commercial Paper Note is due and owing to the holder thereof.

The term "Net Revenues", solely for the purpose of this Resolution shall mean, with respect to any date of calculation, the revenues of the Authority pledged under the Bond Resolutions and remaining after (i) payment or provision for payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions, (ii) payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Statutes, (iii) payment of debt service on Variable Rate Demand Bonds as required by the applicable provisions of the Variable Rate Demand Bond Resolution; and (iv) applications to purposes authorized in accordance with Section 7 of the Consolidated Bond Resolution.

The term "Port Authority Commercial Paper" shall mean the issue of special obligations of the Authority established and issued pursuant to and under this Resolution.

The term "Port Authority Commercial Paper Note" or "Port Authority Commercial Paper Notes" shall mean any note or notes constituting all or a portion of the issue of Port Authority Commercial Paper.

The term "Port Authority Commercial Paper Resolution" or "this Resolution" shall mean this Port Authority Commercial Paper Resolution, including any amendments, modifications or supplements hereto.

The term "Revolving Credit Agreement" shall mean the agreement concerning, inter alia, Advances and the Bank Note, between the Authority and one or more participating banks and trust companies, in substantially the same form as the Revolving Credit Agreement, between the Authority and Marine Midland Bank, N.A., dated as of December 30, 1983, as the same may be or may have been amended and supplemented from time to time.

The term "Settlement Account" shall mean the separate account maintained by the Authority with the Issuing and Paying

Agent for the receipt and the disbursement of the proceeds from the sale of Port Authority Commercial Paper Notes and for the payment of the principal of and interest on Port Authority Commercial Paper Notes at their Maturity Dates.

The term "Settlement Deficiency" shall mean the amount by which the sum of the principal of and interest on any Port Authority Commercial Paper Notes payable on any Maturity Date exceeds the amount of moneys available in the Settlement Account for such payment on such Maturity Date.

The term "Special Reserve Fund" shall mean the special fund by that name established by Section 9 of the Basic Resolution and subsequently placed in trust pursuant to the Trust Agreement.

The term "Special Reserve Fund in Trust" shall mean the Special Reserve Fund placed in trust pursuant to the Trust Agreement.

The term "Trust Agreement" shall mean the agreement made as of December 31, 1970, between the Authority and First National City Bank (now Citibank, N.A.), as Trustee.

The term "Variable Rate Demand Bond Resolution" shall mean the resolution adopted by the Authority on November 14, 1985, establishing and authorizing the issuance of Variable Rate Demand Bonds.

The term "Variable Rate Demand Bonds" shall mean the Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015, established by and issued under the Variable Rate Demand Bond Resolution.

ARTICLE II. AUTHORIZATION, TERMS AND ISSUANCE.

Section 2.01. Establishment and Authorization of Issue of Notes. There is hereby established an issue of negotiable notes of the Authority to be known as "Port Authority Commercial Paper." Port Authority Commercial Paper Notes in an unlimited aggregate principal amount are hereby authorized to be issued for the purposes set forth in Section 2.04 of this Resolution; provided, however, that the aggregate principal amount of all Port Authority Commercial Paper Notes outstanding at any one time shall not exceed One Hundred Fifty Million Dollars (\$150,000,000). For purposes of determining such aggregate principal amount, no Port Authority Commercial Paper Note shall be deemed to be outstanding on its Maturity Date to the extent that one or more Port Authority Commercial Paper Notes, the proceeds of which are to be used to pay such Port Authority

Commercial Paper Note, have been sold on such day. The Port Authority Commercial Paper Notes shall otherwise be subject to the terms, conditions and limitations provided or referred to in this Resolution. The Port Authority Commercial Paper Notes shall be a special obligation of the Authority payable from the sources of payment set forth in Section 2.03 of this Resolution.

Section 2.02. General Terms of the Port Authority Commercial Paper Notes. The Port Authority Commercial Paper Notes authorized by this Resolution shall be issued in bearer form, not registrable as to either principal or interest; provided, however, if at any time, there shall be in effect a provision of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), or the regulations issued thereunder, which provides that, for the interest on such Port Authority Commercial Paper Notes to be considered exempt from Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, such Port Authority Commercial Paper Notes must be in registered form, then such Port Authority Commercial Paper Notes shall be issued in registered form, registered as to both principal and interest but not as to either alone. The Port Authority Commercial Paper Notes shall be issued in the denomination of \$100,000 or any larger denomination that is an integral multiple of \$5,000 in excess thereof as determined by the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them; shall be dated the dates of their delivery from time to time hereunder and shall be numbered consecutively from 1 upwards in the order of their issuance and may bear such other identification as the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, may deem appropriate. The Port Authority Commercial Paper Notes shall mature on such dates and in such years as shall be determined by the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them; provided, however, that the term of any Port Authority Commercial Paper Note shall not exceed two hundred seventy (270) days, and that no Port Authority Commercial Paper Note shall be issued or outstanding subsequent to the Final Maturity Date, which is hereby established as December 31, 1990. The Port Authority Commercial Paper Notes shall be payable at the principal office of the Issuing and Paying Agent in New York, New York, in lawful money of the United States of America. No Port

Authority Commercial Paper Note shall be subject to redemption prior to maturity.

Each Port Authority Commercial Paper Note shall be deemed to bear interest at a rate per annum equal to the product (converted to a percentage) of (a) a fraction, the numerator of which is the total interest payable on such Port Authority Commercial Paper Note during its term and the denominator of which is the par value or denomination of such Port Authority Commercial Paper Note and (b) a fraction, the numerator of which is three hundred sixty-five (365)/three hundred sixty-six (366) and the denominator of which is the number of days (calculated on an actual calendar day basis) from the date of such Port Authority Commercial Paper Note to its Maturity Date.

Each Port Authority Commercial Paper Note shall bear interest at a rate to be set by the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them; provided, however, that no Port Authority Commercial Paper Note shall bear interest in excess of ten per centum (10%) per annum.

Section 2.03. Sources of Payment. The principal of and interest on each of the Port Authority Commercial Paper Notes shall be a special obligation of the Authority payable from the proceeds of Port Authority Commercial Paper Notes or other obligations of the Authority issued for such purposes, including Consolidated Bonds issued in whole or in part for such purposes, or from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such proceeds or Net Revenues are insufficient therefor, from other moneys of the Authority legally available for such payments when due.

The principal of and interest on any Port Authority Commercial Paper Notes shall not be payable from the Special Reserve Fund in Trust or the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions, (ii) the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes, and (iii) the payment of debt service on Variable Rate Demand Bonds as required in the applicable provisions of the Variable Rate Demand Bond Resolution.

Section 2.04. Application of Proceeds. The proceeds of each Port Authority Commercial Paper Note shall be used (a) for

purposes of payment for capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, all or any portion of the unspent proceeds of the Notes may be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of such Notes; and (b) for the purpose of refunding, at a Maturity Date, any Port Authority Commercial Paper Note.

In the event the Executive Director of the Authority determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the Port Authority Commercial Paper Notes to purposes in connection with some but not all of the purposes authorized in this Section 2.04, the Executive Director is hereby authorized, from time to time, to make such allocation in regard to the expenditure of the proceeds of such Port Authority Commercial Paper Note; provided, however, that no portion of the proceeds of any Port Authority Commercial Paper Note shall be allocated to purposes in connection with an additional facility of the Authority prior to the initial expenditure of all or a portion of the proceeds of a series of Consolidated Bonds for purposes in connection with such additional facility.

Section 2.05. Issue and Sale of Port Authority Commercial Paper Notes. Port Authority Commercial Paper Notes may be issued, sold and delivered under the terms of this Resolution whenever the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, shall prescribe the terms of such Port Authority Commercial Paper Notes (including the principal amount of, the purchase price of, the interest payable on, the issuance date of and the Maturity Date of such Port Authority Commercial Paper Notes) and deliver instructions therefor to the Issuing and Paying Agent, all pursuant to Section 2.02 hereof and to the Depositary Agreement. Such directions prescribing the terms of the Port Authority Commercial Paper Notes may be given orally, but in such event the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, shall deliver to the Issuing and Paying Agent

written confirmation of such prescribed terms within twenty-four (24) hours (unless such instructions are transmitted by a time-sharing terminal or telex, in which event such time-sharing terminal message or telex shall be considered to be written instructions). The Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to direct the Issuing and Paying Agent to countersign any Port Authority Commercial Paper Note for the purposes of authentication only and deliver such Port Authority Commercial Paper Note to the purchaser thereof; provided, however, that such Port Authority Commercial Paper Note shall not be valid or obligatory for any purpose unless and until so countersigned.

Section 2.06. Appointment of Issuing Agent and Paying Agents. The Committee on Finance is hereby authorized to appoint one or more Issuing and Paying Agents, and the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to enter into Depositary Agreements which may contain such terms and conditions not inconsistent with this Resolution, regarding the function, responsibilities and duties of such Issuing and Paying Agents.

Section 2.07. Transfer of Notes. The Authority and the Issuing and Paying Agent may treat the holder of any Port Authority Commercial Paper Note as the absolute owner of such Port Authority Commercial Paper Note for the purpose of receiving payment of the principal thereof and interest thereon and for all other purposes, and neither the Authority nor the Issuing and Paying Agent shall be affected by any notice or knowledge to the contrary, unless such Port Authority Commercial Paper Note shall be issued in registered form, in which case the Authority and the Issuing and Paying Agent may treat the registered holder of any Port Authority Commercial Paper Note as the absolute owner of such Port Authority Commercial Paper Note for the purpose of receiving payment of the principal thereof and interest thereon and for all other purposes and neither the Authority nor the Issuing and Paying Agent shall be affected by any notice or knowledge to the contrary.

Section 2.08. Port Authority Commercial Paper Notes Mutilated, Lost, Destroyed or Stolen. In case any Port Authority Commercial Paper Note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and cause the Issuing and Paying Agent to countersign and deliver

a new Port Authority Commercial Paper Note of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated Port Authority Commercial Paper Note or in lieu of or in substitution for such destroyed or lost Port Authority Commercial Paper Note; or if such Port Authority Commercial Paper Note shall have matured, instead of issuing a substitute Port Authority Commercial Paper Note the Authority may direct the Issuing and Paying Agent to pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute Port Authority Commercial Paper Note shall furnish to the Authority evidence satisfactory to it of the destruction or loss of such Port Authority Commercial Paper Note and of the ownership thereof and also such security and indemnity as may be required by the Authority. Upon the issuance of any substitute Port Authority Commercial Paper Note, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new Port Authority Commercial Paper Note so issued in substitution. Any Port Authority Commercial Paper Note issued under the provisions of this Section 2.08 in lieu of any Port Authority Commercial Paper Note alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the Port Authority Commercial Paper Note so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this Resolution with all other Port Authority Commercial Paper Notes issued hereunder.

Section 2.09. Authorization of Sale and Distribution of Offering Statement. The Port Authority Commercial Paper Notes shall be sold to the purchasers thereof in accordance with the terms and conditions of the Depositary Agreement and the Dealer Agreement, and the Issuing and Paying Agent is hereby authorized and directed to deliver the Port Authority Commercial Paper Notes to the purchasers thereof upon the direction of the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, in accordance with the terms of the Dealer Agreement and the Depositary Agreement. The Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to arrange for the preparation of a Commercial Paper Memorandum or other offering statement, in the name and on behalf of the Authority, describing the Port Authority Commercial Paper Notes and the

Authority and its financial condition, and making representations on behalf of the Authority; provided, however, that such Commercial Paper Memorandum or other offering statement shall not be issued without the express consent of the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them. The Authority hereby approves the use of any such offering statement in connection with the sale of the Port Authority Commercial Paper Notes.

Section 2.10. Authorization of Revolving Credit Agreement and the Bank Note. The Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to enter into a Revolving Credit Agreement which may contain such terms and conditions not inconsistent with this Resolution, for provision for the payment of Advances, in support of the payment of the principal of and interest on any Port Authority Commercial Paper Note at its Maturity Date, if necessary, and to execute and deliver the Bank Note.

Section 2.11. Appointment of Dealers. The Committee on Finance of the Authority is hereby authorized to appoint one or more Dealers and the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to enter into Dealer Agreements which may contain such terms and conditions not inconsistent with this Resolution regarding the function, responsibilities and duties of the Dealers.

ARTICLE III. SETTLEMENT ACCOUNT.

Section 3.01. Establishment of the Settlement Account. There is hereby established the Settlement Account to be held and maintained by the Issuing and Paying Agent for the account of the Authority in accordance with the terms of this Resolution.

Section 3.02. Deposits to and Disbursements from the Settlement Account. There shall be deposited into the Settlement Account such portion of the proceeds of the sale of the Port Authority Commercial Paper Notes as the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, shall direct, all Advances

made under the Revolving Credit Agreement and such amounts as the Authority may elect to deposit in such Settlement Account from funds (including proceeds of Consolidated Bonds) legally available for such deposit. Disbursements from the Settlement Account shall be made upon the direction of the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them.

ARTICLE IV. FORM AND EXECUTION OF NOTES.

Section 4.01. Form of Notes. Each of the Port Authority Commercial Paper Notes shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed, manually or by facsimile signature, by any Authorized Officer and shall be manually countersigned by the Issuing and Paying Agent. Such Port Authority Commercial Paper Notes shall be in substantially the following form, the blank spaces being appropriately filled in:

(Form of Port Authority Commercial Paper Note)
THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
COMMERCIAL PAPER NOTE

Issue Date:

Principal Amount:

Note Number _____

On _____, for value received, THE PORT AUTHORITY OF NEW YORK and New Jersey (the Authority) promises to pay to the Bearer hereof the sum of _____ U.S. Dollars payable at _____.

This note is issued pursuant to the Port Authority Commercial Paper Resolution adopted by the Authority on November 14, 1985 ("Note Resolution") and is a SPECIAL OBLIGATION payable solely from the sources of payment listed and to the extent indicated in Section 2.03 of the Note Resolution. A copy of the Note Resolution, which is a contract between the Authority and the holder of this note, is on file with the Issuing and Paying Agent at the above address.

This note shall not be entitled to any security, right or benefit pursuant to the Note Resolution or be valid or obligatory for any purpose unless duly countersigned by the Issuing and Paying Agent.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or to be performed, precedent to and in the issuance of this note exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey and the Compact creating the Authority and the resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or resolutions of the Authority.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer and its official seal to be affixed hereto, or facsimiles thereof to be printed hereon, and this Port Authority Commercial Paper Note to be dated as of its Issue Date.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

Authorized Officer

NOT VALID UNLESS COUNTERSIGNED

Authenticated:

Issuing and Paying Agent

By _____

Authorized Signature

(End of Form of Port Authority Commercial Paper Note)

Section 4.02. Execution of Notes. In case any Authorized Officer of the Authority who shall have signed any of the Port Authority Commercial Paper Notes shall cease to be such Authorized Officer before the Port Authority Commercial Paper Notes shall have been authenticated by the Issuing and Paying Agent, the Port Authority Commercial Paper Notes may nevertheless be issued as though the person who signed such notes had not ceased to be such Authorized Officer of the Authority.

Section 4.03. Registration. In the event that any Port Authority Commercial Paper Notes are required to be issued in registered form, then, in that event, the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to modify the form of such Port Authority Commercial Paper Notes; provided, however, that all expenses connected with such registration or subsequent registrations shall be borne by the Authority.

ARTICLE V. COVENANTS.

The Authority hereby covenants and agrees with the holder of each of the Port Authority Commercial Paper Notes as follows:

(a) The Authority shall duly and punctually pay or cause to be paid the principal of and interest on the Port Authority Commercial Paper Notes, as specified therein.

(b) Upon the date of issuance of the Port Authority Commercial Paper Notes, all conditions, acts and things required by the Constitution or statutes of the States of New York and New Jersey, or the United States of America, or the Bond Resolutions, or this Resolution to exist, to have happened and to have been performed precedent to or in the issuance of such Port Authority Commercial Paper Notes shall exist, have happened and have been performed and such Port Authority Commercial Paper Notes, together with all other indebtedness of the Authority, shall be within every debt and other limit prescribed thereby.

(c) The Authority shall do and perform or cause to be done and performed all acts and things required to be done or performed by or on behalf of the Authority under the provisions of this Resolution in accordance with the terms of such provisions.

(d) So long as any Port Authority Commercial Paper Notes issued on or after the Effective Date remain outstanding, the Authority, at such time or times as it makes the computations called for by Section 3 of the Consolidated Bond Resolution, will, only for purposes of such computation, consider the principal amount of Consolidated Bonds then outstanding to include an amount equal to the amount necessary to refund the principal of and interest on Port Authority Commercial Paper Notes whose principal amount would be equal to the actual (as opposed to maximum potential) commitment of the banks

as of the date of such computation to make advances under the Revolving Credit Agreement.

ARTICLE VI. MISCELLANEOUS.

Section 6.01. Contract. The provisions of this Resolution shall constitute a contract with the holders of the Port Authority Commercial Paper Notes issued pursuant to this Resolution, and with each such holder.

Section 6.02. Amendments. The Authority may modify or amend this Resolution or any agreement authorized by this Resolution at any time by a supplemental resolution or agreement, as applicable, without notice to or the consent of any holder of the Port Authority Commercial Paper Notes, but only in regard to such provisions as shall not materially and adversely affect the interests of such holders of the Port Authority Commercial Paper Notes then outstanding.

Section 6.03. Liability. No Commissioner, officer, agent, representative, or employee of the Authority shall be held personally liable to any purchaser or holder of any of the Port Authority Commercial Paper Notes under or upon such Port Authority Commercial Paper Notes, or under or upon this Resolution or any resolution hereafter adopted relating to the Port Authority Commercial Paper Notes, or because of the issuance or attempted issuance of any of the Port Authority Commercial Paper Notes, or because of any act or omission in connection with the construction, acquisition, effectuation, operation or maintenance of any facility of the Authority, or because of any act or omission in connection with the investment or management of the revenues, funds or moneys of the Authority, or otherwise in connection with the management of its affairs, excepting solely for things wilfully done by such person with an intent to defraud or wilfully omitted to be done by such person with an intent to defraud.

Section 6.04. Investment of Proceeds. No part of the proceeds of any Port Authority Commercial Paper Note shall be invested directly or indirectly in such a manner as to cause the interest on the Port Authority Commercial Paper Notes to be subject to Federal income taxes under the Internal Revenue Code of 1954, as amended, or the regulations promulgated thereunder.

Section 6.05. Certifications. The Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the Port Authority Commercial Paper Notes for the purposes for which such Port Authority Commercial Paper Notes are issued, as to the

status of the projects for which the proceeds of said Port Authority Commercial Paper Notes would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by this Resolution.

Section 6.06. Determinations. Whenever in this Resolution it is provided that any selection, designation, determination or estimate shall or may be made by an individual duly authorized by this Resolution, or that any action may be taken or withheld by such individual or that any action shall or may be taken or withheld at the option of or dependent upon the opinion, discretion or judgment of such individual, then such individual's selection, designation, determination, estimate, action, option, opinion, discretion or judgment so expressed shall be conclusive for the purposes of this Resolution, whether required to be made, taken or withheld as a condition precedent to the issuance of any of the Port Authority Commercial Paper Notes or for the purpose of determining if all conditions precedent to the issuance of any such Port Authority Commercial Paper Note exist, or otherwise, as in the opinion of such individual will best serve the public interest, the Authority hereby adopting such selection, designation, determination, estimate, action, option, opinion, discretion or judgment so expressed as its own.

Section 6.07. Titles. Titles to the Articles and Sections of this Resolution are solely for convenience, and are not an aid in the interpretation of this Resolution or any part thereof.

Section 6.08. Committee on Finance. The Committee on Finance is hereby authorized to authorize or approve any and all agreements as may be required or necessary to effectuate the extension, modification or continuance of the Port Authority Commercial Paper Program authorized in this Resolution and to take such other action as in the opinion of the Committee on Finance may be necessary in connection with such effectuation.

There are no pages 428 and 429.

(Board - 11/14/85)

Port Authority Commercial Paper Program - Modification and Extension - Line of Credit Agreement and Bank Accounts

Pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to amend and supplement the line of credit agreement dated December 30, 1983, between The Port Authority of New York and New Jersey (the Authority) and Marine Midland Bank, N.A. (Marine), to provide that the line of credit provided for in such agreement shall be available in connection with the extension of the Port Authority Commercial Paper Program, in an unlimited aggregate principal amount; provided, however, that the aggregate principal amount of borrowings thereunder outstanding at any one time shall not be in excess of Fifteen Million Dollars (\$15,000,000), and to execute and deliver a note or notes on substantially similar terms and in substantially the same form as set forth in such amendment and supplement; and it is further

RESOLVED, that the Executive Director; Chief Financial Officer; Assistant Executive Director; Treasurer or Assistant Treasurer of the Authority, or any of them, is hereby authorized to establish and maintain zero balance bank accounts with Marine to permit borrowings under the aforesaid line of credit; and it is further

RESOLVED, that so long as the line of credit is available or borrowings thereunder are outstanding, the total cumulative principal amount of Port Authority Commercial Paper Notes, together with any borrowings under the line of credit and any borrowings under the revolving credit agreement in connection with the Port Authority Commercial Paper Notes, outstanding at any one time during the continuance of the Port Authority Commercial Paper Program shall

continue not to be in excess of One Hundred Fifty Million Dollars (\$150,000,000); and it is further

RESOLVED, that in the event that a line of credit agreement is not executed with Marine, the Committee on Finance is hereby authorized to approve a stand-by line of credit agreement consistent with the provisions of this Resolution with an entity other than Marine and to establish zero balance bank accounts in connection therewith; and it is further

RESOLVED, that the form of any such amendment and supplement with Marine (or such other entity) shall be subject to the approval of General Counsel or his designated representative.

(Board - 11/14/85)

Port Authority Commercial Paper Program - Modification and Extension - Establishment of Bank Accounts

Pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director; Assistant Executive Director; Chief Financial Officer; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to continue to maintain a bank account in the name of The Port Authority of New York and New Jersey with Morgan Guaranty Trust Company of New York (Morgan) as partial compensation to Morgan for services rendered as issuing and paying agent under the Port Authority Commercial Paper Program as extended or, in the event Morgan does not continue as such issuing and paying agent, the Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Assistant Director, Finance Department; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to establish such a bank account as partial compensation for services rendered by such other issuing and paying agent; and it is further

RESOLVED, that the moneys on deposit in the aforesaid bank account shall not be in excess of \$50,000 (or such other amount as may be approved by the Committee on Finance) at any one time; and it is further

RESOLVED, that the form of any agreement with Morgan (or such other entity) shall be subject to the approval of General Counsel or his designated representative.

Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015 - Report

It was reported that gross capital expenditures were expected to total more than \$3 billion over the next several years. It is contemplated that scheduled projects authorized or to be authorized by the Board in connection with existing facilities of the Port Authority or those under study would make necessary the issuance of new debt obligations of the Port Authority over the next several years. Under these circumstances, and in view of the continuing volatility in the credit markets, it is desirable to continue to use diversified sources of financing while at the same time preserving and enhancing the acceptability of the principal means of such financing, the Port Authority's Consolidated Bonds. It is desirable for the Port Authority to continue its practice of financing portions of its capital expenditures through a combination of long-, intermediate- and short-term obligations. It is believed that these results may be accomplished in part by establishing and authorizing the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, as well as continuing and modifying the current Port Authority Commercial Paper Program (the "Program") established by the Board at its meeting on September 9, 1982, and extended and increased at its meeting on October 13, 1983. The Program is scheduled to terminate on December 31, 1985.

It was recommended that the Board establish and authorize the issuance of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015 ("VRDBs"), in an aggregate principal amount of up to \$200,000,000. It was further recommended that the Committee on Finance be authorized to sell and to deliver all or any part of such VRDBs in one or more installments or lots, at such time or times on or before June 30, 1986, as it deems propitious, at public or private sale, with or without advertisement. The recommended terms of the VRDBs were as follows:

Series: Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015.

Principal Amount: \$200,000,000.

Dated: Date of Issuance, on or after December 1, 1985.

Due: December 1, 2015; subject to tender, redemption or retirement.

Tender Option: VRDBs would be subject to purchase by the Tender and Paying Agent, upon demand of the registered holders thereof, on any business day,

on 7 calendar days' notice, until conversion, tender, redemption or retirement.

Call Provisions: At the Port Authority's option, on 30 days' notice, on June 1, 1986, and on any interest payment date thereafter at 100%, plus accrued interest.

To meet the schedule of mandatory periodic retirement, on 30 days' notice, on December 1, 2006, and on any December 1 thereafter at 100%, plus accrued interest.

To meet the provisions of accelerated mandatory retirement, on 30 days' notice, on June 1, 1986, and on any June 1 as required at 100%, plus accrued interest.

VRDBs held by the Port Authority, the Remarketing Agent or the Liquidity Facility on the date fixed for redemption would, at the option of the Port Authority be redeemed or retired prior to bonds held by any other registered holders.

Mandatory Periodic Retirement:

<u>Date</u>	<u>Cumulative Par Value</u>	<u>Date</u>	<u>Cumulative Par Value</u>
December 1, 2006	\$ 20,000,000	December 1, 2011	\$120,000,000
December 1, 2007	40,000,000	December 1, 2012	140,000,000
December 1, 2008	60,000,000	December 1, 2013	160,000,000
December 1, 2009	80,000,000	December 1, 2014	180,000,000
December 1, 2010	100,000,000	December 1, 2015	200,000,000

Accelerated Mandatory Retirement: Until the effective date of any conversion as described below, in the event that net revenues as defined in the Consolidated Bond Resolution, remaining after the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions and after the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve

Fund Statutes, for any calendar year calculated as of each December 31 fall below One Hundred Million Dollars (\$100,000,000), the Authority shall retire, on the next succeeding June 1, Variable Rate Demand Bonds in the aggregate principal amount of the lesser of Twenty Million Dollars (\$20,000,000) or the amount of Variable Rate Demand Bonds then outstanding, in accordance with the procedures set forth above in regard to redemption of Variable Rate Demand Bonds, applied to the schedule of mandatory period retirement.

Sinking Fund: A separate sinking fund would be required to be established for VRDBs into which payments shall be made in such amounts and in such times as to accomplish the schedule of mandatory periodic retirement.

Interest Rates and Interest Payable: Until conversion, tender, redemption or retirement, interest would be payable approximately monthly, as specified by the Committee on Finance, commencing on or about February 3, 1986, at the variable interest rate per annum for each Interest Calculation Period. The variable rate of interest for each Interest Calculation Period would be calculated by the Remarketing Agent as the minimum rate per annum, on a 365/366-day year, necessary to enable the Remarketing Agent to sell the VRDBs at par; provided, however, that, unless the Port Authority shall have given its consent in writing to the contrary, the variable rate shall not be greater than 110%, nor less than 90%, of a specified index maintained by the Independent Evaluator, and shall be rounded off to the nearest 1/8% or 1/20%. The Port Authority will immediately thereafter cause the Remarketing Agent to provide notice of the variable rate as calculated for each Interest Calculation Period to the Trustee, the Tender and Paying Agent, the Registrar and the Liquidity Facility.

Conversion: At the option of the Port Authority on a one-time basis, on 30 days' notice, VRDBs would be convertible to registered bonds maturing on December 1, 2015, bearing a fixed rate of interest, interest payable on each June 1 and December 1 thereafter, at a rate, not in excess of 15% per annum, calculated by the Remarketing Agent as the minimum rate per annum, on a 360-day year, necessary to enable the Remarketing Agent to sell

the bonds at par, without Liquidity Facility, accelerated mandatory retirement or tender option, in the denominations of \$5,000 or integral multiples of \$5,000; provided, however, that unless the Authority shall have given its consent in writing to the contrary, the fixed rate shall not exceed a specified fixed rate index maintained by the Independent Evaluator, and shall be rounded off to the nearest 1/8% or 1/10%. The fixed rate bonds would be subject to call to meet the schedule of mandatory retirement, or at the Port Authority's option. The Port Authority will immediately thereafter cause the Remarketing Agent to provide notice of such conversion and such fixed interest rate as calculated to the Trustee, the Tender and Paying Agent, the Registrar and the Liquidity Facility.

Registration and Denominations: Until conversion, VRDBs would be authorized to be in registered form, in the denominations of \$25,000 or integral multiples of \$5,000 in excess of \$25,000.

Security: The principal of and interest on VRDBs shall be a special limited obligation of the Port Authority payable solely from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such Net Revenues are insufficient therefor, from other moneys determined by the Authority to be legally available for such payments.

Revolving Credit and Stand-by Purchase Agreement: The Authority would enter into a line of credit agreement in the form of a revolving stand-by credit facility and stand-by purchase agreement with a bank or banks in the State of New York and/or the State of New Jersey in the amount of \$200,000,000 (plus \$2,000,000 as interest thereon) (referred to herein as the "Liquidity Facility"). The Liquidity Facility is to provide liquidity in the event any of the VRDBs cannot be remarketed and are not purchased by the Port Authority during a period to be specified subsequent to a demand for tender. The Port Authority would have the option to purchase the Tendered Bonds from either the Remarketing Agent or the Liquidity Facility.

Remarketing Agent: The managing underwriter. In addition to the general duties connected with the remarketing of bonds and the processing of

payments therefor, the Remarketing Agent would use its best efforts to avoid the need for the Port Authority to call upon the Liquidity Facility. To this end, the Remarketing Agent would be expected to make a market in VRDBs, purchasing and carrying Tendered Bonds for short periods of time in the expectation of prompt resale. However, the Remarketing Agent would commit itself to carry Tendered Bonds for a period to be specified by the Committee on Finance.

Although the principal of and interest on the Port Authority Commercial Paper Notes would be payable from the proceeds of Port Authority obligations issued for such purposes, the principal of and interest on VRDBs would be a special limited obligation of the Port Authority payable solely from Net Revenues deposited to the Consolidated Bond Reserve Fund pledged under the Basic Resolution establishing the issue of General and Refunding Bonds and the Consolidated Bond Resolution establishing the issue of Consolidated Bonds and remaining after (i) the payment or provision for payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Resolutions establishing such issues; (ii) the payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Statutes; and (iii) applications to purposes authorized in accordance with Section 7 of the Consolidated Bond Resolution.

The principal of and interest on VRDBs would not be payable from the Special Reserve Fund in Trust or the General Reserve Fund of the Port Authority, and the payment thereof would be subject in all respects to (i) the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the resolutions establishing such issues; and (ii) the payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Statutes.

So long as any VRDBs remain outstanding, the Port Authority would not apply any moneys in the Consolidated Bond Reserve Fund (except for payment of debt service becoming due on General and Refunding Bonds, Consolidated Bonds or VRDBs or as otherwise required by operation of law) in cumulative amounts exceeding \$500,000,000 in any period of two consecutive calendar years (or such other amounts over such other period as may be specified by the Committee on Finance prior to the sale of VRDBs), unless the Port Authority shall certify that such application will not, based on an estimate of revenues, operating expenses, debt service, reserves and capital expenditures (a copy of which certification and estimate shall be filed with the Trustee and the Liquidity Facility), materially impair the sound

credit standing of the Port Authority or the ability of the Port Authority to fulfill its commitments whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of VRDBs.

The proceeds of the VRDBs would be used for purposes of payment for capital expenditures in connection with any one or more of the facilities of the Port Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Port Authority and consistent with applicable provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the VRDBs to be used for any purpose for which at the time of issuance thereof the Port Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Port Authority certified or to be certified after such issuance.

In the event the Committee on Finance determines that the needs of the Port Authority for capital funds or the public interest require allocation or restriction of the proceeds of any of the VRDBs to purposes in connection with some but not all of these purposes, the Committee would be authorized, prior to the sale of any VRDBs from time to time, to make such allocation in regard to the expenditure of the proceeds of such VRDBs; provided, however, that no portion of the proceeds of any VRDBs shall be allocated to purposes in connection with an additional facility of the Port Authority prior to the initial expenditure of all or a portion of any of the proceeds of a series of Consolidated Bonds for purposes in connection with such additional facility.

It was reported to be necessary, in order to sell tax-exempt variable rate demand bonds, for issuers to have an outside credit source providing a revolving credit and stand-by purchase facility to ensure liquidity in the event, due to market conditions, such bonds cannot be remarketed when "put" back to the Port Authority. This is accomplished through either a bank letter of credit or a line of credit. In view of the Port Authority's continued strong financial rating, a line of credit in the form of a revolving credit and stand-by purchase facility would be sufficient.

VRDBs would utilize a Liquidity Facility of \$200,000,000 (plus \$2,000,000 as accrued interest on the VRDBs) which would be provided by Marine Midland Bank, N.A. ("Marine"), with the participation of additional banks in New York and New Jersey; Marine provides the current stand-by credit facility under the Port Authority Commercial Paper Program. The Liquidity Facility

would be provided for a fixed period of not less than five years, renewable thereafter from year to year unless cancelled by either party upon no less than six months' notice. The Committee on Finance would authorize an agreement with Marine on such terms, and in such other respects as appropriate in connection with VRDBs, as will best serve the Port Authority and the public interest. The principal of and interest on any advances through the Liquidity Facility would be repayable from the sources of payment and subject to the conditions described above for the VRDBs (except that advances would not be payable from the proceeds of VRDBs or Port Authority Commercial Paper Notes or from additional advances).

It was recommended that the Board provide that no part of the proceeds of the VRDBs shall be invested directly or indirectly in such manner as to cause the interest on VRDBs to be subject to Federal income taxes under the Internal Revenue Code of 1954, as amended, or the regulations promulgated thereunder.

In addition to the customary certifications, determinations, statements and other documents necessary or desirable in connection with the issuance of Port Authority obligations, the Committee on Finance; Chairman of the Port Authority; Vice Chairman of the Port Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Port Authority would be authorized expressly to certify on behalf of the Port Authority as to the need for issuance of the VRDBs, as to the status of the projects or purposes for which the proceeds of said VRDBs are to be used, as to the Port Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized.

In light of the ongoing discussions and review of VRDBs, and the unique nature of a competitive proposal for such obligations, it was recommended that the Committee on Finance be authorized, in connection with VRDBs, to take any other action as in the opinion of the Committee would best serve the public interest.

(Board - 11/14/85)

Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter referred to as the "Authority") has been authorized and empowered to issue bonds, notes, securities or other obligations or evidences of indebtedness to provide capital funds for the financing of its facilities; and

WHEREAS, the Authority has determined to establish and authorize an issue of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015, referred to herein as Variable Rate Demand Bonds (such term and any other terms of special meaning shall have the meanings as set forth in Article I of this Resolution), with an aggregate principal amount not to exceed Two Hundred Million Dollars (\$200,000,000); and

WHEREAS, the Authority has determined to authorize the sale, on or before June 30, 1986, of Variable Rate Demand Bonds, subject to the foregoing, with the proceeds derived from the sale thereof, from time to time, to be used for financing for any and all purposes for which the Authority is or shall be authorized to issue bonds, notes, securities or other obligations or evidences of indebtedness; and

WHEREAS, Variable Rate Demand Bonds shall be a special limited obligation of the Authority, payable as to principal and interest solely from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such Net Revenues are insufficient therefor, from other moneys determined by the Authority to be legally available for such payments; and

WHEREAS, except as provided herein the moneys of the Authority would not be pledged to the payment of interest on or the repayment of the principal of any Variable Rate Demand Bond; and

WHEREAS, the Authority is to authorize a Revolving Credit and Stand-by Purchase Agreement in further support, if necessary, of the payment of interest on or the repayment of the principal of any Tendered Bonds in accordance with the provisions of this Resolution;

NOW, THEREFORE, after due consideration had, be it resolved by The Port Authority of New York and New Jersey:

ARTICLE I

DEFINITIONS

As used in this Resolution and unless otherwise indicated or unless the context otherwise requires, the following terms shall have the following meanings (such meanings to be equally applicable to both the singular and plural forms of the defined terms). As used in this Resolution, any words or phrases specially defined in the Consolidated Bond Resolution shall be read and construed in accordance with such special definitions. All accounting terms not specially defined in this Resolution shall be construed in accordance with generally accepted accounting principles consistently applied.

The term "Authorized Officer" shall mean any of one of the persons holding the office or exercising the duties of Chairman; Vice-Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority, and any other person authorized by resolution of the Authority to perform the act or sign the document referred to.

The term "Basic Resolution" shall mean the resolution adopted by the Authority on March 18, 1935, as amended March 25, 1935, September 16, 1943, March 6, 1947 and October 23, 1947, establishing General and Refunding Bonds.

The term "Bond Advance" shall mean an advance of moneys made pursuant to the Revolving Credit and Stand-by Purchase Agreement in an amount not exceeding the Purchase Price for Tendered Bonds, if any.

The term "Bond Resolutions" shall mean (i) the Basic Resolution and (ii) the Consolidated Bond Resolution.

The term "Business Day" shall mean any day other than a day on which banks located in the City of New York are required or authorized to remain closed.

The term "Code" shall mean the Internal Revenue Code of 1954, as amended; the term "Regulations" shall mean the regulations issued or proposed thereunder; and the term "Section 103" shall mean Section 103 of the Code.

The term "Committee on Finance" shall mean the Committee on Finance of the Authority as the same may be constituted from time to time.

The term "Consolidated Bond Reserve Fund" shall mean the special fund by that name established by Section 7 of the Consolidated Bond Resolution.

The term "Consolidated Bond Resolution" shall mean the resolution adopted by the Authority on October 9, 1952, establishing Consolidated Bonds.

The term "Consolidated Bonds" shall mean the Authority's Consolidated Bonds (including Consolidated Notes) issued under the Consolidated Bond Resolution.

The term "Fixed Interest Index" shall mean that index determined by the Independent Evaluator on the day the fixed interest rate is to be calculated pursuant to Section 2.02 prior to conversion as provided for in Section 2.11 based on yield evaluations at par of securities of not less than twenty (20) issuers selected by the Independent Evaluator, which securities meet the following criteria: (i) the interest on such securities is exempt from Federal income taxation; (ii) the maturity (or remaining period to maturity) on such securities is approximately equal to the period to maturity on the Variable Rate Demand Bonds; and (iii) the rating of such securities by Moody's Investors Service, Inc., Standard & Poor's Corporation or Fitch Investors Service, Inc., is in a bond rating category which is the same as or equivalent to the rating category assigned to the Variable Rate Demand Bonds (without regard to any modification of a rating by the addition of a plus or minus or other numerical designation indicating relative standing within a rating category) or are otherwise determined by the Independent Evaluator to be of credit-worthiness comparable to that of the Variable Rate Demand Bonds.

The term "General and Refunding Bonds" shall mean the Authority's General and Refunding Bonds issued under the Basic Resolution.

The term "General Reserve Fund" shall mean the General Reserve Fund of the Authority authorized by the General Reserve Fund Statutes.

The term "General Reserve Fund Resolution" shall mean the resolution of the Authority adopted on March 9, 1931, as amended May 5, 1932, concerning the administration of the General Reserve Fund.

The term "General Reserve Fund Statutes" shall mean Chapter 5 of the Laws of New Jersey of 1931, as amended, and Chapter 48 of the Laws of New York of 1931, as amended.

The term "Independent Evaluator" (which shall include any successor Independent Evaluator) shall mean a nationally recognized municipal securities evaluation service or other entity appointed pursuant to Section 2.09 of this Resolution which is willing and able to accept the office and to perform the duties imposed upon it under this Resolution.

The term "Interest Calculation Period" shall mean the period of seven (7) consecutive days in each calendar week as fixed and provided for by the Committee on Finance; *provided, however,* that the initial Interest Calculation Period shall commence on the date of issuance of the Variable Rate Demand Bonds and shall continue to and include the final day of the Interest Calculation Period in the next succeeding calendar week.

The term "Interest Rate Index" shall mean that index determined by the Independent Evaluator on the day the variable rate is to be calculated for the next succeeding Interest Calculation Period as provided for in Section 2.02 based on yield evaluations at par of securities of not less than twenty (20) issuers selected by the Independent Evaluator, which securities meet the following criteria: (i) the interest on such securities is exempt from Federal income taxation; (ii) the maturity (or remaining period to maturity) on such securities is thirty (30) days or less; and (iii) the rating of such securities by Moody's Investors Service, Inc., Standard & Poor's Corporation or Fitch Investors Service, Inc., is in a bond, note or commercial paper rating category which is the same as or equivalent to the rating category assigned to the Variable Rate Demand Bonds (without regard to any modification of a rating by the addition of a plus or minus or other numerical designation indicating relative standing within a rating category) or are otherwise determined by the Independent Evaluator to be of credit-worthiness comparable to that of the Variable Rate Demand Bonds.

The term "Liquidity Facility" (which shall include any successor Liquidity Facility or portion thereof) shall mean the banks and trust companies participating in the Revolving Credit and Stand-by Purchase Agreement.

The term "Net Revenues" shall mean, solely for the purpose of this Resolution, with respect to any date of calculation, the revenues of the Authority pledged under the Bond Resolutions and remaining after (i) payment or provision for payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions; (ii) payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Statutes; and (iii) applications to purposes authorized in accordance with Section 7 of the Consolidated Bond Resolution.

The term "Notice of Tender" shall mean a written, irrevocable demand made by the registered holder of a Variable Rate Demand Bond or Bonds for the Tender and Paying Agent or Agents to purchase, in accordance with the provisions of this Resolution, the Variable Rate Demand Bond or Bonds specified in such Notice of Tender.

The term "Purchase Price" shall mean the principal amount of any Tendered Bond together with accrued and unpaid interest thereon, if any, to the date of purchase specified in a Notice of Tender.

The term "Registrar" (which shall include any successor Registrar) shall mean any bank or trust company appointed pursuant to Section 2.09 of this Resolution for and in connection with Variable Rate Demand Bonds.

The term "Remarketing Agent" (which shall include any successor Remarketing Agent) shall mean the remarketing agent for Variable Rate Demand Bonds appointed pursuant to Section 2.09 of this Resolution.

The term "Remarketing Agreement" shall mean the agreement between the Authority and the Remarketing Agent for Variable Rate Demand Bonds, as the same may be or may have been amended and supplemented from time to time.

The term "Revolving Credit and Stand-by Purchase Agreement" shall mean the agreement in support of the payment of the Purchase Price of any Tendered Bonds, if necessary, concerning, *inter alia*, Bond Advances, between the Authority and the Liquidity Facility, as the same may be or may have been amended and supplemented from time to time.

The term "Special Reserve Fund" shall mean the special fund by that name established by Section 9 of the Basic Resolution and subsequently placed in trust pursuant to the Trust Agreement.

The term "Special Reserve Fund in Trust" shall mean the Special Reserve Fund placed in trust pursuant to the Trust Agreement.

The term "Tender Account" shall mean the separate account maintained by the Authority with the Tender and Paying Agent or Agents for the payment of the Purchase Price of any Tendered Bonds pursuant to the provisions of this Resolution.

The term "Tender Agreement" shall mean the agreement between the Authority and any Tender and Paying Agent or Agents for Variable Rate Demand Bonds, as the same may be or may have been amended and supplemented from time to time.

The term "Tender and Paying Agent" (which shall include any successor Tender and Paying Agent) shall mean any bank or trust company appointed pursuant to Section 2.09 of this Resolution for and in connection with the tender, redemption and retirement of Variable Rate Demand Bonds, and the payment of interest thereon. Said bank or trust company shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it under this Resolution.

The term "Tendered Bond" shall mean a Variable Rate Demand Bond tendered to the Tender and Paying Agent in accordance with the provisions of Section 3.03 of this Resolution.

The term "Trust Agreement" shall mean the agreement made as of December 31, 1970, between the Authority and First National City Bank (now Citibank, N.A.), as Trustee.

(Board - 11/14/85)

The term "Trustee" (which shall include any successor Trustee) shall mean a bank or trust company appointed pursuant to Section 2.09 of this Resolution for and in connection with the Variable Rate Demand Bonds. Said bank or trust company shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it under this Resolution.

The term "Variable Rate Demand Bond Resolution" or "this Resolution" shall mean this Variable Rate Demand Bond Resolution, including any amendments, modifications or supplements hereto.

The term "Variable Rate Demand Bonds" shall mean the Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015, established and authorized by this Resolution.

ARTICLE II

AUTHORIZATION, TERMS AND ISSUANCE

SECTION 2.01. *Establishment and Authorization of Issue.* There is hereby established an issue of negotiable bonds of the Authority to be known as "Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015." Variable Rate Demand Bonds in an aggregate principal amount not to exceed Two Hundred Million Dollars (\$200,000,000) are hereby authorized to be issued and sold for the purposes set forth in Section 2.04 of this Resolution. Variable Rate Demand Bonds shall otherwise be subject to the terms, conditions and limitations provided or referred to in this Resolution or as may be provided or authorized by the Committee on Finance. Variable Rate Demand Bonds shall be a special limited obligation of the Authority payable solely from the sources of payment set forth in Section 2.03 of this Resolution.

SECTION 2.02. *General Terms of the Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015.* Variable Rate Demand Bonds shall be dated as of their date of issuance on or after December 1, 1985, shall mature on December 1, 2015, shall be numbered consecutively from 1 upwards and may bear such other identification as any Authorized Officer of the Authority may deem appropriate. Variable Rate Demand Bonds shall be issued in registered form without coupons, registered as to both principal and interest but not as to either alone, in the denomination of \$25,000 or in any larger denomination that is an integral multiple of \$5,000. Both principal of and interest on Variable Rate Demand Bonds shall be payable in lawful money of the United States of America. Principal of Variable Rate Demand Bonds and interest on Tendered Bonds or Variable Rate Demand Bonds called for redemption shall be payable at the office or offices, designated by the Authority, of the Tender and Paying Agent or Agents appointed for the purpose, in the City of New York, State of New York. Interest on the registered Variable Rate Demand Bonds other than Tendered Bonds or Variable Rate Demand Bonds called for redemption shall be payable when due to the registered holder thereof by check or draft drawn on the Tender and Paying Agent or Agents appointed for the purpose and mailed to said registered holder; *provided, however,* that interest may be paid in immediately available funds to any registered holder of at least Five Hundred Thousand Dollars (\$500,000) in aggregate principal amount of Variable Rate Demand Bonds at the request of such registered holder made in accordance with procedures prescribed therefor by the Tender and Paying Agent.

Subject to the changes and adjustments authorized in this Resolution, Variable Rate Demand Bonds shall bear interest from their date at the variable rate per annum for each Interest Calculation Period for such Variable Rate Demand Bonds. The variable rate for each Interest Calculation Period shall be calculated by the Remarketing Agent on the Business Day immediately preceding the first day of such Interest Calculation Period as the minimum rate per annum, computed on the basis of actual days elapsed and a 365/366-day year, necessary to enable the Remarketing Agent, under the then prevailing financial market conditions, to sell Variable Rate Demand Bonds at par (*i.e.*, at a price equal to the principal amount thereof); *provided, however,* that, unless the Authority shall have given its consent in writing to the contrary, the variable rate shall not be greater than one hundred ten per centum (110%), nor less than ninety per centum (90%), of the Interest Rate Index; and *provided, further,* that the variable rate shall be rounded off to the nearest one-eighth of one per centum ($\frac{1}{8}\%$) or one-twentieth of one per centum ($\frac{1}{20}\%$) per annum. Upon such calculation, the Authority will immediately thereafter cause the Remarketing Agent to provide notice of the variable rate as calculated for each Interest Calculation Period to the Trustee, the Tender and Paying Agent or Agents, the Registrar and the Liquidity Facility. Such determination and such rate

(Board - 11/14/85)

or rates shall be conclusive and binding for all purposes upon the holders of any Variable Rate Demand Bonds. Interest shall be payable approximately monthly, as may be authorized by the Committee on Finance, commencing on or about February 3, 1986, and thereafter until maturity or prior tender, redemption or conversion as herein provided.

The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for the purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of Variable Rate Demand Bonds. Each registered Variable Rate Demand Bond shall be transferable only upon such books by the registered holder thereof or by such registered holder's attorney duly authorized in accordance with the provisions of this Resolution.

A registered Variable Rate Demand Bond, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered Variable Rate Demand Bond or Bonds, registered as designated in such request, of any other authorized denominations of the same aggregate principal amount and of like tenor and effect as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of Variable Rate Demand Bonds as above provided shall be filed with the Registrar of the Authority; all Variable Rate Demand Bonds delivered in exchange as aforesaid shall be delivered by the Registrar of the Authority. All Variable Rate Demand Bonds surrendered to the Registrar of the Authority in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar of the Authority upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of Variable Rate Demand Bonds, including such fees as may be imposed by the Registrar of the Authority for such services performed by the Registrar as provided in this Resolution.

Except as provided below, Variable Rate Demand Bonds shall be redeemable, in whole or in part, at the option of the Authority, on thirty (30) days' notice at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to June 1, 1986. If less than all of the Variable Rate Demand Bonds then outstanding are to be called for redemption, the Variable Rate Demand Bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method); *provided, however*, that Variable Rate Demand Bonds held by the Authority, by the Remarketing Agent in accordance with the terms of the Remarketing Agreement or by the Liquidity Facility may, at the sole discretion of the Authority, be redeemed prior to Variable Rate Demand Bonds held by any other registered holders.

Notice of intention to redeem any Variable Rate Demand Bonds shall be given by the Authority by publication in one or more daily newspapers of general circulation in the City of New York, State of New York. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, to the registered holders of Variable Rate Demand Bonds to be called for redemption, at their last known addresses as appearing upon the books for registration kept by the Registrar of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said Variable Rate Demand Bonds.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Tender and Paying Agent or Agents an amount in cash in the aggregate sufficient to redeem all of the outstanding Variable Rate Demand Bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued and unpaid interest to the date fixed for redemption, if any, such amount to be held by the Tender and Paying Agent or Agents in trust for the account of the registered holders of the Variable Rate Demand Bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this Resolution. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office or offices of the Tender and Paying Agent or Agents designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Tender and Paying Agent or Agents in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after

(Board - 11/14/85)

the date fixed for their redemption, and such bonds shall not be entitled to the benefit or security of this Resolution, but shall rely solely upon the funds so deposited.

In the case of Variable Rate Demand Bonds of denominations greater than \$25,000, if less than all of the Variable Rate Demand Bonds then outstanding are to be called for redemption, then for all purposes in connection with such redemption, each \$25,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$25,000, and the word "bond" as used in the immediately preceding paragraph of this Section 2.02 shall be deemed to refer to such \$25,000 unit of face value. If it is determined as above provided that one or more but not all of the \$25,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$25,000 unit or units, the registered holder of said bond shall forthwith present said bond to the Registrar of the Authority who shall issue new bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to the provisions of this Resolution, including a new bond or bonds with the aggregate principal amount of the \$25,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder thereof. Notwithstanding anything in this Resolution to the contrary, if redemption of the \$25,000 unit or units of face value so called would result in a registered bond of a denomination not authorized under this Resolution, then such portion of the face value of such bond in excess of the \$25,000 unit or units of face value so called shall be redeemed to the extent necessary to avoid such result. If the registered holder of such bond of a denomination greater than \$25,000 shall fail to present such bond to the Registrar of the Authority for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the amount of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Tender and Paying Agent or Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such amount of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such amount of face value, but to that extent shall rely solely upon the funds so deposited.

The Authority shall establish and maintain a separate sinking fund for the retirement of Variable Rate Demand Bonds which shall be known as the "Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at December 1 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 2.02, determined in the manner provided in the next succeeding paragraph. Except as provided in the last paragraph of this Section 2.02, payments into said Sinking Fund may, at the sole discretion of the Authority, be made in Variable Rate Demand Bonds purchased or redeemed by the Authority, or held by the Remarketing Agent or the Liquidity Facility and purchased by the Authority, at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Variable Rate Demand Bonds so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and Variable Rate Demand Bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as Variable Rate Demand Bonds held by others. To be eligible for payment into said Sinking Fund each such Variable Rate Demand Bonds shall have theretofore actually been issued and negotiated by the Authority. Variable Rate Demand Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such Variable Rate Demand Bond. Upon payment into said Sinking Fund of said Variable Rate Demand Bonds so purchased or redeemed, said Variable Rate Demand Bonds shall be forthwith cancelled. All Variable Rate Demand Bonds which shall have been redeemed as provided in the seventh paragraph of this Section 2.02 shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said Variable Rate Demand Bonds shall have been presented for payment upon such redemption.

The schedule amount of Variable Rate Demand Bonds for each year shall be determined by multiplying the aggregate principal amount of all Variable Rate Demand Bonds theretofore issued (whether or not any of such Variable Rate Demand Bonds shall have theretofore been retired) by the cumulative percentage of total principal

(Board - 11/14/85)

amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 2.02; if the amount so determined shall not be a multiple of \$25,000, then the schedule for the year shall be the next higher multiple of \$25,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 15 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of Variable Rate Demand Bonds at October 15, 2006, and at October 15 of each year thereafter, in the manner and upon the notice set forth in the seventh paragraph of this Section 2.02, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption.

The following schedule of mandatory periodic retirement is provided for Variable Rate Demand Bonds:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2006	10	2011	60
2007	20	2012	70
2008	30	2013	80
2009	40	2014	90
2010	50	2015	100

Nothing herein contained shall be construed in any way to prevent the Authority from retiring Variable Rate Demand Bonds more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

Until the effective date of any conversion as specified in Section 2.11 of this Resolution, if net revenues, as defined in the Consolidated Bond Resolution, remaining after the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions and after the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes, for any calendar year calculated as of each December 31 fall below One Hundred Million Dollars (\$100,000,000), the Authority shall retire, on the next succeeding June 1, Variable Rate Demand Bonds in the aggregate principal amount of the lesser of Twenty Million Dollars (\$20,000,000) or the amount of Variable Rate Demand Bonds then outstanding. Any such retirement shall be in accordance with the procedures set forth in the seventh paragraph of this Section 2.02 in regard to redemption of Variable Rate Demand Bonds, applied to the schedule of mandatory periodic retirement.

SECTION 2.03. Sources of Payment. The principal of and interest on Variable Rate Demand Bonds shall be a special limited obligation of the Authority payable solely from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such Net Revenues are insufficient therefor, from other moneys determined by the Authority to be legally available for such payments when due.

The principal of and interest on Variable Rate Demand Bonds shall not be payable from the Special Reserve Fund in Trust or the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions; and (ii) the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes.

SECTION 2.04. Application of Proceeds. The proceeds of the Variable Rate Demand Bonds shall be used for purposes of payment for capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however,* that subject to agreements with the holders of obligations of the Authority and consistent with the provisions of the Code, whether in Section 103 or otherwise, or the Regulations, the Committee on Finance may authorize all or any portion of the unspent proceeds of Variable Rate Demand Bonds to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after such issuance.

In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the Variable Rate Demand Bonds to purposes in connection with some but not all of the purposes authorized in this Section 2.04, the Committee on Finance is hereby authorized, prior to the sale of any Variable Rate Demand Bonds from time to time, to make such allocation in regard to the expenditure of the proceeds of such Variable Rate Demand Bonds; *provided, however*, that no portion of the proceeds of any Variable Rate Demand Bonds shall be allocated to purposes in connection with an additional facility of the Authority prior to the initial expenditure of all or a portion of the proceeds of a series of Consolidated Bonds for purposes in connection with such additional facility. The adoption by said Committee of such a resolution prior to any such sale of Variable Rate Demand Bonds shall be sufficient to restrict the application of proceeds of Variable Rate Demand Bonds included in such sale to the purposes specified by the Committee on Finance in said resolution.

SECTION 2.05. *Authorization of Issuance.* Variable Rate Demand Bonds in the principal amount not to exceed Two Hundred Million Dollars (\$200,000,000) may be issued under the terms of this Resolution on or after December 1, 1985, but on or before June 30, 1986.

SECTION 2.06. *Appointment of Trustee.* The Committee on Finance is hereby authorized to appoint a Trustee for and in connection with the Variable Rate Demand Bonds. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the Variable Rate Demand Bonds against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of Variable Rate Demand Bonds. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of Variable Rate Demand Bonds. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 2.06 whether on the Trustee's initiative or at the request or direction of any of the holders of Variable Rate Demand Bonds.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond or other document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this Resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this Resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an Authorized Officer of the Authority, and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this Resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an Authorized Officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on obligations of the Authority, and (iii) the payments of principal on obligations of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

(Board - 11/14/85)

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Trustee, Tender and Paying Agent, Paying Agent and Registrar of bonds of the Authority, whether of Variable Rate Demand Bonds or otherwise, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this Resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of Variable Rate Demand Bonds then outstanding or by their attorneys duly authorized, excluding any Variable Rate Demand Bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of Variable Rate Demand Bonds then outstanding, excluding any Variable Rate Demand Bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of Variable Rate Demand Bonds as authorized in this Section 2.06. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of Variable Rate Demand Bonds.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this Resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

(Board - 11/14/85)

The failure of the Authority to take any action required by this Section 2.06 shall not invalidate any Variable Rate Demand Bond or Bonds issued pursuant to this Resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section 2.06 from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of Variable Rate Demand Bonds.

SECTION 2.07. *Transfer of Variable Rate Demand Bonds.* The Authority and the Tender and Paying Agent or Agents may treat the registered holder of any Variable Rate Demand Bond as the absolute owner of such Variable Rate Demand Bond for the purpose of receiving payment of the principal thereof and interest thereon and for all other purposes and neither the Authority nor the Tender and Paying Agent or Agents shall be affected by any notice or knowledge to the contrary.

SECTION 2.08. *Variable Rate Demand Bonds Mutilated, Lost, Destroyed or Stolen.* In case any Variable Rate Demand Bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new Variable Rate Demand Bond of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated Variable Rate Demand Bond or in lieu of or in substitution for such destroyed or lost Variable Rate Demand Bond; or if such Variable Rate Demand Bond shall have matured or been tendered, instead of issuing a substitute Variable Rate Demand Bond the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute Variable Rate Demand Bond shall furnish to the Authority evidence satisfactory to it of the destruction or loss of such Variable Rate Demand Bond and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute Variable Rate Demand Bond or make any such payment; or the Registrar of the Authority may so execute and deliver and the Tender and Paying Agent so make payment upon, in each case, the written request or authorization of the Authority. Upon the issuance of any substitute Variable Rate Demand Bond, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new Variable Rate Demand Bond so issued in substitution. Any Variable Rate Demand Bond issued under the provisions of this Section 2.08 in lieu of any Variable Rate Demand Bond alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the Variable Rate Demand Bond so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this Resolution with all other Variable Rate Demand Bonds issued hereunder.

SECTION 2.09. *Authorization of Sale.* The Committee on Finance is hereby authorized to sell all or any part of Variable Rate Demand Bonds at such price and on such terms and under such conditions as it deems appropriate, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, at one or more times on or after December 1, 1985, but on or before June 30, 1986, and to fix the terms and conditions upon which such sales shall be made, and to accept or reject offers in connection with such sales and to do so in the name of and on behalf of the Authority.

The Committee on Finance shall have power in the name of and on behalf of the Authority, in connection with Variable Rate Demand Bonds, to enter into any appropriate contracts or agreements concerning any sales; to fix the time or times and determine the terms and conditions of delivery of said Variable Rate Demand Bonds; to appoint one or more Tender and Paying Agents, a Remarketing Agent, a Registrar, a Trustee and an Independent Evaluator (including successors to each of the foregoing), and to enter into any appropriate contracts or agreements therewith, including the Tender Agreement, the Remarketing Agreement and the Revolving Credit and Stand-by Purchase Agreement; to provide appropriate procedures for the administration of the tender, payment of interest, retirement, redemption, conversion, call or other provisions related to Variable Rate Demand Bonds; to designate the office or offices of any Tender and Paying Agent or Agents at which payments shall be made and the office or offices of any Registrar at which the Registry Books of the Authority shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said Variable Rate Demand Bonds; prior to the issuance or conversion of the Variable Rate Demand Bonds, to change and adjust any dates or days provided for in this Resolution including the dates of issuance, maturity, interest payment, Interest Rate Index or Fixed Interest Index determination, interest rate calculation, Interest Calculation Periods, conversion, redemption, retirement,

(Board - 11/14/85)

call and sinking fund provisions; *provided, however*, that the date of maturity may not be later than December 31, 2015; prior to the issuance and conversion of the Variable Rate Demand Bonds, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire principal amount of Variable Rate Demand Bonds at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the Variable Rate Demand Bonds; prior to the issuance and conversion of the Variable Rate Demand Bonds, consistent with this paragraph, to change or adjust the provisions of the form of the bonds; to change or adjust the Interest Rate Index or, prior to conversion as herein provided, to change or adjust the Fixed Interest Index; to change and adjust the provisions for Tender contained in Article III of this Resolution; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance and conversion of Variable Rate Demand Bonds or for the purpose of determining whether all conditions precedent to their issuance and conversion exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee on Finance may be necessary or appropriate in connection with Variable Rate Demand Bonds or will best serve the public interest.

SECTION 2.10. *Distribution of Official Statement.* The Committee on Finance shall have power to authorize one or more official statements in the name and on behalf of the Authority, describing the Variable Rate Demand Bonds and the Authority and its financial condition, and making representations on behalf of the Authority. The Authority hereby authorizes the purchaser or purchasers of the Variable Rate Demand Bonds in offering such bonds for resale to use such official statement or statements and representations as those of the Authority.

SECTION 2.11. *Conversion of Interest Rate.* The Authority may exercise a one-time election to convert the rate of interest on the Variable Rate Demand Bonds from a variable rate to a fixed rate, to be calculated by the Remarketing Agent on the basis of the method set forth herein; and upon such exercise of such election the Variable Rate Demand Bonds so converted (referred to hereinafter in this Section 2.11 as "Bonds") shall bear interest at said fixed rate of interest commencing on the interest payment date specified in the notice of conversion, payable on each June 1 and December 1 thereafter until maturity on December 1, 2015, or prior redemption; *provided, further*, that Bonds once converted may not again be converted; *provided, further*, that on and after the date of conversion on the interest payment date specified in said notice Bonds so converted may no longer be tendered in accordance with the provisions of Article III of this Resolution. Notwithstanding such conversion, the sources of payment and security for the Bonds so converted shall be as specified in Section 2.03 of this Resolution, and except as otherwise provided in this Section 2.11, all other provisions of this Resolution shall apply to the Bonds so converted, subject to the changes, and adjustments authorized in this Resolution.

The fixed rate of interest to be borne by the Bonds so converted shall be calculated by the Remarketing Agent on or before the date specified in the notice of conversion provided by the Authority, in accordance with this Section 2.11, as the minimum rate per annum, computed on the basis of a 360-day year, necessary to enable the Remarketing Agent, under the then prevailing financial market conditions, to sell such Bonds at par (*i.e.*, at a price equal to the principal amount thereof); *provided, however*, that, unless the Authority shall have given its consent in writing to the contrary, the fixed rate of interest shall not exceed the Fixed Interest Index; and *provided, further*, that the fixed rate of interest shall be rounded off to the nearest one-eighth of one per centum ($\frac{1}{8}\%$) or one-tenth of one per centum ($\frac{1}{10}\%$).

On not less than thirty (30) days' notice prior to any interest payment date, notice of intention to exercise this election to convert the rate of interest and, on or before the date fixed for such conversion, notice of the fixed rate of interest to be borne by the Bonds from and after such date, shall be given by the Authority by publication in one or more daily newspapers of general circulation in the City of New York, State of New York. A copy of such notice or notices shall also be mailed by the Authority or the Registrar, as the Authority may elect, to the registered holders of Variable Rate Demand Bonds, at their last known addresses as appearing upon the Registry Books of the Authority and to the Trustee, the Tender and Paying Agent or Agents, the Registrar of the Authority and the Liquidity Facility.

On and after the date of conversion on the interest payment date specified in said notice, the Liquidity Facility shall be terminated and the registered holders of the Bonds so converted, shall be required to present Variable Rate Demand Bonds to the Registrar of the Authority for endorsement; Bonds shall be in the denominations of \$5,000 or integral multiples of \$5,000, and shall be in registered form, registered as to both principal and interest but not as to either alone. In the event that the Authority exercises its conversion election as provided in this Section 2.11, any Authorized Officer of the Authority is authorized, at the time such election to convert is exercised, to modify the form of the Bonds appearing in Section 4.01 of this Resolution; *provided, however*, that all expenses in connection with such modification, presentation for endorsement and registration thereafter shall be borne by the Authority.

In the event of a failure by the registered holder of any Variable Rate Demand Bond to present such Bond to the Registrar for exchange or endorsement as aforesaid on or prior to the date fixed for conversion on the interest payment date specified in said notice, such Bond will be deemed presented and such registered holder shall not be entitled to any benefits of this Resolution on such Bond, except as may be provided for Variable Rate Demand Bonds so converted.

At the time of the exercise of an election to convert the rate of interest, the Authority shall provide, or cause to be provided, to the Tender and Paying Agent, the Registrar of the Authority and the Trustee an opinion of a nationally recognized Bond Counsel to the effect that such conversion is authorized or permitted under this Resolution, and that such conversion will not adversely affect the exemption from Federal income taxation of the interest on such Bonds.

ARTICLE III

TENDER

SECTION 3.01. *Establishment of the Tender Account.* There is hereby established a Tender Account to be held and maintained by the Tender and Paying Agent or Agents for the account of the Authority in accordance with the terms of this Resolution.

SECTION 3.02. *Deposits to and Disbursements from the Tender Account.* There shall be deposited into the Tender Account the proceeds from the remarketing of Tendered Bonds by the Remarketing Agent, all Bond Advances, such amounts as the Authority may elect to deposit from Net Revenues or other funds determined by the Authority to be legally available for such deposit, and such other amounts as the Remarketing Agent may deposit. Disbursements from the Tender Account shall be made to purchase Tendered Bonds in accordance with the provisions of this Resolution and upon the direction of any Authorized Officer of the Authority.

SECTION 3.03. *Tender of Variable Rate Demand Bonds.* Until the effective date of a conversion of the variable interest rate to a fixed interest rate in accordance with the provisions of Section 2.11 of this Resolution, any Variable Rate Demand Bonds, or portion thereof, in any authorized denomination of \$25,000 or more, shall be purchased upon the demand of the registered holder thereof. Said demand shall be made by:

(i) Delivery to the office or offices, designated by the Authority, of the Tender and Paying Agent or Agents in the City of New York, State of New York, of a Notice of Tender in form satisfactory to the Authority and its Tender and Paying Agent or Agents, not less than seven (7) calendar days prior to the Business Day of purchase specified in said Notice of Tender; and

(ii) Delivery to said office or offices of such Tendered Bond or Bonds as specified in said Notice of Tender, at or prior to the time to be specified by the Tender and Paying Agent on the Business Day of purchase specified in said Notice of Tender.

The Tender and Paying Agent shall notify the Registrar of the Authority, the Remarketing Agent and the Liquidity Facility immediately upon receipt of such a Notice of Tender. On or before the Business Day specified in each Notice of Tender at the option of the Authority, the Authority will deposit or cause to be deposited in the Tender Account in accordance with Section 3.02 of this Resolution, and in accordance with the Remarketing Agreement and the Revolving Credit and Stand-by Purchase Agreement, an amount in cash equal to the Purchase Price for the Tendered Bonds specified in such Notice of Tender. On and after the date specified in each Notice

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes. This bond is also issued pursuant to the Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015 Resolution adopted by the Authority on November 14, 1985 (the "Resolution"); Section 2.03 of the Resolution provides that the principal of and interest on this bond shall be a SPECIAL LIMITED OBLIGATION of the Authority payable solely from Net Revenues deposited to the Consolidated Bond Reserve Fund (as defined in the Resolution), and in the event such Net Revenues are insufficient therefor, from other moneys determined by the Authority to be legally available for such payments when due. The principal of and interest on this bond shall not be payable from the Special Reserve Fund in Trust or the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions; and (ii) the payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Resolution. A copy of the Resolution, which is a contract between the Authority and the registered holder of this bond, subject to modification as therein provided, is on file with the Tender and Paying Agent at the above address.

This bond shall not be entitled to any security, right or benefit pursuant to the Resolution or be valid or obligatory for any purpose unless duly countersigned by the Registrar of the Authority.

The Authority has appointed a Trustee for and in connection with the Variable Rate Demand Bonds as provided by the Resolution.

The variable interest rate on this bond for each Interest Calculation Period shall be calculated weekly by the Remarketing Agent as the minimum rate per annum necessary to enable the Remarketing Agent, under the then prevailing financial market conditions, to sell Variable Rate Demand Bonds at par (*i.e.*, at a price equal to the principal amount hereof); provided, however, that, unless the Authority shall have given its consent in writing to the contrary, the variable rate shall not be greater than one hundred ten per centum (110%), nor less than ninety per centum (90%), of the Interest Rate Index established by _____, the Independent Evaluator; provided, further, that the variable rate shall be rounded off to the nearest one-eighth of one per centum ($\frac{1}{8}\%$) or one-twentieth of one per centum ($\frac{1}{20}\%$) per annum. Upon such calculation, the Authority will immediately thereafter cause the Remarketing Agent to provide notice thereof to the Trustee, the Tender and Paying Agent or Agents, the Registrar and the Liquidity Facility. Such determination and such rate or rates shall be conclusive and binding for all purposes upon the holders of any Variable Rate Demand Bonds.

Until the effective date of a conversion of the variable interest rate to a fixed interest rate as described below, this bond shall be purchased upon the demand of the registered holder by:

(i) Delivery to the office or offices, designated by the Authority, of the Tender and Paying Agent or Agents in the City of New York, State of New York, of a written, irrevocable Notice of Tender in form satisfactory to the Authority and its Tender and Paying Agent or Agents, not less than seven (7) calendar days prior to the Business Day of purchase specified in said Notice of Tender; and

(ii) Delivery to said office or offices of such Tendered Bond or Bonds as specified in said Notice of Tender, at or prior to _____ p.m., New York City time, on the Business Day of purchase specified in said Notice of Tender.

The Tender and Paying Agent or Agents shall notify the Registrar of the Authority, the Remarketing Agent and the Liquidity Facility immediately upon receipt of such a Notice of Tender. On or before the Business Day specified in each Notice of Tender, at the option of the Authority, the Authority will deposit or cause to be deposited in the Tender Account in accordance with the Resolution, and in accordance with the Remarketing Agreement and the Revolving Credit and Stand-by Purchase Agreement an amount in cash equal to the outstanding principal amount thereof, together with accrued and unpaid interest thereon, if any, to the date specified in such Notice of Tender. On and after the date specified, if funds sufficient therefor shall have been deposited in the Tender Account as aforesaid, then and in any such event, interest shall cease to accrue on this bond from and after such date specified for purchase in each Notice of Tender, and this bond shall not be entitled to the benefit or security of the Resolution, but shall rely solely upon the funds so deposited.

In accordance with the Resolution, on not less than thirty (30) days' notice prior to any interest payment date, the Authority may exercise a one-time election to convert the rate of interest on the Variable Rate Demand Bonds

(Board § 11/14/85)

from a variable rate to a fixed rate, to be calculated by the Remarketing Agent on the basis of the method set forth therein; and upon such exercise of such election this bond shall bear interest at said fixed rate of interest commencing on the interest payment date specified in said notice, payable on each June 1 and December 1 thereafter until maturity on December 1, 2015, or prior redemption; *provided, however*, that this bond once converted may not again be converted; and *provided, further*, that on and after the date of conversion on the interest payment date specified in said notice this bond may no longer be tendered as described above. Notwithstanding such conversion, the sources of payment and security for this bond shall be as specified above.

The fixed rate of interest to be borne by this bond so converted shall be calculated by the Remarketing Agent on or before the date specified in the notice of conversion provided by the Authority, as the minimum rate per annum necessary to enable the Remarketing Agent, under the then prevailing financial market conditions, to sell this bond at par (*i.e.*, at a price equal to the principal amount hereof); *provided, however*, that, unless the Authority shall have given its consent in writing to the contrary, the fixed rate of interest shall not exceed the Fixed Interest Index established by the Independent Evaluator; *provided, further*, that such rate shall be rounded off to the nearest one-eighth of one per centum ($\frac{1}{8}\%$) or one-tenth of one per centum ($\frac{1}{10}\%$).

On not less than thirty (30) days' notice prior to any interest payment date, notice of intention to exercise this election to convert the rate of interest and, on or before the date fixed for such conversion, notice of the fixed rate of interest to be borne by this bond from and after such date, shall be given by the Authority by publication in one or more daily newspapers of general circulation in the City of New York, State of New York. A copy of such notice or notices shall also be mailed by the Authority or the Registrar, as the Authority may elect, to the registered holders of Variable Rate Demand Bonds, at their last known addresses as appearing upon the Registry Books of the Authority and to the Trustee, the Tender and Paying Agent or Agents, the Registrar of the Authority and the Liquidity Facility.

On and after the date of conversion on the interest payment date specified in said notice, the Liquidity Facility shall be terminated and the registered holders of this bond shall be required to present it to the Registrar for exchange or endorsement. Bonds shall be authorized in the denomination of \$5,000 or integral multiples of \$5,000, and shall be in registered form, registered as to both principal and interest but not as to either alone.

At the time of the exercise of an election to convert the rate of interest to a fixed rate, the Authority shall provide, or cause to be provided, to the Tender and Paying Agent, the Registrar and the Trustee an opinion of a nationally recognized Bond Counsel to the effect that such conversion is authorized or permitted under the Resolution, and that such conversion will not adversely affect the exemption from Federal income taxation of the interest on this bond.

In the event of a failure by the registered holder of this bond to present this bond to the Registrar for exchange or endorsement as aforesaid on or prior to the date fixed for conversion on the interest payment date specified in said notice, this bond will be deemed presented and such registered holder shall not be entitled to any benefits of the Resolution on this bond, except as may be provided for bonds so converted.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the Resolution. The Variable Rate Demand Bonds are issuable only in the form of registered bonds without coupons in the denominations of \$25,000 or integral multiples of \$5,000 in excess of \$25,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the Resolution for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of Variable Rate Demand Bonds including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with December 1, 2006, to satisfy the requirements of the schedule of mandatory periodic retirement provided for Variable Rate Demand Bonds in and pursuant to said Resolution at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to June 1, 1986, at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption.

(Board - 11/14/85)

Until the effective date of any conversion of the variable rate to a fixed rate as described above, in the event that net revenues, as defined in the Consolidated Bond Resolution, remaining after the payment of debt service on General and Refunding Bonds and Consolidated Bonds as required by the applicable provisions of the Bond Resolutions and after the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes, for any calendar year calculated as of each December 31 fall below One Hundred Million Dollars (\$100,000,000), the Authority shall retire, on the next succeeding June 1, Variable Rate Demand Bonds in the aggregate principal amount of the lesser of Twenty Million Dollars (\$20,000,000) or the amount of Variable Rate Demand Bonds then outstanding, in accordance with the procedures set forth above in regard to redemption of Variable Rate Demand Bonds, applied to the schedule of mandatory periodic retirement.

If less than all the Variable Rate Demand Bonds then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York. A copy of such notice shall also be mailed to the registered holder of this bond at his last known address as appearing on the books for registration kept by the Registrar of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Tender and Paying Agent or Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the Resolution but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$25,000, and if less than all of the Variable Rate Demand Bonds are to be called for redemption, then for all purposes in connection with redemption, each \$25,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$25,000, and the word "bond" as used in the foregoing provisions shall be deemed to refer to such \$25,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$25,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$25,000 unit or units, the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the Resolution, including a new bond or bonds with the aggregate principal amount of the \$25,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. Notwithstanding anything in the Resolution to the contrary, if redemption of the \$25,000 unit or units of face value so called would result in a registered bond of a denomination not authorized under the Resolution, then such portion of the face value of such bond in excess of the \$25,000 unit or units of face value so called shall be redeemed to the extent necessary to avoid such result. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the amount of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Tender and Paying Agent or Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such amount of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such amount of face value, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for Variable Rate Demand Bonds by the Resolution.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or to be performed, precedent to and in the issuance of this bond exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New

(Board - 11/14/85)

Jersey and the Compact creating the Authority and the resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or resolutions of the Authority.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer and its official seal to be affixed hereto, or facsimiles thereof to be printed hereon, and this bond to be dated as of the _____ day of December, 1985.

SECTION 4.02. *Execution of Variable Rate Demand Bonds.* In case any Authorized Officer of the Authority who shall have signed any of the Variable Rate Demand Bonds shall cease to be such Authorized Officer before the Variable Rate Demand Bonds shall have been authenticated by the Registrar of the Authority, the Variable Rate Demand Bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such Authorized Officer of the Authority.

ARTICLE V

COVENANTS

The Authority hereby covenants and agrees with the registered holder of each of the Variable Rate Demand Bonds as follows:

(a) The Authority shall duly and punctually pay or cause to be paid the principal of and interest on the Variable Rate Demand Bonds, as specified therein.

(b) Upon the date of issuance or conversion of the Variable Rate Demand Bonds, all conditions, acts and things required by the Constitutions or statutes of the States of New York and New Jersey, or the United States of America, or the Bond Resolutions, or this Resolution to exist, to have happened and to have been performed precedent to or in the issuance of such Variable Rate Demand Bonds shall exist, have happened and have been performed and such Variable Rate Demand Bonds, together with all other indebtedness of the Authority, shall be within every debt and other limit prescribed thereby.

(c) The Authority shall do and perform or cause to be done and performed all acts and things required to be done or performed by or on behalf of the Authority under the provisions of this Resolution in accordance with the terms of such provisions.

(d) So long as any Variable Rate Demand Bonds remain outstanding, the Authority shall not apply any moneys in the Consolidated Bond Reserve Fund (except for payment of debt service becoming due on General and Refunding Bonds, Consolidated Bonds or Variable Rate Demand Bonds or as otherwise required by operation of law) in cumulative amounts exceeding Five Hundred Million Dollars (\$500,000,000) in any period of two (2) consecutive calendar years (or such other amount over such other period as the Committee on Finance may specify prior to the issuance and sale of the Variable Rate Demand Bonds), unless the Authority shall first certify that such application will not, based on an estimate by the Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority, of revenues, operating expenses, debt service, reserves and capital expenditures (a copy of which certification and estimate shall be filed with the Trustee and the Liquidity Facility), materially impair the sound credit standing of the Authority or the ability of the Authority to fulfill its commitments whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Variable Rate Demand Bonds.

ARTICLE VI

MISCELLANEOUS

SECTION 6.01. *Contract.* The provisions of this Resolution shall constitute a contract with the registered holders of the Variable Rate Demand Bonds issued pursuant to this Resolution, and with each such registered holder.

SECTION 6.02. *Amendments.* The Authority may modify or amend this Resolution or any agreement authorized by this Resolution at any time by a supplemental resolution or agreement, as applicable, without notice to or the consent of any registered holder of the Variable Rate Demand Bonds, but only in regard to such provisions as shall not materially and adversely affect the interests of such registered holders of the Variable Rate Demand Bonds then outstanding.

SECTION 6.03. *Liability.* No Commissioner, Authorized Officer, officer, agent, representative or employee of the Authority shall be held personally liable to any purchaser or registered holder of any of the Variable

(Board - 11/14/85)

Rate Demand Bonds under or upon such Variable Rate Demand Bonds, or under or upon this Resolution or any resolution hereafter adopted relating to the Variable Rate Demand Bonds, or because of the issuance or attempted issuance of any of the Variable Rate Demand Bonds, or because of any act or omission in connection with the construction, acquisition, effectuation, operation or maintenance of any facility of the Authority, or because of any act or omission in connection with the investment or management of the revenues, funds or moneys of the Authority, or otherwise in connection with the management of its affairs, excepting solely for things wilfully done with an intent to defraud or wilfully omitted to be done with an intent to defraud.

SECTION 6.04. *Investment of Proceeds.* The moneys derived from the sale of Variable Rate Demand Bonds shall from time to time be deposited in such depositories as the Authority may designate or invested in obligations of (or fully guaranteed by) the United States; *provided, however*, that such obligations shall mature not later than the date upon which the Authority intends to apply the proceeds so invested for the purposes for which such Variable Rate Demand Bonds were issued. No part of the proceeds of any of the Variable Rate Demand Bonds shall be invested directly or indirectly in such manner as to cause the interest on such Variable Rate Demand Bonds to be subject to Federal income taxes under the Code, whether under Section 103 or otherwise, or the Regulations.

SECTION 6.05. *Certifications.* The Committee on Finance or any Authorized Officer of the Authority is, and they each are, hereby authorized in connection with the Variable Rate Demand Bonds to take any action which may be necessary or desirable to assure that such Variable Rate Demand Bonds are in conformity with the provisions of the Code and the Regulations, and any such actions taken in connection therewith are hereby ratified. Any Authorized Officer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the Variable Rate Demand Bonds for the purposes for which such Variable Rate Demand Bonds are issued, as to the status of the projects for which the proceeds of said bonds would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by this Resolution or the Committee on Finance.

SECTION 6.06. *Determinations.* Whenever in this Resolution it is provided that any selection, designation, determination or estimate shall or may be made by an individual duly authorized by this Resolution, or that any action may be taken or withheld by such individual or that any action shall or may be taken or withheld at the option of or dependent upon the opinion, discretion or judgment of such individual, then such individual's selection, designation, determination, estimate, action, option, opinion, discretion or judgment so expressed shall be conclusive for the purposes of this Resolution, whether required to be made, taken or withheld as a condition precedent to the issuance of any of the Variable Rate Demand Bonds or for the purpose of determining if all conditions precedent to the issuance of any such bond exist, or otherwise as in the opinion of such individual will best serve the public interest, the Authority hereby adopting such selection, designation, determination, estimate, action, option, opinion, discretion or judgment so expressed as its own.

SECTION 6.07. *Titles.* Titles to the Articles and Sections of this Resolution are solely for convenience, and are not an aid in the interpretation of this Resolution or any part thereof.

(Board - 11/14/85)

Consolidated Bonds, Fifty-fifth Series and Fifty-sixth Series - Report

It was reported that gross capital expenditures were expected to total more than \$3 billion over the next several years. Under present circumstances it is desirable for the Authority to continue its practice of financing a portion of its capital expenditures through a combination of long-, intermediate- and short-term obligations.

Authorization is being sought at this time for the issuance of up to \$200 million in aggregate principal amount of each of two series of Consolidated Bonds which, when combined with other existing or pending authorizations, would permit capital funds to be obtained from time to time upon the most favorable terms to the Authority. Prior to the sale of any of the foregoing obligations, the Authority would take any necessary or appropriate actions, as provided for in the Internal Revenue Code of 1954, as amended.

It was recommended that the Board establish Consolidated Bonds, Fifty-fifth Series, Due 2021, and Consolidated Bonds, Fifty-sixth Series, Due 2021, and that the Board authorize the issuance of up to \$200 million in aggregate principal amount of each such Series of Bonds. It was further recommended that the Committee on Finance be authorized to sell and to deliver all or any part of each such Series of Bonds at such time or times on or before December 31, 1986, as it deems propitious, in one or more installments at public or private sale, bearing interest at a rate or rates including fixed or variable rates or a combination thereof or without a stated rate of interest for each such Series, to be fixed by the Committee, but in any event not in excess of 15% per annum.

The proceeds of each of such Series of Bonds would be authorized, subject to allocation and restriction by the Committee on Finance:

(a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of each such Series of Bonds to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of each of such Series of Bonds; (b) for the purpose of refunding, at or before maturity, all or any

part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of each of such Series of Bonds; and (c) for the purpose of refunding, in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

It was also recommended that the Board authorize the Committee on Finance to designate and appoint one or more Paying Agents, a Registrar and a Trustee in connection with each of such Series of Bonds, as appropriate.

It was further recommended that the Board provide that no part of the proceeds of each of such Series of Bonds shall be invested directly or indirectly in such a manner as to cause the interest on each of such Series of Bonds to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

It was recommended that certification on behalf of the Authority as to the need for the issuance of each of such Series of Bonds, as to the status of the projects for which the proceeds of said Bonds are to be used, as to the Authority's intentions with respect to the application and investment of such proceeds and as to such other related matters as may be authorized by the Committee on Finance may be made by the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority, and any action which may be necessary or desirable in connection with said Bonds to assure such Bonds are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, may be taken by any one of the foregoing and that any such actions taken in connection therewith be ratified.

The Bonds of the Fifty-fifth and Fifty-sixth Series would be dated as of April 1, 1986 and October 1, 1986, respectively, mature April 1, 2021 and October 1, 2021, respectively, and bear interest at a rate or rates including fixed or variable rates or a combination thereof or without a stated rate of interest, to be fixed by the Committee on Finance not in excess of 15% per annum, shall be sold at a price resulting in a net interest cost to the Authority for each such Series of Bonds not in excess of 15% per annum. A sinking fund would be established for each Series of Bonds to meet the requirements of a schedule of mandatory periodic retirement commencing in 1996 for each such Series of Bonds to completely retire each Series at or prior to its respective maturity, for which purpose the Bonds would be callable for redemption prior to

maturity at 100%. The Bonds of each Series would also be subject to redemption, at the option of the Authority, in whole or in part, commencing in 1996 for each such Series of Bonds, at prices beginning at 103% and descending to 100%.

The Bonds would be issued in registered form, registered as to both principal and interest and not as to either alone. The Bonds would be issued in denominations of \$5,000 or integral multiples of \$5,000.

It was recommended that the Committee on Finance of the Authority be authorized (i) prior to the issuance of the first installment of the Bonds of each Series, to change the date as of which the Bonds of such series shall be dated to any date on or before December 31, 1986, and, if the date as of which the Bonds of such Series shall be dated is so changed and the Bonds bear a stated rate or rates of interest, the Committee would change by the same number of days the respective dates on which interest on the Bonds of such Series would be payable; (ii) prior to the issuance of any installment of the Bonds of each Series, to change the date at which any of the Bonds of that installment would mature; provided, that said date or dates would not be more than thirty-five years from the date as of which the Bonds of such Series are dated; (iii) prior to the issuance of the first installment of the Bonds of each Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the Bonds of such Series; (iv) prior to the issuance of the first installment of the Bonds of each Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the Bonds of such Series; (v) prior to the issuance of the first installment of the Bonds of each Series, to reduce the percentages of face value relating to the optional call provisions for the Bonds of such Series; (vi) prior to the issuance of the first installment of the Bonds of each Series, to provide for the Bonds of each Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; and (vii) prior to the issuance of any installment of the Bonds of each Series, consistent with the foregoing, to change or adjust the provisions of the Bonds of such installment thereof to permit the issuance of such Bonds or installments with a fixed or variable interest rate or rates or a combination thereof.

(Board - 11/14/85)

Consolidated Bonds, Fifty-fifth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as the "Fifty-fifth Series, Due 2021," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of the Fifty-fifth Series, Due 2021, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments as the Authority may hereafter determine.

The bonds of this Series shall be dated as of April 1, 1986, shall mature on April 1, 2021, and shall bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, from the semi-annual interest payment date next preceding their date of issue, or if such date of issue shall be an interest payment date, from such date of issue, not exceeding fifteen per centum (15%) per annum, as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed or variable rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on October 1, 1986, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), or the regulations promulgated thereunder, which does not provide that, for the

(Board - 11/14/85)

interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance shall and it is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to April 1, 1996, and prior to maturity, as follows:

At one hundred three per centum (103%) of their face value, plus accrued interest to the date fixed for redemption, at April 1, 1996, and thereafter and at or prior to April 1, 1998; at one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2001; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2004; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2020.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium, (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

(Board - 11/14/85)

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-fifth Series, Due 2021, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 1 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to August 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to August 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to October 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of August 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on August 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at October 1, 1996, and at October 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 1996, and thereafter and at or prior to October 1, 2020.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1996	0.5	2009	25.0
1997	1.0	2010	30.0
1998	1.5	2011	35.0
1999	2.0	2012	41.0
2000	3.0	2013	47.0
2001	4.0	2014	53.0
2002	5.5	2015	59.0
2003	7.0	2016	65.0
2004	9.0	2017	72.0
2005	11.0	2018	79.0
2006	14.0	2019	86.0
2007	17.0	2020	93.0
2008	21.0	2021	100.0

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and

(Board - 11/14/85)

having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depositary for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors

(Board - 11/14/85)

to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer

sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-FIFTH SERIES, DUE 2021**

No. C(55)-

Maturity Date: April 1, 2021 Interest Rate:% Per Annum Dated: April 1, 1986 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of April, 2021, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on October 1, 1986, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of November 14, 1985, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

(Board - 11/14/85)

This bond may be redeemed at October 1 of any year prior to maturity beginning with 1996 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at October 1, 1996, and thereafter and at or prior to October 1, 2020.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to April 1, 1996, as follows:

At one hundred three per centum (103%) of its face value, plus accrued interest to the date fixed for redemption, at April 1, 1996, and thereafter and at or prior to April 1, 1998; at one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2001; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2004; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2020.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the

(Board - 11/14/85)

date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of April, 1986.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1986, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the bonds of this Series; (iv) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the bonds of this Series; (v) prior to the issuance of the first installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for the bonds of this Series; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing,

(Board - 11/14/85)

to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or any coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

(Board - 11/14/85)

Consolidated Bonds, Fifty-fifth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 14th day of November, 1985, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as the "Fifty-fifth Series, Due 2021" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds of the Authority of the Fifty-fifth Series, Due 2021, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the Fifty-fifth Series.

SECTION 3. The bonds of this Series shall be numbered upward from C(55)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding, in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to

(Board - 11/14/85)

(475)

restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

(Board - 11/14/85)

Consolidated Bonds, Fifty-fifth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, constituting the Fifty-fifth Series, Due 2021 (hereinafter called the "bonds of this Series"), at a price which will result in a net interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1986, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series.

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1986, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the purchaser or purchasers in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

SECTION 6. The Committee or any member thereof; the Chairman of the Authority; Vice Chairman of the Authority; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department;

(Board - 11/14/85)

(477)

Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee.

Consolidated Bonds, Fifty-sixth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as the "Fifty-sixth Series, Due 2021," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of the Fifty-sixth Series, Due 2021, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments as the Authority may hereafter determine.

The bonds of this Series shall be dated as of October 1, 1986, shall mature on October 1, 2021, and shall bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, from the semi-annual interest payment date next preceding their date of issue, or if such date of issue shall be an interest payment date, from such date of issue, not exceeding fifteen per centum (15%) per annum, as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed or variable rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on April 1, 1987, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), or the regulations promulgated thereunder, which does not provide that, for the

(Board - 11/14/85)

interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance shall and it is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to October 1, 1996, and prior to maturity, as follows:

At one hundred three per centum (103%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 1996, and thereafter and at or prior to October 1, 1998; at one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2001; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2004; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

(Board - 11/14/85)

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium, (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-sixth Series, Due 2021, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at July 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to August 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to August 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to October 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of August 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on August 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at October 1, 1996, and at October 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 1996, and thereafter and at or prior to October 1, 2020.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1996	0.5	2009	25.0
1997	1.0	2010	30.0
1998	1.5	2011	35.0
1999	2.0	2012	41.0
2000	3.0	2013	47.0
2001	4.0	2014	53.0
2002	5.5	2015	59.0
2003	7.0	2016	65.0
2004	9.0	2017	72.0
2005	11.0	2018	79.0
2006	14.0	2019	86.0
2007	17.0	2020	93.0
2008	21.0	2021	100.0

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at

(Board - 11/14/85)

least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depositary for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-SIXTH SERIES, DUE 2021**

No. C(56)-

Maturity Date: October 1, 2021 Interest Rate:% Per Annum Dated: October 1, 1986 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of October, 2021, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on April 1, 1987, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of November 14, 1985, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at April 1 of any year prior to maturity beginning with 1997 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at April 1, 1997, and thereafter and at or prior to April 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to October 1, 1996, as follows:

At one hundred three per centum (103%) of its face value, plus accrued interest to the date fixed for redemption, at October 1, 1996, and thereafter and at or prior to October 1, 1998; at one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2001; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2004; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the

(Board - 11/14/85)

date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of October, 1986.

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1986, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the bonds of this Series; (iv) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the bonds of this Series; (v) prior to the issuance of the first installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for the bonds of this Series; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing.

(Board - 11/14/85)

to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or any coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

(Board - 11/14/85)

Consolidated Bonds, Fifty-sixth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 14th day of November, 1985, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as the "Fifty-sixth Series, Due 2021" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds of the Authority of the Fifty-sixth Series, Due 2021, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the Fifty-sixth Series.

SECTION 3. The bonds of this Series shall be numbered upward from C(56)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

(Board - 11/14/85)

Consolidated Bonds, Fifty-sixth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, constituting the Fifty-sixth Series, Due 2021 (hereinafter called the "bonds of this Series"), at a price which will result in a net interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1986, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series.

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1986, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the purchaser or purchasers in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

SECTION 6. The Committee or any member thereof; the Chairman of the Authority; Vice Chairman of the Authority; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department;

(Board - 11/14/85)

Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee.

Appointment of Comptroller

Chairman Kaltenbacher then announced the appointment of Francis A. Gorman as Comptroller.

Whereupon, the meeting was adjourned.

 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Acting Director of Tunnels, Bridges and Terminals
 Sidney Frigand, Assistant Executive Director/Director of Public Affairs
 Louis J. Gambaccini, Assistant Executive Director/Trans-Hudson Transportation
 Francis A. Gorman, Comptroller
 Charles L. Hirsch, Executive Assistant to the Executive Director
 Leon Katz, Supervising Information Officer, Public Affairs Department
 Richard R. Kelly, Acting Director of Rail Transportation
 James J. Kirk, Port Director
 Louis J. LaCapra, Assistant Director of Personnel
 Philip LaRocco, Director of Economic Development
 Donald R. Lee, Director of Audit
 Lillian C. Liburdi, Director of Management and Budget
 Katharine B. MacKay, Assistant Executive Director/Administration
 Mark Marchese, Assistant Director, Information Services, Public Affairs
 Rino M. Monti, Director of Engineering/Chief Engineer
 James H. Mullen, Administrative Assistant
 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Martin E. Robins, Director of Planning and Development
 Victor T. Strom, Director of Public Safety
 Guy F. Tozzoli, Director of World Trade
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Director, Finance Department/Acting Chief Financial Officer
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Treasurer
 Robert N. Williams, Deputy Director of General Services

The meeting was called to order by the Chairman.

(Board - 12/12/85)

Memorial to Joseph R. Crowley

The Chairman addressed the Board upon the death of Joseph R. Crowley, Esq., Chairman of the Port Authority Employment Relations Panel. The following Minute was unanimously adopted by a rising vote.

The Commissioners of The Port Authority of New York and New Jersey note with sadness the untimely death, on December 3, 1985, of Joseph R. Crowley, Esq., Chairman of the Port Authority Employment Relations Panel. Chairman Crowley had served with great distinction as the New York Member of the Panel since February 11, 1982 and, as the Panel's Chairman since May 12, 1983.

Chairman Crowley was a nationally recognized authority in the field of public sector labor law. At the time of his death, he was Associate Dean and Cameron Professor of Law at the Fordham University School of Law. He was a founding member of the New York State Public Employment Relations Board, which he served from 1967 to 1978, and which was responsible for implementing, interpreting and administering New York's Taylor Law.

In addition, Chairman Crowley's public service included consulting for the United States Department of Labor, Division of Public Employee Relations, from 1972 to 1981, and for the New York City Office of Collective Bargaining in 1980 and 1981. He was a member of the arbitration panels of the American Arbitration Association, New York State Public Employee Relations Board, and New York City Office of Collective Bargaining.

Chairman Crowley's integrity, impartiality and good humor, together with his broad experience and scholarship helped maintain a high degree of respect for the Employment Relations Panel, lent credibility to its decisions, and ensured that the policies adopted by the Board in its Labor Relations Instruction were fairly, vigorously and successfully implemented.

The Commissioners of the Port Authority now, therefore, express their personal and official regret at the passing of Chairman Joseph R. Crowley, Esq., and direct that this tribute shall be spread in full upon the proceedings of the Board and that suitably engrossed copies be sent to his family.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of November 14, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on December 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on December 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on December 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on December 12, 1985, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 12/12/85)

1986 Budget - January 1 through January 31, 1986

It was reported that in connection with the items constituting the proposed 1986 Budget being considered by the Board, preliminary budget materials have been sent to the Governors' staffs for review. Neither of the States have completed that review, which may result in the 1986 Budget not being ready for adoption before the January 9, 1986 meeting of the Board. In that event, it is appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million through January 31, 1986.

It was reported that the Board confirm that the Executive Director is authorized through January 31, 1986 to make expenditures in an amount not to exceed \$200 million including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through January 31, 1986 to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

(Board - 12/12/85)

Engineering Department - Retention of Professional Services on an As-Needed Basis for the 1986 Calendar Year - Aviation Department - Retention of Professional Services on an As-Needed Basis for the 1986 and 1987 Calendar Years

It was reported that since 1977 the workload necessary for the Engineering Department to accomplish the capital and expense programs of the Port Authority and PATH has steadily increased and surpassed its available permanent staffing. Work requirements have been met by a combination of the use of professional and advisory service firms, temporary help (job shop) and technical service firms, overtime, vacation deferral and rescheduling of non-critical work when possible. A review of the planned workload for 1986 has indicated an overdemand, estimated at more than \$43.6 million, prior to budgetary adjustment, which cannot be handled by existing permanent staff. In addition to hiring additional permanent staff in order to meet this workload, the retention of professional services on an as-needed basis provides the required flexibility for responding to this overdemand. During the last five years, the approximate total commitments for outside professional services retained by the Engineering Department has been:

Year	Professional and Advisory Services Retained under the Blanket Authorization	Professional and Advisory Services Retained under Separate Authorizations	Temporary Help Services Retained	Technical Services Retained	Total
1981	\$ - 0 -	\$1,259,000	\$ 720,000	\$ 391,000	\$ 2,370,000
1982	920,000	184,000	1,905,000	332,000	3,341,000
1983	3,440,000	1,230,000	2,400,000	425,000	7,495,000
1984	12,842,000(Est.)	10,257,000	3,423,000	1,656,000(Est.)	28,178,000
1985	15,400,000(Est.)	2,094,000	2,900,000	1,257,000	21,651,000

For 1986, staff recommends that the Chief Engineer be authorized to enter into agreements for the performance of architectural and engineering and related services on an as-needed basis, from a group of approximately fifteen of the most qualified professional and advisory service firms in each functional area in which forecasted work cannot be handled by in-house staff. The services these firms will provide include: undertaking studies, performing professional inspections, preparing renderings, providing advice and opinions, teaching technical seminars, managing projects, developing recommendations, preparing contract documents and performing post-award contract work. The agreements will contain provisions for making a good faith effort to attain goals of 10% participation by Minority Business Enterprises and 1% participation by Women Business Enterprises and some projects will also be set aside for Minority Business Enterprises.

As was done since 1983, initial lists of all potential professional service and advisory firms for each required functional area will be developed using broad basic criteria. Approximately fifteen of the most qualified firms in each functional area will then be selected from the initial lists on the basis of evaluation by a Review Board appointed by the Chief Engineer which will consist of at least three Engineering Department staff members. Requests for Proposals (RFPs) using these lists will commence after January 1, 1986.

(Board - 12/12/85)

When a project is identified which cannot be handled by in-house staff, the Chief Engineer will determine the method to be utilized for selection of firms to be sent RFPs with the goal that by year end all firms on each functional list will have been given an equal opportunity to submit proposals. Firms to be sent RFPs are generally selected on a rotational basis. A Selection Board will be appointed by the Chief Engineer consisting of at least one Line Department and two Engineering Department staff members who will review and evaluate the proposals received. The proposals will be evaluated on their merit using criteria such as quality of staff to be assigned, project start and completion dates, experience specifically related to the particular project or functional workload, manpower analysis, technical approach and price. The most favorable proposal will then be recommended to the Chief Engineer who will make the final selection. Exceptions to this method occur only if one or more firms have a particular expertise in a functional area whereby only those firm(s) will be sent RFPs or if an emergency situation mandates an immediate commencement of services, in which case the Chief Engineer will enter into an agreement with the firm he deems most qualified and to be in the best interest of the Port Authority or PATH. In addition, for lesser size jobs, firms on each functional list will be sent RFPs and undergo the aforementioned process in order to identify the most appropriate firm(s) to perform these jobs on a "call in" basis. All services performed under this Professional and Advisory Service Firm Program will be monitored and managed by staff for adherence to cost, schedule and quality of work. Payments under any one agreement will not exceed \$500,000.

Because of the dynamic nature of engineering and architectural work, the Chief Engineer will have the flexibility to amend the agreements for specific projects, such amendments not to exceed \$100,000 per agreement and the total amount of each agreement, as amended, will not exceed \$500,000. Based upon previous experience with regard to projects forecasted and actually starting in a given year, it is anticipated that during 1986 the total expenditures for all architectural and engineering and related services initiated under this program will be approximately \$18.5 million.

The second portion of this request for authority deals with the retention of various technical service firms to furnish professional and technical personnel to supplement permanent staff on an as-needed basis during 1986 and to provide various inspection, testing and survey services at an aggregate cost presently estimated at \$1.5 million. During 1985, the Materials and Construction Divisions of the Engineering Department were the only users of technical service firms for outside inspection, testing and surveying work. As has been done for the last few years, the Chief Engineer will order work from technical service firms which are known to have the required qualifications and capabilities. Payments to any one technical service firm, per project, will not exceed \$250,000 for providing professional and technical personnel and for providing various inspection, testing and survey services. This represents an increase in authorization over the \$250,000 limit per firm in last year's authorization, which is required because of the large planned workload for 1986. The selection of technical service firms will again be on the basis of capability, price and availability.

(Board - 12/12/85)

The third portion of this request for authority deals with the retention of temporary help firms to provide professional and technical personnel for the Engineering Department and various other departments which experience workloads in excess of their available permanent staffing. During 1985, the Board authorized \$6.8 million to satisfy these temporary help needs for which it is forecasted that \$5.83 million will be utilized as follows: Engineering Department (\$2.89 million); Aviation Department (\$1.0 million); Economic Development Department (\$300,000); General Services Department (\$200,000); Port Department (\$200,000); Rail Transportation Department (\$650,000); Tunnels, Bridges and Terminals Department (\$140,000); and the World Trade Department (\$450,000). In general, the types of personnel that would be made available from these temporary help firms are: architects, engineers, designers and draftsmen. In the majority of cases these firms furnish people who work in-house and are directly supervised by permanent staff. For 1986, the aforementioned departments along with the Public Safety Department have indicated that they will experience workloads in excess of their available permanent staffing. It is requested that \$9.79 million be provided in the 1986 authorization to hire temporary help to satisfy these needs as follows: Engineering Department (\$4.1 million); Aviation Department (\$1.5 million); Economic Development Department (\$500,000); General Services Department (\$300,000); Port Department (\$340,000); Public Safety Department (\$200,000); Rail Transportation Department (\$1.1 million); Tunnels, Bridges and Terminals Department (\$750,000); the World Trade Department (\$600,000); and, an additional \$400,000 to be used as a contingency against an overrun or for other departments.

As occurred last year, the temporary help personnel used by departments other than the Engineering Department will be predominantly for planning and construction inspection work and will not include personnel for design work. It is again anticipated that a larger variety of professional and technical temporary help will be hired in the upcoming year.

It was further reported that at its meeting on August 9, 1984, the Board authorized the Director of Aviation to retain various professional firms to undertake planning and research studies at a maximum expenditure of \$250,000 for each study and at an aggregate expenditure estimated at \$2.5 million for the remainder of 1984 and all of 1985. Through 1985 approximately \$600,000 will have been expended under this authorization. The reasons for the underrun are that certain studies that were originally planned to be performed by consultants, were performed instead by Port Authority staff, other studies were postponed or cancelled and some studies, originally planned to be funded by the Port Authority, were funded by outside sources.

The Aviation Department is developing major initiatives for its 1986-1990 capital plan. There is also a need to perform studies which do not relate directly to the capital plan but are needed to attain maximum utilization and to assure a high level of service to the public, tenants and other users of the airports.

The staffing required to accomplish these planning and research activities greatly exceeds the currently authorized staff of the Aviation Department. The relatively short-term duration of these intense planning and research efforts makes it more practical to retain professional services on an as-needed basis rather than hiring a significant number of permanent staff to handle this peak workload.

(Board - 12/12/85)

As provided in the previous Board authorization, the Director of Aviation would develop a representative list of qualified firms and solicit proposals from an appropriate number of them for each assignment. Qualified Minority/Women-owned firms will be included in the solicitations and the successful firm will be required to make a good-faith effort to use Minority/Women-owned firms for subconsultant work and other services, where appropriate. A review board, including representatives from the Aviation Department and other departments, as appropriate, would evaluate all proposals based on predefined criteria and recommend award.

The Director of Aviation would make the final determination and enter into an agreement with the selected firm, at a maximum compensation not to exceed \$250,000 for any one study. In the event the expenditure for a particular study is expected to exceed \$250,000, separate authorization will be requested.

It was therefore recommended that the Board authorize:

1. the Chief Engineer to:

- a. retain various professional and advisory service firms on an as-needed basis for architectural and engineering and related work for various Port Authority and PATH projects initiated during 1986 at an aggregate amount presently estimated at \$18.5 million;
- b. retain various technical service firms to furnish professional and technical personnel for the Engineering Department on an as-needed basis for the 1986 calendar year, at an aggregate amount presently estimated at \$1.5 million; and
- c. retain various temporary help firms to furnish professional and technical personnel on an as-needed basis for the 1986 calendar year at an aggregate amount presently estimated at \$9.79 million;

2. an extension of the existing program which authorizes the Director of Aviation to retain various professional firms to undertake studies to assist staff in preparing conceptual and functional drawings and outline specifications for airport projects included in the planned five-year capital program and to perform other necessary planning and research studies, at a maximum expenditure of \$250,000 for each study and at an aggregate expenditure not to exceed \$3.0 million during 1986 and 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Chief Engineer to: (a) retain various professional and advisory service firms on an as-needed basis for architectural and engineering and related work for various Port Authority and PATH projects initiated during 1986 at an aggregate amount presently estimated at \$18.5 million; (b) retain various technical service firms to furnish professional and technical personnel for the Engineering Department on an as-needed basis for the 1986 calendar year, at an aggregate amount presently estimated at \$1.5 million and (c) retain various temporary help firms to furnish professional and technical personnel on an as-needed basis for the 1986 calendar year at an aggregate amount presently estimated at \$9.79 million; and it is further

RESOLVED, that the Board authorizes an extension of the existing program which authorizes the Director of Aviation to retain various professional firms to undertake studies to assist staff in preparing conceptual and functional drawings and outline specifications for airport projects included in the planned five-year capital program and to perform other necessary planning and research studies, at a maximum expenditure of \$250,000 for each study and at an aggregate expenditure not to exceed \$3.0 million during 1986 and 1987; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 12/12/85)

Downtown Manhattan Heliport (Wall Street) - Increase in Project Authorization - Authorization to Increase Extra Work Allowance for Contract DMH-110.004 - Downtown Manhattan Heliport Pier Reconstruction - Authorization to Enter Into Supplemental Agreement No. 1 to Contract DMH-110.004 for Structural Steel - Authorization to Award Contract DMH-110.006 - Downtown Manhattan Heliport Terminal Building - Authorization to Purchase and Install Barges for Helicopter Parking

It was reported that the Board, at its meeting on October 13, 1983, authorized the Executive Director to enter into an agreement of lease with The City of New York covering the letting of a site (the "Downtown Manhattan Heliport") consisting of approximately 7.5 acres, the term of the lease to commence upon the surrender by the Port Authority of its existing lease covering the Downtown Manhattan Heliport. The Board further authorized the implementation of a project covering the rehabilitation of existing Pier 6, new piling, fencing, paving, lighting, a new terminal building, office areas and related facilities, all at a budget estimate of \$5.9 million for construction.

Subsequently, the Committee on Construction, at its meeting on August 9, 1984, authorized the award of Contract DMH-110.003 for the demolition of the then existing Pier 6; and the Board, at its meeting on March 14, 1985, authorized the Executive Director to award Contract DMH-110.004 for the reconstruction of the pier. Demolition was completed, and work is currently in progress under Contract DMH-110.004.

The license with the Battery Park City Authority for The World Trade Center/Battery Park City Heliport expires on April 1, 1986. The Battery Park City Authority has indicated that continued operation of the Heliport at that location could be granted on a month-to-month basis after that date. In order to complete work on the new Downtown Manhattan Heliport before the Port Authority is required to vacate the Battery Park City Heliport facility, it is necessary to expedite the construction of foundations for the new terminal building under Contract DMH-110.004 by performing work under "winter conditions" and it is deemed advisable to advance the erection of the structural steel for the new terminal building by awarding the work as a Supplemental Agreement to J.E. Brennerman and Company, DMH-110.004 contractor. In the event a proposal for the supplemental work in a reasonable amount is not received from J.E. Brennerman and Company, the work will be included in Contract DMH-110.006.

The proposed increase in the extra work allowance under Contract DMH-110.004 provides for revisions to the terminal building foundations and utilities, and for premium costs for performing work under "winter conditions", which was not anticipated in the original contract. Should the new terminal building not be completed before the Battery Park City location must be vacated, operations can be commenced at the Downtown Manhattan Heliport using trailers as a temporary terminal facility.

Authorization is also requested for the Executive Director to award Contract DMH-110.006, which provides for the construction of a new terminal building for the Downtown Manhattan Heliport. The building will contain space for helicopter passenger ticketing, a passenger lounge and waiting area, space for air courier operations, the Port Authority helicopter operations center and additional tenant rentable space. Contract DMH-110.006 was publicly advertised on November 25, 1985 and bids are scheduled to be received on December 17, 1985. In order to meet the targeted completion date of September 1, 1986, it will be necessary to award Contract DMH-110.006 by the first week in January 1986.

(Board - 12/12/85)

Authorization is also requested for the Executive Director to negotiate and enter into contract or contracts for the purchase and installation of one or more barges, to be moored on the north side of the pier, to provide approximately sixteen helicopter parking positions. This delegation of authority is sought in order to enable the Port Authority to take advantage of potentially significant savings, since used barges, in particular, seldom remain available for purchase for any length of time. As a result they are difficult to obtain through a public solicitation of bids. The total expenditure for both the purchase and installation of the barge(s) is presently estimated at \$2 million.

Total project costs for the reconstruction of the Downtown Manhattan Heliport are presently estimated to be \$9.1 million. The proposed increase in the project authorization is due to the proposed additional extra work allowance under Contract DMH-110.004, an upgrading of the design of the terminal building, a large number of helicopter parking positions to meet the growing helicopter activity in downtown Manhattan and the inclusion of administrative, general and financing expenses.

Federal funds amounting to \$5,495,000 and including a \$1.75 million allowance for barges have been provided for this project under the Airport Improvement Program. In addition, the Downtown Manhattan Heliport site was chosen by the FAA as one of four heliport sites throughout the country to demonstrate the state-of-the-art for all-weather helicopter operations in metropolitan areas.

It was therefore recommended that the Board authorize:

1. an increase in the project authorization for the construction of the Downtown Manhattan Heliport from \$5.9 million to an expenditure presently estimated at \$9.1 million, including payments to contractors, an allowance for extra work and administrative, general and financing expenses;
2. an increase in the extra work allowance for Contract DMH-110.004, Downtown Manhattan Heliport-Pier Reconstruction from \$300,000 to \$650,000;
3. the Executive Director, in his discretion, to enter into Supplemental Agreement No. 1 to Contract DMH-110.004, providing for the furnishing and erection of structural steel for the Heliport Terminal Building, with J. E. Brennerman and Company upon receipt of a proposal in a reasonable amount from the contractor;
4. the Executive Director, in his discretion, to award Contract DMH-110.006, Downtown Manhattan Heliport Terminal Building, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids; and
5. the Executive Director, in his discretion, to enter into a contract or contracts for the purchase and for the installation of one or more barges to provide for helicopter parking at the Downtown Manhattan Heliport, in the total estimated amount of \$2 million.

(Board - 12/12/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the project authorization for the construction of the Downtown Manhattan Heliport is increased from \$5.9 million to an expenditure presently being estimated at \$9.1 million, including payments to contractors, an allowance for extra work and administrative, general and financing expenses; and it is further

RESOLVED, that the extra work allowance for Contract DMH-110.004, Downtown Manhattan Heliport, Pier Reconstruction, is increased from \$300,000 to \$650,000; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to enter into Supplemental Agreement No. 1 to Contract DMH-110.004, providing for the furnishing and erection of structural steel for the Heliport Terminal Building, with J.E. Brennerman and Company upon receipt of a proposal in a reasonable amount from the contractor, said Supplemental Agreement No. 1 to be subject to approval as to form by General Counsel or his designated representative; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to award Contract DMH-110.006, Downtown Manhattan Heliport Terminal Building, to the bidder submitting the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to enter into a contract or contracts for the purchase and installation of one or more barges to provide for helicopter parking at the Downtown Manhattan Heliport, in the total estimated amount of \$2 million; said contract or contracts to be subject to approval as to form by General Counsel or his designated representative.

(Board - 12/12/85)

New Jersey Fisheries Development Commission - Planning Studies for Belford Fishing Port

It was reported that the Board, at its meeting on May 10, 1984, authorized \$200,000 for an Executive Panel to be created by the Governor's Office of the State of New Jersey to plan appropriate programs or projects as part of the Port Authority-funded fisheries or marine development commitment in New Jersey. On June 28, 1984, Governor Kean signed the Executive Order which established the New Jersey Fisheries Development Commission and outlined their mandate: to conduct a board range of commercial fishing development activities including the planning of fisheries projects to be funded by the Port Authority commitment. The commitment was expressed in December 1983 at the time the Board authorized the Bi-State Fisheries Development Program which also included the Fishport at Erie Basin in Brooklyn at an estimated project cost of \$27 million. Representatives of the Fisheries Commission have recently met with the owners of an 85-acre waterfront tract in Belford, New Jersey, which was the site of the former Seacoast fishmeal plant, and is for sale.

Individual fishermen and the Belford Fisherman's Cooperative have been leasing a small parcel of the Seacoast property for over 50 years to conduct their fishing activity. As part of the Bi-State Fisheries Development Program, the Port Authority recently completed a \$100,000 study of the Belford fishing industry and concluded that in order for commercial fishermen to upgrade and expand their shoreside facilities and remain economically viable, issues relating to the ownership of the Seacoast property must be resolved.

An additional \$200,000 has been requested by the Fisheries Commission to be used for further studies. The Fisheries Commission request for \$200,000 would be in addition to the funds previously authorized by the Port Authority for the Commission's start-up and administrative expenses, and would come from the Port Authority-funded Fisheries or Marine Development commitment.

It was therefore recommended that the Board authorize \$200,000 for the purposes hereinabove described.

Whereupon, the following resolution was unanimously adopted, Commissioner Sagner abstaining:

RESOLVED, that the Board hereby authorizes \$200,000 requested by the New Jersey Fisheries Development Commission to undertake further studies which can include continued studies of Belford properties and a possible project there, in accordance with the foregoing.

(Board - 12/12/85)

Kennedy International Airport - American Airlines, Inc. - Settlement of Outstanding Debt - Aircraft Maintenance Fee

It was reported that from time to time the Port Authority has issued aircraft maintenance permits granting airlines possessing appropriate facilities at Kennedy International Airport the privilege to perform routine and non-routine maintenance on aircraft of others. These permits provide a fee of 5% of gross receipts from such services to be paid to the Port Authority by the permittee airline. To date, permits have been executed by Flying Tiger Lines, British Airways and United Airlines. Previous disputes concerning fees with Flying Tigers and Pan Am were presented to the Board and settled. Negotiations are on going with several airlines, including Pan Am, primarily aimed at obtaining execution of current permits.

Port Authority audits of American Airlines with respect to its aircraft maintenance operations covered the period May 1, 1975 to June 30, 1983. They indicated that American owed the Port Authority \$216,629 in unreported and unpaid fees for that period. The unreported amounts were primarily due to American not reporting receipts for work that had to be done by aircraft mechanics under the unique contract American had with its mechanics union during the audited period. That contract required mechanics to perform duties in connection with routine maintenance work performed as part of aircraft "turnaround" services not normally associated with that trade classification such as aircraft towing, baggage handling, etc. American contends that only a portion of the amounts that appeared on its books as routine maintenance was true aircraft maintenance work performed on aircraft.

After substantial negotiations that clarified American's bookkeeping methods, an agreement has been reached with American whereby it will pay the 5% fee to the Port Authority on 51% of the routine maintenance portion of all gross receipts shown on its books as routine maintenance work for the period May 1, 1975 to June 30, 1983. Staff believes this agreement reflects the true value of maintenance work performed. American Airlines agreed to adjust its operations, effective July 1, 1983, to preclude the possibility of any similar misunderstandings in the future.

It is therefore recommended that the Port Authority accept from American Airlines, Inc. \$114,798 as settlement of outstanding aircraft maintenance fees for the period May 1, 1975 to June 30, 1983.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement with American Airlines, Inc., all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted;

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with American Airlines, Inc., under which American Airlines would pay to the Port Authority the sum of \$114,798 representing agreed upon fees due the Port Authority for the period May 1, 1975 to June 30, 1983 for actual aircraft maintenance performed by American Airlines for others and in settlement of previously audited amounts totaling \$216,629; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 12/12/85)

Kennedy International Airport - Lease of Space in a Cargo Building Either to a Corporation Formed by Air Couriers or to Air Courier Companies Individually

It was reported that on September 5, 1985 the U.S. Customs Service issued a Directive which requires the relocation of the processing of all in-bound, air courier baggage operations from passenger terminals to cargo areas at major international airports throughout the United States designated as "congested". Kennedy International Airport has been designated as an airport in this category.

The air courier industry consists of companies which specialize in expediting the movement of small packages and documents directly from an originating customer to a final destination. Speed of delivery and personalized customer service, trademarks of the industry, are accomplished by handling the documents and small packages as passenger-escorted baggage. World wide, the air courier industry has grown rapidly over the last ten years, with Kennedy International Airport established as its primary base of international operations in the United States. Several similar bases have been established in Europe over the past three years, at such locations as Heathrow Airport in Great Britain and Frankfurt Airport in West Germany. To the Port Authority's knowledge, the lease(s) herein authorized will give Kennedy International Airport the first consolidated courier clearance center in the United States.

The U.S. Customs Service Directive is intended to solve two current problems at congested airports. First, the rapid increase in volume of courier baggage has added to the existing congestion in passenger processing areas of airport terminals. Second, Customs' clearance of these shipments in secured passenger areas requires additional courier and customhouse broker employees in these areas, increasing the potential for security breaches. An additional benefit to Kennedy International Airport which is expected upon implementation of the Directive is the elimination of courier vehicles from terminal curb frontage and the airport roadway system.

Aviation Department staff have been working closely with U.S. Customs and representatives of the air courier industry to coordinate the Port Authority's response to the Directive. Although U.S. Customs set an implementation date of December 31, 1985, it informed the air courier group at a recent meeting that the couriers could use space on a temporary basis in the U.S. Customs' Building 80 at Kennedy International Airport, provided there was clear evidence that steps were being taken to establish a permanent in-bound clearance center on or close to that date. The air couriers intend to take advantage of this offer while finalizing an operating plan and completing alterations to a permanent facility.

A group of approximately fifteen air courier companies has indicated that it may form a corporation to enter into a lease with the Port Authority on behalf of all couriers. As an alternative, each courier may enter into a separate lease with the Port Authority. It is anticipated that either the Port Authority or the lessee(s) would perform alteration work required by U.S. Customs, including provision of rest room facilities, air conditioning and an improved heating system, all at a preliminary estimated cost of about \$70,000. In the event the Port Authority performs this work, the rent will be adjusted to recover the Port Authority's cost. The lessee or lessees may also select ramp handling services from the authorized list of Ramp Service Contractors to transfer incoming air courier shipments from the International Arrivals Building and the British Airways, Pan Am, TWA and American Airlines Unit Terminals to the new consolidated clearance center. The Port Authority would receive a fee equal to 5% of the gross receipts of the Ramp Services Contractor. If a corporation is formed, it would charge a non-discriminatory fee to every air courier company utilizing the service. The fee would be designed to enable the corporation to recover all of its costs.

(Board - 12/12/85)

Negotiations have been substantially completed with representatives of the air courier group for space in several potential locations that include related outside areas and an area for a helicopter landing pad. The lease would be for a term of three years commencing on or about February 1, 1986 in an agreed-upon location at rental rates of \$5.50 per square foot for space inside a cargo building and \$.55 per square foot for related outside space.

The above rates assume the air couriers will perform the estimated \$70,000 worth of alteration work themselves. However, in the event that the Port Authority performs the required alteration work, the lease would provide for additional rent for three years equal to .0348 per month for each dollar paid by the Port Authority for the alteration work. Should a location in the cargo area be decided upon other than Cargo Building 82, the corresponding rental rates would be no less than the above. Under the proposed lease, the lessee or lessees would assume responsibility for maintenance and operating costs associated with the premises and the Port Authority would be responsible for property insurance, structural repairs and maintenance of the roof. The Port Authority would provide electricity and water to the premises on a metered basis, to be paid for by the companies.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into either a lease with a corporation to be formed by a group of air couriers or into leases with individual air couriers for space in Cargo Building 82 or in a similar facility in the cargo area at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into either a lease with a corporation to be formed by a group of air couriers or into leases with individual air couriers for space in Cargo Building 82 or in a similar facility in the cargo area at Kennedy International Airport; the form of the lease or leases to be subject to the approval of General Counsel or his designated representative.

Expansion of Foreign-Trade Zone No. 49 to Include a Subzone at General Biscuit Brands, Inc.
Plant in Elizabeth, New Jersey

It was reported that subzones are special-purpose ancillary sites authorized by the Foreign-Trade Zones Board to permit the conduct of operations by firms that cannot be accommodated within an existing general-purpose zone when it can be demonstrated that the activity, usually manufacturing, will result in a public benefit. Foreign-Trade Zone regulations require that applications for subzones be submitted by a general purpose Foreign-Trade Zone grantee, which has ultimate responsibility for a subzone. As grantee of Foreign-Trade Zone No. 49 at the Port Newark/Elizabeth-Port Authority Marine Terminal, the Port Authority has been asked by General Biscuit Brands, Inc. to apply for subzone status for its manufacturing plant in Elizabeth, New Jersey.

General Biscuit Brands, Inc., formerly Burry-Lu, is a supplier of cookie and cracker products to retail stores, Girl Scouts of the U.S.A., and the food service and dairy industries. The Burry-Lu operation, originally started in Canada, expanded to Elizabeth, New Jersey in 1938, where almost 1,000 people are employed today.

Over the past several years, General Biscuit has been attempting to develop a strategy to enable it to compete more successfully in domestic and international markets. Because General Biscuit cannot compete in main stream U.S. retailing due to major competitors' substantial advertising spending, it has developed certain niches where it can compete on creativity and service, such as in food services, dairy, Girl Scouts fund raising, export and contract manufacturing. Growth here has been relatively modest, however, because General Biscuit manufactures food products with certain imported ingredients which puts it at a disadvantage with foreign competition.

Subzone status will enable General Biscuit to purchase foreign sugar at the world price and process it into finished products not subject to quota, and allow it to export more aggressively to world markets. Since many large internationally known food companies use contract manufacturers, General Biscuit will also be able to compete more successfully with these international suppliers. Both of these market opportunities would have the effect of preserving and perhaps expanding job opportunities at the Elizabeth location. Nearly 66% of General Biscuit's 700 production workers are minority employees in unskilled and semi-skilled positions.

The Port Authority is the sponsor of the Ford Motor Co. subzone in Edison, New Jersey and a General Motors subzone in Linden, New Jersey. An application is on file with the Foreign-Trade Zones Board for the Hooton Chocolate Company plant in Newark, New Jersey.

It was therefore recommended that the Board authorize the Executive Director to take action to file an application for creation of a subzone and to execute an appropriate agreement with General Biscuit in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorize the Executive Director for and on behalf of the Port Authority to file an application with the Foreign Trade Zones Board of the U.S. Department of Commerce for the establishment of a subzone at the General Biscuit Brands, Inc., plant in Elizabeth, New Jersey and to execute an appropriate agreement with General Biscuit Brands, Inc.; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 12/12/85)

Newark International Airport - Central Terminal Area Roads - Interim Improvements - Project Authorization and Authorization to Award Contract

It was reported that since 1982, the first full year of People Express operations, traffic at Newark International Airport has grown substantially. Annual air passenger volume has increased dramatically from 12.1 million in 1982 to a projected 29-30 million in 1985, with continued growth forecasted for the future.

At present, vehicular traffic at Newark International Airport is split between the Central Terminal Area (CTA) and the north side of the airport, where People Express has most of its domestic operations in the North Terminal. This situation will change in mid-1987 when People Express is expected to complete and occupy its new facility in Terminal C, adding its present North Terminal domestic operations to its existing operations at this facility, thereby bringing all scheduled air carrier operations passengers into the CTA. With this change, CTA traffic volumes will exceed the design capacity of the present roadway system.

In an effort to provide initial alleviation of these roadway capacity constraints expected in 1987, Louis Berger International, Inc., was retained to evaluate the existing CTA situation and recommend means of accommodating the increased traffic through implementation of transportation system management (TSM) strategies and/or low-cost interim capital improvements which could be implemented in the short term. Louis Berger International, Inc., has recommended low-cost interim improvements which include the creation of a third lane on the Express Roadway, at-grade intersection changes and traffic signalization. These proposals together with certain additional roadway modifications recommended by Port Authority staff are the subject of this authorization and are considered necessary to help meet the anticipated 1987 traffic demand.

In order to accommodate the continued growth in traffic projected beyond 1987, additional modifications and a comprehensive roadway and frontage expansion project are planned. It is expected that a professional service firm will be retained next year to undertake an extensive evaluation and to recommend modifications to meet the forecasted long-term demand of 50 million annual air passengers.

Contract NIA-110.030, which is the only contract to be awarded in connection with the subject interim roadway project, provides for the construction of pavement, drainage, signage, traffic signals, structural modifications and other related work required for the implementation of the aforementioned interim improvements to the CTA Roads. Board authorization of Contract NIA-110.030 is required at this time in order to meet the project schedule and to facilitate timely completion of the work to help meet the anticipated traffic demands. The contract will be publicly advertised.

It was therefore recommended that the Board authorize:

1. a project for the construction of interim roadway improvements within the Central Terminal areas at Newark International Airport, at a total project cost currently estimated at approximately \$3.6 million, including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses; and

(Board - 12/12/85)

2. the Executive Director, in his discretion, either to award Contract NIA-110.030 to the lowest qualified bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted on the contract, or to reject all bids, said action to be subject to the approval of the Committee on Construction.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for the construction of interim roadway improvements within the Central Terminal Area at Newark International Airport, at a total project cost currently estimated at approximately \$3.6 million, including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, either to award Contract NIA-110.030 to the lowest qualified bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted on the contract, or to reject all bids; said action to be subject to the approval of the Committee on Construction.

(Board - 12/12/85)

Kennedy International Airport - International Arrivals Building and Buildings 80, 106, 141, 155, 252 and 269 - General Cleaning Contract PSE-438 - Award to Hispanic Maintenance Services, Inc.

It was reported that the current General Cleaning Contract, PSE-395, is scheduled to expire on January 31, 1986. To permit continuity of cleaning services in the International Arrivals Building and Buildings 80, 106, 141, 155, 252 and 269, Contract PSE-438, the successor to Contract PSE-395, was publicly advertised. The following bids were received on November 6, 1985:

Company	Two-Year Bid Price
*Hispanic Maintenance Services, Inc. White Plains, New York	\$5,257,978
*Unified Services, Inc. Washington, D.C.	5,571,642
Prompt Maintenance Service, Inc. New City, New York	5,631,683
Triangle Building Maintenance Corp. Valley Stream, New York	5,729,130
*Porterhouse Maintenance, Inc. Edison, New Jersey	5,884,285
Allied Building and Airport Services, Inc. New York, New York	6,294,688
Cleaning Emporium Co. Woodbury Heights, New Jersey	6,317,037
Central Services, Inc. Secaucus, New Jersey	6,320,932
Triple A Maintenance Corp. Brooklyn, New York	6,630,251
*Maintenance Pace Setters, Inc. Alexandria, Virginia	6,829,247
Servair, Inc. McLean, Virginia	7,275,396

*Minority Firm

(Board - 12/12/85)

Company	Two-Year Bid Price
Temco Service Industries, Inc. New York, New York	\$7,494,236
Urban Cleaning Contractors, Inc. Bronx, New York	8,264,877
*Ebon Services International, Inc. Newark, New Jersey	8,458,165

***Minority Firm**

Contract PSE-438 would be for a two-year period commencing February 1, 1986 and subject to termination by the Port Authority without cause on 30 days' notice. The term of the contract is subject to extension for two additional two-year periods, with the compensation due the contractor in each of the extension periods being subject to adjustment based on mutually agreed-upon cost increases or decreases related to the cost of labor. The price adjustment will be established as of the beginning of each extension period and will be computed based on the difference between the actual cost for wages, applicable taxes, insurance required by law, and supplemental benefits for employees incurred by the contractor for employees in the second year of the contract or the second year of the first extension period, as applicable. If the parties fail to agree on the adjusted compensation for any renewal period, or if for any other reason either of the parties refuses to execute an extension agreement, then the contract will expire at the end of the original term, or the first extension period, as the case may be.

The Port Authority would have the right to order extra work during the initial two-year term of the contract and during each extension period, in an amount not to exceed 15% of the lump sum price agreed to for the said term. The contract also provides that the contractor must pay at least the wages and benefits specified therein.

Staff has determined that Hispanic Maintenance Services, Inc., a minority contractor, is qualified to perform the requirements of the contract.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to award Contract PSE-438 for general cleaning in the International Arrivals Building and Buildings 80, 106, 141, 155, 252 and 269 at Kennedy International Airport to Hispanic Maintenance Services, Inc., at the bid price of \$5,257,978, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director: (1) to award Contract PSE-438, General Cleaning Contract, to Hispanic Maintenance Services, Inc., for a two-year term effective on or about February 1, 1986, at its bid price of \$5,257,978 for the two-year term; (2) at his discretion, to order extra work up to 15% of the entire contract price; and (3) at his discretion, to extend the contract for two additional two-year terms as provided in the contract, and to authorize the expenditure for extra work up to 15% of the estimated contract price for each extension period; and it is further

(Board - 12/12/85)

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 12/12/85)

The World Trade Department - The Teleport - Contract TP-110.034 - Automatic Network Protection System - Award

It was reported that various phases of the construction of the electrical distribution system at The Teleport are currently underway. To date, Contracts TP-110.033 for the purchase of up to 28 network transformers and TP-110.019 for the purchase of a high voltage switching station have been awarded. Staff is now ready to proceed with Contract TP-110.034 for network protection units for the electrical system.

Contract TP-110.034 requires the contractor to design and furnish the equipment necessary for up to seven Network Protection Systems to be installed by others at various locations at The Teleport. Each network protection system contains four units for a total capacity of up to 28 protector units when fully operational.

The network protector units consist of equipment which is manufactured by several companies having expertise in highly sensitive electrical components. The equipment required for the network protection units, consisting of network breaker units, enclosures, and associated bus sections, will be utilized to control and protect the distribution of electrical power to Teleport tenants. To provide the highest level of reliability and to protect the source and recipient of electrical power, the design requires that all elements of the system be comprised of standard components assembled in a configuration that offers maximum protection against electrical faults and maintains the reliability required for distribution throughout The Teleport site.

Because of the five-month lead time required for design and fabrication of the Network Protection Systems, and the need to award the contract as soon as possible so that delivery may coincide with the installation of the transformers and switches (Contracts TP-110.033 and TP-110.019), staff recommends that the Board authorize the Executive Director to either award Contract TP-110.034 to the contractor who submits the lowest qualified proposal, and who, in the opinion of the Executive Director, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to an amount of 10% of the proposal accepted, or to reject all proposals.

Proposals will be solicited from five qualified contractors on or about December 4, 1985 and are scheduled to be received on or about January 7, 1986.

It was therefore recommended that the Board authorize the Executive Director, in his discretion, to award a contract for the design and furnishing of up to seven automatic network protection systems over a five-year period to the contractor who submits the lowest qualified proposal, and who, in the opinion of the Executive Director, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable and to order extra work up to an amount of 10% of the proposal accepted, or to reject all proposals.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized in his discretion, to award a contract for the design and furnishing of up to seven automatic network protection systems over a five-year period, to the contractor who submits the lowest qualified proposal, and who, in the opinion of the Executive Director is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable and to order extra work up to an amount of 10% of the proposal accepted, or to reject all proposals.

(Board - 12/12/85)

The World Trade Center - Contract WTC-399.01 - North and South Tower Buildings and Below Grade Areas - Maintenance Agreement - Elevators and Escalators - Increase In Extra Work Authorization

It was reported that the Board at its meeting on November 18, 1966, authorized the award of Contract WTC-399.01 as a five-year maintenance agreement at an amount of \$665,000 per year. Subsequent Board, Committee and Executive Director authorizations extended the term of the agreement to fifteen years, effective May 1978, and provided for extra work authorizations to their current level of \$150,000 per year.

When Contract WTC-399.01 was prepared it was determined that extra work would not be needed since the elevators were relatively new, demand was not extensive and vandalism was minimal. However, as the occupancy of The World Trade Center increased, a comparable increase in use occurred for both freight and passenger elevators. This increased use, combined with the advancing age of the elevators and equipment, extensive vandalism and misuse, requirements for standby mechanics, smoke detection system testing, structural integrity studies and escalation have resulted in frequent requests for additional extra work authorizations. Therefore, staff has determined that, in order to maintain the level of elevator service desired in a first-class office building, meet the ever-increasing demands on the elevator system and provide for escalation in a manner similar to other maintenance contracts, the extra work authorization under Contract WTC-399.01 be increased to 10% of the base contract cost for 1985 and the remaining years of the agreement thru May 1993. The anticipated base contract costs for 1985 are currently estimated at \$2.6 million.

It was therefore recommended that the Board authorize an increase in the extra work authorization under Contract WTC-399.01 with Otis Elevator Company, a subsidiary of United Technologies, from \$150,000 per year to an amount equal to 10% of the yearly base contract costs effective January 1, 1985.

(Board - 12/12/85)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that an increase in the extra work authorization under Contract WTC-399.01 with Otis Elevator Company, a subsidiary of United Technologies, from \$150,000 per year to an amount equal to 10% of the yearly base contract costs, effective January 1, 1985, is authorized.

Whereupon, the meeting was adjourned.

Secretary

Marshal L. Wilcox, Jr., Treasurer
Alexander Sam Ruimy
Claude Ruimy
Valerie Ruimy, Howard S. Cullman Fellow

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of December 12, 1985. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on January 9, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on January 9, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on January 9, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on January 9, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 1/9/86)

1986 Budget - January 1 through February 28, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986 to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). This action was taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

As contemplated in the proposed 1986 Budget, in light of recent staff studies, and similar studies conducted by private and public agencies, of salary, wage, and consumer price index trends, and consistent with the Port Authority Labor Relations Instruction, effective December 29, 1985, salary ranges for staff not represented for collective negotiations would be increased by 5.5%. All compensation programs for affected individuals would continue to be administered on the basis of merit.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, and to authorize the Executive Director to implement the annual salary range adjustment, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through February 28, 1986.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through February 28, 1986 to make expenditures at a rate not to exceed \$200 million per month including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, and the Executive Director is hereby authorized to implement the annual salary range adjustment, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

(Board - 1/9/86)

1986 Vehicular Equipment Purchase Program

It was reported that the Port Authority fleet of trucks, cars, snow removal equipment, emergency vehicles and other miscellaneous mobile equipment is reviewed annually to determine which equipment should be replaced, as well as how many additional units will be required to meet day to day organizational needs. In 1986, the vehicle purchase program agenda will total 455 units at a cost not to exceed \$14,138,000.

An economic and physical assessment of individual vehicles conducted by the Central Automotive Division determined that 287 existing vehicles should be replaced. This includes \$4.5 million for the replacement of twelve crash/fire/rescue vehicles operated at the three airports. The Management Engineering and Analysis Division will evaluate the actual need for the 168 additional vehicles requested by the Departments. Complex operations and maintenance equipment comprise the major portion of the dollar value of the additional requests for 1986. Only five additional requests are for passenger cars that will not be used for police or field operations and maintenance functions.

The decision to solicit new bids or to exercise existing options for vehicular equipment is determined by an economic assessment at the time of vehicle procurement. Purchase order contracts are awarded on the basis of competitive bids. Bidding for passenger-type vehicles is limited to equivalent models of selected vehicle manufacturers.

Vehicular equipment purchase order contracts are for terms not exceeding three years, and the duration of each contract is determined by operational and purchasing requirements. Contracts for passenger vehicles, however, are generally for a single purchase of a fixed number of vehicles. Since many of the heavy duty emergency and specialty equipment to be purchased require long lead times for delivery, actual expenditures for the 1986 vehicular equipment purchase program will be approximately \$3 million in 1986, \$10 million in 1987 and \$1 million in 1988.

It was therefore recommended that the Board authorize the Executive Director to:

1. receive bids on a series of contracts, each not to exceed a term of three years, for the purchase of vehicular equipment for all Port Authority departments and, in his discretion, in the case of each such contract either to enter into said contract with the lowest qualified bidder thereon or to reject all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicle manufacturers; and
2. exercise options, in his discretion, for the purchase of such equipment under existing contracts authorized by the Board in connection with previous vehicular equipment purchase programs; the total authorized expenditures under (1) and (2) combined not to exceed \$14,138,000.

(Board - 1/9/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to: (1) receive bids on a series of contracts, each not to exceed a term of three years, for the purchase of vehicular equipment for all Port Authority departments and, in his discretion, in the case of each such contract either to enter into said contract with the lowest qualified bidder thereon or to reject all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicle manufacturers and (2) exercise options, in his discretion, for the purchase of such equipment under existing contracts authorized by the Board in connection with previous equipment purchase programs; the total authorized expenditures under (1) and (2) combined not to exceed \$14,138,000.

(Board - 1/9/86)

Development of New Jersey Park-Ride Lots - Approval of Port Authority Participation

It was reported that the June 1985 report of the Trans-Hudson Task Force documented the increasing congestion at Port Authority tunnels and bridges. The report emphasized the importance of the network of transportation facilities that feeds into the Port Authority Trans-Hudson system. It also recognized that increasing the network's mass transit capacity was an important goal in order to accommodate forecasted growth.

In this connection, the Port Authority and New Jersey Transit (NJT) have recognized that inadequate parking capacity is a critical constraint in the use of mass transit by trans-Hudson commuters. Ridership increases on NJT have outpaced increased in the supply of parking spaces. NJT has identified park-ride projects at 21 stations that could be constructed or reconfigured to provide additional spaces. Recently, the Board of Directors of NJT authorized implementation of all 21 projects, subject to the identification of funding sources. Of these, eight are at stations in the Port District that primarily feed commuters into the PATH system. These eight projects would provide for the paving of 120 spaces and the creation of 625 new spaces.

The estimated total cost of the eight projects is \$1.9 million, which the State has requested be taken from the New Jersey share of the funds made available from the 1984 toll increase.

NJT will be responsible for the design, engineering, environmental analysis, and construction of the projects; for the operation and maintenance of the lots; and for negotiations with affected municipalities as required. NJT will also be responsible for insuring that any agreement it enters into with any municipality is consistent and compatible with the agreement developed between the Port Authority and NJT regarding the eight park-ride lots.

Funds for the park-ride lots will be obtained from funds made available for New Jersey projects by the 1984 toll increase. New Jersey's share of the funds is \$137.5 million. The Board authorized the expenditure of \$27.0 million for the Route - 169 Bayonne Bridge connection in September 1985. With up to \$1.9 million authorized for the eight park-ride lots, \$108.6 million would be available for other New Jersey projects.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with New Jersey Transit (NJT) at a total cost not to exceed \$1.9 million providing for the design, engineering, environmental analysis, and construction required to upgrade, expand, or create park-ride facilities at eight NJT stations (Essex Street, Little Falls, Lyndhurst, Orange, Passaic, Radburn, River Edge, and Wood-Ridge);

2. pay to NJT up to \$1.7 million of the total cost of \$1.9 million for the design, engineering, environmental analysis and construction of the park-ride facilities from the funds made available for New Jersey projects by the 1984 tolls increase; and

(Board - 1/9/86)

3. provide an additional amount not to exceed \$200,000 of the total cost of \$1.9 million for the acquisition by NJT of property for a park-ride lot at the NJT station at River Edge from the funds made available for New Jersey projects by the 1984 toll increase.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with New Jersey Transit (NJT) at a total cost not to exceed \$1.9 million providing for the design, engineering, environmental analysis, and construction required to upgrade, expand, or create park-ride facilities at eight NJT stations (Essex Street, Little Falls, Lyndhurst, Orange, Passaic, Radburn, River Edge, and Wood-Ridge); and it was further

RESOLVED, that the Executive Director is authorized to provide to NJT up to \$1.7 million of the total cost of \$1.9 million for the design, engineering, environmental analysis, and construction of the park-ride facilities from the funds made available for New Jersey projects by the 1984 toll increase; and it is further

RESOLVED, that the Executive Director is authorized to provide an additional amount not to exceed \$200,000 of the total cost of \$1.9 million for the acquisition by NJT of property for a park-ride lot at the NJT station at River Edge, from the funds made available for New Jersey projects by the 1984 toll increase; and it is further

RESOLVED, that the form of the such agreement with New Jersey Transit be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

Revised Settlement with Fugazy Express, Inc. and Affiliates - Aviation Ground Transportation Permit Fee Obligations

It was recalled that the Board, at its meeting on July 11, 1985, authorized the Executive Director or the Director of Aviation to, among other things, enter into a Payment Agreement with each of the Fugazy Parties (which term collectively refers to Fugazy Continental Corporation of New Jersey, Inc., Fugazy New Yorker Limousine Co., Inc., Fugazy International Corp., Fugazy Continental Corp., Fugazy Continental, Inc., Fugazy Express, Inc., Fugazy Express of Connecticut, Inc. and Fugazy Express of New Jersey, Inc.). The Payment Agreement as authorized would have provided for the payment to the Port Authority of a principal amount of \$1.3 million, together with ongoing interest from October 31, 1984, arising from ground transportation operations to, at and from the airports of one or more of the Fugazy Parties, and provided for the mutual release of the claims of the Fugazy Parties and the Port Authority, each against the other. Payment was to consist of \$100,000 to be made upon execution of the Payment Agreement with the remainder to be paid in 60 equal monthly installments of principal and ongoing interest at the annual rate of 11%. The Port Authority was to receive a letter of credit or other acceptable security for twelve such monthly installments to be effective during the five-year term of the Payment Agreement.

Further discussions among representatives of Metromedia, Inc., which corporation has purchased a controlling ownership interest in certain of the Fugazy Parties, Counsel to the foregoing and Port Authority staff has resulted in certain changes to the terms of the Payment Agreement. A proposed Revised Payment Agreement has been executed by the Fugazy Parties and Fugazy Express of Greenwich, Inc. and delivered to the Port Authority with an irrevocable offer by them to be liable under such Agreement, if such irrevocable offer is accepted by the Port Authority on or before February 20, 1986.

The Revised Payment Agreement as so executed provides for the payment of a principal amount of \$1.3 million as of April 1, 1985, together with ongoing interest, over a six-year term commencing as of October 1, 1985, with such interest computed at an annual rate of 11% until December 31, 1985. Interest thereafter is computed at the prime rate as fixed on the first business day of each calendar year during the term of the Agreement. The amount of \$100,000 is to be payable to the Port Authority upon execution of the Agreement by it, with a payment of \$300,000 to be made on September 30, 1991 and the balance to be paid in 72 monthly installments of principal and ongoing interest. The Agreement provides for the mutual release of the claims of the Fugazy Parties and the Port Authority, each against the other, as of October 31, 1984. The Revised Payment Agreement is to be guaranteed by Metromedia, Inc. pursuant to the terms of a Contract of Guaranty, to the extent of approximately \$246,000, the guarantee to be effective during the term of the Agreement. The initial payment of \$100,000 together with the monthly payments due on October 30, 1985 and November 30, 1985 are now held by Counsel to Metromedia and Fugazy. The Contract of Guaranty has been executed by Metromedia and delivered to the Port Authority with an irrevocable offer by it to the Port Authority to be liable under such Contract if such irrevocable offer is accepted by the Port Authority on or before February 20, 1986.

(Board -1/9/86)

Ground transportation permits for the period November 1, 1984 through November 30, 1986, for the privilege of operating service to, at and from Kennedy International, Newark International and LaGuardia Airports, each to be revocable by either party on 30 days' notice to the other, would be issued to one or more of the Fugazy Parties. Separate permits would be issued, one covering service to airlines and the other covering both line haul service to the public and chauffeured limousine service. A portion of the fee for line haul service to the public and chauffeured limousine service would be payable on the basis of a flat monthly vehicular charge in lieu of the usual fee of 10% of the permittee's gross receipts from airport ground transportation departures. Such measurement on the basis of a flat monthly vehicular charge has been used in the past as a method for determining fees payable to the Port Authority and the Port Authority may, when it deems it appropriate, continue to issue ground transportation permits containing such arrangements.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into a Revised Payment Agreement, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be authorized to accept the irrevocable offer of and to enter into a Revised Payment Agreement with each of the Fugazy Parties (which term collectively refers to Fugazy Continental Corporation of New Jersey, Inc., Fugazy New Yorker Limousine Co., Inc., Fugazy International Corp., Fugazy Continental Corp., Fugazy Continental, Inc., Fugazy Express, Inc., Fugazy Express of Connecticut, Inc. and Fugazy Express of New Jersey, Inc.) and Fugazy Express of Greenwich, Inc. covering claims arising out of ground transportation operations by one or more Fugazy Parties to, at and from the airports; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

Kennedy International Airport - Lease with Halmar Construction Corp. and Halmar Contracting, Inc. for a Multi-Tenant Air Cargo Service Building

It was reported that the Board, at its meeting on March 8, 1984, authorized the Executive Director to enter into an Agreement of Lease for a site of approximately either six or nine acres of land at Kennedy International Airport (the nine-acre site now having been decided upon) with Halmar Construction Corp. and Halmar Contracting, Inc. for a term of approximately 27 years commencing on or about May 1, 1984 or as soon thereafter as practicable for the construction and operation, including sub-letting, of a multi-tenant air cargo service building. Specified ground rentals and a percentage rental of 10% of the lessee's gross receipts, to be defined in the lease, were provided for. The authorization included an obligation for the Port Authority to make available to the lessee payments up to a maximum of \$12 million exclusive of accruals during construction, for the design and construction of the facility for a period of up to four years after the commencement of the lease term. Negotiations have proceeded and are now substantially complete.

Halmar has requested and staff recommends an increase in the payments the Port Authority would make in connection with this project from \$12 million to \$13.2 million based upon the effects of inflation. It is expected that this increase will provide the complete cost of this project. The conditions under which these payments will be made and the determination of facility rental based thereon would remain the same except that the facility rental would commence on the earlier to occur of three years after the commencement of the letting or on completion of construction; and the repayment of the accruals during the construction period would commence two years after commencement of the facility rental. In addition, Port Authority payments would be available to the lessee up to the earlier to occur of two years after completion of construction or four years after the commencement of the term of the letting. The lease would now also permit the lessee and its affiliates to act as general contractor or construction manager and to perform all or part of the construction work and would set forth the manner in which Port Authority payments, including overhead and profit, would be calculated and made based on such work.

The lease would now provide for a maximum term of 28 years, commencing on or about February 1, 1986, including a period of up to three years for construction. The lease would also allow partial occupancy of the facility by subtenants prior to the earlier to occur of completion of construction or three years after the commencement of the lease term and ground rentals during any partial occupancy period would be prorated and annual exemption amounts applicable to the payment of percentage rental during such period appropriately reduced.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement of lease with Halmar Construction Corp. and Halmar Contracting, Inc. at Kennedy International Airport, all in accordance with the foregoing.

(Board - 1/9/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Resolution adopted by the Board, at its meeting on March 8, 1984, authorizing the Executive Director to enter into an agreement for and on behalf of the Port Authority with Halmar Construction Corp. and Halmar Contracting, Inc. for the construction and operation of a multi-tenant air cargo service building at Kennedy International Airport, be and the same is hereby amended in accordance with the foregoing, including an increase in the payments the Port Authority would make available under the agreement from \$12 million to \$13.2 million; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

All Airports - Refurbishment of Aeronautical In-Pavement Lighting - Contract with Crouse-Hinds Company

It was reported that the aeronautical lighting systems at Kennedy International, Newark International and LaGuardia Airports consist of a combination of elevated and in-pavement light fixtures. Runway and taxiway edge lighting and sign lighting fixtures are elevated while runway touchdown zone, runway centerline and taxiway centerline fixtures are recessed in the pavement. Over 3,700 of the elevated fixtures and 8,750 of the recessed variety are maintained at the three airports.

A recent study of aeronautical lighting system maintenance at the three airports, conducted by the Management Engineering and Analysis Division identified opportunities for savings and improvements through standardization of maintenance. Accordingly, consideration was given to a number of alternative fixture refurbishment programs. These included:

- the establishment of a central Port Authority fixture refurbishment shop,
- upgrading the existing facility shops,
- a third-party refurbishment contract, and
- fixture refurbishment by the original manufacturer (Crouse-Hinds Company).

The Port Authority central shop option was rejected on the basis of the high startup cost of properly equipping the facility plus the continuing cost to staff and supervise the shop. The third-party contract option was rejected due to a lack of firms with this expertise and the necessity of purchasing all parts from the manufacturer. The remaining two options, upgrading the present shops or contracting with the manufacturer, were analyzed further and their estimated costs were compared to the current program. The estimated annual cost for the additional Port Authority labor required for refurbishing was approximately the same as the estimated cost for the Crouse-Hinds program. This indicated that when cost of upgraded facilities and additional testing equipment were added, the Port Authority program would be substantially more costly than contracting with the manufacturer.

Crouse-Hinds Company is at present the only manufacturer approved by both the Port Authority and the FAA to supply in-pavement aeronautical fixtures. The advantages of having fixtures refurbished to by the manufacturer include: (1) units will be refurbished to an as-new state; (2) an estimated 25% reduction in field relamping will result due to increased lamp life; (3) replacement fixture purchases will be eliminated (except for structurally damaged units) and (4) most spare parts and lamp inventories for in-pavement lighting will be eliminated.

The term of the proposed contract with Crouse-Hinds is three years. The contract will also contain two options to be exercised by the Port Authority to extend the term of the contract by one year each. If the Port Authority decides to exercise its option(s), appropriate authorization(s) will be obtained at that time. The estimated expenditure for contract's three years is based on negotiated unit prices for each type of fixture. In addition, the unit prices will be adjusted based on the increase or decrease in the "All Cities Price Index" in years two and three of the contract.

(Board - 1/9/86)

It was therefore recommended that the Board authorize the Executive Director to enter into a three-year contract commencing on or about February 1, 1986 with Crouse-Hinds Company for the refurbishment of all aeronautical recessed lighting fixtures at Kennedy International, Newark International and LaGuardia Airports, on an as-needed basis, including all required FAA testing, at an expenditure currently estimated at \$2 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into a three-year contract commencing on or about February 1, 1986 with Crouse-Hinds Company for the refurbishment of all aeronautical recessed lighting fixtures at Kennedy International, Newark International and LaGuardia Airports, on an as-needed basis, including all required FAA testing, at an expenditure currently estimated at \$2 million; and it is further

RESOLVED, that the form of such agreement be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

Kennedy International Airport - International Arrivals Building - Interline Baggage Conveyor System - Project Authorization and Contract Award

It was reported that presently, over 25% of the arriving international travellers who are processed through the International Arrivals Building transfer to other airlines at Kennedy International Airport to continue their trip. A major portion of the congestion currently experienced in the Customs Hall during peak travel season can be attributed to the manual baggage processing operation associated with these interlining passengers. As a means of improving the overall level of service to travellers during the period prior to a planned major redevelopment at Kennedy International Airport, it is proposed to relocate the interline baggage activity to an area outside the present Customs Hall and to install a baggage conveyor system to move interline baggage to a remote location for transfer to other airlines. These measures will eliminate the present queuing of interlining travellers in the Customs Hall and the severe congestion caused by the movement of baggage carts across and against the normal exiting flow of the travellers.

It is necessary to assure that the proposed improvements are in place and operational in time for the 1986 peak summer travel season. Accordingly, Contract JFK-410.137, International Arrivals Building, Interline Baggage Conveyor System, has been prepared for the design, fabrication, installation and maintenance for a five-year period of the required baggage conveyor system and necessary building modifications to accommodate the system and it is proposed to solicit bids from a list of known, qualified conveyor manufacturers who have the ability to deliver the system on time as approved by the Chief Engineer. Since the extent of the required building modifications are not known, this portion of the work will be performed on a cost plus percentage fee basis.

Additionally, Contract JFK-110.060, International Arrivals Building, Interline Baggage Conveyor System, Miscellaneous Building Alterations, was prepared, which provides for, on a call-in basis, the performance of alterations to office and various operation space required in connection with the installation of the interline baggage conveyor system. Because of the nature of the work, bids on this contract will be solicited from a list of contractors approved by the Chief Engineer who are experienced and capable of performing the work; are known to have previously performed satisfactory work for the Port Authority; and can respond with sufficient labor, equipment and materials to perform the work on a timely basis.

The successful bidder on Contract JFK-110.060 will be compensated at an amount equal to the net cost of the labor, materials, field office expenses, equipment rental and insurance plus a fee based on the amount of the net cost of the work. Bids will be compared using the percentage addition to the net cost inserted by the bidders.

Bids on both contracts are presently scheduled to be received in early February 1986.

A portion of the work under these contracts will be performed outside normal working hours in order to minimize disruption to operations at the International Arrivals Building.

The construction of the interline baggage conveyor system at the International Arrivals Building represents a project cost not to exceed \$7 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses.

(Board - 1/9/86)

The Wing Building Lessees have requested that they be allowed to reimburse the Port Authority directly in a lump sum for the purchase price of the interline baggage conveyor system and associated equipment. Such request is under consideration and will be the subject of negotiations with the lessees. The installation of the system, required building modifications and all other costs of the project would be recovered under the cost formulae of the existing Wing Building Leases. In the event agreement cannot be reached with the lessees on a lump sum or other appropriate reimbursement for the purchase price of the interline baggage conveyor system and associated equipment, the cost would also be recovered under the existing Wing Building Leases cost formulae.

This project has been discussed with the U.S. Customs Service and it has received their support as well as that of the Wing Building Lessees.

It was therefore recommended that the Board authorize:

1. a project at Kennedy International Airport for the installation of an interline baggage conveyor system at the International Arrivals Building, at an expenditure not to exceed \$7 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses;

2. the Executive Director either to award Contract JFK-410.137, International Arrivals Building, Interline Baggage Conveyor System, to the contractor who submits the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable for (a) the design, fabrication and installation of an interline baggage conveyor system at the International Arrivals Building and necessary building modifications to accommodate the system, and to order extra work up to 10% of the bid purchase and installation price, and for (b) the maintenance of the interline baggage system for a five-year period, to order extra work up to 10% of the five-year estimated maintenance bid amount and to provide for escalation, or to reject all bids;

3. the Executive Director, either to award Contract JFK-110.060, International Arrivals Building, Interline Baggage Conveyor System, Miscellaneous Building Alterations, to the contractor who submits the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, or to reject all bids, the total of all payments under the contract not to exceed \$3 million without further authorization; and

4. the Executive Director, in his discretion, to enter into an agreement with the Wing Building Lessees amending the Wing Building Leases to provide for the lump sum or other appropriate reimbursement to the Port Authority of the purchase price of the interline baggage conveyor system and associated equipment.

(Board - 1/9/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project at Kennedy International Airport for the installation of an interline baggage conveyor system at the International Arrivals Building, at an expenditure not to exceed \$7 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; (2) the Executive Director either to award Contract JFK-410.137, International Arrivals Building, Interline Baggage Conveyor System, to the contractor who submits the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable for (a) the design, fabrication and installation of an interline baggage conveyor system at the International Arrivals Building and necessary building modifications to accommodate the system, and to order extra work up to 10% of the bid purchase and installation price, and for (b) the maintenance of the interline baggage system for a five-year period, to order extra work up to 10% of the five-year estimated maintenance bid amount and to provide for escalation, or to reject all bids; (3) the Executive Director, either to award Contract JFK-110.060, International Arrivals Building, Interline Baggage Conveyor System, Miscellaneous Building Alterations, to the contractor who submits the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, or to reject all bids, the total of all payments under the contract not to exceed \$3 million without further authorization and (4) the Executive Director, in his discretion, to enter into an agreement with the Wing Building Lessees amending the Wing Building Leases to provide for the lump sum or other appropriate reimbursement to the Port Authority of the purchase price of the interline baggage conveyor system and associated equipment; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 1/9/86)

Newark International Airport - Cargo Building 154 - Establishment of Rental Rates - Authority to Enter Into Lease Agreements

It was reported that the Board, at its meeting on May 13, 1982, authorized the construction of Cargo Building 154 at Newark International Airport. The building will provide approximately 49,500 square feet of cargo space for leasing to all carriers, cargo operators and other appropriate tenants. Staff recommends that the rental for premises leased should be based upon a rate of approximately \$13 for each square foot of building space. This rate consists of two factors, one a constant factor at a fixed rate equivalent to \$11 for each square foot of building space, which is a composite rate calculated to cover exclusive and non-exclusive leased areas in the building and a related number of square feet of outside areas; the other, a variable factor (Airport Services Factor) at the rate of approximately \$2 for each square foot of building space, said rate being based on the 1984 final Airport Services Factor and subject to annual adjustment in accordance with the same formula as is set forth in the Airline Master Lease. It is presently anticipated that the aforesaid constant factor would be firm for approximately two years of the lease term and, beyond two years, it is anticipated that said factor would be escalated by approximately 10% for each two-year extension period.

Under the terms of the proposed agreements with the firms finally selected, each lessee will be responsible for the operation, maintenance and repair of its portion of the building and related outside areas and collectively for certain common areas, as well as payment for all utilities. The Port Authority will be responsible for maintenance and repair of the roof, for structural integrity, and for property insurance.

The building has been developed as a multi-occupancy facility. It occupies a site of some four acres in the northwest corner of the airport adjacent to the existing Air Cargo Center. During the period of the building's construction, cargo activity has doubled at Newark International Airport. As a result, various inquiries have been received regarding the availability of space in the new building, and it is the intention to set the rates at a level which would provide a better than break-even return over the term of the building's write-off.

Aviation staff has been developing standards to be utilized in selecting tenants, with the final written Selection Standards to be approved by the Director of Aviation. Among the pertinent factors being considered in making the selection of tenants for the building are the firm's level of cargo volumes, the amount of space currently occupied at the airport, if any, the financial health of the prospective tenant, and the growth patterns of its operation both past and anticipated.

It is the intent of staff to approach prospective tenants in the general order in which they are ranked until the four cargo modules within the building are fully rented.

It was therefore recommended that the Board establish a rental rate of approximately \$13 per square foot of building space in Cargo Building 154 at Newark International Airport, and authorize the Executive Director for and on behalf of the Port Authority to enter into lease agreements with appropriate tenants chosen through an approved selection process on the terms set forth above.

(Board - 1/9/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a rental rate is hereby established of approximately \$13 per square foot of building space in Cargo Building 154 at Newark International Airport, and the Executive Director is authorized for and on behalf of the Port Authority to enter into lease agreements with appropriate tenants chosen through an approved selection process; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

Newark International Airport - Runway 11 - Authorization to Enter Into an Agreement with the Federal Aviation Administration for the Preparation of an Environmental Impact Statement for the Installation of a Microwave Landing System

It was reported that a study of the airside capacity at Newark International Airport, which was jointly sponsored by the Federal Aviation Administration (FAA), the Port Authority and the airlines serving the airport, determined that unless specific steps are taken either to reduce projected demands or to increase the airport's ability to accept additional aircraft, excessive aircraft delays could be expected as early as 1987.

As a first step to improve airside capacity at Newark International Airport, the intersection of Runways 4R-22L and 11-29 was recently eliminated, increasing the use of Runway 11-29 by allowing simultaneous landings on Runways 4R and 11 during visual flight conditions.

As a further step to meet the increasing airside capacity needs at Newark International Airport, the FAA proposes to install a Microwave Landing System on Runway 11. The installation of the landing system would permit the use of Runway 11 under some Instrument Flight Rule conditions. Port Authority staff have reached an agreement with the FAA to support this project by sharing equally the cost for the preparation of an Environmental Impact Statement (EIS) to satisfy the requirements of the National Environmental Policy Act (NEPA) of the Council on Environmental Quality and the FAA.

The FAA will issue a Request for Qualifications (RFQ) and a Request for Proposal (RFP), and will contract for and administer the work of the selected firm. The Port Authority will assist the FAA in reviewing the qualifications of the firms, developing the RFP, reviewing the proposals, selecting the firm and reviewing the EIS. In addition, the Port Authority will participate in conducting any public hearings which may be required in the EIS process.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the Federal Aviation Administration (FAA) whereby the Port Authority and the FAA will share equally the cost for the preparation of an Environmental Impact Statement (EIS) for the proposed installation of a Microwave Landing System on Runway 11 at Newark International Airport, with the Port Authority's share currently estimated at \$50,000, such EIS to satisfy the requirements of the National Environmental Policy Act (NEPA) of the Council on Environmental Quality and of the FAA.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to enter into an agreement with the Federal Aviation Administration (FAA) whereby the Port Authority and the FAA will share equally the cost for the preparation of an Environmental Impact Statement (EIS) for the proposed installation of a Microwave Landing System on Runway 11 at Newark International Airport, with the Port Authority's share currently being estimated at \$50,000, such EIS to satisfy the requirements of the National Environmental Policy Act (NEPA) of the Council on Environmental Quality and of the FAA.

(Board - 1/9/86)

La Guardia Airport - United Air Lines, Inc. and New York Airlines, Inc. - Supplements to Leases Covering Improvements to West Wing Central Terminal Premises; Buyout of United's Unamortized Capital Investment

It was reported that United Air Lines, Inc. and New York Airlines, Inc., occupy premises in the West Wing Building of the Central Terminal Building at LaGuardia Airport, as do other Basic Lessee Airlines, under month-to-month leases. Host Services of New York, Inc. occupies premises in the West Wing Building pursuant to a fixed-term lease authorized by the Board on May 10, 1973. As a necessary service improvement, it is now proposed that United relocate, upgrade and refurbish certain of its existing facilities and construct new ones, as well as perform certain other construction work on behalf of the Port Authority. The proposed rehabilitation and expansion in the West Wing Building is consistent with the anticipated expansion of the Central Terminal Building.

With respect to the work proposed to be performed on United's premises, said work will require an estimated investment on the part of United of approximately \$10.6 million. In connection therewith United may request that the Port Authority pay for the improvements to its premises. If such payments are made, commencing upon completion of such construction, United would pay to the Port Authority an additional monthly rental equivalent to the amount paid by the Port Authority to United plus \$.145956 for each dollar so paid to United, including accruals during the construction period, such rental to be paid over a fifteen-year period. In the event, by mutual agreement with the Port Authority, United should surrender its lease, or the lease is terminated by the Port Authority for cause, United would continue to be responsible for said additional rental unless another airline would lease the vacated premises and would assume the obligation for the monthly payments which would be required of it in its lease of said premises. The Port Authority would make a reasonable effort to so lease the premises to another airline.

In the event United does not request the Port Authority to make such payments, the Supplement to United's month-to-month lease would allow United to amortize its construction cost over a fifteen-year period on a straight-line basis, without interest. In the event the Port Authority does not continue United's lease in effect other than for reason of termination for cause, the Port Authority would pay United for the then unamortized amount of its construction cost.

In conjunction with the aforesaid work, United will also construct additional improvements to expand certain Port Authority areas in the West Wing Building, as well as certain space covered by New York Airlines' month-to-month lease and Host's fixed-term lease, which improvements will include the relocation of a snow melting pit, piles and foundations, structural steel and exterior walls, as well as new Port Authority restroom space, construction of an egress stairway, the enclosing of a new Host liquor/snack bar area, and a portion of the relocation of United's Red Carpet Room to third floor space in order to provide second floor terminal area space for New York Airlines in the lobby area being vacated by the Red Carpet Room. The Port Authority will pay United for its costs incurred in the construction of the aforesaid improvements in Port Authority areas and in the Host and New York Airlines premises, the amounts paid by the Port Authority to United not to exceed \$2.9 million, \$575,000 and \$650,000, respectively. In turn, supplemental agreements to the leases with Host and New York Airlines will provide for payment to the Port Authority by said respective lessees of such additional rentals as are applicable to their respective premises. The foregoing construction and payment arrangements with United would be subject to the execution of appropriate supplements to the Host and New York Airlines leases. That portion of the work now to be performed by United on premises leased to Host was authorized by the Board at its meeting of February 14, 1985.

(Board - 1/9/86)

A substantial portion of the payments to United for construction performed on behalf of the Port Authority will be recovered through cost recovery formulas in the Airport Lease Agreements with the basic lessees. Funds for the United payments, net of recoveries and compensation from others, are provided for in the 1986 Capital Budget. Of the \$2.9 million for Port Authority work to be paid to United by the Port Authority, approximately \$850,000 will be for new and refurbished public restrooms which will be recovered from the West Wing Airline Lessees in the formula for the recovery of costs of all public restrooms. The \$300,000 for the necessary relocation of the Port Authority's snow melting pit will be recovered through the flight fee formula. The \$950,000 cost of modifying and extending the West Wing CHRP distribution systems will be recovered through the CHRP Lease Formula.

There remains approximately \$800,000 of Port Authority work necessitated by the West Wing modernization project which would be a cost to the Port Authority as the airport operator. Included in this amount are such items as egress stairs required by Code and the relocation of electrical and mechanical service distribution systems and centers serving the various tenants in the West Wing. However, space being vacated as a result of the relocation work will be rentable to West Wing Airline Lessees for operational needs.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into separate supplemental agreements to the leases with United Air Lines, Inc. and New York Airlines, Inc., respectively, at LaGuardia Airport, and to provide in the supplemental agreement to United's lease for a buyout, in certain circumstances, of United's unamortized capital investment; all of the foregoing on the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into separate supplemental agreements to the leases with United Air Lines, Inc. and New York Airlines, Inc., respectively, covering improvements to their respective West Wing Terminal premises and to certain Port Authority areas, and covering payments for work by United at premises of Host Services of New York, Inc., all at LaGuardia Airport, and to provide in the supplemental agreement to United's lease for a buyout, in certain circumstances, of United's unamortized capital investment; the form of the supplemental agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

Personnel Department - Retention of Professional and Contract Services on an As-Needed Basis

It was reported that on April 11, 1985 the Board authorized the Director of Personnel to augment staff efforts during calendar year 1985 in recruiting to meet increased human resource needs resulting from an expanded Port Authority capital program, new program initiatives and a renewed commitment to service improvements, at a total cost not to exceed \$330,000 for all of 1985. While much of the work for 1985 has been completed, a significant amount is still in progress and will continue into 1986. Many of the positions to be filled, including key positions in the Electrical and Mechanical Engineering disciplines, as well as a number of positions in the highly competitive fields of systems programming and other computer-related specialties, will require a more targeted recruitment effort to identify and attract qualified candidates.

Because of the immediacy of this intense and ongoing effort, it will be necessary to continue the use of executive search firms and employment agencies to augment staff efforts into 1986. To date, a total of approximately \$90,000 of the \$330,000 authorized by the Board in April of 1985, has already been expended for executive searches, employment agencies and minority search activities.

It was therefore recommended that the Board extend the authority granted to the Director of Personnel in April of 1985, to retain various professional firms and employment agencies on an as-needed basis to assist the Personnel Department in its recruitment efforts, at a total expenditure for such professional and contract services not to exceed \$330,000, the amount originally authorized by the Board.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board extend the authority granted to the Director of Personnel in April of 1985, to retain various professional firms and employment agencies on an as-needed basis to assist the Personnel Department in its recruitment efforts, at a total expenditure for such professional and contract services not to exceed \$330,000, the amount originally authorized by the Board; the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 1/9/86)

Port Newark - C.S. Greene and Co., Inc. - Lease LNS-658 - Mutual Surrender

It was reported that C.S. Greene and Co., Inc., a Chicago-based company, has been a tenant at Port Newark since 1967. At its meeting on February 2, 1967, the Committee on Operations approved a 20-year term lease of Building 301, which expires August 31, 1987. The tenant used the building for its export packing operations.

With the development of containerization, the export packing business has steadily declined. C.S. Greene is interested in surrendering Building 301 on the condition it is released from its obligation to repair tenant related damage to the building estimated at \$68,000. In consideration for this release and the surrender of the lease, the tenant will pay the Port Authority \$84,665, which equates to nine months rent.

- Demand for distribution space at Port Newark has been strong. With the rehabilitation of the building, this space can be leased at current market rates, which are more than triple the rate C.S. Greene is presently paying.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement of surrender of lease with C.S. Greene and Co., Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a mutual surrender of a lease with C.S. Greene and Co., Inc. covering Building 301, consisting of 145,000 square feet, at Port Newark, effective April 30, 1986, in consideration for C.S. Greene's payment of \$84,665; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/9/86)

1985 Howard S. Cullman Fellowship

It was reported that the Howard S. Cullman Fellowship was established by the Board in April 1962 as a tribute to the Honorary Chairman for his contributions to the Port Authority. The purpose of this Fellowship is to afford a staff member or members the opportunity to undertake a unique project which benefits the Port Authority and contributes to the organization's public service responsibilities to the people of the Port District.

This year the Cullman Fellowship Review Committee was comprised of the 20 members of The Advisory Group, representing a cross-section of Port Authority staff members at the junior and middle management levels. After careful consideration of all submitted proposals, The Advisory Group recommends that the 1985 Fellowship be awarded to Valerie Ruimy to analyze alternate work arrangements such as flexi-place, flex-time, job sharing, and their applicability to Port Authority job families.

The objective of the Fellowship is to take a focused, in-depth and comprehensive look at alternate work arrangements available and in place in other organizations to allow for a thorough assessment of programs suitable to the Port Authority. Such programs have been shown to assist organizations in recruiting and retaining superior personnel. In view of the current shortage of qualified staff in this region, and the ambitious agenda of the Port Authority, it is key for the organization to be competitive in the regional job market.

Ms. Ruimy proposes to identify and consult with business support groups such as New York City's Center for Public Advocacy, The Work in America Institute and the Conference Board so as to identify alternate work arrangements and organizations which have instituted alternate work arrangements. Additionally, Ms. Ruimy proposes to review the pertinent literature which addresses the issues surrounding alternate work arrangements, investigate organizations which have alternate work arrangements in place and specific programs instituted and analyze Port Authority job families. Finally, Ms. Ruimy will develop six-month, one-year and long-term follow-up assessment methodologies, in order to analyze the benefits attributed to instituting alternate work arrangements and the desirability of continuing such programs in the Port Authority.

Ms. Ruimy's project will be for a duration of up to one year. In addition to her salary during this period, it is anticipated that an additional \$12,000 will be incurred for incidental expenses including travel, phone, clerical support, report preparation and duplicating expenses.

(Board - 1/9/86)

Recommendation was made that the Board authorize the award of the Howard S. Cullman Fellowship to Valerie Ruimy.

Approved.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of January 9, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on February 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on February 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on February 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on February 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 2/13/86)

All Risk Property Damage and Loss of Revenue Insurance - Increase in Premium

It was reported that the Board, at its meeting on May 10, 1984, authorized the purchase of \$200 million excess of a \$100,000 self-insured retention, per occurrence, of All Risk Property Damage and Loss of Revenue insurance covering all properties of the Port Authority and Port Authority Trans-Hudson Corporation (PATH), other than bridges and tunnels, effective June 1, 1984, through Hamond & Regine, Inc., and C. E. Heath & Co., Ltd., as follows:

1. \$10 million excess of a \$100,000 self-insured retention, per occurrence, for a period of three years (June 1, 1984 to June 1, 1987) at a prepaid premium of \$1.1 million and for an additional period of three years (June 1, 1987 to June 1, 1990) at a prepaid premium equal to the premium for the first three years, adjusted in proportion to the changes in insurable values occurring during the first three-year period; and

2. \$190 million excess of \$10 million excess of a \$100,000 self-insured retention, per occurrence, for a period of three years (June 1, 1984 to June 1, 1987) at a prepaid premium of \$675,000, and for an additional period of two years (June 1, 1987 to June 1, 1989) at a prepaid premium equal to two-thirds the premium for the first three years, adjusted in proportion to the change in insurable values occurring during the first three-year period.

As a direct result of restrictive worldwide market conditions, which have had adverse effects on all major insurance placements, the Board, at its meeting on June 14, 1985, authorized an increase of \$501,180 in premium from the previously authorized amount of \$1,775,000 to \$2,276,180.

Soon thereafter, in accordance with the policy provisions providing for cancellation of the policy on 120 days' prior written notice, Birmingham Fire Insurance Company an insurer of \$4 million of the \$10 million per occurrence primary insurance coverage layer issued a cancellation notice effective December 7, 1985. When efforts to replace the coverage at existing premium rates were unsuccessful, the Port Authority assumed the role of co-insurer in the primary coverage area. As reported to the Board by the Executive Director, the Port Authority as co-insurer is responsible for 40% of each and every loss which occurs after December 7, 1985 and which falls within the \$10 million primary insurance coverage layer.

Broker, Hamond & Regine, Inc., recently advised that, in exchange for an increase in premium and a revision in the policy cancellation notice provision from 120 days to 60 days at any time, certain insurers currently participating in the \$10 million primary coverage layer are amenable to restructuring their participation such that it would provide for 100% insurance recovery of the first \$5 million of each and every loss occurrence in excess of the \$100,000 self-insured retention. This, in turn, would also afford more insurance recovery on any loss below \$10 million than the current arrangement whereby the Port Authority co-insures 40% of any loss.

(Board - 2/13/86)

Staff has reviewed this proposal and is of the opinion that the favorable reduction in risk of loss to the Port Authority is worth the increase in premium and the concession in the policy cancellation provision. It should be noted that while under the proposed arrangement insurers may cancel on 60-days notice, staff nonetheless believes that entering into the new arrangement at this time will be to the Port Authority's advantage by (1) placing the Port Authority in a better negotiating position vis-a-vis the underwriters of the \$190 million excess insurance layer at policy anniversary; (2) avoiding or, at least, postponing an even greater premium increase on policy anniversary for the \$10 million primary layer, which in turn would effect the pricing of the entire \$200 million insurance program; and (3) by providing the greatest possibility that the Port Authority's manuscript policy form with its superior terms and conditions will remain in effect, rather than changing to policy forms dictated by individual insurers. As soon as negotiations are completed for the \$190 million excess portion of the program, staff will request appropriate authorization.

The increase in the premium which would be in effect as of March 1, 1986, results in a revised premium of \$2,529,978 for the three-year period beginning on June 1, 1984 and translates to a rate of \$.019 per \$100 of insurable values.

Recommendation was made that the Board authorize an increase of \$253,798 in premiums for the \$10 million layer excess of a \$100,000 self-insured retention of the All Risk Property Damage and Loss of Revenue Insurance covering all properties of the Port Authority and Port Authority Trans-Hudson Corporation (PATH), other than bridges and tunnels, purchased from various domestic and London insurers through Hamond & Regine, Inc. and C.E. Heath & Co., Ltd., for a three-year period commencing June 1, 1984. This increase, when added to the previously authorized amount of \$2,276,180, brings the new total authorized premium amount to \$2,529,978.

Approved.

(Board - 2/13/86)

Professional Services Agreement for a Comprehensive Review of Insurance Carrier Administrative and Claims Processing Services Provided Under the Port Authority and PATH Group Health and Dental Benefits Programs

It was reported that as part of the Port Authority's effort to assure that Port Authority and PATH are receiving the best and most cost-efficient health and dental claims processing and administrative services from the incumbent insurance carriers, staff deems it desirable to retain a professional specialist to perform a comprehensive review of those services.

Since the late 1930's, the Port Authority has sponsored group health insurance programs to reduce the impact of medical care costs on active and retired employees. The Prudential Insurance Company of America has provided group health coverage since July 1, 1966, and group dental coverage since its inception in 1975. Empire Blue Cross (formerly Blue Cross and Blue Shield of Greater New York) has provided group hospitalization coverage since the inception of the program. Blue Cross has also provided group dental coverage for certain PATH union groups since 1977.

The review of insurance carrier services will focus on the following components:

- an evaluation of the quantity and accuracy of the overall carrier claims administration;
- an evaluation of administration charges;
- an assessment of the timeliness of claim payments and its effect upon accuracy;
- a determination of the effectiveness of existing carrier claim cost controls;
- a review of carrier controls to guard against claim abuses and fraudulent claims;
- an assessment of the present method of carrier determination of claimant eligibility.

Requests for proposals (RFP's) were sent to twelve leading firms in this specialized field. Proposals were subsequently received from the following firms:

Alexander & Alexander of New York, Inc., New York, New York
 Coopers and Lybrand, New York, New York
 EBASCO Risk Management Consultants, Inc., New York, New York
 Hay/Huggins Company, Inc., New York, New York
 Hewitt Associates, New York, New York
 Johnson and Higgins, New York, New York
 Lucas, Tucker & Co., New York, New York
 William M. Mercer-Meidinger, Incorporated, New York, New York
 Towers, Perrin, Forster & Crosby, New York, New York
 The Wyatt Company, New York, New York

(Board - 2/13/86)

Proposals were thoroughly evaluated by Risk Management, Personnel and Audit staff according to specific criteria, which included technical merit of the proposal, cost, adherence to proposal requirements, and knowledge and experience of the offerer and staff. As a result of the evaluation, staff selected the proposal offered by William M. Mercer-Meidinger, Incorporated.

William M. Mercer-Meidinger, Incorporated, with offices in more than 80 cities worldwide, is the largest professional services firm in the employee benefits, compensation and human resource field. Its impressive list of clients includes many of the nation's largest corporations as well as numerous public sector agencies, including New York City and the State of New York. Project staff to be assigned to the Port Authority review are located in Mercer's New York City and Morristown, New Jersey offices.

It was therefore recommended that the Board authorize the Executive Director to retain William M. Mercer-Meidinger, Incorporated to perform a comprehensive financial and systems review of the administrative and claims processing services provided for the Port Authority and PATH group health and dental benefit plans by The Prudential Insurance Company of America and Empire Blue Cross at a cost not to exceed \$77,000.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to retain William M. Mercer-Meidinger, Incorporated to perform a comprehensive financial and systems review of the administrative and claims processing services provided for the Port Authority and PATH group health and dental benefit plans by The Prudential Insurance Company of America and Empire Blue Cross at a cost not to exceed \$77,000; and it is further

RESOLVED, that the form of the agreement be subject to approval by General Counsel or his authorized representative.

(Board - 2/13/86)

Air Cargo Fast Flow - Project Authorization and Authorization to Award Contracts

It was reported that at the 1985 annual meeting of the American Association of Port Authorities, the U.S. Commissioner of Customs stated that Port Authorities "which are investing in their future by aggressively pursuing an automated service center concept" for the facilitation of foreign trade "will be the Ports of the future." The local air cargo community, working in cooperation with U.S. Customs and the Port Authority, has been in the vanguard in recognizing the importance of automation in the processing of international air cargo, with the Port Authority maintaining the catalytic role in this endeavor.

As a result of this initiative, the Committee on Operations, at its meeting on March 8, 1984, authorized the Executive Director to enter into an agreement with a professional service firm to prepare Air Cargo Fast Flow System (ACFF) specifications and the Request For Proposal (RFP) for a contractor to perform the turnkey implementation of the ACFF system. Subsequently, DLA Associates, of Springfield, New Jersey (DLA) was retained to perform these services.

The Committee on Operations, at its meeting on August 9, 1984, and the Board, at its meeting on September 13, 1984, expanded the scope of the agreement with DLA to include the implementation of the Automated Cargo Clearance Enforcement Processing Technique (ACCEPT), the U.S. Customs clearance and release component of ACFF. ACCEPT is now on-line and successfully processing both air and marine cargo. Although ACCEPT will eventually be in the U.S. Customs Service computer in Franconia, Virginia, linked to ACFF under the banner of "Selectivity", ACCEPT will serve as the prototype for national application.

ACFF will be a computerized cargo inventory control and clearance/release system which, through an extensive telecommunications network, will tie together a national and international user community comprised of air carriers, customhouse brokers, container station operators and the U.S. Customs Service in the processing of import cargo. In addition, the selected contractor will develop functional specifications, an RFP and cost estimates for the future implementation of the Automated Cargo Expediting System (ACES), the ACFF counterpart for Marine Cargo, as well as size the equipment for the potential of ACES implementation and future ACFF system enhancements such as exports and the electronic transfer of funds.

The RFP produced by DLA was distributed to 35 firms on April 25, 1985, and proposals were received from two firms on June 27, 1985. In August 1985, the U.S. Customs Service issued a policy statement which substantially changed the conceptual design of ACFF, necessitating revisions to the RFP. On October 24, 1985, the revised RFP was distributed to 47 firms, and responsive proposals were received from the following firms on December 2, 1985:

Arthur Andersen and Co.
New York, New York

Arthur Young
New York, New York

Electronic Data Systems Corp.
Morristown, New Jersey

(Board - 2/13/86)

Peat, Marwick and Mitchell and Co.
New York, New York

Price Waterhouse
Washington, D.C.

SASC Technologies, Inc.
Lanham, Maryland

A proposal was also received from Tandem Computers, Inc., of New York, New York, which was deemed non-responsive.

The proposals were reviewed by an evaluation team comprised of representatives from the Aviation, Port, Management Information Services and General Services Departments of the Port Authority, Pan American World Airways, Inc. and the U.S. Customs Service.

The evaluation team recommends that a contract be negotiated with Arthur Andersen and Co., based on the quality of its technical proposal, its corporate experience and air cargo knowledge, and the proposed price. This contract would include detailed system design, modeling of alternate system architecture, development and implementation of the recommended ACFF system, and system operations and maintenance and support, as required, for the first two years of system operation. Arthur Andersen and Co., will be subcontracting a portion of the work effort to Research and Data Systems Corp. of Lanham, Maryland, a Port Authority certified MBE.

The final hardware configuration and associated costs will be determined following completion of the modeling task to be performed by Arthur Andersen and Co., under Phase I of the contract. The Port Authority will either purchase the equipment, as required, through Arthur Andersen or directly from the suppliers if necessary in order to take advantage of agency discounts.

The recommended hardware will be installed in the Management Information Services Department's World Trade Center computer facility. This will result in savings since a separate computer facility need not be constructed to house the system. The total project cost provides for MISD support services.

Capital costs, which include Aviation ACCEPT development costs, as well as on-going ACFF operating and maintenance costs, will be recovered from the user community through the levying of user charges.

It was therefore recommended that the Board authorize:

1. a project for the implementation of the Air Cargo Fast Flow System, which includes system design, development and implementation, purchase and installation of data processing equipment and communications equipment and services, and construction of appropriate space to house the system, at a project cost estimated at \$16.5 million; and operation and maintenance of the system for a two year period at an estimated cost of \$6 million;

(Board - 2/13/86)

2. the Executive Director to enter into an agreement with Arthur Andersen and Co. for a contract for the implementation of the Air Cargo Fast Flow System, including detailed system design, development, and system operation and maintenance for the first two years of system operations, as required, with provision for extra work not to exceed 10% of the contract price;

3. the Executive Director to enter into agreement(s) with vendor(s) for the purchase and installation of data processing and communications equipment and services to support the Air Cargo Fast Flow System, as required.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project for the implementation of the Air Cargo Fast Flow System, which includes system design, development and implementation, purchase and installation of data processing equipment and communications equipment and services and construction of appropriate space to house the system, at a project cost estimated at \$16.5 million; and operation and maintenance of the system for a two year period at an estimated cost of \$6 million; (2) the Executive Director to enter into an agreement with Arthur Andersen and Co. for a contract for the implementation of the Air Cargo Fast Flow System, including detailed system design, development, and system operation and maintenance for the first two years of system operations, as required, with provision for extra work not to exceed 10% of the contract price; (3) the Executive Director to enter into agreement(s) with vendor(s) for the purchase and installation of data processing and communications equipment and services to support the Air Cargo Fast Flow System, as required; and

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 2/13/86)

Newark International Airport - Consolidated Ground Transportation Site - Project Authorization

It was reported that the continuing growth of air passenger activity at Newark International Airport and the increasing number of those patrons using other than private automobiles to travel to the airport has lead to greater demands on space at the terminal frontages and courtyards as well as on the terminal highway system. To accommodate the resulting need for high occupancy vehicles and to reduce congestion through better use of frontage and areas adjacent to the terminals, alternate facilities for functions currently accommodated in the vicinity of the terminals must be created.

It is proposed that an area south of the existing rental car facilities near the airport's main entrance be developed as a consolidated ground transportation site to accommodate a central taxi stack, a limousine hold area, and a special bus hold lot, as well as ancillary facilities. Staff has determined that the four-acre site under consideration will satisfy current usage and is expected to satisfy future demand.

In addition, the elimination of the individual terminal building taxi stacks and the relocation of limousine hold areas currently accommodated adjacent to Terminals A, B and C would make that space available for the relocation of functions presently located on the frontages. Additionally, development of new transportation facilities, such as bus loading areas, which could be adjacent to the terminal buildings for the most effective response to future passenger transportation demands, are now being considered.

It was therefore recommended that the Board authorize:

1. a project for the construction at Newark International Airport of a Consolidated Ground Transportation Facility at an estimated project cost of \$1.5 million including construction, administrative, engineering and financing expenses; and
2. the Executive Director either to award related publicly advertised contracts on the basis of bids received for the construction of said facilities, to in the case of each contract, the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, said action to be subject to the approval of the Chairman of the Committee on Construction.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for the construction at Newark International Airport of a Consolidated Ground Transportation Facility at an estimated project cost of \$1.5 million, including construction, administrative, engineering and financing expenses is authorized; and it is further

(Board - 2/13/86)

RESOLVED, that the Executive Director is authorized either to award publicly advertised contracts on the basis of bids received for the construction of said facilities to, in the case of each contract, the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, said actions to be subject to the approval of the Chairman of the Committee on Construction; and it is further

RESOLVED, that the form of such contracts be subject to the approval of General Counsel or his designated representative.

(Board - 2/13/86)

Kennedy International Airport - Taxiway Stubs AA, BA & DA - Contract JFK-220.058 - Award

It was reported that Kennedy International Airport aircraft traffic on Taxiways I and O, which parallel the runways, usually travel in opposite directions. Direct access from the airport unit terminals to both Taxiways I and O is necessary to provide efficient aircraft ground movements. At present, all of the unit terminals have taxiways that provide direct access to both Taxiways I and O, except the British Airways and TWA unit terminals. The three existing taxiways that serve the British Airways and the TWA unit terminals (Taxiways AA, BA & DA) provide direct access to Taxiway I only. Contract JFK-220.058 provides for the construction of the extension of these three taxiways to provide direct access to Taxiway O.

Currently, the lack of direct access to Taxiway O from British Airways and TWA terminals is a source of extreme congestion not only in the area of these unit terminals but also on adjacent taxiways, causing frequent delays. Aircraft movements in the area of these unit terminals have increased during the past few years particularly since TWA designated Kennedy International Airport as its hub base. TWA's movements have doubled since 1980.

The taxiway extensions will help alleviate aircraft congestion and increase capacity of the taxiway system in the area of the British Airways and TWA unit terminals and result in more efficient airport operation.

Contract JFK-220.058 includes paving of the taxiway extensions and the construction of taxiway lighting, drainage and guidance signs. Paving of the extensions in the area of Taxiway I will be performed during a seven consecutive day shutdown of a portion of Taxiway I. In addition, during a seven consecutive day shutdown of a portion of Taxiway O, the extensions will be paved in the area of Taxiway O. The shutdowns will be at the discretion of the engineer and Taxiways I and O will not be shut down simultaneously.

The contract includes a provision that the bidder use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract also provides for the excavation of unsuitable materials and subsequent backfilling with suitable material and for providing additional fill all on a net cost basis, estimated at roughly \$250,000. A major portion of the contract is eligible for Federal funds under the Airport Improvement Program (AIP).

The contract was publicly advertised and the following bids were received on January 21, 1986:

	Lump Sum Amount
Anthony Grace & Sons, Inc., and Edenwald Contracting Co., Inc., a joint venture Whitestone, New York	\$2,978,000
Naclerio Industry Corp. Bronx, New York	3,461,381

(Board - 2/13/86)

	Lump Sum Amount
Willets Point Contracting Corp. Flushing, New York	\$3,720,000
ENGINEER'S ESTIMATE	\$3,000,000

Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project at Kennedy International Airport for construction of Taxiway Stubs AA, BA and DA between Taxiways I and O, at an expenditure presently estimated at \$4.1 million, including payments to contractors, allowances for extra work, engineering, administrative and financing expenses; and
2. the Executive Director to award Contract JFK-220.058, Taxiway Stubs AA, BA & DA, Kennedy International Airport, to Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, the low bidder, at its bid price in the amount of \$2,978,000, plus an authorization of \$298,000 for extra work and a provision for net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at Kennedy International Airport for construction of Taxiway Stubs AA, BA & DA between Taxiways I and O, the expenditure therefore presently being estimated at \$4.1 million, including payments to contractors, allowances for extra work and net cost work, and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract JFK-220.058, Taxiway Stubs AA, BA & DA, Kennedy International Airport, to Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, the low bidder at its bid price in the amount of \$2,987,000 plus an authorization of \$298,000 for extra work and a provision for net cost work.

(Board - 2/13/86)

All Airports - Noise Abatement Projects at Five Selected Schools - 1986 Program

It was reported that the Board, at its meetings on April 12, 1984, July 12, 1984 and March 14, 1985, authorized agreements which allowed for the soundproofing of thirteen schools in the vicinity of Port Authority airports in the total estimated amount of \$7,735,280 Federal and \$1,814,720 Port Authority funds. Construction will be completed at four schools in early spring 1986.

The cost of each annual program for 1983, 1984 and 1985 is currently estimated to exceed the amounts approved by the Board, although actual costs will not be known until the work under all of the contracts is completed. Increased project authorization, if indicated, will be requested from the Board before the last school contract under each year of the program is awarded. The principal reason for the increase is that Board authorization was based on preliminary building data and cost estimates. Definitive estimates became available after the Board authorized retaining of experts to perform preliminary and definitive design. In most cases, the scope of work is greater than staff anticipated.

In a collaborative effort with school officials and elected governmental officials, the Port Authority deems it prudent to proceed with the soundproofing of four new schools and to complete the soundproofing of the Lawrence High School, portions of which have been included in two previous programs. This is a continuation of the Port Authority's policy of benefiting the communities surrounding the airports and to make use of the available Federal funds in the current fiscal year. Accordingly, it is requested that the Board authorize agreements with the respective governing bodies of the following schools:

Ann Street School, New Building, Newark, New Jersey
Lawrence High School-Phase III, Cedarhurst, New York
P.S. 219, Flushing, New York
P.S. 38, Rosedale, New York
St. Patrick High School, Elizabeth, New Jersey

The proposed soundproofing work for these schools would be similar to that planned for the previous thirteen schools. The estimated cost of such improvements, including engineering and administration, will not exceed \$6 million, based upon preliminary Aviation Department estimates. Definitive estimates will be prepared before the design phase of the projects. As was done for the previous schools, it will be proposed to the respective school governing bodies that they select and retain an architect to perform the preliminary design and contract document preparation and that they award the construction contracts. If any of the respective school governing bodies are unable to administer the soundproofing work with their own staff in a timely manner, the Port Authority, in collaboration with the school governing body, will engage the services of a professional architectural and engineering firm to develop recommendations and prepare contract documents for the soundproofing work and employ the services of a construction contractor to perform the work under the supervision of the school governing body, subject to Port Authority review.

(Board - 2/13/86)

Under the Airport and Airway Improvement Act of 1982, Federal funds are available at an 80% funding rate for soundproofing of schools. The Port Authority will pay the 20% sponsor share with no cost to be paid by the schools. Accordingly, applications will be made for funding the above work, and grants must be received before the end of the current Federal fiscal year, which expires September 30, 1986. The soundproofing project work will be sponsored by the Port Authority subject to the availability of Federal funds.

It was therefore recommended that the Board authorize the Executive Director to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority-operated airports to permit joint Port Authority-Federal Airport Improvement Program funding in a total amount not to exceed \$6 million for projects to reduce the impact of aircraft noise levels within these schools.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority-operated airports to permit joint Port Authority-Federal Airport Improvement Program funding in a total amount not to exceed \$6 million for projects to reduce the impact of aircraft noise levels within these schools; the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/13/86)

Newark International Airport - Parking Lot "F" - Project Authorization

It was reported that air passenger growth at Newark International Airport continues to increase at a phenomenal rate. In 1985, Newark International Airport handled in excess of 28 million air passengers, and growth to over 40 million annual passengers is projected by the early 1990's. In order to accommodate the resulting increases in parking demand, it is imperative that additional automobile parking space be developed on the airport, since parking lot saturation is currently being experienced during peak periods throughout the year.

It is proposed to develop necessary additional at-grade long term parking at the south end of the airport in an area south of Runways 4L and 4R. This site is approximately two miles from the Central Terminal Area and lies within the clear zones under the approaches to both runways and, as such, cannot be used for any non-aeronautical airport purpose other than at-grade parking. Further, due to the scarcity of airport land and the probable alternative uses of currently undeveloped land, this is the most suitable remaining space on-airport for an at-grade parking facility. This 3,000 space facility is capable of being expanded to approximately double that size. Although staff is developing intermediate and long term plans for additional automobile parking or alternatives thereto, including possible structural parking facilities, this is the minimum amount of parking that must be built based on all reasonable future demand scenarios.

Approval to develop automobile parking facilities at this location has been requested from the Federal Aviation Administration (FAA). Based on recent discussions with regional FAA staff, it is anticipated that this will be acceptable, and the Port Authority is awaiting formal approval. Due to the need to meet the Port Authority's schedule to provide additional parking space consistent with increasing demand, it is imperative that the Port Authority progress the project and proceed with detailed design. However, contracts for construction of the facility will not be awarded until FAA approval is received.

This project will include publicly advertised contracts for the construction of parking spaces, associated tolls facilities, and paving and utilities to and within the site.

It was therefore recommended that the Board authorize:

1. a project at Newark International Airport for the construction of Parking Lot "F", containing approximately 3,000 automobile parking spaces, at a project cost presently estimated at \$8 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; and
2. the Executive Director either to award publicly advertised contracts for the construction of Parking Lot "F" at Newark International Airport to, in the case of each contract, the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, said actions to be subject to the approval of the Chairman of the Committee on Construction.

(Board - 2/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at Newark International Airport for the construction of Parking Lot "F", containing approximately 3,000 automobile parking spaces, at a project cost being estimated at \$8 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized either to award publicly advertised contracts for the construction of Parking Lot "F" at Newark International Airport to, in the case of each contract, the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, said actions to be subject to the approval of the Chairman of the Committee on Construction; and it is further

RESOLVED, that the form of such contracts be subject to the approval of General Counsel or his designated representative.

(Board - 2/13/86)

Port Newark - Rehabilitation of the Doremus Avenue Bridge - Approval of Port Authority Participation

It was reported that the New Jersey Governor's Office has requested that the Port Authority provide up to \$2.5 million in connection with the rehabilitation of the Doremus Avenue Bridge. The bridge, which is just north of Port Newark and the Elizabeth-Port Authority Marine Terminal, passes over ConRail's Oak Island Rail Yard, an important rail facility providing service to the Port District, and is one of the three access routes to Port Newark and the Elizabeth-Port Authority Marine Terminal. In addition to vehicular traffic, the bridge also supports a city water line and a sewer effluent line that services Port Newark and the adjacent Newark Industrial Center. The bridge, which was built in 1917 and is constructed of structural elements that range from 70 to 100 years old, has deteriorated in recent years at an accelerated rate. Since December 1984, the vehicle loads have been limited to three tons, thereby eliminating truck traffic. On December 12, 1985, the City of Newark, on the recommendation of the New Jersey Department of Transportation (NJDOT), closed the bridge to all traffic, eliminating one of the three access routes to the port facilities. Because the closing of any one of the three access routes to our port facilities will tax the capacity of the remaining routes and has the potential for disrupting ingress and egress to the port, the Port Authority will benefit from the bridge rehabilitation.

Although the extent of the rehabilitation is not fully known, professionals retained by NJDOT estimate that total costs will approximate \$2,725,000. Under the proposed agreement the Port Authority will provide from funds made available for New Jersey projects by the 1984 tolls increase an amount not to exceed \$2.5 million for construction contract costs and construction engineering costs. NJDOT will be responsible for the design and execution of the rehabilitation and will also be responsible for obtaining any additional funds which may be required to complete the project. NJDOT has advised staff that it will soon complete design work and expects to award construction contracts in June of this year and to complete the rehabilitation in January of 1987. The planned rehabilitation is expected to extend the life of the bridge by about ten years, at which time NJDOT expects that the bridge will be replaced. The Port Authority will not become obligated to maintain or operate the bridge.

New Jersey's share of the funds made available by the 1984 toll increase is \$137.5 million. Of this, the Board authorized \$27 million in September 1985 for the Route 169-Bayonne Bridge connection and \$1.9 million for the New Jersey Transit Park Ride Lots in January 1986. With up to \$2.5 million authorized for rehabilitation of the Doremus Avenue Bridge, \$106.1 million remains available for other New Jersey projects.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with the New Jersey Department of Transportation (NJDOT) to provide for the execution by NJDOT of the rehabilitation of the Doremus Avenue Bridge, which spans ConRail's Oak Island Rail Yard, an important rail facility providing service to the Port District, and provides an access to Port Newark and the Elizabeth-Port Authority Marine Terminal; and
2. pay to NJDOT from funds made available for New Jersey projects by the 1984 toll increase an amount not to exceed \$2.5 million for construction contract costs and construction supervision costs of the Doremus Avenue Bridge rehabilitation.

(Board - 2/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the New Jersey Department of Transportation (NJDOT) to provide for the execution by NJDOT of the rehabilitation of the Doremus Avenue Bridge, which spans ConRail's Oak Island Rail Yard, an important rail facility providing service to the Port District, and provides an access to Port Newark and the Elizabeth-Port Authority Marine Terminal; and it is further

RESOLVED, that the Executive Director is authorized to pay to NJDOT from funds made available for New Jersey projects by the 1984 toll increase an amount not to exceed \$2.5 million for construction contract costs and construction supervision costs of the Doremus Avenue Bridge rehabilitation; and it is further

RESOLVED, that the form of the such agreement with NJDOT be subject to the approval of General Counsel or his designated representative.

The World Trade Department - The Teleport - Contract TP-110.012 - Main Entrance Security Building - Award

It was reported that Contract TP-110.012 requires the contractor to provide all labor and materials necessary to construct the main entrance facility at The Teleport site which will include a security building and two adjacent auxiliary guard booths that will house personnel performing vehicular and pedestrian security checks. From its inception, such a facility entrance has been an integral element in The Teleport master plan. The building will include space for communications controls, as well as equipment used to monitor perimeter security and building security and fire alarm systems. The security building will be approximately 600 square feet and will provide shelter and locker room facilities, and a single toilet room for security guards on duty.

The contract includes a provision that the contractor will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Staff has determined that since the contract will necessitate a six-month construction period, it is necessary to award a contract as soon as possible in that the current schedule indicates that an increase in tenancy is expected later this year. The existing construction employees and the expected increase in traffic loads from tenants make it necessary to have a main access point for the screening and controlling of vehicular and pedestrian traffic flow in an orderly fashion on and off the facility. In addition, the opening of the main entrance facility will enhance the appearance of the site for the benefits of prospective tenants, thereby aiding The Teleport's marketing effort.

Proposals were solicited from approximately 30 qualified contractors on January 17, 1986 and proposals are expected to be received on or about February 17, 1986.

In order to provide for the award of Contract TP-110.012 at the earliest possible date, it is requested that the Board authorize the Committee on Construction either to award a contract for the construction of the main entrance security building at The Teleport to the contractor who submits the lowest proposal, and who, in the opinion of the Committee on Construction is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Committee on Construction deems reasonable, and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals.

It was therefore recommended that the Board authorize the Committee on Construction to either award Contract TP-110.012 to the contractor who submits the lowest proposal, and who, in the opinion of the Committee on Construction is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Committee on Construction deems reasonable, and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Committee on Construction either to award Contract TP-110.012 to the contractor who submits the lowest proposal, and who, in the opinion of the Committee on Construction is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Committee on Construction deems reasonable, and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals.

(Board - 2/13/86)

The World Trade Department - Newark Legal and Communications Center - Sale of Space Agreement - Crummy, Del Deo, Dolan, Griffinger & Vecchione

It was recalled that the Board, at its meeting on September 12, 1985, authorized the Executive Director to enter into installment contracts of sale with purchasers of space in The Newark Legal and Communications Center (NL&CC) at a consideration equal to the project cost divided by the number of usable square feet to be sold (or leased). With current project costs, inclusive of engineering, administrative and Port Authority financial costs, estimated at approximately \$38 million, staff anticipated that usable space, of which there is approximately 300,000 square feet available for sale or lease, could be sold in the NL&CC building at a per-usable-square-foot rate of approximately \$126, exclusive of any tenant fit-up allowance. It was reported too that in order to progress marketing efforts and obtain commitments from prospective purchasers of space, it was necessary, in staff's judgment, to agree that the sales price would in no event exceed \$132.65 per usable square foot, and would be paid over a term of 25 years, at an annual factor not to exceed .13194 for each dollar of Port Authority expenditure.

At its meeting on September 12, 1985, the Board also authorized the Executive Director to enter into agreements to provide finishes: the initial \$14.79 of which to be under the same terms as those of the purchase price; and the remainder to be provided at an annual factor not to exceed .13418 for each dollar of additional expenditure. The total cost for initial finishes was estimated at \$4.2 million. While the purchasers' liability for the payment of the base sales price plus the first \$14.79 of finishes will not extend beyond their property interest in the space, the purchasers would be personally liable for the cost of the additional finishes.

Staff has engaged in negotiations with the law firm of Crummy, Del Deo, Dolan, Griffinger & Vecchione for over a year, and has reached agreement in principle for the purchase by Crummy, Del Deo, Dolan, Griffinger & Vecchione, or such other partnership as the members of the firm may create and designate for this transaction, of up to four floors in the NL&CC. The agreement provides for the sale to Crummy, Del Deo, Dolan, Griffinger & Vecchione of the two uppermost floors in the NL&CC, totalling approximately 34,220 usable square feet. Options for the purchase of the two floors immediately under the above-cited two floors total approximately 36,970 usable square feet. One option must be exercised by October 1, 1986, and the other at such time as the Port Authority will have received an offer for that last remaining floor in the building. Staff has every confidence that, in light of the growing space requirements of Crummy, Del Deo, Dolan, Griffinger & Vecchione, the firm will have purchased, at occupancy, the entire four floors, comprising approximately 71,190 usable square feet.

The purchase price, exclusive of any fit-up allowance, shall be arrived at by dividing the total project cost of approximately \$38 million by the estimated number of usable square feet available for sale or lease. Current projection yields a cost of approximately \$126 per usable square foot. In order to assuage the concerns of purchasers regarding the possibility of the final cost far exceeding the estimates, the Port Authority has agreed that in no event shall the cost exceed \$132.65 per usable square foot, or 105% of the estimated figure. The purchase price shall be paid in 300 equal monthly installments, which shall be non-recourse both to the purchasing partnership and to the individual partners.

(Board - 2/13/86)

In addition, the agreement requires that the Port Authority provide funds for finishes as well as all moving costs incurred in purchaser's move from Gateway I in Newark to the NL&CC. The initial \$14.79 of finishes are to be provided under the same terms and conditions as those of the purchase price. The balance of finishes, and the moving costs are to be provided at an annual factor not to exceed .13418 for each dollar of such expenditure.

The proposed agreement requires that, if, at some specified time prior to the renewal date in the present lease of Crummy, Del Deo, Dolan, Griffinger & Vecchione, it becomes clear that the space purchased by them in the NL&CC will not be ready for occupancy by July 14, 1987 or thereabout, the Port Authority will negotiate with the leaseholder of the space now occupied by Crummy, Del Deo, Dolan, Griffinger & Vecchione - i.e., The Prudential Insurance Company of America - for an appropriate extension of that lease, including to up to 10,000 more square feet than is presently included in the lease. The proposed agreement stipulates also that, if an appropriate extension cannot be negotiated with Prudential, Crummy, Del Deo, Dolan, Griffinger & Vecchione shall be able, at its sole option, to renew for the entire five years specified in its current lease, including the addition of up to 10,000 square feet.

In either eventuality, the Port Authority would reimburse Crummy, Del Deo, Dolan, Griffinger & Vecchione for the difference, if any, between the amount to be paid under the new lease and that which Crummy, Del Deo, Dolan, Griffinger & Vecchione would have been paying to the Port Authority for an equal number of square feet in the NL&CC until such time as the space purchased is ready for occupancy. Then, if the new lease at Gateway I is still in effect upon Crummy, Del Deo, Dolan, Griffinger & Vecchione's occupancy at the NL&CC, the Port Authority shall be responsible for the balance of the lease.

Crummy, Del Deo, Dolan, Griffinger & Vecchione currently occupies approximately 33,000 rentable square feet at Gateway I in Newark. The base agreement between Crummy, Del Deo, Dolan, Griffinger & Vecchione and Prudential specifies a renewal option to begin on August 1, 1987 at a rental rate averaging \$33.06 per rentable square foot. (There are in fact five different leases, at different rates, but all to end simultaneously).

The difference that may have to be made up by the Port Authority totals approximately \$21,700 per month until Crummy, Del Deo, Dolan, Griffinger & Vecchione takes occupancy at the NL&CC.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an installment contract of sale with the firm of Crummy, Del Deo, Dolan, Griffinger & Vecchione, or such other partnership as the firm may designate, for the purchase of approximately 34,000 usable square feet in The Newark Legal and Communications Center (NL&CC), together with options for the purchase of up to approximately 37,000 usable square feet, at a consideration equal to the project cost divided by the number of usable square feet available for sale or lease, which consideration shall not however exceed \$132.65 per usable square foot, and which shall be paid over a term of 25 years at an annual factor not to exceed .13194 for each dollar of Port Authority expenditure;

(Board - 2/13/86)

2. enter into an agreement with the above-mentioned party to provide tenant finishes and moving costs: the initial \$14.79 of which finishes to be provided under the same terms and conditions as the purchase price; and the balance of said tenant finishes and the moving costs to be provided over a term of 25 years, at an annual factor not to exceed .13418 for each dollar of additional expenditure.

3. negotiate with the leaseholder of the space currently occupied by Crummy, Del Deo, Dolan, Griffinger & Vecchione for a lease extension, possibly up to five years, on its present space plus an addition of up to 10,000 square feet, and to pay the difference, if any, between the amount to be paid under the lease extension and that which Crummy, Del Deo, Dolan, Griffinger & Vecchione would have been paying for an equal number of square feet in the NL&CC until such time as the NL&CC is ready for occupancy; and thereupon to take responsibility for the lease for the balance of said extension.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized to: (1) enter into an installment contract of sale with the firm of Crummy, Del Deo, Dolan, Griffinger & Vecchione, or such other partnership as the firm may designate, for the purchase of approximately 34,000 usable square feet in The Newark Legal and Communications Center (NL&CC), together with options for the purchase of up to approximately 37,000 usable square feet, at a consideration equal to the project cost divided by the number of usable square feet available for sale or lease, which consideration shall not however exceed \$132.65 per usable square foot, and which shall be paid over a term of 25 years at an annual factor not to exceed .13194 for each dollar of Port Authority expenditure; (2) enter into an agreement with the above-mentioned party to provide finishes and moving costs: the initial \$14.79 of which finishes to be provided under the same terms and conditions as the purchase price; and the balance of said finishes and the moving costs to be provided over a term of 25 years at an annual factor not to exceed .13418 for each dollar of additional expenditure, and (3) negotiate with the leaseholder of the space currently occupied by Crummy, Del Deo, Dolan, Griffinger & Vecchione for a lease extension, possibly up to five years, on its present space plus an additon of up to 10,000 square feet, and to pay the difference, if any, between the amount to be paid under the lease extension and that which Crummy, Del Deo, Dolan, Griffinger & Vecchione would have been paying for an equal number of square feet in the NLCC until such time as the NLCC is ready for occupancy; and thereupon to take responsibility for the lease for the balance of said extension; and it is further

RESOLVED, that all documents required to consummate the aforesaid transactions be subject to approval as to form by General Counsel or his authorized representative.

(Board - 2/13/86)

New York City Passenger Ship Terminal - Port Newark and Elizabeth and Brooklyn-Port Authority Marine Terminals - Maintenance Dredging - Contract MFP-163 - Award

It was reported that Contract MFP-163 provides for the removal and disposal of approximately 625,000 cubic yards of accumulated material from various berths at the New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn-Port Authority Marine Terminals as part of the normal dredging required to maintain sufficient depths for shipping operations.

The contract was publicly advertised and the following bids were received on January 28, 1986:

	Estimated Total Amount
Weeks Dredging and Contracting Inc. Cranford, New Jersey	\$2,680,015
Great Lakes Dredge & Dock Company Staten Island, New York	2,761,000
American Dredging Company Camden, New Jersey	3,227,500
ENGINEER'S ESTIMATE	\$2,830,000

The low bidder, Weeks Dredging and Contracting Inc., has previously performed satisfactory work for the Port Authority and is qualified to carry out the requirements of this contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract MFP-163, Maintenance Dredging, New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn-Port Authority Marine Terminals, to Weeks Dredging and Contracting, Inc., the low bidder, at its bid price in the estimated total amount of \$2,680,015, plus an authorization of \$268,000 for extra work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract MFP-163, Maintenance Dredging, New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn-Port Authority Marine Terminals to Weeks Dredging and Contracting, Inc., the low bidder, at its bid price in the estimated total amount of \$2,680,015, plus an authorization of \$268,000 for extra work.

(Board - 2/13/86)

1986 Budget - January 1 through March 31, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986 to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). On January 9, 1986, the Board acted to confirm the authority of the Executive Director through February 28, 1986 to make expenditures at a rate not to exceed \$200 million per month and to authorize the Executive Director to implement the annual salary range adjustment. These actions were taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

It was therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through March 31, 1986.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through March 31, 1986 to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

Engineering Department - A&E and Construction Contractors Forums - Retention of Joan D. Finch

It was reported that as a result of the feedback received during the Engineering Department's A&E Forum of November 20, 1985, many of the A&Es have requested that the Engineering Department follow up and take action on several of their recommendations. In order to assist staff in resolving some of the more difficult issues, staff has begun the formation of a standing Board of A&E Professionals. The Board of A&E Professionals will consist of the A&Es and Port Authority staff members who served as panelists at the A&E Forum and it will convene when necessary. Also, since Ms. Joan D. Finch played a key role in the A&E Forum's success, staff deems it prudent to continue to retain her in order to assure that the documentation of results, the writing of final reports and the follow-up actions, are also successful.

The second part of this recommendation concerns a proposed Construction Contractors Forum to be held in the spring of 1986. In view of the large planned capital program and based upon recommendations made at the A&E Forum and by Executive Staff, staff feels that a Construction Contractors Forum should be held. The Construction Contractors Forum will advise the contracting community of changes which have been instituted to improve the process and to solve specific problems that remain. Staff also deems it prudent to retain Ms. Finch to act as a facilitator for this forum. Her unique knowledge and experience in planning, organizing and implementing numerous building and construction related conventions, forums and seminars, which is not possessed by Port Authority staff, makes her an ideal choice.

Under the agreement for the A&E Forum, Ms. Finch was paid a per diem rate of \$300 plus out-of-pocket expenses. Ms. Finch has requested that this rate be increased to \$400 per day plus out-of-pocket expenses which staff deems fair and equitable. This new rate will apply to the increase in the scope of services under the existing agreement for the A&E Forum and the new agreement for the Construction Contractors Forum.

It was therefore recommended that the Board authorize:

1. an increase in the scope of services and an increase in the compensation rate and total amount payable under an agreement with Ms. Joan D. Finch for professional services in connection with the Engineering Department's Architectural and Engineering Forum with total compensation not to exceed \$20,000; and
2. the retention of Ms. Joan D. Finch for expert professional services in connection with the planning, organization and implementation of a Construction Contractors Forum, at a total compensation not to exceed \$20,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) an increase in the scope of services and an increase in the compensation rate and total amount payable under an agreement with Ms. Joan D. Finch for professional services in connection with the Engineering Department's Architectural and Engineering Forum, with total compensation not to exceed \$20,000; and (2) the retention of Ms. Joan D. Finch for expert professional services in connection with the planning, organization and implementation of a Construction Contractors Forum, at a total compensation not to exceed \$20,000; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/13/86)

Agreement with the City of New York and the State of New Jersey for Joint Study of Maritime Support Industry

It was reported that the rapidly changing use of waterfront property is causing dislocation of traditional water-dependent maritime support services in the port. The continuing acquisition of waterfront property for mixed development is forcing companies which provide tugs, scows, barge services and vessel repair to compete with housing and office development for available waterfront property. The City of New York, Departments of City Planning, Ports and Terminals, and the Public Development Corporation, together with the New Jersey Department of Environmental Protection's Coastal Resources Division and the Port Authority, propose to jointly sponsor a study to quantify the needs of this industry and to identify possible future sites for this vital segment of the maritime industry.

The proposed agreement provides for the retention of an expert by the New York City Department of City Planning to perform the study, the creation of an inter-agency review committee to evaluate the expert's work and for the funding of the study by the respective agencies.

The scope of the expert's work will be to identify the marine support services in the harbor; quantify their future space requirements; inventory possible site locations; and perform economic and physical feasibility studies of site locations.

The cost of the study is not to exceed \$150,000 and will be shared proportionally as follows:

	Maximum Amount
City of New York Department of City Planning	\$25,000
City of New York Department of Ports and Terminals	25,000
City of New York Public Development Corporation	25,000
New Jersey Department of Environmental Protection	25,000
The Port Authority of New York and New Jersey	50,000

The proposed agreement calls for both the Port Authority and the New Jersey Department of Environmental Protection each to pay the City of New York 20% of their total shares on or before the date that the Board of Estimate approves the agreement for expert services with the remaining 80% to be paid within 120 days of the effective date of this expert services agreement.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the City of New York (Departments of City Planning, Ports and Terminals, and the Public Development Corporation) and the State of New Jersey, (Department of Environmental Protection), for participation in a Marine Support Services location study, at an expenditure by the the Port Authority not to exceed \$50,000.

(Board - 2/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to enter into an agreement with the City of New York (Departments of City Planning, Ports and Terminals, and the Public Development Corporation) and the State of New Jersey (Department of Environmental Protection), for participation in a Marine Support Services location study at an expenditure by the Port Authority not to exceed \$50,000, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/13/86)

Personnel Department - Retention of Professional Services and Instructors for Human Resource Development for the 1986 Year

It was reported that in 1983 staff discussed plans for a Comprehensive Human Resource Program with the Commissioners. In 1984 the Board authorized the Personnel Director to retain professional services to assist in the implementation of two Assessment Centers, the initial component of the Executive Development Program. In 1985 the Board authorized the Personnel Director to retain professional and instructor services to assist in the design and delivery of a variety of executive training programs.

Additional components of the Comprehensive Human Resource Program were initiated in 1985. The Supervisory Academy, modeled after the Executive Development Program, was implemented to assure effective succession and development of field supervisors. A Secretarial Development Program was initiated to address the developmental needs of the clerical and administrative workforce. An Affirmative Action Awareness and Sensitivity Program was continued and expanded to include field supervisors. Implementation continued on a Performance Appraisal Program to assess employees' performance and identify specific developmental needs.

For 1986, the major part of the anticipated expenditures will be targeted in the areas of executive development, affirmative action and performance appraisal training. Professional and instructor services are needed to continue Executive Development Program activities, which will include distinguished speakers, workshops, seminars and residency programs in areas such as leadership and team building, problem solving and decision making, media relations, business presentations, information processing, public finance and project management.

An Equal Opportunity/Affirmative Action Program started in 1985 for our Field Supervisors will be continued in 1986. Professional services will continue to provide these staff members with a better understanding of the critical issues involved in managing a diverse workforce. It is anticipated that approximately 330 Field Supervisors will participate in this program this year.

In 1985 the Port Authority introduced a formal performance appraisal process for management staff in each department. Approximately 2,000 staff members were trained by members of the Personnel Department in the utilization of this process. The final phase of this process includes feedback to employees regarding their work performance and development needs. Professional services will be utilized to train executive staff in effective feedback and counseling skills.

In addition to the above, it is anticipated that professional and instructor services will be needed in areas of succession planning, executive assessment and to develop and implement a variety of programs for junior and middle management staff.

Minority business enterprise firms have been identified for several key programs and will represent a significant portion of the funds expended for professional and instructor services.

(Board - 2/13/86)

The total expenditure for these services will not exceed \$375,000, exclusive of reimbursement for out-of-pocket expenditures. Monies for these services have been included in the Personnel Department's budget for 1986.

It was therefore recommended that the Board authorize the Personnel Director to retain various professional and instructor services on an as-needed basis to assist the Personnel Department in the performance of development activities associated with key comprehensive human resource programs at an individual amount not to exceed \$50,000 and at an aggregate amount not to exceed \$375,000 for 1986, exclusive of reimbursement for out-of-pocket expenditures.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Personnel Director to retain various professional and instructor services on an as-needed basis to assist the Personnel Department in the performance of development activities associated with key comprehensive human resource programs at an individual amount not to exceed \$50,000 and at an aggregate amount not to exceed \$375,000 for 1986, exclusive of reimbursement for out-of-pocket expenditures, the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/13/86)

Meritorious Service Award of Police Commendation Medal to Police Officer Edward C. Devine

It was recommended that the Police Commendation Medal be awarded to Police Officer Edward C. Devine.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Edward C. Devine it is recommended that the Police Commendation Medal award be given on the following grounds:

At approximately 3:00 p.m. on Wednesday, November 21, 1984, Port Authority Police Officer Edward C. Devine was off-duty, in civilian clothes, waiting for his wife at Desmond's Restaurant on West 57th Street in Manhattan. As he waited inside the restaurant, Officer Devine noticed two men in their fifties begin to argue. As the argument grew louder and more heated, Officer Devine monitored it closely, sensing that it might escalate into a violent situation.

As he had suspected, Officer Devine observed one of the men reach into a green nylon bag, pull out a .38 caliber revolver and point it at the other man. Without police backup, Officer Devine acted swiftly and approached the armed man, instructing the patrons in the restaurant to take cover. He identified himself as a police officer to the armed man as he displayed his shield, drawing his own off-duty revolver. Officer Devine then ordered the armed man to drop his weapon. Ignoring Officer Devine's order, the suspect fired a shot at the man with whom he was arguing.

Though within proper police procedures to fire at the assailant, Officer Devine recognized the threat of serious injury to both the intended victim and the patrons if he fired his gun in a crowded restaurant. Instead, Officer Devine lunged at the armed suspect, struggled with him, and pinned him to the floor. Because he was off-duty and without the usual handcuffs and other police equipment, Officer Devine held onto the aggressor until backup units from the New York City Police Department arrived to assist in the arrest.

(Board - 2/13/86)

In the confusion, the injured victim, with observable gun powder burns on the right side of his torso, left the restaurant without being identified. Eyewitnesses verified Officer Devine's observation that the victim may have been struck by a bullet.

Officer Devine's actions were in the finest tradition of Port Authority police service. Acting above and beyond the requirements of duty and without regard for his own safety, Officer Devine successfully captured an armed individual and protected innocent restaurant patrons.

For his exceptional good judgment and his valiant restraint in the use of deadly force, it is recommended that the Police Commendation Medal be awarded to Police Officer Edward C. Devine.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Edward C. Devine.

(Board - 2/13/86)

Meritorious Service Award of Police Commendation Medal to Police Officer Richard Percoco

It was recommended that the Police Commendation Medal be awarded to Police Officer Richard Percoco.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Richard Percoco it is recommended that the Police Commendation Medal award be given on the following grounds:

At 7:30 a.m. on Friday, June 7, 1985, the commuter rush hour crowds were beginning to fill The World Trade Center Concourse. Police Officer Richard Percoco was on duty in front of the East River Savings Bank near the PATH escalators. Suddenly, he heard a loud commotion and saw one man, Wesley Lister, yelling loudly and chasing another man, Ronald Williams, from the direction of One World Trade Center toward the escalators. When they reached the escalators, Williams, who was being chased, stopped, reached into his jacket, grabbed a 7-inch meat cleaver, and turned around and began chasing Lister back toward One World Trade Center.

Officer Percoco immediately began to chase after Williams and radioed for police backup. Wildly waving the meat cleaver overhead, Williams was terrifying the crowds of commuters as he rushed after Lister. Lister ran into the Duane Reade drugstore to seek shelter. The problem between the two men had begun when Williams tried to steal Lister's lunch cooler. Lister grabbed the cooler back and the altercation escalated from a loud verbal exchange into the mad chase toward the PATH escalators.

Officer Percoco reached the Duane Reade drugstore as crowds of panicked customers, commuters and Duane Reade employees ran yelling and screaming out of the store into the Concourse. The armed man had run to the back of the narrow store. When he realized he could isolate the suspect, Officer Percoco calmly evacuated all of the remaining people in the store before he approached the suspect. Officer Percoco put his life in jeopardy as he moved closer to the armed suspect. He did not fire his weapon, though he had the legal right to use deadly force against the suspect. Instead, he demonstrated the utmost professional restraint by ordering Williams to drop his weapon and surrender.

(Board - 2/13/86)

During those tense moments, Officer Percoco ordered the suspect to drop his weapon and step back. The man did not obey. Twice more Officer Percoco ordered him to drop the weapon, and finally, Williams complied. Officer Percoco arrested him after a short struggle. The suspect was indicted by the Grand Jury for 1st Degree robbery, attempted assault and possession of a weapon. Subsequently, Officer Percoco received the Cop-of-the-Month Award from the Nassau County Police Shields for his actions.

For safely evacuating innocent customers from the range of an armed man and for successfully capturing that dangerous suspect without the use of deadly force, it is recommended that the Police Commendation Medal be awarded to Police Officer Richard Percoco.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Richard Percoco.

(Board - 2/13/86)

Meritorious Service Award of Commendation Medal to Leon Anderson

It was recommended that the Commendation Medal be awarded to Leon Anderson.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Leon Anderson it is recommended that the Commendation Medal award be given on the following grounds:

On April 11, 1985 at approximately 2:00 p.m., at PATH's Newark Station, Passenger Information Agent Leon Anderson and Police Officer Nicholas Kormash witnessed a very muscular, athletic looking man jumping the turnstile. At this point, Mr. Anderson yelled at the man to stop. When he did not stop and proceeded to the train, Police Officer Kormash quickly followed the man into the Newark train alone. Fortunately, Mr. Anderson, was positioned about ten feet away near the turnstile and was able to cautiously observe the actions of the patron suspect throughout the incident. Police Officer Kormash, who was the only officer on duty at the Newark Station, was also fortunate that the Newark Station is all on one level so Mr. Anderson was able to watch the encounter between Police Officer Kormash and the suspect when Kormash stepped on the train.

The man began screaming and swinging his arms around which terrified the other passengers. The individual repeatedly screamed, "I paid my fees. Go ahead, shoot, kill me!" Police Officer Kormash, at this point, had a choice of giving the man a summons or arresting him. Giving a summons for jumping the turnstile is the usual course of action when the patron has identification and is cooperative. The man, however, continued his incessant chant.

The other passengers in the car, either fled or watched in fear as the suspect continued to act in an extremely unusual manner. Police Officer Kormash finally grabbed hold of him and succeeded in pulling him off the train and onto the platform, to the relief of the other passengers.

(Board - 2/13/86)

Mr. Anderson walked closer when he observed a struggle begin between Police Officer Kormash and the turnstile jumper. In the course of the struggle Kormash had managed to get one handcuff on the man but could not get the other handcuff on to complete the arrest. With Anderson's assistance, Police Officer Kormash got the suspect under control by handcuffing his wrists behind his back. While Anderson, a 5'8 man with a medium frame, physically restrained the muscular man, Police Officer Kormash gained full control of the situation.

Mr. Anderson took action boldly, beyond his duties as a Passenger Information Agent, to intervene in the incident. If he had not intervened, it could have taken more than ten crucial minutes for a police unit from Journal Square Transportation Center to respond to a call for help. In the opinion of Police Officer Kormash, as well as Captain Francis Brennan his Commanding Officer, it was Mr. Anderson's prompt intervention that was directly responsible for resolving this incident without any permanent injury to Officer Kormash, the prisoner, or nearby patrons.

For his extraordinary, quick selfless actions beyond the scope of his duty and for coming to the aid of a Port Authority Police Officer in jeopardy, and protecting PATH patrons from a situation which may have escalated further, without any regard for his own well being, it is recommended that the Commendation Medal be awarded to Passenger Information Agent Leon Anderson.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Leon Anderson.

(Board - 2/13/86)

Meritorious Service Award of Commendation Medal to William Harmon, Sr.

It was recommended that the Commendation Medal be awarded to William Harmon, Sr.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of William Harmon, Sr. it is recommended that the Commendation Medal award be given on the following grounds:

On June 16, 1985, Facility Operations Agent William Harmon Sr., while on duty at his assigned post at the George Washington Bridge Emergency Garage, received a call from the communications desk at approximately 6:30 a.m., that an accident involving passenger vehicles had occurred on the Westbound side of the bridge's Lower Level.

Mr. Harmon left the garage promptly and was the first to arrive at the scene of the accident. One accident victim who was bleeding from several facial wounds and rapidly slipping into shock had climbed out onto the very narrow eighteen-inch mesh grating catwalk in an unwise attempt to get away from the three moving lanes of traffic. Dangerous under any circumstances, the catwalk, which has no outer rail and is only used by maintenance men wearing the proper safety cables, became an even more hazardous location for the patron since the accident took place on a rainy morning.

Mr. Harmon, without regard for his own safety, climbed over the guardrail and down one foot to the open catwalk to aid the injured and disoriented patron. The patron, reacting from fear, then knocked Mr. Harmon down, almost causing him to slip off the open catwalk to his own death. Mr. Harmon then managed to climb back onto the catwalk and to wrap his arms around the patron, acting as a physical barrier to protect the patron from falling into the river. Mr. Harmon remained in that position until he was calm enough and had gained enough strength to help the injured victim back over the guardrail. At that point, a Fort Lee ambulance unit was able to take the patron to the hospital where he was admitted.

(Board - 2/13/86)

For his swift and decisive action, without regard for his own personal safety, it is recommended that the Commendation Medal be awarded to Facility Operations Agent William Harmon, Sr.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to William Harmon, Sr.

(Board - 2/13/86)

Meritorious Service Award of Commendation Medal to Ann Tighe and Scott Shih

It was recommended that the Commendation Medal be awarded to Ann Tighe and Scott Shih.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Ann Tighe and Scott Shih it is recommended that the Commendation Medal award be given on the following ground:

On August 22, 1985, around 5 p.m., Scott Shih was jogging across the George Washington Bridge on the south walk when he observed a man, later identified as Samuel N. Patterson of Manhattan, standing outside the safety railing of the bridge, poised and ready to jump. Within seconds, another jogger, Ann Tighe, came by. When she realized what was happening, she turned around and went over to where Scott Shih and Mr. Patterson were standing. Mr. Patterson held on with nothing but a toe- and hand-hold on the walkway's outer railing and three inch ledge. If his hands had slipped he would have plummeted 250 feet to his death in the river.

Standing inside the pedestrian walkway, both Ann Tighe and Scott Shih attempted to engage Patterson in conversation. They learned that Patterson was despondent over the recent death of his mother and that he had recently lost his job. They gained Patterson's confidence when Ann Tighe told him that she had psychic powers, and that she could communicate with his mother through her powers. Elaborating on her psychic powers, Tighe drew out the conversation to delay Patterson's attempt to jump. Tighe told Patterson that his mother would not be pleased with his actions.

While Tighe and Shih were talking, they were able to grab hold of Patterson. A biker was riding by and they asked him to notify the police. Patterson pleaded with his rescuers, saying, "Please let me go. I have nothing to live for." Continuing to hold Patterson, they kept him engaged in conversation until the police arrived and Patterson was pulled over the railing to safety. Patterson was then admitted to Bergen Pines County Hospital.

(Board - 2/13/86)

The rapid, life-saving responses of Ann Tighe and Scott Shih were unlike those of the typical civilian, who either completely ignores a dangerous situation, or waits until he can notify the police when he reaches the end of the bridge.

For their quick thinking and care for a fellow human being, and for their courage and decisive action in saving the life of Samuel Patterson, it is recommended that the Commendation Medal be awarded to Ann Tighe and Scott Shih.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Ann Tighe and Scott Shih.

(Board - 2/13/86)

Meritorious Service Award of Commendation Medal to Ruth Walker

It was recommended that the Commendation Medal be awarded to Ruth Walker.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Ruth Walker it is recommended that the Commendation Medal award be given on the following grounds:

At 8:00 p.m. on Saturday, August 17, 1985, Mrs. Ruth Walker, a Staten Island resident, was bicycling across the Bayonne Bridge walkway with her two young teenagers, Caroline and Andrew. As they rode on the Bayonne side of the center span, they observed a young man standing on the walkway and gazing over the rail into the water. He glanced back furtively as the Walkers rode past him. Mrs. Walker and her children bicycled through Bayonne for an hour and began their trip back over the Bayonne Bridge at 9:00 p.m. She noticed the same young man who was now standing on the outside of the railing, holding on with only one arm. It was apparent he was preparing to commit suicide by jumping into the waters below. If his arm slipped off the railing, he would lose his toehold on the narrow ledge and fall 150 feet to his death.

Mrs. Walker was in shock. She put down her bike and slowly approached the man, who was later identified as 23-year-old Thomas Contaldi. Mrs. Walker began to talk to him, but she would not go too near him in case she might upset him further. So as not to panic the would-be jumper, Mrs. Walker told her son in French to ride the mile to the Staten Island side of the Bridge and call the police.

Meanwhile, Mrs. Walker continued talking to Contaldi, telling him repeatedly, "Don't do it!" She drew on her strong religious faith and kept assuring Contaldi that Jesus Christ could help him out of his troubles. Gradually, Contaldi spilled out his problems — he was a drug addict, his parents had thrown him out of the house and he had slept on the street the night before.

(Board - 2/13/86)

Meanwhile, Mrs. Walker's son rode his bike from the middle of the Bridge to the toll booths. He explained the emergency to a toll collector, who immediately notified the supervisor. The supervisor called the communication desk and, in turn, the desk staff radioed the police. At this point at least fifteen minutes had gone by, and Mrs. Walker and her daughter were still trying to keep Contaldi talking.

Two police cars approached the scene from opposite ends of the Bridge and stopped a distance away. Police Officers Bernard Grossman and Himan Jones ran the quarter of a mile to Mrs. Walker and the poised jumper. She noticed the approach of the police from each side and successfully distracted Contaldi. The two officers joined Mrs. Walker in talking to Contaldi. Gradually, they inched closer and eventually the officers were able to grab Contaldi from each side and haul him over the railing to safety. Without jeopardizing the precarious position of the would-be jumper, Mrs. Walker acted to calm a despairing man and to send her son for assistance. Because Mrs. Walker stopped to help, a man's life was saved.

For her brave and selfless actions, for her valiant and humane approach, it is recommended that the Commendation Medal be awarded to Ruth Walker.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Ruth Walker.

(Board - 2/13/86)

Award of Distinguished Service Medal to Edith E. Bishop

It was recommended that the Distinguished Service Medal be awarded to Edith E. Bishop.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Edith E. Bishop it is recommended that the Distinguished Service Medal award be given on the following grounds:

Edith E. Bishop began her career with the Port Authority in 1948 as a Clerk Stenographer I in the Engineering Department. During her 37 years of service, she has held a variety of increasingly responsible positions including Departmental Secretary to the Comptroller of the Port Authority, which ultimately led to her current position as Senior Administrative Assistant in the Director's Office of the Finance Department.

Ms. Bishop brought to her current position an intimate knowledge of the Finance Department. She has, over the years, provided continuity in the face of changing leadership, sharing her knowledge and expertise with top staff. Among Ms. Bishop's major contributions were her overseeing and coordinating the administrative functions and personnel transactions required for several major reorganizations of the department. At one time, the Comptrollers Department had over 500 employees. As a result of the transfer of Electronics to the Management Information Services Department, Financial Planning and Analysis to the Management and Budget Department, and Audit becoming a separate department, the staff of the Finance Department now numbers approximately 235. It was Ms. Bishop's job to plan and coordinate the processing of the administrative requirements for this massive undertaking. As a direct result of her contributions to these major reorganizations, and through sustained competence, excellent judgment and determination, all were smoothly coordinated, flawlessly executed, and completed in a timely fashion without incident. As always, Ms. Bishop demonstrated her exceptional ability to handle extremely complex issues involving a large number of staff, and, as we have come to expect, she did it with speed, completeness, and accuracy.

(Board - 2/13/86)

In addition to a myriad of other duties, Ms. Bishop is responsible for implementing new programs in the department. In the past, she has developed and maintained policies and procedures for administering for the Finance Department such new Port Authority programs as the Average Grade Plan, the Bonus Plan, Pay for Performance, the Vacation Exchange Program, and the Port Authority Career Service Plan. Through this latter function, she has quietly and efficiently assisted and advised several generations of directors throughout the Port Authority.

Ms. Bishop has repeatedly demonstrated her knowledge, skills and ability to get the job done and is looked upon for advice and guidance from all levels of staff both within and outside the department. She has a unique ability to maintain her composure throughout any crisis or stressful situation. For instance, during the New York State Audit of the Port Authority's Expense Accounts, Edith coordinated the Auditor's requests and directed them to the proper departments or divisions.

For her superior service to the Port Authority, her high degree of excellence in terms of her superior job knowledge, good judgement, steadfast dedication and unselfish devotion to duty throughout her 37 years with the Port Authority, it is recommended that the Distinguished Service Medal be awarded to Edith E. Bishop.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Edith E. Bishop for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Robert M. Crawford

It was recommended that the Distinguished Service Medal be awarded to Robert M. Crawford.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Robert M. Crawford it is recommended that the Distinguished Service Medal award be given on the following grounds:

Robert M. Crawford joined the Port Authority as a Parking Lot Attendant shortly after Newark Airport was leased by the Port Authority from the City of Newark. For the past 38 years, Mr. Crawford has been a dedicated member of the Newark Airport family, successively as a laborer in the maintenance section, an Airport Operations Agent, a Senior Airport Operations Agent and, since 1973, as an Operations Services Supervisor.

Over the past decade, Mr. Crawford has been a key part of the Airport Services Division's efforts to provide superior levels of service to the rapidly increasing millions of passengers traveling through Newark International Airport. For example, he developed a procedure to identify and determine the operational status of all North Terminal access doors which improved building security and alarms, maintenance and repair, and energy conservation in the terminal. As a result, control of secured areas, passenger comfort, and response time for correction and mechanical door problems were significantly improved.

Mr. Crawford also helped develop the operational procedures required when new Federal Inspection Facilities were created in the North Terminal. Working with the Federal agencies, his attention to detail and continued involvement led to implementation of working procedures for VIP passenger handling, baggage cart systems and improved security in the North Terminal when demands on that facility were overwhelming. His persistence in developing these procedures for the reactivated North Terminal passenger building set the groundwork for similar procedures for the new facilities of Terminal C.

(Board - 2/13/86)

The value of Mr. Crawford's contribution at Newark goes far beyond his knowledge of terminal operation and his special ability to establish operating procedures. He has often assisted a troubled or stranded passenger by extending a helping hand or actually reaching into his own pocket to assure a patron a trip home, while not expecting anything in return. Mr. Crawford's concern for the patrons and his unhesitating willingness to give of himself to resolve problems as well as his loyalty and dedication to the Port Authority have set an outstanding example for his peers and for those he supervises.

Mr. Crawford is a versatile supervisor who encourages teamwork by his own unselfish dedication, always seeking the best results without concern for personal recognition. He moves easily from one problem area to another, contributing his best, following up, and seeing that the proper action is taken in each circumstance. He is that special employee, an independent, creative thinker, who can be relied on in any situation.

For his extraordinary professional expertise as an Operations Services Supervisor, and in appreciation for his long, and dedicated service to the Port Authority, it is recommended that the Distinguished Service Medal be awarded to Robert M. Crawford.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Robert M. Crawford for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Abraham Hertz

It was recommended that the Distinguished Service Medal be awarded to Abraham Hertz.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Abraham Hertz it is recommended that the Distinguished Service Medal award be given on the following grounds:

Abraham Hertz began his Port Authority career in 1952 as a Draftsmen II. He is currently an Engineer in the Aviation Department, a position he has held since March 1, 1971. For the better part of his 32 years of service, he has immersed himself in the preparation of some 2,500 Aviation Department lease exhibits and a great number of equally precise land-use maps which are vital to the business administration and operations divisions of our airports. These exact lease exhibits are crucially important to successful rentals, while the land use maps are essential for the determination of revenue producing flight fees and the allocation of non-aeronautical lease costs.

As new drafting material and reproduction methods were introduced, Mr. Hertz adapted them to his precision ink-line drafting to improve the speed with which he could describe the numerous legal changes, caveats and financial arrangements in the more than 2,500 leases at aviation facilities. For safe-keeping and quick retrieval of all the information stored in more than 100 file boxes, he has developed a remarkable simple code system based on designations combining the airport and the year of the lease. During the course of lease negotiations, Mr. Hertz also contributes his knowledge and judgment to the members of the negotiating team.

Mr. Hertz also developed quantitative area statistical data and the translation of these data into land-use documents, including accounting area maps, maps of public areas and air terminal highways and speed limits, all of which require updating on regular schedules. In addition, he maps out every public area so that the police know their areas of jurisdiction. Abe Hertz is also the only person who calculates the area of lease space for every airport tenant so Business Management staff can determine appropriate rents.

(Board - 2/13/86)

On his own initiative, Mr. Hertz has assumed the responsibility of consulting, not only within the Aviation Department but also with other concerned departments such as Law, Engineering and Finance, during the course of devising ways to delineate fully and explicitly the very complex legal information that goes into the lease exhibits. He takes the legal information from the Law Department and drafts the highly technical exhibits of how the airport land must appear. He then interprets, in laymen's terms, the complex information to business managers and tenants so business transactions and operational changes can occur. The airport business administration people depend on Mr. Hertz for these functions, considering him to be irreplaceable. Often exhibits and information are needed in a hurry and he has been known to work nights, weekends and even vacations to get the job done. Abe Hertz has been fulfilling these vital needs for over 32 years with enthusiasm, keen judgment and professional competence. And he is also passing on his skills to another generation of staff. With the anticipated arrival of computerized drafting and design technology, he is looking forward both to an improved information retrieval system and increased productivity.

For his untiring dedicated professionalism and for his many years of dedicated service to the Aviation Department and the Port Authority, it is recommended that the Distinguished Service Medal be awarded to Abraham Hertz.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Abraham Hertz for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Adele Kasmer

It was recommended that the Distinguished Service Medal be awarded to Adele Kasmer.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Adele Kasmer it is recommended that the Distinguished Service Medal award be given on the following grounds:

Adele Kasmer began her service with the Treasury Department of the Port Authority in 1949 as a Clerk/Stenographer and has since become the primary Port Authority employee responsible for the preparation and control of the documentation for the Port Authority's investment portfolio, with accounts valued at over \$1 billion.

This is a monumental job, a conclusion supported by many employees within Treasury and by several professionals from outside the Port Authority, who have knowledge of the process by their daily contact with Port Authority investments. Ms. Kasmer has administered every purchase or sale of securities of Port Authority bonds made by every Port Authority Treasurer, Assistant Treasurer or Portfolio Manager between 1949 and 1985. This includes, most importantly, the accurate recording of the accrued earnings, purchase price, yield to maturity, and other related information for every trade. In 1984 alone, monetary transactions in and out of the Port Authority Portfolio totaled about \$6.2 billion.

Ms. Kasmer's superiors and co-workers admire her diligence, energy and accuracy. Most conclude that it would be virtually impossible to replace her in kind; she has become more than the "Keeper" of the Port Authority Portfolio. She is a seasoned troubleshooter who can spot problems quickly, solve them and prevent them from occurring again.

(Board - 2/13/86)

Representatives from Citibank, the organization that controls the Port Authority Portfolio, have come to appreciate Ms. Kasmer's keen eye for detail and her ability to spot and solve problems. They admit that she has helped them to facilitate their handling the Port Authority Portfolio. One Citibank employee who has regular contacts with her says that it is not uncommon for him and Ms. Kasmer to spend forty-five minutes on the phone while she instructs him in detail how to solve a problem that occurred on the Citibank end of the transaction.

Underscoring Ms. Kasmer's effectiveness is her love for the Port Authority. She is an intensely loyal employee, and is not afraid to express her loyalty with young employees, setting them an example that several concede has inspired them. But Ms. Kasmer is also a person of the 80's and is never tied to an approach that no longer works or that is counterproductive. With her mind set in traditions and her actions displaying innovation, she always performs at her best, and handles the Port Authority Portfolio as if it were her own, striving vigorously to prevent errors that could lose the organization money or bring it public embarrassment.

For her outstanding administration of security portfolio trades, constant superior performance, and almost perfect attendance, it is recommended that the Distinguished Service Medal be awarded to Adele Kasmer.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Adele Kasmer for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Franklin H. Klopping

It was recommended that the Distinguished Service Medal be awarded to Franklin H. Klopping.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Franklin H. Klopping it is recommended that the Distinguished Service Medal award be given on the following grounds:

Franklin H. Klopping entered the Port Authority in 1950 at the age of eighteen as a messenger and clerical aide in the Law Department. He subsequently held progressively more responsible positions, going on to Clerk Typist and then to Cargo Clerk in the Marine Terminals Department. He made a significant career change in 1961 when he joined the then emerging data processing operation within the Comptroller's Department as a Computer Operator. He continued to expand his horizons when he joined the department's professional staff as a Programmer/Systems Designer.

Through years of enthusiastic, dedicated service, hard work and personal integrity, Mr. Klopping has risen to his present position as Supervisor in the Management Information Services Department. He is currently responsible for the processing of the Port Authority and PATH payrolls, benefits and personnel information. This is a most critical and sensitive function which directly affects every Port Authority and PATH employee.

Mr. Klopping is the Port Authority's "Payroll Systems Expert" who must service over 8,000 clients (and self-auditors). His concern for these employees has averted strikes, law suits or union problems that could have arisen. He is also called on to handle all new payroll applications such as tax breaks or deferred compensation, to name a few.

Mr. Klopping was also one of the main designers and implementers of the critical Port Authority Payroll and the Personnel Information System (Compers), one of the most reliable systems in the Port Authority.

(Board - 2/13/86)

For his extraordinary record of never missing a payroll for over 8,000 employees every pay period, for his superior technical assistance in designing and implementing the Payroll & Personnel Information System and for his dedication, technical knowledge, and 36 years of Port Authority experience and professionalism, it is recommended that the Distinguished Service Medal be awarded to Franklin H. Kloepping.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Franklin H. Kloepping for the performance of outstanding service.

Award of Distinguished Service Medal to Percival Lewis

It was recommended that the Distinguished Service Medal be awarded to Percival Lewis.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Percival Lewis it is recommended that the Distinguished Service Medal award be given on the following grounds:

Percival Lewis, Principal Financial Analyst in the Management and Budget Department, has taken an active role within the organization beginning with his first assignment in 1951 at New York International Airport (now JFKIA) and continuing through a variety of progressively responsible positions within the Comptroller's Department and the Management and Budget Department.

During these 34 years, Mr. Lewis has always performed with the utmost professionalism. He served with distinction as Disbursements Supervisor when the PATH disbursement function was brought on line. With the Project Cost Review Division, he was responsible for controls over World Trade Center expenditures during the formative years of this project. Since then, he has been responsible for a variety of assignments with Management Planning and Budgeting, ranging from coordination and presentation of the Port Authority's budget to his present assignment as Supervisor of the Trans-Hudson Group. In his present position, he has earned the respect of key staff in his client departments through his responsiveness and willingness to devote extra effort to meeting his responsibilities. It was best expressed by a line department director: "We don't always agree with Percy, nor is he easy in the sense he doesn't allow us to spend our money in a frivolous manner, but he is always helpful. He knows our facilities, he knows our budget, he understands what we are trying to do, and on a regular basis, helps us achieve our goals."

Mr. Lewis also has contributed his wealth of knowledge and expertise to external organizations. In 1971, he began a 2½-year mobility assignment for the United Nations advising the East African Railways and Harbours Corporation. He served as an advisor in financial management to the East African communities of Kenya, Tanzania and Uganda, looking at ways and means by which the corporation could strengthen its financial management. At that time, Rhodesia closed trade routes to Zambian cargo, and Mr. Lewis helped the United Nations find ways to organize Kenya's and Tanzania's new task of moving Zambian imports and exports. In addition to his other work assignments there, he became active in civic affairs in the international community of Dar es Salaam, the capital of Tanzania, and was elected to the Board of Directors of the International School.

(Board - 2/13/86)

Mr. Lewis received the Black Achiever in Industry award in 1976 and is presently President of the New Jersey Chapter of the Planning Executives Institute.

For his outstanding achievement, his professionalism and sensitivity in working with a variety of line departments in helping them to achieve their goals, and for over 34 years of consistently high level of dedication and commitment, it is recommended that the Distinguished Service Medal be awarded to Percival Lewis.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Percival Lewis for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Robert Linn

It was recommended that the Distinguished Service Medal be awarded to Robert Linn.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Robert Linn it is recommended that the Distinguished Service Medal award be given on the following grounds:

Robert Linn began his career with the Port Authority in 1961 as an Architectural Draftsman III in the Marine Terminals Department and in less than two years he joined the World Trade Department as a Planning Architect in the World Trade Planning Division. Mr. Linn supervised the preparation of the Master Plan for The World Trade Center Plaza Buildings and below-grade space. This assignment required the day-to-day supervision of the architectural drafters and designers and extensive coordination with outside consultants. He did such a good job, he became Manager of Project Planning. Serving in this position at a time when The World Trade Center was still under construction, Mr. Linn was faced with daily architectural and design problems. His technical abilities and the excellent rapport he maintained with staff, consultants, and contractors helped bring The World Trade Center project to completion on schedule.

His subsequent appointment as Manager of the WTC Construction Division gave Mr. Linn direct responsibility for the monitoring of all phases of construction and direct involvement with the inspection of base building contracts, tenant finishes and reconstruction of occupied spaces. Having managed the planning and construction of The World Trade Center complex, Mr. Linn was the outstanding candidate for Operations Manager, with responsibility for the overall activities of the operations and maintenance staff at the Trade Center. He supervised a technical and professional staff of over 50 people involved in electrical, mechanical, and general maintenance, sanitation, parking, security, fire safety and tenant relations. As Operations Manager, Mr. Linn devoted an inordinate amount of time to solving labor disputes and resolving major emergencies to avoid any disruption of service for tenants and visitors in The World Trade Center. Again, Mr. Linn did such a good job that, when the position of Deputy Director for Physical Facilities became available, he was more than capable of handling it.

(Board - 2/13/86)

Mr. Linn now was called to exhibit his adeptness for negotiating. As the World Trade Department representative, he played a lead role in successfully negotiating the 1981 easement agreement between the Battery Park City Authority and the Port Authority. This agreement, a product of several years of negotiation, superseded the 1970 Tripartite Agreement between the City, the Port Authority and BPCA. The easement agreement became the guideline for development for such important components as the pump house facilities and outfall; the development of the World Financial Center by Olympia & York, including the relocations of the river water intake lines; and, not least of all, the alternate design for the north pedestrian bridge which he espoused in order to preserve the entrance and facade of One World Trade Center and at the same time presenting a superior design solution by utilizing available U.S. Customs' space. Throughout the long and difficult negotiations, and in spite of deep personal sacrifice, he was able to adhere to his convictions and at the same time maintain the structural and aesthetic integrity of The World Trade Center.

Mr. Linn has more recently been given responsibility for overseeing the construction of The Teleport and the Newark Legal and Communications Center projects. Starting with the selection of the Master Plan architects, the Grad Partnership, continuing through the Master Plan and Schematic design process to its completion, he is now participating in the review of final drawings and the selection of a construction management organization to complete the Newark Legal and Communications Center project.

During his many years of Port Authority service, Robert Linn has maintained the highest level of professionalism. He has performed his varied assignments with an unparalleled degree of vigor and skill and has always upheld and enhanced the ideals of the Port Authority.

For his many contributions to the planning, construction and operation of The World Trade Center, The Teleport, and the Newark Legal and Communications Center and for his outstanding conduct in negotiations involving the Battery Park City Interface and Seven World Trade Center Building projects, it is recommended that the Distinguished Service Medal be awarded to Robert Linn.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Robert Linn for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Paul W. Magda

It was recommended that the Distinguished Service Medal be awarded to Paul W. Magda.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Paul W. Magda it is recommended that the Distinguished Service Medal award be given on the following grounds:

For 30 years Paul W. Magda has served the Port Authority with distinction. Except for a few years as a traffic officer, Sgt. Magda's entire career has been in the Police Division's Special Services Unit, where he has dedicated long hours to ensuring that a myriad of public and private ceremonies proceeded with safety and dignity.

Sgt. Magda's prompt response and courageous actions demonstrate the selfless way he approaches each assignment – from emergency airport fires to mammoth celebrations such as the 1976 Bicentennial activities. In 1975 Sgt. Magda was one of the airport police officers who responded instantly when an Eastern Airlines jet suddenly crashed on its landing approach and burst into flames on Rockaway Boulevard. Sgt. Magda was awarded the Police Division Citation for helping to save the ten badly burned survivors of an accident that claimed the lives of more than 100 passengers.

Sgt. Magda has planned, coordinated and implemented strategies to ease the rush hour transportation problems of the thousands of New York and New Jersey commuters during the 1980 PATH and New York City Transit strikes. With a cheerful and willing spirit he worked long hours to expedite extra bus services, to coordinate the movement of thousands of patrons through new routes, and to calm the demanding and volatile situations as patrons stood in endless lines waiting to get back and forth between work and home.

(Board - 2/13/86)

Demonstrating strong diplomatic and supervisory skills throughout his 30 years of service, Sgt. Magda's unselfish dedication has enhanced the Port Authority's image to individuals, to VIP's and to business and diplomatic groups. He coordinated security for such events as visits by Pope John II and Japan's Emperor. With care and precision Sgt. Magda has ensured the safety of many VIP's such as the President of the United States. When Mr. Reagan recently visited Hoboken last year and landed by helicopter at the Port Authority piers, Sgt. Magda was the expert sought by law enforcement agents from the Secret Service, FBI and local police. In a superlative manner, Sgt. Magda managed each detail of police and emergency logistics to ensure the safe arrival and departure of the Presidential helicopter.

Behind the scenes of each VIP public appearance, Sgt. Magda must work under highly pressured conditions. He has to be always prepared to coordinate, at a moment's notice, the placement of his subordinates with the Secret Service and police plans. He must work out likely alternate routes so that he will be able to relocate his staff at short notice for numerous changes in the Secret Service's routes.

Perhaps the most difficult assignments handled by Sgt. Magda have to do with the death of a fellow police officer. Sgt. Magda has given heartfelt concern and dedication to bereaved families of police officers. Letters from the families demonstrate the countless hours he has devoted to easing each family's suffering, helping them through the first difficult days, supervising the official presence of the Police Honor Guard at the funeral, and then assisting the family in settling the cumbersome legal and financial matters during the weeks and months after the funeral.

For 30 years of outstanding service, for consistently maintaining both the public image of the Port Authority and the utmost safety of thousands of distinguished guests and visitors, and for his unstinting devotion to duty, it is recommended that the Distinguished Service Medal be awarded to Paul W. Magda.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Paul W. Magda for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Paul G. Nicholson

It was recommended that the Distinguished Service Medal be awarded to Paul G. Nicholson.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Paul G. Nicholson it is recommended that the Distinguished Service Medal award be given on the following grounds:

Paul G. Nicholson's career in the Engineering Department has shown a consistently high level of design and field supervisory expertise, construction supervision, negotiating skills and contract administration, the mastery of which has taken him from his initial position of Civil Engineer preparing original specifications for construction contracts in 1948, to Resident Engineer for the construction of the George Washington Bridge Bus Station in 1963, to Manager of the Construction Division from 1970 to 1984, to his present position as Assistant Chief Engineer for Construction.

Evidence of his talents was seen in 1957, when Mr. Nicholson was given a two year leave of absence to work for the U.S. State Department to supervise the design, construction and operation of the U.S. Pavilion at the 1958 Brussels World Fair. Upon his return to the Port Authority in 1959, he became an Assistant Engineer of Design for Terminals, and soon after, as Resident Engineer, oversaw the construction of the George Washington Bridge Bus Station early in 1963. He subsequently served in a similar capacity in charge of the modernization and rehabilitation of the track, signal and electric power traction systems, and the New York and New Jersey stations, for the PATH rail system.

Promoted in 1968 to be Assistant Manager of the Department's Construction Division, Paul was actively involved in the supervision of construction contracts for the Tunnels, Bridges and Terminals Department and PATH, in addition to which he assisted the Division Manager in the administration of its Survey and Structural Integrity Groups.

(Board - 2/13/86)

Two years later, Paul became Manager of the Construction Division, a post he was to hold for fourteen years, and which placed him in charge of over 300 employees. Among his major accomplishments were the successful integration of the 165 person Central Maintenance Services Group which provides the Port Authority with construction and maintenance services on a routine and emergency basis, which became the Construction Division in 1971 and ultimately the Staff Engineering Maintenance and Construction (SEMAC) in 1973.

His negotiating skills, adept administration and comprehensive knowledge of the construction industry, including its standards, systems and key leaders, combined to establish him in his present post of Assistant Chief Engineer for Construction, overseeing broad policy and pragmatic issues affecting construction management for the entire Engineering Department.

A graduate of Manhattan College in New York, where he received a bachelors degree in civil engineering, Mr. Nicholson is a licensed Professional Engineer in both New York and New Jersey. His professional trade memberships include the International Bridge, Tunnel and Turnpike Association; the American Society of Civil Engineers; the National Society of Professional Engineers; and The Moles, an organization whose members have extensive experience in heavy construction work.

For his outstanding service and for his dedication and professionalism which have earned him the highest level of respect from his colleagues throughout the engineering profession, it is recommended that Paul G. Nicholson be awarded the Distinguished Service Medal.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Paul G. Nicholson for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Milton H. Pachter

It was recommended that the Distinguished Service Medal be awarded to Milton H. Pachter.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Milton H. Pachter it is recommended that the Distinguished Service Medal award be given on the following grounds:

In over three decades of Port Authority service, Milton H. Pachter, Chief of the Law Department's Litigation Division, has established a reputation for outstanding professional ability, excellent judgment and steadfast devotion. The Port Authority has been the beneficiary not only of Mr. Pachter's superb ability as a trial lawyer but has also benefited from his business acumen, negotiating skills and real estate expertise.

Mr. Pachter began his Port Authority career in 1955 as a law clerk in the Law Department and has steadily risen to his present position as Chief of the Department's Litigation Division, with responsibility for a staff of over 30 professionals, a case load in the thousands, and an annual budget of over \$3 million dollars. His never-failing enthusiasm, energy, inventiveness and overall superb legal talent in handling major Port Authority litigation has set an example for others and has contributed much to the outstanding reputation of the Port Authority's Law Department.

Especially noteworthy was his successful handling of the Port Authority's major condemnation cases, where he was instrumental in saving the organization millions of dollars. New York Supreme Court Justice Charles G. Tierney, at the conclusion of The World Trade Center condemnation cases, expressed the high regard in which Mr. Pachter is held by the New York judiciary:

"The Court wishes to express its deep and sincere appreciation to all counsel who had occasion to appear before it, and especially to the very capable, knowledgeable, personable, and cooperative attorneys for the Port Authority, Milton Pachter. . ."

(Board - 2/13/86)

"I wish to commend counsel for the Port Authority especially for the exhaustive preparation which they had made which was reflected each day in the orderly manner in which the evidence was produced and witnesses were prepared, and certainly enlightened this Court to better understand the issues involved."

More recently, Mr. Pachter personally handled the Federal antitrust lawsuit brought by the Trailways Bus Companies seeking millions of dollars in damages from the Port Authority. As a result of his capable, thorough and spirited defense, Trailways was forced to withdraw its complaint and agreed to abide by the terms of its lease with the Port Authority. In addition, Milt successfully defended the validity of the Port Authority's aircraft noise rule in Federal court last year.

Mr. Pachter also possesses organizational and administrative skills of a high order. These include the ability to train and motivate younger attorneys and at the same time maintain firm control over a heavy and complex calendar of litigated matters.

Mr. Pachter is a full Professor on the adjunct faculty at New York University's Real Estate Institute, and is a recipient of the award for teaching excellence from the University's School of Continuing Education. He has a Bachelor's Degree in Business Administration from CCNY, a Law Degree and a Master's Degree in Law from New York University Law School, and a Doctorate in Law from New York Law School, a remarkably rare achievement.

Mr. Pachter has also had a distinguished military career. During the Korean War, he served with distinction as a Psychological Warfare Officer working with Korean and Chinese prisoners of war. Following the Korean War and a subsequent promotion to Captain, he joined the U.S. Army Reserve where he actively served for 30 years, most recently as Colonel in the Judge Advocate General's Office with responsibility for all of the Army's legal work in the New York area.

For his outstanding record of achievement and his professionalism exercised on behalf of the Port Authority over a long and distinguished career, it is recommended that the Distinguished Service Medal be awarded to Milton H. Pachter.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Milton H. Pachter for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Richard C. Richards

It was recommended that the Distinguished Service Medal be awarded to Richard C. Richards.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Richard C. Richards it is recommended that the Distinguished Service Medal award be given on the following grounds:

Lieutenant Richard C. Richards began his career for the Port Authority in 1949 as a Traffic Officer at the Lincoln and Holland Tunnels. During his 36 years of service, Lt. Richards has held a variety of positions at LaGuardia, Newark International and Kennedy International Airports. Displaying exceptional judgment, courageous action and compassion, he has been a constant role model for new police officers and an invaluable leader in any emergency situation whether it involved a mob of unruly passengers, a fiery airplane crash, or a disturbed teenager.

Lt. Richards has received two citations, in 1967 and in 1975, for his courageous actions in rescuing passengers from fiery airplane crashes.

His fair and dispassionate decision-making made his leadership invaluable in daily police assignments. Lt. Richards' superior officers count on him for a thoughtful evaluation of legal and practical job duties. As a constant and thoughtful role model, Lt. Richards is often assigned new police officers to give them the best orientation on their new jobs. Lt. Richards earned the respect of his superiors and his men. His fellow officers call him "the Judge" or "the Advocate" and they presented him with a gavel to symbolize their respect for him.

His caring and thoughtful treatment of others has garnered praise for the Port Authority; his perceptive and prompt evaluations of problem situations have saved individuals from needless physical and emotional trauma. Many letters fill his personnel folder and attest to his outstanding service as a police officer and tour commander at Kennedy International Airport. The letters include those from the grateful parents of an emotionally disturbed teenager; and one from parents who appreciated how Lt. Richards wisely distinguished between their son's health and mental problems and brought him to medical help for his diabetic crisis.

(Board - 2/13/86)

Most recently as Tour Commander at Kennedy International Airport, Lt. Richards' daily work in monitoring the safe passage of 35,000 travelers has shown his exceptional diligence and dedicated work above and beyond normal duty. Letters from law enforcement agencies, the Federal Bureau of Investigation, and foreign diplomats demonstrate the high praise for Lt. Richards' deft management of potentially volatile situations. He carefully plans and oversees situations, from the transport of an ill traveler; to the safe movement of the expelled Iranian diplomats through Kennedy International Airport in 1980; to the apprehension of an armed bank robber and \$9,000 of stolen money at LaGuardia Airport with such exemplary restraint that there was no injury to the public, the police or the criminal.

On December 21, 1984, he exhibited the finest skills of mediation and problem solving. Faced with a tense standoff between 160 angry passengers who were stranded and the airline terminal operator, Lt. Richards de-escalated the potential violence of the situation by resourcefully locating the charter operator responsible for the overselling of 160 seats in such a busy holiday season. By eliciting the cooperation of Carey Bus Lines and American Airlines, he guided the responsible parties into an agreement to provide hotels, air and ground transportation for the 160 travelers. He solved a secondary problem when payment and credit arrangements were in doubt by having a promissory note drawn between the charter operator and American Airlines.

For his 36 years of dedicated and exemplary service in which he has shown the highest levels of courage, resourcefulness and compassion, it is recommended that Richard C. Richards be awarded the Distinguished Service Medal.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Richard C. Richards for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Andrew L. Saporito

It was recommended that the Distinguished Service Medal be awarded to Andrew L. Saporito.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Andrew L. Saporito it is recommended that the Distinguished Service Medal award be given on the following grounds:

Supervising the work of 26 men performing sign fabrication, sign erection and pavement marking at all Port Authority facilities is a complex task requiring skill in supervision and scheduling, and technical competence in sign shop production procedures. When this assignment must be carried out to accommodate a multitude of rush hour traffic operational requirements at all Port Authority facilities, the task becomes highly demanding. Quick response is often essential; as when critical traffic control signs are knocked down, detours are required for emergency situations or sudden changes in construction stagings, or unexpected traffic problems occur upon the opening of a new facility or roadway. Andrew L. Saporito accomplishes this myriad of responsibilities in an exemplary fashion.

Currently Supervisor of the Traffic Engineering Division's Central Sign Shop, Mr. Saporito began his Port Authority career 24 years ago as a Plumber I in the old Central Maintenance Engineering Division (CMED). He soon progressed to more responsible positions within the foreman ranks and finally to the supervisory position that he now holds. He has demonstrated outstanding ability in improving the sign shop's quick response capability. He has never missed a deadline in his fourteen years as supervisor. On many complex Port Authority construction projects he has coordinated the necessary signing and pavement marking, often working with his crews through nights and weekends to accomplish the work. On several new facility openings such as the Eastern Shuttle Terminal and the George Washington Bridge Toll Plaza, his crews were called in to perform work when contractors could not meet the deadline for opening the facilities. He has received numerous letters of commendation for his quick action; most recently to accommodate the explosive expansion of People's Express at Newark International Airport, and to allow for the Holland Tunnel South tube night closing to facilitate ceiling replacement.

(Board - 2/13/86)

Quick response capability in the sign shop has improved dramatically during his tenure. Constantly striving to speed up sign shop procedures and work methods and reduce labor costs, he has implemented many improvements and innovations. He has instituted a technique for making silk screens by a photographic process to mass produce standard signs. Without this process it would not have been possible to meet the deadline on the Port Authority Bus Terminal Annex opening. He has implemented a new technique for sign erection utilizing new-type brackets that greatly simplify and expedite field erection procedures to utilize the new 20 second fast dry paints, and he maintains a ready inventory of plastic markings to enable quick delineation of new or revised traffic lanes. He selected and implemented the use of a computerized signmaker which automatically cuts out letters or symbols from reflectorized sheeting in the selected style and at the proper spacing for direct transfer to sign blanks. He also assigns vehicles and personnel directly to facilities to minimize travel time and vehicle costs. He keeps a large selection of the more critical sign messages on sheets of clear acetate which he can adhere to blank sign panels instantaneously. His quickness to recognize outstanding performances has generated a spirit of enthusiasm in tackling difficult assignments.

For his ingenuity, resourcefulness, innovation and dependability in increasing the efficiency of the sign shop, it is recommended that Andrew L. Saporito be awarded the Distinguished Service Medal.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Andrew L. Saporito for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Guido Vendittoli

It was recommended that the Distinguished Service Medal be awarded to Guido Vendittoli.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Guido Vendittoli it is recommended that the Distinguished Service Medal award be given on the following grounds:

Guido Vendittoli began his career as a Trackman I in February, 1960 and through dedication and perseverance, he advanced through various and increasingly higher levels of responsibility to his present position of Track Foreman II.

As a Foreman, Mr. Vendittoli is known for his sensitivity to the needs of his staff of track and power rail mechanics and for his commitment to getting the job done within established time limits. His jobs frequently require functions to be performed under difficult circumstances, despite which he has long been able to motivate and maintain the morale of those assigned to his section so that the project goal was achieved. His personal style of leadership instills trust in the Track Section Staff that he supervises. His staff has complete confidence in his ability to look out for their best interests. His former position as Vice Chairman of the Transport Workers Union has provided him with a strong background in union rules and PATH policies.

Mr. Vendittoli was appointed as leader and coordinator of the Aldene Plan, developed in the late 1960's, which required PATH to relocate the main track between Harrison Station and Journal Square to make way for a storage yard. His involvement in this key project resulted in the system's changeover without major traffic interruption.

(Board - 2/13/86)

During a project dealing with a reconnection of PATH from Hudson Terminal to The World Trade Center, a private contractor was hired to construct the track in the WTC complex. Mr. Vendittoli was assigned to act as a coordinator and advisor to the contractor. Over the July 4th weekend, 1971, he led the PATH forces working in coordination with the contractor to change the trackage leading to Hudson Terminal to the new line into the WTC complex, and by rush hour Monday morning, trains were running into the new station.

Mr. Vendittoli was assigned responsibility for all activities concerning the JSTC Complex Project and the rebuilding of switches and an Interlocking Plant. The successful, timely completion of this project was a result of Mr. Vendittoli's efforts.

To prepare for the expanded 1984-1985 PATH Safety Program, it was necessary to construct two new yards at Journal Square. The first, known as "D" Yard, required a total of three new turnouts and approximately 1,000 feet of track, all built under the direction of Mr. Vendittoli. The regular track and power rail forces were used and a temporary force was assigned to assist in the timely completion of the project. He was successful in completing the project within the established time constraints. The second yard at Waldo "C" Yard required four new turnouts and 1,600 feet of track to feed the new shop and support tracks.

Mr. Vendittoli's "hands-on" experience and in-depth knowledge of the track and mechanical aspects of the railroad are invaluable and this has been proven time and time again by the exemplary manner in which he has approached and completed all of his project undertakings. His cooperative attitude and his expertise have earned him admiration and affection from his supervisors, co-workers and associates in other divisions. Guido Vendittoli's name has become synonymous with PATH track work as he is recognized as being one of the most knowledgeable staff members in this area.

For his long-term and consistently high level of performance, numerous achievements and selfless dedication, Guido Vendittoli is highly recommended to receive the 1985 Distinguished Service Medal.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Guido Vendittoli for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Thomas Young

It was recommended that the Distinguished Service Medal be awarded to Thomas Young.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Thomas Young it is recommended that the Distinguished Service Medal award be given on the following grounds:

Thomas Young joined the Port Authority in 1955 as a Port Promotion Representative I in Port Development. Two years later, he joined the Public Affairs Department as an Information Officer I. From the very beginning, he demonstrated a grasp for the finer points of the administrative activities of the Port Authority and a unique sensitivity to the public impact of the various projects and activities the Port Authority began to develop. His abilities led him to promotions through increasingly responsible positions.

In 1979, Tom was promoted to Principal Information Officer and was given responsibility for coordinating the activities of a group of information officers involved in day-to-day media relations. This position requires a working knowledge of every issue, project and event underway, planned or long completed and an ability to use this collective knowledge in planning and advising on future issues. He also was responsible for review and assignment of releases for Board Calendar items, and had special responsibilities in the preparation of all financial and budgetary releases. Through his varied 30-year career, he served in virtually all areas of public and community relations, giving him a strong background for support in departmental functions to all Port Authority line and staff departments.

For many years, Tom Young had as his special area of expertise the handling of Board Meeting agendas and releases, and he handled this difficult and time-consuming function meticulously and flawlessly.

(Board - 2/13/86)

Tom Young was unmatched for speed and accuracy in the preparation of public responses to the toughest questions and on the most complex and varied issues. When there was a difficult release to write, one that required thorough research and sound judgment, invariably the Director of Public Affairs and the Assistant Director turned to him.

Executive staff throughout the Port Authority frequently have called on Tom Young for a quick reading on a possible course of action. Because of his unique abilities and exceptional exposure, Mr. Young established the reputation of knowing everything. Many key reporters, editors, and other media executives have thought first of Tom Young when seeking reliable information on public activities in the Port District. Students seeking clearance on Port Authority business-related term papers; prospective Port Authority business contacts seeking introduction or information; school teachers; and local legislators all felt comfortable in seeking his counsel.

In his role as Media Operations Supervisor, Tom Young has been responsible for coordinating the preparation and distribution of all Port Authority news releases, overseeing the timely maintenance of all mailing lists for these releases to insure that Port Authority news got to the right reporter at the right time to insure maximum effectiveness and fulfill the needs of the media.

A project that deserves special mention is Mr. Young's handling in recent years of the Port Authority's role in publicizing the annual Harbor Festival purpose and goals. He was one of the leading forces in keeping the Harbor Festival focused on the recreational uses of both sides of the New York/New Jersey Harbor. Due to his enthusiasm for Harbor Festival, he was always conscious of the need to keep the activities attuned to the average metropolitan area resident, whether publicizing the Women's Lifeboat Races at Lower Manhattan parades or Liberty State Park band concerts during the annual Festival.

For serving as a reliable and responsive spokesman for the Port Authority, for his never-failing ability to provide the press with accurate and up-to-the-minute information on any Port Authority project, for always being at the scene of the story no matter what the hour or how distant the location, and for his professional, steadfast manner through every situation over the course of three decades, it is recommended that the Distinguished Service Medal be awarded to Thomas Young.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Thomas Young for the performance of outstanding service.

(Board - 2/13/86)

Award of Distinguished Service Medal to Sally Zawaski

It was recommended that the Distinguished Service Medal be awarded to Sally Zawaski.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed usually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Sally Zawaski it is recommended that the Distinguished Service Medal award be given on the following grounds:

Sally Zawaski began her career as an Information Agent at the Port Authority Bus Terminal 32 years ago. She has since distinguished herself in the Transportation Information Field as a true professional and a training specialist. Her dedication to duty is evidenced by her exceptional record of 29 years of perfect attendance, 22 of them consecutive. A member of a very select group of employees who have spent their entire careers at the Bus Terminal, Ms. Zawaski has a personal determination to establish and maintain high standards of performance for herself that have certainly helped the organization achieve its well-deserved reputation for providing superior public service.

Her current position as Information Agent III is one of vital importance to the smooth, efficient operation of the Bus Terminal's Information Center. Training new Information Agents is only one of her duties, but it is a particularly crucial one in terms of both present and future operations. In fact, Ms. Zawaski is tested anew each year when the Information Center's staff increases for the summer and she must train a fresh crop of employees who are new to the facility as well as to the process of giving out transportation information to the public. Her calm, gentle manner and encyclopedic knowledge of the various facets of her job, combined with a special talent for communicating that knowledge to new agents, serve to make her a particular asset to the Information Center and assure that its services will continue to be provided courteously and efficiently.

(Board - 2/13/86

Ms. Zawaski's reputation for reliability and dedication extends beyond Port Authority staff. All the carriers who operate out of the Bus Terminal recognize that, no matter when changes occur in their schedules or operation procedures, she can be relied upon to ensure that they are incorporated into the Information Center network so that proper public advisories will be made. Often, carriers do not remember to notify the Information Center of schedule changes until scant hours before they are to take effect. Nonetheless, Ms. Zawaski keeps attuned to everything that may affect the Terminal's operations—especially those of the Information Center—and keeps the agents informed about such changes as efficiently as she ensures that they are fully aware of emergencies and special events so that they can advise patrons accordingly.

Ms. Zawaski's personnel file is filled with commendations—from her supervisors and from patrons to whom she has provided assistance. In addition, there is one noteworthy letter from an employee she once supervised. It reads in part: "...Sally, faced with a continuous stream of phone calls from patrons asking 'What are your delays' and 'What are your cancellations?', managed to be pleasant and helpful all the while. It could be said that Sally is only doing her job. I dismiss this kind of conclusion...Sally set the tone and fine crew followed through with the same quiet patience, passing along as much information as she or we could find. It was a pleasure to work under her supervision."

Ms. Zawaski has consistently been a source of inspiration to all who have come in contact with her, and she has been a role model for new Information Center employees. She is always available to help with difficult requests, and she is always willing to give her support in difficult times. Sally is an original, a truly unique and outstanding member of the Port Authority staff.

For her long and dedicated service to the Port Authority in her role as Information Agent in the highest tradition of Public Service, it is recommended that the Distinguished Service Medal be awarded to Sally Zawaski.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Sally Zawaski for the performance of outstanding service.

(Board - 2/13/86)

Report on Public Hearing - Port Authority Financing Plan

It was reported that gross capital expenditures may exceed \$4 billion over the next five years. The level of expected expenditures and the volatility of financial markets, as well as prudent financial planning, make it desirable for the Port Authority to have a financing plan which will provide needed flexibility and enable the Port Authority to finance its capital expenditures, as appropriate, through a combination of long-, intermediate- and short-term obligations (including obligations used to refund existing obligations of the Port Authority) so that capital (or other) funds might be obtained expeditiously and at the most favorable interest cost to the Port Authority. The financing plan would include the establishment and authorization of the issuance and sale of Consolidated Bonds, Fifty-seventh Series, and Consolidated Bonds, Fifty-eighth Series, and amendments to existing authorizations with respect to various obligations.

It was further reported that, on February 11, 1986, public hearings in connection with the issuance and sale of bonds, notes and other obligations of the Port Authority as provided by Section 103(k) of the Internal Revenue Code of 1954, as added by the Tax Equity and Fiscal Responsibility Act of 1982, and the regulations promulgated thereunder, were conducted by the Treasurer of the Port Authority at the offices of the Port Authority at One World Trade Center and at the offices of the Port Authority at the Journal Square Transportation Center, pursuant to public notice published on January 27, 1986, in The New York Times, a newspaper of general circulation in the New York portion of the Port District, and in The Star Ledger, a newspaper of general circulation in the New Jersey portion of the Port District. In pertinent part, the notice contained the following description of the above obligations and the Authority's facilities and projects: "Consolidated Bonds of The Port Authority of New York and New Jersey, presently denominated as the Fifty-seventh and Fifty-eighth Series; and the previously approved Consolidated Bonds, Fifty-sixth Series; Consolidated Notes, Series KK, Series LL and Series MM; a series of Port Authority Limited Obligation Variable Rate Demand Bonds; a Bank Loan; and the Port Authority Operating Equipment - Lease Financing Program, all to be issued and sold in connection with a plan of financing, which also includes the Port Authority Commercial Paper Program, various capital and other expenditures at certain of the facilities of the Port Authority located in the Port of New York District, to wit, the Holland Tunnel, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, Port Authority Bus Terminal, Port Authority Bus Programs, Hudson Tubes portion of the Port Authority Trans-Hudson System, New York Union Motor Truck Terminal, LaGuardia Airport, John F. Kennedy International Airport, Newark International Airport, Teterboro Airport, Port Authority-West 30th Street Heliport, Port Authority-Downtown

Manhattan Heliport, Oak Point Rail Freight Link, a rail freight improvement project in The Bronx, N.Y., Port Newark, Hoboken-Port Authority Marine Terminal, Brooklyn-Port Authority Marine Terminal, Erie Basin-Port Authority Marine Terminal, Elizabeth-Port Authority Marine Terminal, Columbia Street Marine Terminal, Howland Hook Marine Terminal, New York City Passenger Ship Terminal, Pre-development Site Acquisition Program, a project or facility for acquisition of real property in the New Jersey and New York portions of the Port of New York District, World Trade Center, a facility of commerce in Manhattan, N.Y., Bathgate Industrial Park, an industrial park in The Bronx, N.Y., Port Authority Industrial Park at Elizabeth, an industrial park in Elizabeth, N.J., Port Authority Industrial Park at Yonkers, an industrial park in Yonkers, N.Y., Teleport, a satellite communications center at the Staten Island Industrial Park, Staten Island, N.Y., a foreign trade zone/distribution center and industrial development project or facility in the Howland Hook Marine Terminal Area of Staten Island, N.Y., a bank for regional development project or facility in the New Jersey and New York portions of the Port of New York District, a pre-development site acquisition project or facility for acquisition of real property in the New Jersey and New York portion of the Port of New York District, a port improvement homeport project or facility in the vicinity of the pier area of Stapleton, Staten Island, N.Y., a legal and communications center project or facility in Newark, N.J., a resource recovery project or facility in Essex County, N.J., a waterfront development project or facility to be located in each of Hunters Point, Queens, N.Y., and Hoboken, N.J., a separate receiving and storage facility for imported automobiles at the Greenville Freight Yard and additional development of the site in Jersey City, N.J., a marine terminal project or facility consisting in part of a float bridge associated with transportation of rail freight between the Greenville freight yard in Jersey City, N.J., and the Brooklyn, N.Y., waterfront, to be authorized by the Port Authority. The initial owner, operator or manager of these facilities is or will be the Port Authority. The major projects presently authorized or which may be authorized by the Port Authority to be undertaken at these facilities include at LaGuardia Airport, general runway and roadway modification, paving, Central Terminal Building expansion; John F. Kennedy International Airport, general runway, taxiway and roadway modification, paving, modification to the International Arrivals Building, multi-tenant air cargo services building, central terminal area roadway reconstruction, passenger distribution system and construction of additional terminal facilities and related improvements; Newark International Airport, general runway and roadway modification, paving, construction of additional parking facilities, maintenance building, completion of Terminal C; a Bi-State Port Development Program in New York and New Jersey, including certain dredging, Howland Hook Marine Terminal, acquisition, improvement,

expansion, Port Newark, channel dredging, berth deepening, terminal improvements, Elizabeth-Port Authority Marine Terminal, channel dredging, berth deepening, building construction, paving; Erie Basin-Port Authority Marine Terminal, fishport project; Brooklyn-Port Authority Marine Terminal, Red Hook Container Terminal expansion, distribution buildings; Oak Point Rail Freight Link project; an intermodal freight handling facility in The Bronx, N.Y.; miscellaneous capital improvements at the World Trade Center, including continued installation of a sprinkler system; Bathgate Industrial Park project; Elizabeth Industrial Park project; Yonkers Industrial Park project; Port Authority Bus Terminal, extension, improvement, modernization; Teleport project; Port Authority Bus Programs; capital improvements related to safety, maintenance, rehabilitation or improvement at the Hudson Tubes portion of Port Authority Trans-Hudson System, the George Washington Bridge, Lincoln Tunnel, Holland Tunnel, Goethals Bridge, Bayonne Bridge, Outerbridge Crossing; Howland Hook project; Bank for Regional Development project; Pre-development Site Acquisition Program project; Homeport project; Legal and Communications Center project; Essex County resource recovery project; Hunters Point waterfront project; Hoboken waterfront project; Greenville yard marine terminal and float bridge project; ferries; park/ride lots; a Center for Advanced Technology and Telecommunications in Brooklyn, N.Y.; and other miscellaneous capital improvements and replacements and operating equipment lease financing in connection with the facilities of the Port Authority. The said obligations of the Port Authority would be issued for purposes of capital or other expenditures with respect to the facilities and projects noted above and in the maximum aggregate principal amounts noted below: each of said Series of Consolidated Bonds would be in principal amount of up to \$200,000,000, provided, however, that the total aggregate principal amount of all said Series of Bonds sold would not exceed \$400,000,000; each of said Series of Consolidated Notes would be in principal amount of up to \$100,000,000, provided, however, that the total aggregate principal amount of all said Series of Notes sold would not exceed \$200,000,000; the Series of Port Authority Limited Obligation Variable Rate Demand Bonds would be in principal amount of up to \$200,000,000; the Bank Loan would be in a principal amount of up to \$100,000,000; the Port Authority Commercial Paper Program would be in principal amounts of up to \$150,000,000 outstanding at any one time; and the Port Authority Operating Equipment - Lease Financing Program would be in principal amounts of up to \$10,000,000 at any one time."

It was recommended that the Board establish Consolidated Bonds, Fifty-seventh Series, Due 2021, and Consolidated Bonds, Fifty-eighth Series, Due 2022, and that the Board authorize the issuance of up to \$200 million in aggregate principal amount of each such Series of Bonds, provided, however, that the total aggregate principal amount sold of the two newly-established

Series of Bonds and the previously established Consolidated Bonds, Fifty-sixth Series, Due 2021, shall not exceed \$400 million. It was further recommended that the Committee on Finance be authorized to sell and to deliver all or any part of each such Series of Bonds at such time or times on or before June 30, 1987, as it deems propitious, in one or more installments, at public or private sale, bearing interest at a rate or rates including fixed or variable rates or a combination thereof or without a stated rate of interest for each such Series, to be fixed by the Committee, but in any event not in excess of 15% per annum.

The proceeds of each of Consolidated Bonds, Fifty-seventh Series, and Consolidated Bonds, Fifth-eighth Series, would be authorized, subject to allocation and restriction by the Committee on Finance:

(a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, all or any portion of the unspent proceeds of each such Series of Bonds may be used for any purpose for which at the time of issuance thereof the Authority is authorized by law to issue its obligations, including capital expenditures in connection with the facilities of the Authority certified or to be certified after issuance of each such Series of Bonds; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of each such Series of Bonds; and (c) for the purpose of refunding, at maturity, Commercial Paper Notes in accordance with applicable law, regulations and contractual provisions.

It was also recommended that the Board authorize the Committee on Finance to designate and appoint one or more Paying Agents, a Registrar and a Trustee in connection with each of such Series of Bonds, as appropriate.

It was further recommended that the Board provide that no part of the proceeds of each of such Series of Bonds shall be invested directly or indirectly in such a manner as to cause the interest on each of such Series of Bonds to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

It was recommended that certification on behalf of the Authority as to the need for the issuance of each of such Series of Bonds, as to the status of the projects for which the proceeds of said Bonds are to be used, as to the Authority's intentions with respect to the application and investment of such proceeds and as to such other related matters as may be authorized by the Committee on Finance may be made by the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority, and that any such action taken in connection therewith be ratified; it was also recommended that any action which may be necessary or desirable in connection with said Bonds to assure that such Bonds are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and to assure that the interest on said Bonds is not subject to Federal income taxes, may be taken by the Committee on Finance, the Chairman of the Authority, the Chairman of the Committee on Finance, the Executive Director, Assistant Executive Director, Chief Financial Officer or Treasurer of the Authority and that any such actions taken in connection therewith be ratified.

The Bonds of the Fifty-seventh and Fifty-eighth Series would be dated as of November 1, 1986 and April 1, 1987, respectively, mature November 1, 2021 and April 1, 2022, respectively, and bear interest at a rate or rates including fixed or variable rates or a combination thereof or without a stated rate of interest, to be fixed by the Committee on Finance not in excess of 15% per annum, and shall be sold at a price resulting in a net interest cost to the Authority for each such Series of Bonds not in excess of 15% per annum. A sinking fund would be established for each Series of Bonds to meet the requirements of a schedule of mandatory periodic retirement commencing in 1996 and 1997 for each such Series of Bonds, respectively, to completely retire each Series at or prior to its respective maturity, for which purpose the Bonds would be callable for redemption prior to maturity at 100%. The Bonds of each Series would also be subject to redemption, at the option of the Authority, in whole or in part, commencing in 1996 and 1997, respectively, for each such Series of Bonds, at prices beginning at 103% and descending to 100%.

The Bonds would be issued in registered form, registered as to both principal and interest and not as to either alone. The Bonds would be issued in denominations of \$5,000 or integral multiples of \$5,000.

It was recommended that the Committee on Finance of the Authority be authorized (i) prior to the issuance of the first installment of the Bonds of each Series, to change the date as of which the Bonds of such series shall be dated to any date on or before June 30, 1987, and, if the date as of which the Bonds of such Series shall be dated is so changed and the Bonds bear a stated rate or rates of interest, the Committee would change by the same number of days the respective dates on which interest on the Bonds of such Series would be payable; (ii) prior to the issuance of any installment of the Bonds of each Series, to change the date at which any of the Bonds of that installment would mature; provided, that said date or dates would not be more than thirty-five years from the date as of which the Bonds of such Series are dated; (iii) prior to the issuance of the first installment of the Bonds of each Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the Bonds of such Series; (iv) prior to the issuance of the first installment of the Bonds of each Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the Bonds of such Series; (v) prior to the issuance of the first installment of the Bonds of each Series, to reduce the percentages of face value relating to the optional call provisions for the Bonds of such Series; (vi) prior to the issuance of the first installment of the Bonds of each Series, to provide for the Bonds of each Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (vii) prior to the issuance of any installment of the Bonds of each Series, consistent with the foregoing, to change or adjust the provisions of the Bonds of such installment thereof to permit the issuance of such Bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest.

In addition to the foregoing, it was also recommended that the amounts authorized to be issued and sold of Consolidated Bonds, Fifty-sixth Series, and of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, be amended to conform to the financing plan as reported above. Additionally, in recognition of continued fluctuation in the financial markets, as well as the desirability of increasing flexibility of the financing plan, it was also recommended that the authorization to sell certain of the obligations described in the financing plan be extended.

In this connection, it was also reported that the Board, at its meeting on October 11, 1984, adopted separate resolutions establishing and authorizing the issuance of each of Consolidated Notes, Series KK, Series LL, and Series MM, and, in each case, authorizing the sale of each such Series of Notes by the Committee on Finance on or before October 15, 1986 in a principal amount not to exceed \$25 million, and establishing and authorizing the execution and delivery of a Bank Loan of 1985 in a principal amount not to exceed \$100 million. The Board, at its meeting on July 11, 1985, amended the resolutions authorizing the sale of each said Series of Consolidated Notes increasing the aggregate principal amount thereof, in each case, to \$50 million, provided, however, that the total aggregate principal amount of such issues of Consolidated Notes sold could not exceed \$95 million.

It was recommended that, in order to maintain maximum flexibility for obtaining funds through the issuance of short-term obligations, the resolutions relating to Consolidated Notes be further amended to permit the sale of Consolidated Notes, Series KK, Series LL, and Series MM, each in a principal amount of up to \$100 million, provided, however, that the aggregate principal amount of the three Series of Consolidated Notes sold would not exceed \$200 million.

It was further recommended that the applicable resolutions covering the obligations described in the financing plan be amended to provide that the Committee on Finance, the Chairman of the Authority, the Chairman of the Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer or Treasurer be authorized to take any action which may be necessary or desirable to assure that such obligations are in conformity with the provisions of the Internal Revenue Code of 1954, as amended and the regulations promulgated thereunder, and to assure that the interest on such obligations is not subject to Federal income taxes.

It was further reported that the Board, at its meeting on November 14, 1985, adopted separate resolutions authorizing the establishment, issuance and sale of Consolidated Bonds, Fifty-sixth Series, Due 2021; the Committee on Finance may sell such Series in a principal amount not to exceed \$200 million at one or more times on or before December 31, 1986. For consistency with the proposed establishment and authorization of the issuance and sale of Consolidated Bonds, Fifty-seventh Series, and Consolidated Bonds, Fifty-eighth Series, it was recommended that the resolutions authorizing the issuance and sale of the Fifty-sixth Series of Consolidated Bonds also be amended to provide that the total aggregate principal amount sold of the Fifty-sixth, Fifty-seventh and Fifty-eighth Series of Consolidated Bonds not exceed \$400 million.

It is prudent and in the interest of maximizing the flexibility of the financing plan to extend the time periods for effectuating the elements of the financing plan, in each case, to June 30, 1987. It was therefore recommended that the resolutions relating to Consolidated Bonds, Fifty-sixth Series; to each of Consolidated Notes, Series KK, Series LL and Series MM; and to the Limited Obligation Variable Rate Demand Bonds be amended in each case to authorize the sale of such Bonds or Notes by the Committee on Finance on or before June 30, 1987. It was therefore also recommended that the resolution relating to the Bank Loan be amended to provide that such Bank Loan be executed and delivered at any time before June 30, 1987. It is also deemed appropriate and it was therefore recommended that the Limited Obligation Variable Rate Demand Bonds, "Series 1985, Due 2015" be renamed "Series 1986, Due 2016" and that the "Bank Loan of 1985" be renamed the "Bank Loan of 1986."

In all respects, other than as hereinbefore described, the resolutions relating to Consolidated Bonds, Fifty-sixth Series, Consolidated Notes, Series KK, Series LL, and Series MM, the Port Authority's Limited Obligation Variable Rate Demand Bonds, and the Bank Loan would remain unchanged. In this connection, it was noted that the proceeds from the sale of each of the aforementioned Series of Consolidated Bonds and Notes may be used to refund prior Consolidated Notes and Commercial Paper Notes and that it is anticipated that such proceeds may be used for such purposes.

Consolidated Bonds, Fifty-seventh Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as the "Fifty-seventh Series, Due 2021," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of the Fifty-seventh Series, Due 2021, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments as the Authority may hereafter determine.

The bonds of this Series shall be dated as of November 1, 1986, shall mature on November 1, 2021, and shall bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, from the semi-annual interest payment date next preceding their date of issue, or if such date of issue shall be an interest payment date, from such date of issue, not exceeding fifteen per centum (15%) per annum, as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed or variable rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on May 1, 1987, and thereafter on each succeeding November 1 and May 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), or the regulations promulgated thereunder, which does not provide that, for the

interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance shall and it is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to November 1, 1996, and prior to maturity, as follows:

At one hundred three per centum (103%) of their face value, plus accrued interest to the date fixed for redemption, at November 1, 1996, and thereafter and at or prior to November 1, 1998; at one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to November 1, 2001; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to November 1, 2004; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to May 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of

general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium, (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-seventh Series, Due 2021, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at November 1 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next

preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to September 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to September 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to November 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of September 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on September 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at November 1, 1996, and at November 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at November 1, 1996, and thereafter and at or prior to November 1, 2020.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1996	0.5	2009	25.0
1997	1.0	2010	30.0
1998	1.5	2011	35.0
1999	2.0	2012	41.0
2000	3.0	2013	47.0
2001	4.0	2014	53.0
2002	5.5	2015	59.0
2003	7.0	2016	65.0
2004	9.0	2017	72.0
2005	11.0	2018	79.0
2006	14.0	2019	86.0
2007	17.0	2020	93.0
2008	21.0	2021	100.0

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however,* that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying

the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-SEVENTH SERIES, DUE 2021**

No. C(57)-

Maturity Date: November 1, 2021 Interest Rate: . . . % Per Annum Dated: November 1, 1986 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of November, 2021, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on May 1, 1987, and thereafter on each succeeding November 1 and May 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of February 13, 1986, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at November 1 of any year prior to maturity beginning with 1996 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at November 1, 1996, and thereafter and at or prior to November 1, 2020.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to November 1, 1996, as follows:

At one hundred three per centum (103%) of its face value, plus accrued interest to the date fixed for redemption, at November 1, 1996, and thereafter and at or prior to November 1, 1998; at one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to November 1, 2001; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to November 1, 2004; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to May 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of November, 1986.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority, shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

Dated:

..... (Signature of Registered Holder)

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before June 30, 1987, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature: provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the bonds of this Series; (iv) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the bonds of this Series; (v) prior to the issuance of the first installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for the bonds of this Series; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing, to change or

adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or any coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Fifty-seventh Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 13th day of February, 1986, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as the "Fifty-seventh Series, Due 2021" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds of the Authority of the Fifty-seventh Series, Due 2021, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the Fifty-seventh Series.

SECTION 3. The bonds of this Series shall be numbered upward from C(57)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation

by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Fifty-seventh Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, constituting the Fifty-seventh Series, Due 2021 (hereinafter called the "bonds of this Series"), at a price which will result in a net interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before June 30, 1987, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-sixth Series, Due 2021, Consolidated Bonds, Fifty-seventh Series, Due 2021, and Consolidated Bonds, Fifty-eighth Series, Due 2022, sold by the Committee shall not exceed Four Hundred Million Dollars (\$400,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before June 30, 1987, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the purchaser or purchasers in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

SECTION 6. The Committee; Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder and that the interest on such bonds of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. The Chairman of

the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee, and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Fifty-eighth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as the "Fifty-eighth Series, Due 2022," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of the Fifty-eighth Series, Due 2022, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments as the Authority may hereafter determine.

The bonds of this Series shall be dated as of April 1, 1987, shall mature on April 1, 2022, and shall bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, from the semi-annual interest payment date next preceding their date of issue, or if such date of issue shall be an interest payment date, from such date of issue, not exceeding fifteen per centum (15%) per annum, as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed or variable rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on October 1, 1987, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone: *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1954, as amended (hereinafter called the "Code"), or the regulations promulgated thereunder, which does not provide that, for the

interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance shall and it is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to April 1, 1997, and prior to maturity, as follows:

At one hundred three per centum (103%) of their face value, plus accrued interest to the date fixed for redemption, at April 1, 1997, and thereafter and at or prior to April 1, 1999; at one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2002; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2005; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of

interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance shall and it is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to April 1, 1997, and prior to maturity, as follows:

At one hundred three per centum (103%) of their face value, plus accrued interest to the date fixed for redemption, at April 1, 1997, and thereafter and at or prior to April 1, 1999; at one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2002; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2005; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of

general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium, (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-eighth Series, Due 2022, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 1 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next

preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to August 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to August 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to October 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of August 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on August 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at October 1, 1997, and at October 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 1997, and thereafter and at or prior to October 1, 2021.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1997	0.5	2010	25.0
1998	1.0	2011	30.0
1999	1.5	2012	35.0
2000	2.0	2013	41.0
2001	3.0	2014	47.0
2002	4.0	2015	53.0
2003	5.5	2016	59.0
2004	7.0	2017	65.0
2005	9.0	2018	72.0
2006	11.0	2019	79.0
2007	14.0	2020	86.0
2008	17.0	2021	93.0
2009	21.0	2022	100.0

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying

the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-EIGHTH SERIES, DUE 2022**

No. C(58)-. . . .
Maturity Date: April 1, 2022 Interest Rate:% Per Annum Dated: April 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of April, 2022, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on October 1, 1987, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of February 13, 1986, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at October 1 of any year prior to maturity beginning with 1997 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at October 1, 1997, and thereafter and at or prior to October 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to April 1, 1997, as follows:

At one hundred three per centum (103%) of its face value, plus accrued interest to the date fixed for redemption, at April 1, 1997, and thereafter and at or prior to April 1, 1999; at one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2002; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2005; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of April, 1987.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before June 30, 1987, and; if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the bonds of this Series; (iv) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the bonds of this Series; (v) prior to the issuance of the first installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for the bonds of this Series; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing, to change or

adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or any coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Fifty-eighth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 13th day of February, 1986, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as the "Fifty-eighth Series, Due 2022" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds of the Authority of the Fifty-eighth Series, Due 2022, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the Fifty-eighth Series.

SECTION 3. The bonds of this Series shall be numbered upward from C(58)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, at or before maturity, all or any part of any issue of Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding, in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation

by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Fifty-eighth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, constituting the Fifty-eighth Series, Due 2022 (hereinafter called the "bonds of this Series"), at a price which will result in a net interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before June 30, 1987, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-sixth Series, Due 2021, Consolidated Bonds, Fifty-seventh Series, Due 2021, and Consolidated Bonds, Fifty-eighth Series, Due 2022, sold by the Committee shall not exceed Four Hundred Million Dollars (\$400,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before June 30, 1987, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the purchaser or purchasers in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

SECTION 6. The Committee; Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder and that the interest on such bonds of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. The Chairman of

the Authority: Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Comptroller; Deputy Comptroller; Assistant Director, Finance Department; Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such action taken in connection therewith are hereby ratified.

(Board - 2/13/86)

Consolidated Bonds, Fifty-sixth Series - Consolidated Notes, Series KK, Series LL, and Series MM -
Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016 -
Bank Loan of 1986 - Amendments

Pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that Section 10 of the resolution of November 14, 1985 (appearing at pages 478 et seq. of the Official Minutes of that date), which resolution relates to the establishment of Consolidated Bonds, Fifty-sixth Series, be amended to read as follows:

"SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before June 30, 1987, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of the bonds of this Series; (iv) prior to the issuance of the first installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption to retire the entire Series at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to the bonds of this Series; (v) prior to the issuance of the first installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for the bonds of this Series; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders;

(vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed or variable interest rate or rates or a combination thereof; and (viii) to take such other action as in the opinion of the Committee will best serve the public interest."

and it is further

RESOLVED, that Sections 1 and 2 of the resolution of November 14, 1985 (appearing at pages 491-492 of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Bonds, Fifty-sixth Series, be amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, constituting the Fifty-sixth Series, Due 2021 (hereinafter called the "bonds of this Series"), at a price which will result in a net interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before June 30, 1987 and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; provided, however, that the total aggregate principal amount of Consolidated Bonds, Fifty-sixth Series, Due 2021, Consolidated Bonds, Fifty-seventh Series, Due 2021, and Consolidated Bonds, Fifty-eighth Series, Due 2022, sold by the Committee shall not exceed Four Hundred Million Dollars (\$400,000,000).

"SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before June 30, 1987, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority."

RESOLVED, that the first sentence of Section 6 of the resolution of November 14, 1985 (appearing at pages 491-492 of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Bonds, Fifty-sixth Series, be amended to read as follows:

"Section 6. The Committee; the Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such bonds of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. * * *"

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 467 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution, as amended, relates to the establishment and authorization of issuance of Consolidated Notes, Series KK, be further amended to read as follows:

"SECTION 2. There is hereby established a Series of negotiable notes of the Authority to be known as "Consolidated Notes, Series KK" (hereinafter called the "Series KK Notes" or "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series KK Notes is hereby authorized. Said Series KK Notes shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED, that Section 9 of the resolution of October 11, 1984 (appearing at pages 467 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution, as amended, relates to the establishment and authorization of issuance of Consolidated Notes, Series KK, be further amended to read as follows:

"SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the Series KK Notes (i) to change the date as of which the notes of this Series shall be dated to any date on or before June 30, 1987; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (v) consistent with the foregoing, to change or adjust the provisions of the notes of this Series to permit the issuance of such notes of this Series with a fixed or variable interest rate or rates or a combination thereof; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest."

and it is further

RESOLVED, that Sections 1 and 2 of the resolution of October 11, 1984 (appearing at pages 475-476 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series KK, be further amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee) is hereby

authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series KK (hereinafter called the "Series KK Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before June 30, 1987, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series KK Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Two Hundred Million Dollars (\$200,000,000).

"SECTION 2. The Committee shall have power, in connection with the Series KK Notes, to fix the time or times of sale on or before June 30, 1987, to determine the terms and conditions upon which sales be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority."

and it is further

RESOLVED, that the first sentence of Section 6 of the resolution of October 11, 1984 (appearing at pages 475-476 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series KK, be further amended to read as follows:

"Section 6. The Committee; the Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such notes of this Series is not subject to Federal income

taxes, and any such actions taken in connection therewith are hereby ratified. * * *

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 477 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of the date), which resolution relates to the establishment and authorization of the issuance of Consolidated Notes, Series LL, be further amended to read as follows:

"SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series LL" (hereinafter called the "Series LL Notes" or "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series LL Notes is hereby authorized. Said Series LL Notes shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED that Section 9 of the resolution of October 11, 1984 (appearing at pages 477 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance of Consolidated Notes, Series LL, be further amended to read as follows:

"SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the Series LL Notes (i) to change the date as of which the notes of this Series shall be dated to any date on or before June 30, 1987; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of

the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (v) consistent with the foregoing, to change or adjust the provisions of the notes of this Series to permit the issuance of such notes with a fixed or variable interest rate or rates or a combination thereof; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest."

and it is further

RESOLVED, that Sections 1 and 2 of the resolution of October 11, 1984 (appearing at page 485 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series LL, be further amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series LL (hereinafter called the "Series LL Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before June 30, 1987, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series LL Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Two Hundred Million Dollars (\$200,000,000).

"SECTION 2. The Committee shall have power, in connection with the Series LL Notes, to fix the time or times of sale on or before June 30, 1987, to determine

the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority."

and it is further

RESOLVED, that the first sentence of Section 6 of the resolution of October 11, 1984 (appearing at page 485 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series LL, be amended to read as follows:

"Section 6. The Committee; the Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such notes of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. * * *"

and it is further

RESOLVED, that the first paragraph of Section 2 of the resolution of October 11, 1984 (appearing at pages 486 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series MM, be further amended to read as follows:

"SECTION 2. There is hereby established a Series of negotiable notes of the Authority to be known as "Consolidated Notes, Series MM" (hereinafter called the "Series MM Notes" or "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series MM Notes is hereby authorized. Said Series MM Notes shall

be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution."

and it is further

RESOLVED, that Section 9 of the resolution of October 11, 1984 (appearing at pages 486 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of issuance of Consolidated Notes, Series MM, be further amended to read as follows:

"SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the Series MM Notes (i) to change the date as of which the notes of this Series shall be dated to any date on or before June 30, 1987; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued in book-entry form without certificates and to be separately registrable as to principal and interest to any one or more holders; (v) consistent with the foregoing, to change or adjust the provisions of the notes of this Series to permit the issuance of such notes with a fixed or variable interest rate or rates or a combination thereof; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest."

and it is further

RESOLVED, that Sections 1 and 2 of the resolution of October 11, 1984 (appearing at page 494 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the

authorization of the sale of Consolidated Notes, Series MM, be further amended to read as follows:

"SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series MM (hereinafter called the "Series MM Notes"), at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before June 30, 1987, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said Series MM Notes; provided, however, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, and Consolidated Notes, Series MM, sold by the Committee shall not exceed Two Hundred Million Dollars (\$200,000,000).

"SECTION 2. The Committee shall have power, in connection with the Series MM Notes, to fix the time or times of sale on or before June 30, 1987, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority."

and it is further

RESOLVED, that the first sentence of Section 6 of the resolution of October 11, 1984 (appearing at pages 494 of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the authorization of the sale of Consolidated Notes, Series MM, be amended to read as follows:

"Section 6. The Committee; the Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable

to assure that the notes of this Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such notes of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. * * *

and it is further

RESOLVED, that the name of The Port Authority of New York and New Jersey, Bank Loan of 1985, the delivery and execution of which was authorized by the resolution of October 11, 1984 (appearing at pages 495 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), is hereby changed from "The Port Authority of New York and New Jersey, Bank Loan of 1985" to "The Port Authority of New York and New Jersey, Bank Loan of 1986"; and it is further

RESOLVED, that the definition of "Port Authority Commercial Paper Notes" contained in Article I of the resolution of October 11, 1984 (appearing at pages 495 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of execution and delivery of the Bank Loan, be further amended as follows:

"The term "Port Authority Commercial Paper Note" or "Port Authority Commercial Paper Notes" shall mean any note or notes constituting all or a portion of the issue of Port Authority Commercial Paper Notes issued under a resolution adopted by the Authority on November 14, 1985 in connection with the Port Authority Commercial Paper Program, as said resolution may be amended from time to time."

and it is further

RESOLVED, that Sections 2.01 and 2.02 of Article II of the resolution of October 11, 1984 (appearing at pages 495 et seq. of the Official Minutes of that date), as amended by the resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution

relates to the establishment and authorization of execution and delivery of the Bank Loan, be further amended as follows:

"Section 2.01. Establishment and Authorization of Issue of the Bank Loan. There is hereby established an issue of special obligations of the Authority to be known as "The Port Authority of New York and New Jersey, Bank Loan of 1986." The Bank Loan is hereby authorized to be issued for the purposes set forth in Section 2.04 of this Resolution, in the principal amount of up to One Hundred Million Dollars (\$100,000,000). The Committee on Finance of the Authority is hereby authorized to provide for the execution and delivery of the Bank Loan Agreement and the Promissory Note at such time as may be determined and fixed by said Committee on or before June 30, 1987 (which said time of execution and delivery said Committee is hereby authorized to fix and determine), and upon public bid or private offer (which such bid or offer said Committee is hereby authorized to accept or reject), with or without advertisement, only from such banks or trust companies as are authorized to do business in the State of New York or the State of New Jersey.

"Section 2.02. General Terms of the Bank Loan, Bank Loan Agreement and Promissory Note. The Bank Loan shall be in an aggregate principal amount to be determined by the Committee on Finance of the Authority up to One Hundred Million Dollars (\$100,000,000); shall be dated as of the date of the Bank Loan Agreement and the Promissory Note, such date to be determined and fixed by the Committee on Finance as any date on or before June 30, 1987; shall mature on a date or dates to be determined and fixed by the Committee on Finance, provided that such date or dates shall not be more than ten (10) years from the date of the Bank Loan Agreement and Promissory Note; shall bear a stated interest rate or rates including fixed or variable rates or a combination thereof, from its date until maturity or prior redemption, not in excess of twelve per centum (12%) per annum to be determined and fixed by the Committee on Finance, which said Committee may also determine that said Bank Loan shall not bear a stated rate of interest; shall be at a price which will result in a net interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity or prior redemption; shall be payable as to principal and

interest, from the sources of payment set forth in Section 2.03 of this Resolution, on a schedule to be determined and fixed by the Committee on Finance, provided, that such schedule shall permit redemption of the Bank Loan, at the option of the Authority, prior to maturity without premiums or penalty; shall be in the form of a Bank Loan Agreement and Promissory Note to be authorized by the Committee on Finance subject to the terms, conditions and limitations provided or referred to in this Resolution, which Bank Loan Agreement may contain such other terms and conditions not inconsistent with this Resolution and which Bank Loan Agreement and Promissory Note shall be executed by an Authorized Officer; and shall be payable as to principal and interest in lawful money of the United States of America at the principal office of the Authority or its paying agent or paying agents appointed for such purpose, if any, or otherwise as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to take all actions in connection with the foregoing to fix and determine the general terms of the Bank Loan, Bank Loan Agreement and Promissory Note and generally to take such other action as in the opinion of the Committee will best serve the public interest."

and it is further

RESOLVED, that the second paragraph of Section 4.04 of Article IV of the resolution of October 11, 1984 (appearing at pages 495 et seq. of the Official Minutes of that date), as amended by the Resolution of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of execution and delivery of the Bank Loan, be further amended as follows:

"The Committee on Finance, the Chairman of the Authority, Chairman of the Committee, Executive Director, Assistant Executive Director, Chief Financial Officer or Treasurer of the Authority is hereby authorized, in connection with the Bank Loan, to take any action which may be necessary or desirable to assure that the Bank Loan is in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such Bank Loan is not subject to Federal

income taxes, and any such actions taken in connection therewith are hereby ratified."

RESOLVED, that the name of the series of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1985, Due 2015, established by the resolution of November 14, 1985 (appearing at pages 440 et seq. of the Official Minutes of that date), be and the same hereby is changed from "Series 1985, Due 2015" to "Series 1986, Due 2016"; and it is further

RESOLVED, that the third WHEREAS paragraph at the commencement of the resolution of November 14, 1985 (appearing at pages 440 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016 (as heretofore renamed in this resolution), be amended to read as follows:

"WHEREAS, the Authority has determined to authorize the sale, on or before June 30, 1987, of Variable Rate Demand Bonds, subject to the foregoing, with the proceeds derived from the sale thereof, from time to time, to be used for financing for any and all purposes for which the Authority is or shall be authorized to issue bonds, notes, securities or other obligations of evidences of indebtedness;"

and it is further

RESOLVED, that Section 2.05 of the resolution of November 14, 1985 (appearing at pages 440 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016 (as heretofore renamed in this resolution), be amended to read as follows:

"SECTION 2.05. Authorization of Issuance. Variable Rate Demand Bonds in the principal amount not to exceed Two Hundred Million Dollars (\$200,000,000) may be issued under the terms of this Resolution on or after December 1, 1985, but on or before June 30, 1987."

and it is further

RESOLVED, that the first paragraph of Section 2.09 of the resolution of November 14, 1985 (appearing at pages 440 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016 (as heretofore renamed in this resolution), be amended to read as follows:

"SECTION 2.09. Authorization of Sale. The Committee on Finance is hereby authorized to sell all or any part of Variable Rate Demand Bonds at such price and on such terms and under such conditions as it deems appropriate and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, at one or more times on or after December 1, 1985, but on or before June 30, 1987, and to fix the terms and conditions upon which such sales shall be made, and to accept or reject offers in connection with such sales and to do so in the name of and on behalf of the Authority. * * *"

and it is further

RESOLVED, that Section 6.05 of the resolution of November 14, 1985 (appearing at pages 440 et seq. of the Official Minutes of that date), which resolution relates to the establishment and authorization of the issuance and sale of Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016 (as heretofore renamed in this resolution), be amended to read as follows:

"Section 6.05. Certifications. The Committee on Finance, Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer or Treasurer of the Authority is, and they each are, hereby authorized in connection with the Variable Rate Demand Bonds to take any action which may be necessary or desirable to assure that such Variable Rate Demand Bonds are in conformity with the provisions of the Code and the Regulations and that the interest on such Variable Rate Demand Bonds is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. Any Authorized Officer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance

of the Variable Rate Demand Bonds for the purposes for which such Variable Rate Demand Bonds are issued, as to the status of the projects for which the proceeds of said bonds would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by this Resolution or the Committee on Finance."

Whereupon, the meeting was adjourned.

The meeting was called to order by the Acting Chairman.

(Board - 3/13/86)

Memorial to Honorable William A. Sternkopf, Jr.

The Chairman addressed the Board upon the death of the Honorable William A. Sternkopf, Jr. The following Minute was unanimously adopted by a rising vote.

The Commissioners of The Port Authority of New York and New Jersey note with deep sorrow the death of former Commissioner William A. Sternkopf, Jr. on March 10, 1986.

William A. Sternkopf, Jr. was appointed a Commissioner of the Port Authority by Governor Richard J. Hughes on June 3, 1968 to fill the unexpired term of Commissioner Gerard F. Brill who had resigned. He was reappointed by Governor Hughes on March 10, 1969 and served as a Commissioner until his resignation from the Board on July 12, 1971.

As a Commissioner, he served as Chairman of the Committee on Construction, Vice Chairman of the Committee on Operations, and as a member of the Committee on Port Planning and a member of the Committee on Finance.

Commissioner Sternkopf brought to his position on the Board a wide range of experience in business and government in the State of New Jersey. He was born in North Bergen in 1900 and attended Pace Institute, Columbia University and New York University. He became a public accountant in 1920, a registered municipal accountant in 1922 and a certified public accountant in 1939. He was a member of the Municipal Accounting Association of New Jersey, the American Institute and the New Jersey Association of the Certified Public Accountants Association. Commissioner Sternkopf also was a member of the Turnpike Authority from 1961 to 1968 and he was auditor of Hudson County for 34 years.

During his tenure on the Board, Commissioner Sternkopf gave wholeheartedly of his abilities, his energy and his time. His fellow Commissioners and staff highly valued his contributions to the deliberations of the Board.

The Commissioners of The Port Authority of New York and New Jersey, now, therefore, in expressing both personal and official regret upon the death of a dedicated and distinguished public servant, direct that this tribute shall be spread in full upon the proceedings of the Board, and that a copy shall be suitably engrossed and sent to the family of former Commissioner William A. Sternkopf, Jr.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of February 13, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on March 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on March 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on March 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on March 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 3/13/86)

1986 Budget - January 1 through April 30, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986 to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). On January 9, 1986, the Board acted to confirm the authority of the Executive Director through February 28, 1986, to make expenditures at a rate not to exceed \$200 million per month and to authorize the Executive Director to implement the annual salary range adjustment. On February 13, 1986, the Board's confirmation of the Executive Director's authority was extended through March 31, 1986. These actions were taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through April 30, 1986.

It was therefore recommended that the Board confirm that the Executive Director is authorized through April 30, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through April 30, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

New York State Commuter Railroad Car Program - New York State Guaranteed Commuter Car Bonds, Eighth Series - Establishment and Authorization of Issuance and Sale - Agreements with Metropolitan Transportation Authority Covering the Purchase and Lease of Commuter Railroad Cars - Report

It was recalled to the Board that on April 12, 1962, the Port Authority adopted a resolution providing for the issuance and sale from time to time of New York State Guaranteed Commuter Railroad Car Bonds ("Commuter Car Bonds") of the Port Authority to be unconditionally guaranteed, both as to principal and interest, by the State of New York. Such issuance and sale is authorized by bi-State legislation which allows the Port Authority to purchase and lease railroad cars to commuter railroads in either State and to borrow money from any source for such purchase, provided that the electing State, by appropriate action, has made itself liable for the repayment of such moneys. The State of New York in 1959 elected to provide for the purchase and rental of railroad cars for commuter railroads and authorized the required guarantees by the State of New York. In November, 1961, the New York State Constitution was amended to authorize the Legislature to make the State of New York liable unconditionally for the payment of principal of and interest on Commuter Car Bonds up to an aggregate principal amount at any one time of \$100 million and, in 1962, the Legislature of the State of New York made the State of New York so liable.

The bi-State legislation authorizing the Commuter Railroad Car Program prohibits the Port Authority from pledging its full faith and credit or from pledging or using for this Program any of its revenues or reserves pledged in support of Consolidated Bonds including the revenues of any of its existing facilities or any of its existing reserves. The Port Authority can neither derive net revenues nor incur net expenses from the railroad car leasing program which may in any way add to or detract from revenues or reserves pledged to Consolidated Bonds or any Port Authority bonds other than the State guaranteed Commuter Car Bonds issued under this Program.

The Metropolitan Transportation Authority ("MTA") is acquiring additional rail passenger cars for the Commuter Railroad portion of its Five Year Capital Program, and has asked the Port Authority to acquire under the New York State Commuter Railroad Car Program a portion of these cars which the Port Authority would purchase by means of an assignment from the MTA of the MTA's rights and interest to purchase such cars. The Port Authority would lease said cars to the MTA pursuant to the provisions of the bi-State legislation authorizing such lease, which includes a requirement for approval by the Commissioner of the Department of Transportation of the State of New York. The

agreements would permit safe harbor lease transactions involving the commuter railroad cars acquired with the proceeds of the bonds of an Eighth Series of Commuter Car Bonds.

The MTA has indicated that it will request that bonds of the Eighth Series be sold through a negotiated placement with Dillon, Read & Co., Inc. (and/or other financial underwriters for the MTA's capital program). Prior to the sale of the bonds, it will be required that the New York State Comptroller certify his approval of the manner and time of sale of the bonds (including the details of such negotiated placement, if any) and that the New York State Attorney General approve the bonds and the guaranty.

The MTA would pay rent for the cars in amounts equal to the debt service on the bonds, plus the Port Authority's administrative, legal and financial expenses incurred in connection with its purchase and lease of the cars. MTA's liability for rental payments would commence with the issuance of the Eighth Series of Commuter Car Bonds without reference to the delivery date of the cars. It is presently anticipated that the MTA would lease these cars to the Long Island Rail Road Company (a subsidiary of the MTA).

The aggregate principal amount of the Eighth Series of Commuter Car Bonds to be sold by the Port Authority would be based on the cost of the cars to the Port Authority plus expenses to be capitalized by the Port Authority in connection with the issuance and sale of the bonds. At this time there are outstanding Commuter Car Bonds in a total principal amount of \$87,565,000, representing unmaturred securities of the Second through the Seventh Series which have previously been issued to provide rail passenger cars for use in commuter service on the Long Island Rail Road, the Hudson and Harlem Divisions of the former Penn Central Railroad and the Metro-North Commuter Railroad. Thus, the principal amount of Commuter Car Bonds which may be issued by the Port Authority under the Commuter Car Program is \$12,435,000.

Set forth below is a table describing the seven series of Commuter Car Bonds previously sold with amounts outstanding as of March 2, 1986.

New York State Guaranteed Commuter Car Bonds

<u>Series</u>	<u>Par Value</u>	<u>Amount Outstanding</u>	<u>Purpose</u>
1	\$ 5,475,000	\$ -	For the acquisition of approximately 60 railroad passenger cars for lease to the Long Island Rail Road.
2	8,250,000	660,000	For the refinancing of 53 railroad passenger cars leased to and operated by the New York Central Railroad.
3	6,000,000	720,000	For the acquisition of 34 railroad passenger cars for lease to the New York Central Railroad.
4	32,500,000	17,945,000	The proceeds of the fourth and the fifth series of Commuter Car Bonds constituted the funds necessary for the acquisition of 270 railroad passenger cars and 8 locomotives for lease to the MTA for operation on the Long Island Rail Road.
5	30,500,000	17,760,000	
6	23,500,000	13,580,000	For the acquisition of 80 railroad passenger cars for lease to the MTA for use on the Hudson and Harlem lines of Penn Central Railroad.
7	40,635,000	36,900,000	For the acquisition of 46 railroad passenger cars for lease to the MTA for use on the Metro-North Commuter Railroad.
TOTAL		\$87,565,000	

Subject to action by the Committee on Finance prior to the issuance and sale of the bonds, the bonds of the Eighth Series would be dated as of April 1, 1986, mature serially on a semi-annual basis through October 1, 1996, and bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, if any, from their date of issue, not exceeding 10 percent per annum, as may be determined by the Committee on Finance. The bonds would be subject to redemption at 100%, at the option of the Port Authority, in whole or in part, commencing in 1991. The bonds would be fully registrable as to both principal and interest, but not as to either alone. The bonds would be issued in integral multiples of \$5,000.

The Committee on Finance of the Authority would be authorized prior to the issuance of the bonds of the Eighth Series (i) to change or adjust the date as of which such bonds are to be dated to any date on or before December 15, 1986; (ii) to change or adjust the date or dates on which semi-annual interest on such bonds would be payable; (iii) to change or adjust the date or dates in connection with the redemption or call provisions of such bonds; and (iv) to fix the date or dates at which any of the bonds are to mature; provided, that said date or dates of maturity would not be later than December 1, 1996; and to take such other action as in the opinion of the Committee will best serve the public interest.

Additionally, the Committee on Finance would be authorized, in connection with the sale of the bonds, to authorize one or more official statements, and to authorize the purchaser or purchasers in offering said bonds for resale to use such official statements as those of the Port Authority, provided that the official statement would contain a representation that any information pertaining to the State of New York, the City of New York or the MTA has been furnished by the State of New York, the City of New York or the MTA and that the Port Authority makes no representations concerning the accuracy or completeness thereof.

It was also recommended that the Board authorize the Committee on Finance to appoint a Paying Agent, a Registrar and a Special Fund Trustee in connection with the bonds.

It was further recommended that the Board provide that no part of the proceeds of the bonds of the Eighth Series shall be invested directly or indirectly in such a manner as to cause the interest on such Series of bonds to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

In addition to the customary certifications, determinations, statements and other documents necessary or desirable in connection with the issuance of New York State

Guaranteed Commuter Car Bonds by the Port Authority, it was recommended that certification on behalf of the Port Authority as to the need for the issuance of the bonds of the Eighth Series, as to the status of the projects for which the proceeds of said bonds are to be used, as to the Port Authority's intentions with respect to the application and investment of such proceeds and as to such other related matters as may be authorized by the Committee on Finance may be made by the Chairman of the Port Authority; Vice Chairman of the Port Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Port Authority, and that any such action taken in connection therewith be ratified; it was also recommended that any action which may be necessary or desirable in connection with said bonds to assure that such bonds of the Eighth Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and to assure that the interest on such bonds is not subject to Federal income taxes, may be taken by the Committee on Finance; the Chairman of the Port Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer or Treasurer of the Port Authority and that any such action taken in connection therewith be ratified.

New York State Commuter Railroad Car Program—New York State Guaranteed Commuter Car Bonds, Eighth Series—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted, Commissioner McGoldrick abstaining:

WHEREAS, on the 12th day of April, 1962, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the Authority) adopted a resolution providing for the issuance of State Guaranteed Commuter Car Bonds of the Authority to be guaranteed by the State of New York, hereinafter called Car Bonds, from time to time in conformity with said resolution for the purposes therein set forth, which said resolution is hereinafter called the Car Bond Resolution, and which said resolution constitutes a contract with the holders of the bonds so issued; and

WHEREAS, the Car Bond Resolution provides that Car Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of each series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Car Bond Resolution; and

WHEREAS, the Authority has heretofore established and issued seven series of said Car Bonds and has now determined that it is advisable and in the public interest to establish and issue another series of Car Bonds, without prejudice to its right hereafter to establish other and additional series of Car Bonds;

NOW, THEREFORE, after due consideration had, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the Car Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of Car Bonds, designated as the "Eighth Series" and to be issued in conformity with the Car Bond Resolution, which Car Bonds are hereinafter called "bonds of the Eighth Series" and the issuance of up to Twelve Million Four Hundred Thirty-five Thousand Dollars (\$12,435,000) in principal amount of such bonds of the Eighth Series is hereby authorized. Such principal amount is hereby determined to be necessary to accomplish the purposes for which the bonds of the Eighth Series are to be issued.

SECTION 3. Bonds of the Eighth Series shall be dated as of April 1, 1986, shall mature serially as hereinafter stated, and shall bear a stated rate or rates of interest including fixed or variable rates or a combination thereof, from their date of issue, not exceeding ten per centum (10%) per annum, as may be determined by the Committee on Finance of the Authority. The Committee on Finance of the Authority is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, including fixed or variable rates or a combination thereof, if any, *provided*, that all bonds of the Eighth Series maturing on the same date shall have the same interest rate, payable semi-annually commencing on October 1, 1986, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption.

Principal of the bonds of the Eighth Series shall be payable, in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder thereof at the office or offices designated by the Authority of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the bonds of the Eighth Series shall be payable, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent appointed for the purpose by the Authority and mailed to said registered holder.

Bonds of the Eighth Series shall be issued only in registered form without coupons, registered as to both principal and interest but not as to either alone. The Authority will keep or cause to be kept at the offices, designated by the Authority of its Registrar or Registrars for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for such registration.

Any accrued interest included in the sale price of the bonds of the Eighth Series shall be deposited in the Special Fund established for such Bonds pursuant to the Car Bond Resolution.

SECTION 4. Except as provided in Section 6 hereof, bonds of the Eighth Series shall be of the denomination of \$5,000 each, shall be numbered upward from SG(8)-1 (or they may bear such other numbers as the Chairman of the Authority, Vice Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer, Director, Finance Department, Assistant Director, Finance Department, Comptroller, Deputy Comptroller, Treasurer or Assistant Treasurer of the Authority may deem appropriate), and shall mature serially in numerical order in accordance with such schedule of maturities as is fixed by the Committee on Finance pursuant to Section 9 hereof.

SECTION 5. The purpose for which the issuance of bonds of the Eighth Series is authorized is to raise funds necessary for acquisition of railroad cars for lease to commuter railroads of the State of New York and for purposes incidental thereto in accordance with the authorizing statutes and the provisions of the Car Bond Resolution.

SECTION 6. Bonds of the Eighth Series shall be of the denominations of \$5,000 or integral multiples of \$5,000. Bonds of the Eighth Series of a denomination greater than \$5,000 shall bear numbers corresponding to those which would have been used had such bonds been issued in the denomination of \$5,000.

Upon the written request of the holder of any bond of the Eighth Series of a denomination greater than \$5,000, and upon the surrender and cancellation of such bond (herein called the "old bond"), two or more new bonds of smaller denominations shall be issued in exchange or substitution therefor and as evidence of the same debt,—such new bonds to have in the aggregate the same principal amount as that of the old bond, to bear numbers corresponding to those borne by the old bond, to be in registered form fully registered as to both principal and interest in the name of any designated person, all as shall be requested by the registered holder of the old bond, and except as to denominations and numbers and any changes so requested with respect to registration, to be in all respects of like tenor and effect as the old bond.

Upon the written request of the holder or holders of two or more registered bonds of the Eighth Series, which said bonds have the same date of maturity, and upon the surrender and cancellation of such bonds (herein called the "old bonds"), a single new bond will be issued in exchange or substitution therefor and as evidence of the same debt,—such new bond to have the same principal amount as the aggregate principal amount of the old bonds, to bear numbers corresponding to those borne by the old bonds, to be fully registered as to both principal and interest in the name of any person designated by such holder or holders of the old bonds, and except as to denomination and numbering and any changes requested with respect to registration, to be in all respects of like tenor and effect as each of the old bonds.

All requests for the execution, authentication and delivery of new bonds of the Eighth Series as above provided shall be filed with the Registrar of the Authority; all bonds of the Eighth Series to be surrendered and cancelled pursuant to such requests shall be surrendered to the Registrar; and all new bonds of the Eighth Series delivered in exchange or substitution as aforesaid shall be delivered by the Registrar after proper execution and authentication. All expenses of and in connection with the execution, authentication and delivery of new bonds of the Eighth Series in exchange or substitution for other bonds of the Eighth Series as above provided, incurred by the Authority or the Registrar (including the cost of cancelling old bonds and of preparing and delivering new bonds, and including the fees of the Registrar), shall be borne by the lessee of the commuter railroad cars.

No transfers or exchanges of bonds shall be required to be made by the Registrar during the fifteen (15) days next preceding an interest payment date for such bonds, nor during the forty-five (45) days next preceding the date fixed for redemption of any bonds.

Bonds of the Eighth Series shall be transferable only upon the books kept for that purpose by the Registrar of the Authority by the registered holder or attorney duly authorized in writing, upon surrender thereof, together with a written instrument of transfer satisfactory to the Registrar duly executed by the registered holder or attorney duly authorized in writing, a new bond, in all respects of like tenor and effect as the old bond, shall be issued to the transferee in exchange therefor.

Nothing herein contained shall be deemed to authorize the execution, authentication and delivery of bonds of the Eighth Series except in denominations of \$5,000 or of integral multiples of \$5,000.

SECTION 7. Bonds of the Eighth Series shall be redeemable at the option of the Authority in whole or in part, on any interest payment date, at or subsequent to April 1, 1991, and prior to maturity, at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption.

If less than all the bonds of the Eighth Series then outstanding are to be called for redemption, then the bonds so to be redeemed shall be called in inverse order of maturity; *provided, however*, that if less than all of such bonds having the same maturity date and then outstanding are to be called for redemption, the bonds of such maturity so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect.

Notice of intention to redeem any of the bonds of the Eighth Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of the Eighth Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority.

Before the date fixed for redemption specified in such notice, the Authority will pay or cause to be paid to the Paying Agent or Paying Agents an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds of the Eighth Series which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such amount to be held by the Paying Agent or Paying Agents in trust for the account of the holders of the bonds of the Eighth Series so called for redemption and to be paid to them respectively upon presentation and surrender of said bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided, the bonds so called shall become due and payable at the office of the Paying Agent or Paying Agents designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent or Paying Agents in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds shall not be entitled to the benefit or security of this resolution or the Car Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of bonds of the Eighth Series of denominations greater than \$5,000, if less than all of the bonds of the Eighth Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value shall be treated as though it were a separate bond of the denomination of \$5,000 bearing one of the numbers borne by the bond, and the word "bond" as used in the foregoing provision of this Section 7 shall be deemed to refer to such \$5,000 unit of face value. If it is determined by lot as above provided that one or more but not all of the \$5,000 units of face value represented by any such bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units, the holder of such bond shall forthwith present such bond to the Registrar and request the issuance of new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, pursuant to Section 6 of this resolution (except that all expenses of and in connection with the printing, execution, authentication and delivery of new bonds of the Eighth Series upon an exchange or substitution of denomination pursuant to this paragraph shall be borne by the lessee of the commuter railroad cars), including new bonds of the denomination of \$5,000 each, bearing numbers corresponding to the numbers of the \$5,000 units of face value called for redemption; and the new bonds bearing such numbers shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar and to request the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid,

such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Car Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 8. Each bond of the Eighth Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or imprinted thereon, and shall be signed manually or by the facsimile signature of any one of the following persons, to wit:—the persons holding the office or exercising the duties of Chairman of the Authority, Vice Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer, Secretary, Assistant Secretary, Director, Finance Department, Assistant Director, Finance Department, Treasurer, Assistant Treasurer, Comptroller and Deputy Comptroller of the Authority at the time of its execution.

Each bond of the Eighth Series shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond shall be entitled to any benefit under this resolution or the Car Bond Resolution or be valid or obligatory for any purposes unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder.

Each bond of the Eighth Series shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
STATE GUARANTEED COMMUTER CAR BOND
EIGHTH SERIES**

\$

No. SG(8)-

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to _____, the registered holder hereof, on the _____ day of _____ 19____, upon presentation and surrender of this bond, the sum of _____ Dollars (\$) _____) and to pay to said registered holder hereof interest thereon at the rate of _____ per centum (_____ %) per annum from the date hereof, payable semi-annually commencing on October 1, 1986, and on each succeeding April 1 and October 1 until maturity or prior redemption, but solely out of the net car revenues of the Authority derived from the lease of railroad cars with respect to which State Guaranteed Commuter Car Bonds of this or any other series shall have been issued pursuant to the Car Bond Resolution hereinafter mentioned. Principal on this bond shall be payable, in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the _____ office or offices designated by the Authority of the Paying Agent or

Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on this bond shall be payable, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority, and Chapter 638 of the Laws of New York of 1959, as amended, and Chapter 25 of the Laws of New Jersey of 1959, for purposes provided in said Compact and statutes. The provisions of the resolution of the Authority of April 12, 1962, establishing an issue of State Guaranteed Commuter Car Bonds, hereinafter called the Car Bond Resolution, and of the resolution of the Authority of March 13, 1986, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the holder of this bond.

THIS BOND IS NOT A DIRECT AND GENERAL OBLIGATION OF THE AUTHORITY AND THE FULL FAITH AND CREDIT OF THE AUTHORITY ARE NOT PLEDGED TO THE PAYMENT OF THE PRINCIPAL HEREOF OR THE INTEREST HEREON.

There are pledged to the prompt payment of the principal of and interest upon this bond pursuant to the Car Bond Resolution, the net car revenues of the Authority derived from the lease of railroad cars with respect to which State Guaranteed Commuter Car Bonds of this or any other series shall have been issued pursuant to the Car Bond Resolution. The Authority covenants and agrees in the Car Bond Resolution to establish for and in connection with the Series of which this bond forms a part the State Guaranteed Commuter Car Bond Fund, Eighth Series, into which the Authority agrees to make prompt payments, out of such net car revenues, for application to debt service in connection with bonds of the Series of which this bond forms a part, in full accordance with the Car Bond Resolution.

Except for such net car revenues and the aforesaid State Guaranteed Commuter Car Bond Fund, Eighth Series, the revenues, assets and reserve funds of the Authority are not pledged for the payment of principal of or interest on this bond or to the fulfillment of any obligation which the Authority has assumed or may assume to or for the benefit of the holder of this bond.

The Authority has appointed a Special Fund Trustee for and in connection with the bonds of this Series as required by the Car Bond Resolution.

No transfer or exchange of this bond shall be required to be made by the Registrar of the Authority during the fifteen (15) days next preceding an interest payment date for this bond, nor during the forty-five (45) days next preceding the date fixed for redemption of this bond.

This bond is transferable only upon the books kept for that purpose by the Registrar of the Authority by the registered holder or attorney duly authorized, in writing, in accordance with the provisions of, and under the circumstances and in the manner set forth in, the resolution establishing the Series of which this bond forms a part and authorizing the issuance of this bond. Upon surrender of this bond together with a written instrument of transfer satisfactory to the Registrar duly executed by the registered holder or attorney duly authorized in writing, a new bond, in all respects of like tenor and effect as the old bond, shall be issued to the transferee in exchange therefor.

The bonds of the Series of which this bond forms a part shall be subject to redemption at the option of the Authority, in whole or in part, on any interest payment date, at or subsequent to April 1, 1991, and prior to maturity, at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption.

If less than all of the bonds of the Series of which this bond forms a part, which are then outstanding, are to be called for redemption, then the bonds so to be redeemed shall be called in inverse order of maturity; *provided, however*, that if less than all of such bonds having the same maturity date as this bond and then outstanding be so called for redemption, the bonds of such maturity so to be called shall be determined by lot by the Authority or the Registrar, as the Authority may elect.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder at his last known address as appearing on the Registry Books of the Authority. If this bond shall be called for redemption and if funds sufficient to pay the redemption price together with accrued interest to the date fixed for redemption shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date and this bond shall not be entitled to the benefit or security of the foregoing resolution and shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part then outstanding are to be called for redemption, then for all purposes in connection with such redemption, each \$5,000 unit of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000 bearing one of the numbers borne by this bond, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to such \$5,000 unit of face value.

If it is determined by lot as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units, the holder of this bond shall forthwith present this bond to the Registrar and request the issuance of new bonds of smaller denominations in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part and authorizing the issuance of this bond, including new bonds of the denomination of \$5,000 each, bearing numbers corresponding to the number of the \$5,000 units called for redemption; and the new bonds bearing such numbers shall be deemed to be duly called for redemption without further notice to the holder of this bond. If the holder of this bond shall fail to present this bond to the Registrar and to request the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption; and (the notice of intention to redeem having been completed as above provided, and funds sufficient to pay the redemption price together with accrued interest to the date fixed for redemption having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) this bond shall not be entitled to the benefit or security of the foregoing resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall be payable solely from the funds so deposited.

The registered holder of this bond may upon written application to the Registrar of the Authority exchange this bond together with other bonds of the Series of which this bond forms a part, which have the same maturity date as this bond, for a single bond of a larger authorized denomination,—but only under the circumstances and in the manner set forth in the resolution establishing the Series of which this bond forms a part and authorizing the issuance of this bond.

If this bond is of an authorized denomination greater than \$5,000, the registered holder may upon written application to the Registrar of the Authority exchange this bond for two or more bonds of smaller authorized denominations,—but only under the circumstances and in the manner set forth in the resolution establishing the Series of which this bond forms a part and authorizing the issuance of this bond.

Except as may otherwise be provided in the resolution establishing the Series of which this bond forms a part and authorizing the issuance of this bond, all expenses of and in connection with the execution, authentication and delivery of new bonds in exchange or substitution for other bonds as above provided,

incurred by the Authority or the Registrar (including the cost of cancelling old bonds and of preparing and delivering new bonds, and including the fees of the Registrar), shall be borne by the lessee of the commuter railroad cars.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or to be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey and the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limits prescribed by said Constitutions, statutes, Compact or Car Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by the manual or facsimile signature of its duly authorized officer and its official seal, or a facsimile thereof, to be hereto affixed or imprinted hereon, and this bond to be dated as of the first day of April, 1986.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

Authorized Officer

(END OF FORM OF BOND)

Each of said bonds of the Eighth Series shall have the guaranty of the State of New York endorsed thereon in substantially the following form:

(FORM OF GUARANTY BY THE STATE OF NEW YORK)

GUARANTY BY THE STATE OF NEW YORK

The punctual payment of the above Bond is hereby fully and unconditionally guaranteed by the State of New York, both as to principal and interest, according to its terms.

IN WITNESS WHEREOF, THE STATE OF NEW YORK has caused this Guaranty to be executed by the signature or facsimile signature of the Comptroller of the State of New York or of a Deputy Comptroller of the State of New York.

Comptroller of the State of New York

(END OF FORM OF GUARANTY OF THE STATE OF NEW YORK)

The certificate of authentication attached to each of the bonds of the Eighth Series shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds issued under the provisions of the within-named resolution and Car Bond Resolution.

REGISTRAR
as Registrar of the Authority

By _____
Authorized Officer

(END OF FORM OF CERTIFICATE OF AUTHENTICATION)

Each of said bonds of the Eighth Series shall have a form of assignment endorsed thereon, in substantially the following form:

(FORM OF ASSIGNMENT)

ASSIGNMENT

FOR VALUE RECEIVED the undersigned sells, assigns and transfers unto _____

(Please Print or Type Name and Address of Assignee) the within bond and all rights thereunder and does hereby irrevocably constitute and appoint _____ Attorney to transfer such bond on the books kept for the registration thereof, with full power of substitution in the premises.

Dated:

(Signature of Registered Holder)

Please insert Social Security Number or other identifying number of Assignee.

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular.

in the presence of: _____
(Witness)

(END OF FORM OF ASSIGNMENT)

In case any official of the Authority who shall have executed (whether manually or by facsimile signature) any of the bonds of the Eighth Series or any Comptroller or Deputy Comptroller of the State of New York who shall have executed a Guaranty thereon shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who executed such bonds or Guaranty had not ceased to be such official.

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of the bonds of the Eighth Series (i) to change or adjust the date as of which such bonds are to be dated to any date on or before December 15, 1986; (ii) to change or adjust the date or dates on which semi-annual interest on such bonds would be payable; (iii) to change or adjust the date or dates in connection with the redemption or call provisions of such bonds; and (iv) to fix the date or dates at which any of the bonds are to mature; *provided*, that said date or dates of maturity shall not be later than December 1, 1996.

SECTION 10. In case any bond of the Eighth Series shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond in lieu of or in substitution for such destroyed or lost bond; or, if such bond shall have matured, instead of issuing a substitute bond the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond of the Eighth Series shall furnish to the Authority evidence satisfactory to it of the destruction or loss of such bond and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond; or the Authority, or any Paying Agent upon

the written request or authorization of the Authority, may make any such payment. Upon the issuance of any such substitute bond, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond so issued in substitution. Any bond issued under the provisions of this section in lieu of any bond alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Car Bond Resolution with all other bonds issued hereunder or thereunder.

SECTION 11. The provisions of this resolution shall constitute a contract with the holders of the Car Bonds issued pursuant to this resolution, and each such holder.

(Board - 3/13/86)

New York State Commuter Railroad Car Program - New York State Guaranteed Commuter Car Bonds, Eighth Series - Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted, Commissioner McGoldrick abstaining:

WHEREAS, on the 12th day of April, 1962, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the Authority) adopted a resolution providing for the issuance of State Guaranteed Commuter Car Bonds of the Authority to be guaranteed by the State of New York, hereinafter called Car Bonds, from time to time in conformity with said resolution for the purposes therein set forth, which said resolution is hereinafter called the Car Bond Resolution, and which said resolution constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 13th day of March, 1986, the Authority adopted a resolution providing for the establishment of the Eighth Series of Car Bonds and authorizing the issuance of the bonds of the Eighth Series for the purposes set forth in said resolution; and

WHEREAS, the Authority has now determined that it is advisable and in the public interest to provide for offering the bonds for sale;

NOW, THEREFORE, after due consideration had, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. The Committee on Finance is hereby authorized to sell all or any part of Twelve Million Four Hundred Thirty-five Thousand Dollars (\$12,435,000) in principal amount of New York State Guaranteed Commuter Car Bonds, Eighth Series (hereinafter called "bonds of the Eighth Series"), for the accomplishment of the purposes for which the issuance of said bonds of the Eighth Series is authorized and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, at any time in 1986 subsequent to April 1, 1986; provided, that the manner and time of sale shall have been approved by the Comptroller of the State of New York; and the Executive Director is hereby authorized to apply the proceeds of such sale to the accomplishment of said purposes.

SECTION 2. Said bonds of the Eighth Series shall be sold at a price which will result in a true interest cost to the Authority not in excess of ten per centum (10%) per annum to maturity.

SECTION 3. The Committee on Finance shall have the power, in connection with the bonds of the Eighth Series, to fix the time or times of sale on or before December 15, 1986, to determine the terms and conditions upon which sales shall be made, and to accept or reject offers in connection with such sales and to do so in the name of and on behalf of the Authority.

SECTION 4. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of the Eighth Series, to designate and appoint and to enter into appropriate contracts or agreements with one or more Paying Agents, a Registrar and a Special Fund Trustee in connection with said bonds of the Eighth Series and to designate the office or offices of the Paying Agent or Paying Agents at which payment shall be made and the office or offices of the Registrar at which the books for registration shall be kept; and to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority pursuant to the Car Bond Resolution adopted by the Authority on April 12, 1962, or the resolution of the Authority adopted on March 13, 1986, establishing said bonds of the Eighth Series and authorizing the issuance of bonds of said Series, as a condition precedent to the issuance of the bonds of the Eighth Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, as its own; and to authorize any of the foregoing and generally to take such action as in the opinion of the Committee on Finance will best serve the public interest.

SECTION 5. The Committee on Finance shall have power, in connection with the sale of the bonds of the Eighth Series, to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the purchaser or purchasers in offering said bonds for resale to use such official statements and representations as those of the Authority; provided, however,

that any official statement shall contain a representation that any information pertaining to the State of New York, the City of New York or the Metropolitan Transportation Authority has been furnished by the State of New York, the City of New York or the Metropolitan Transportation Authority, and that the Authority makes no representations concerning the accuracy or completeness thereof.

SECTION 6. No part of the proceeds of such bonds shall be invested directly or indirectly in such a manner as to cause the interest on such bonds to be subject to Federal income taxes under Section 103 of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder.

SECTION 7. The Committee on Finance; the Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the issuance and sale of bonds of the Eighth Series, to take any action which may be necessary or desirable to assure that the bonds of the Eighth Series are in conformity with the provisions of the Internal Revenue Code of 1954, as amended, and the regulations promulgated thereunder, and that the interest on such bonds is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Director, Finance Department; Assistant Director, Finance Department; Comptroller; Deputy Comptroller; Treasurer or Assistant Treasurer of the Authority are each hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of the Eighth Series for the purposes for which such bonds are issued, as to the status of the projects for which the proceeds of such bonds would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee on Finance.

(Board - 3/13/86)

New York State Commuter Railroad Car Program - Agreements with Metropolitan Transportation Authority Covering the Purchase and Lease of Commuter Railroad Cars

Pursuant to the foregoing report, the following resolution was unanimously adopted, Commissioner McGoldrick abstaining:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a contract or contracts on behalf of The Port Authority of New York and New Jersey (hereinafter called the Port Authority) with the Metropolitan Transportation Authority (hereinafter called the MTA) pursuant to the New York State Commuter Railroad Car Program (hereinafter called the Commuter Railroad Car Program) as provided for in Chapter 638, Laws of New York, 1959, as amended, Chapter 25, Laws of New Jersey, 1959, and Article 10, Section 7 of the New York State Constitution to acquire commuter railroad cars with the proceeds of the Eighth Series of New York State Guaranteed Commuter Car Bonds, at a cost not in excess of the proceeds of the Eighth Series less amounts representing the Port Authority's administrative, legal and financial expenses, for lease to the MTA for further lease to Long Island Rail Road Company (or such other subsidiaries of MTA as may be agreed upon) for use in commuter railroad service on a commuter line or lines of said railroad or railroads in accordance with such legislation; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to execute on behalf of the Port Authority and pursuant to said Commuter Railroad Car Program a lease or leases of said commuter railroad cars to the MTA, for further lease to the Long Island Rail Road Company (or such other subsidiaries of MTA as may be agreed upon) for use in commuter railroad service on a commuter line or lines of said railroad or railroads in accordance with such legislation, which lease or leases shall include provisions similar to those in the Port Authority's existing leases of commuter railroad cars which provide for the payment of rental sufficient to cover debt service on State Guaranteed Commuter Car Bonds issued to finance the acquisition of commuter railroad cars and the Port Authority's administrative, legal and financial expenses in connection with such cars; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to execute on behalf of the Port Authority such other documents, and to take such further action, as may be necessary or desirable to effectuate the acquisition of said commuter railroad cars and said lease or leases, including such documents or such action as may be necessary to facilitate safe harbor leasing of commuter railroad cars provided to the MTA (or such subsidiaries of MTA as may be agreed upon) under said Commuter Railroad Car Program; provided, however, that no lease contemplated by such legislation shall be effective until it has been approved in writing by the Commissioner of the Department of Transportation of the State of New York; and it is further

RESOLVED, that the form of agreement with respect to the acquisition of said commuter railroad cars, said lease, and ancillary documents, and any modifications to any of the foregoing, shall be subject to the approval of General Counsel of the Port Authority or his designated representative.

(Board - 3/13/86)

Purchase and Installation of a Replacement Computer Complex and Additional Direct Access Storage Devices

It was reported that Electronic data processing has been an integral function in the Port Authority since the early 1950's. Over the past 30 years, the equipment needed to support this function has been upgraded or replaced to provide sufficient computing capacity to meet the needs of the organization. The Board, at its May 12, 1983 meeting, authorized the acquisition of the present IBM 3081 Model D32 central processing complex. At that time, it was projected that the IBM 3081 configuration would meet the Port Authority's central data processing needs for the next five years. However, over the past two and one half years the Port Authority has experienced an unprecedented growth in organization-wide demand for computer resources, especially for timesharing services. A critical point already has been reached where daily demand for these resources has been exceeding the capacity of the IBM 3081 complex to process workload in a timely and efficient manner. This has resulted in a significant decrease in the system's responsiveness and its basic ability to satisfy organizational requirements.

Needed computer capacity is based on the configuration and sizing of three major system components: the central processing unit or computer, the direct access storage devices (DASD) for data storage, and the communications network for computer terminal connections. This Item addresses the first two of these components only since communications devices are included under a previous authorization.

The Port Authority's current central processing unit (CPU), an IBM 3081 D32, is rated at 10 MIPS. MIPS is the basic industry measure of computer capacity, indicating the number of millions of instructions per second (MIPS) that the computer can process. In 1983, when the IBM 3081 was installed, CPU utilization was 34% of capacity at peak periods. Today, it averages over 70%, the accepted industry threshold for effective processing, and often rises to 100% during peak periods of the normal work day. Present CPU utilization translates into a need for approximately 16 MIPS of required computer capacity, well beyond the present system configuration. Moreover, peak capacity requirements are forecast at almost 24 MIPS by June 1986 and as much as 40 MIPS by year end 1986. This rapid increase in present and future demand for computing capacity results primarily from the following four requirements: (1) implementation of a mainframe based project management system; (2) introduction of a database management system to increase staff productivity and vastly improve end user access to vital management information; (3) implementation of new applications and acquisition of special purpose software packages to satisfy a wide variety of organizational requirements and (4) continued expansion of end user computing to enhance Port Authority staff efficiency and effectiveness. Demand for mainframe resources will only marginally be reduced by the potential introduction of the Office Automation system.

The Port Authority's on-line data storage capacity (DASD) is currently over fifty billion characters of directly accessible storage. In 1983, 59% of the total capacity was in use. Today, it is at 93% of capacity. Future DASD requirements are forecast to increase at a rapid pace, requiring the requested addition of 20 billion characters of storage needed through year end of 1986.

(Board - 3/13/86)

In light of this unprecedented demand, the Management Information Services (MIS) Department has taken specific steps, which have been discussed with the MIS Council, to optimize the usage and performance of the present IBM 3081 complex and to better plan for future needs. The MIS Department has established a Computer Resource Management function as an on-going planning process to forecast Port Authority computer support requirements over a five-year period, to maintain a policy of acquiring only that increment of needed computer resource when it is needed to take advantage of decreasing computer hardware costs, and to communicate requests for additional capacity through the Port Authority's annual budget process. Based on this review, the MIS Department recommends that the Port Authority accelerate the upgrade (as originally referenced in the March 1983, Board Item) of the existing IBM 3081 D32 Processor Complex to a processing capacity equivalent to an IBM 3084 Q96 with associated peripherals.

This requested upgrade meets all selection criteria for short term capacity requirements. In addition, because a processor such as the IBM 3084 Q96 (rated at 27 MIPS) represents a technology that is one step behind the current state-of-the-art, it can be obtained at a significant cost reduction from its original price. The cost of this machine without DASD was \$8.6 million in 1983. In 1986, the identical equipment can be acquired for approximately \$3 million from the third party marketplace.

A Request for Proposal(s) (RFP), which includes the purchase of the replacement computer complex, the additional required DASD, as well as the potential sale of the present IBM 3081 D32 computer complex, was publicly advertised and sent to a list of computer equipment vendors in February. An evaluation committee will review proposals received based on predetermined criteria which include equipment availability, price and vendor qualifications. Following installation of the replacement computer complex, a determination will be made to retain or to sell the existing IBM 3081 D32 computer complex based on the then current market value and rate of depreciation, availability of an alternate site and other related factors.

Additionally, to meet a long-term requirement to establish an alternate computer site which will provide a location for the next increment of required capacity as well as a back-up facility and to possibly accommodate systems such as Air Cargo Fast Flow, it is anticipated that a second computer complex will be required by year end 1986, potentially located in a New Jersey site. It is currently anticipated that Board authorization for this acquisition and related expenditures will be sought later this year. This alternate complex should be such that it is capable of being upgraded to a more powerful system to continue to provide for future projected Port Authority computer resource requirements in the most cost effective manner.

It was therefore recommended that the Board authorize the Executive Director to enter into agreement(s) with vendor(s) to be selected for:

1. the purchase and installation of a computer complex to replace the Port Authority's existing IBM 3081 Model D32 computer complex;
2. the potential sale of the Port Authority's existing IBM 3081 Model D32 computer complex at an amount equal to the then current market value; and
3. the purchase and installation of additional Direct Access Storage Devices and associated Control Units to supplement existing computer storage capacity.

(Board - 3/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreement(s) with vendor(s) to be selected for: (1) the purchase and installation of a computer complex to replace the Port Authority's existing IBM 3081 Model D32 computer complex; (2) the potential sale of the Port Authority's existing IBM 3081 Model D32 computer complex at an amount equal to the then current market value and (3) the purchase and installation of additional Direct Access Storage Devices and associated Control Units to supplement existing computer storage capacity; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 3/13/86)

Lincoln Tunnel - Repaving of New Jersey Route 495 - Approach to Lincoln Tunnel - Approval of Plan and Authorization of Port Authority Participation

It was reported that the New Jersey Department of Transportation (NJDOT) has been advancing a comprehensive highway improvement program along Route 495. The overall program includes the structural rehabilitation of the North Bergen viaduct, milling and resurfacing of the roadway from Route 3 East to Pleasant Avenue, providing protective fencing along the overpasses, and reconstructing the Kennedy Boulevard interchange ramps. The work to be covered by the proposed agreement between NJDOT and the Port Authority involves the milling, resurfacing, signing and drainage improvements to New Jersey Route 495 from Route 3 East to Pleasant Avenue, through the township of North Bergen, City of Union and Township of Weehawken, Hudson County.

The New Jersey Governor's office has requested the Port Authority provide an amount not to exceed \$2 million for this program from funds made available for New Jersey projects by the 1984 toll increase. NJDOT will be responsible for obtaining any additional funds required to complete the project.

All of the proposed improvements are designed to improve the safety and rideability of the road and to increase the capacity through this much traveled corridor.

The benefits to Port Authority users are immeasurable since over 90% of the vehicles using the Lincoln Tunnel travel the Route 495 corridor. The improved rideability of the highway will maintain the steady traffic flow and allow vehicles to avoid quick lane changes because of potholes. The improved drainage will reduce the incidences of flooding along the roadway and reduce lane closings during heavy storms. The improved signing will result in less abrupt lane changing and should help to reduce accidents.

NJDOT will be solely responsible for the design and execution of this project. The Port Authority will have no responsibility for maintaining the Route 495 approach to the Lincoln Tunnel from Route 3 East to Pleasant Avenue. NJDOT expects to award the contract in August 1986 and to complete the project by November 1986. All work will be performed during off-peak hours to minimize impact on Lincoln Tunnel patrons.

New Jersey's share of the funds made available by the 1984 toll increase is \$137.5 million. The Board has previously authorized the expenditure of \$27.0 million for the Route 169-Bayonne Bridge connection, an amount not to exceed \$1.9 million for New Jersey Transit Park-Ride Lots, and an amount not to exceed \$2.5 million for the rehabilitation of the Doremus Avenue Bridge at Port Newark. With an amount not to exceed \$2.0 million authorized for improvements to the Route 495 approach to the Lincoln Tunnel, \$104.1 million would be available for other New Jersey projects.

(Board - 3/13/86)

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with the New Jersey Department of Transportation (NJDOT) to resurface and make signing and drainage improvements on the Route 495 approach to the Lincoln Tunnel from Route 3 East to Pleasant Avenue, Hudson County, New Jersey; and

2. pay to NJDOT from funds made available for New Jersey projects by the 1984 toll increase an amount not to exceed \$2.0 million for resurfacing and making signing and drainage improvements on the Route 495 approach to the Lincoln Tunnel from Route 3 East to Pleasant Avenue, Hudson County, New Jersey.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the New Jersey Department of Transportation (NJDOT) to resurface and make signing and drainage improvements on the Route 495 approach to the Lincoln Tunnel from Route 3 East to Pleasant Avenue, Hudson County, New Jersey; and it is further

RESOLVED, that the Executive Director is authorized to pay to NJDOT from funds made available for New Jersey projects by the 1984 toll increase an amount not to exceed \$2.0 million for resurfacing and making signing and drainage improvements on the Route 495 approach to the Lincoln Tunnel from Route 3 East to Pleasant Avenue, Hudson County, New Jersey; and it is further

RESOLVED, that the form of the such agreement with NJDOT be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Kennedy International Airport - Flight Meal Commissaries - Building 139 and Site - New Lease or Extension of Existing Lease with Marriott Corporation Covering Building 139 and Rental of Additional Land and Building 143 - Amendmnt of Lease with Marriott Corporation - Buildings 146, 110 and 196 - Amendment of Leases with Ogden Foods Travel Services, Inc. and Air La Carte, Inc.

It was reported that the Committee on Operations, at its meeting on March 2, 1967, authorized a lease (the "Lease") of a 4.224-acre site at Kennedy International Airport to Idlewild Properties, Inc., for the construction thereon of a flight meal commissary building. Idlewild Properties was a wholly-owned subsidiary of Marriott-Hot Shoppes, Inc., to which the Lease was later assigned. Marriott-Hot Shoppes thereafter changed its name to Marriott Corporation. The term of the Lease (AYA-303) is 20 years, expiring on October 17, 1988. Under the Lease, Marriott initially paid an annual ground rent of \$21,120 based on an annual rate of \$5,000 per acre and an additional annual rental equal to 8% of all gross receipts in excess of an exemption amount. The exemption amount is 12.5 times the sum of the basic rental plus the annual amortization and interest for the actual construction costs of the facility. Before the start of construction, the design of the building was altered and its size enlarged to a point that the Committee on Operations, at its meeting on September 30, 1970, authorized a revision to the initial rental exemption formula. Accordingly, Marriott currently pays an annual ground rental of \$21,120 plus 8% of all gross receipts between \$2,357,400 and \$3 million, 4% of all gross receipts between \$3 million and \$4,897,500 and 8% of all gross receipts over \$4,897,500.

Marriott handles a number of airline accounts at Building 139 and, during 1985, staff was advised that it had negotiated a five-year contract with Pan American World Airways, Inc. to provide in-flight meal services. Pan American had historically performed its in-flight meal service with its own employees at the airport. Since annual gross receipts from Pan American's business with Marriott are estimated at about \$33 million for 1987 and growing thereafter due both to increased traffic volume and to inflation, it is in the Port Authority's interest to have Pan American's business catered by a contractor which has a percentage arrangement with the Port Authority. To accommodate this substantial growth in the activity at Building 139, Marriott must expand its building premises and add additional land area to provide for overflow truck maneuvering and parking needs during peak periods and for future building expansion as required. Marriott plans a building expansion of some 36,400 square feet at an estimated investment of approximately \$4 million and has requested a long-term extension of its lease along with the historical precedent of rental and investment exemption amounts on its percentage rental payments. Marriott has agreed to make good faith efforts to use Minority Business Enterprises (MBE) and Women-owned Business Enterprises (WBE) and to employ minorities and women in the construction.

Negotiations have been substantially completed with Marriott for a new lease or a fifteen-year extension of its existing Lease, with increased rental rates for land and payment of building rental to commence October 18, 1988, the expiration date of the existing Lease. In addition, Marriott will lease approximately three acres of land adjacent to the existing site for a term commencing on October 18, 1986 with rentals on this land to commence on the completion date of the required building expansion but in no event later than October 18, 1987. During the first five years of a new lease, or the Lease extension, Marriott will pay \$26,000 per acre per year for the approximate 7.224-acre site and \$9 per square foot per year for the approximate 120,000

(Board - 3/13/86)

square feet of building space, resulting in total annual basic rentals of approximately \$1,267,824. These rates will increase respectively to \$30,000 per acre per year and \$10 per square foot per year during the second five-year period for total annual basic rentals of approximately \$1,416,720 and, during the last five-year period, the rates will be \$35,000 per acre per year and \$11 per square foot per year equating to total annual basic rentals of approximately \$1,572,840.

The percentage rental formula in the existing Lease will be revised in the new or amended lease to reflect the changes in the above site and building rentals plus the additional actual investment made by Marriott for its required expansion, with the latter exemption amount not, in any event, to reflect an investment greater than \$5 million, and with the continued use of percentage ranges patterned after the existing formula. The exemption amounts will be predicated upon Marriott's investment amortized from the date of completion of the building expansion to the end of the term of the new or amended Lease. Also, the Lease will provide that the Port Authority will have the right to increase the percentage rental on gross receipts from 8% to 9% effective on or after October 18, 1988, and the right to increase the then existing percentage rental up to a maximum of 10% effective on or after October 18, 1993.

Marriott Corporation would continue to have complete responsibility for maintenance and repair of the premises and electricity and water would continue to be metered and sold by the Port Authority to the lessee.

Marriott Corporation also has a lease (AYA-811) for a flight meal commissary in Building 143 which is situated on a 2.75-acre site at Kennedy International Airport. That lease also provides for payment of basic rentals plus 8% over specified exemption amounts and it does not expire until October 17, 1994. Marriott has agreed that, in conjunction with the changes made in the Lease for the Building 139 facility, the lease for the Building 143 facility will be amended to provide that the Port Authority will have the right to increase the gross receipts percentage rental applicable to business done at Building 143 from 8% to 9% effective on or after October 18, 1988 and the right to increase the then existing percentage rental to a maximum of 10% effective on or after October 18, 1993 should either or both rights be exercised by the Port Authority with respect to the Building 139 facility. The exemption amount for Building 143 will remain as is through the term of the lease.

Air La Carte, Inc. has a lease (AYA-418) for a flight meal commissary in Building 146 at Kennedy International Airport and it does not expire until June 30, 1990. The gross receipts percentage rental applicable to business done at Building 146 is 8%, increasing to 9% effective July 1, 1988. Authorization is requested to amend this lease to replace the automatic increase to 9% with the right of the Port Authority to increase the percentage rental from 8% to 9% effective at any date on or after July 1, 1988. Should the Port Authority choose not to exercise this right to increase the percentage rental rate on July 1, 1988, the total rental due to the Port Authority under this lease would thereby be reduced by an amount depending on the date on which, or if, this right is subsequently exercised.

(Board - 3/13/86)

Ogden Foods Travel Services, Inc. (formerly Chef's Orchid Inflight Services) also has a lease (AY-911) for flight meal commissaries in Buildings 110 and 196 at Kennedy International Airport and it does not expire until April 30, 1992. The gross receipts percentage rental applicable to business done at Buildings 110 and 196 is 8%, increasing to 9% effective May 1, 1988. Authorization is requested to amend this lease to replace the automatic increase to 9% with the right of the Port Authority to increase the percentage rental from 8% to 9% effective any date on or after May 1, 1988. Should the Port Authority choose not to exercise the right to increase the percentage rental rate on May 1, 1988, the total rental due to the Port Authority under this lease would be similarly reduced.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into agreements with Marriott Corporation, with Air La Carte, Inc., and with Ogden Foods Travel Services, Inc., all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to enter into: (1) a new lease with Marriott Corporation or an agreement with Marriott Corporation amending and supplementing its existing Lease AYA-303 which covers rental of a 4.224-acre site at Kennedy International Airport upon which Marriott Corporation constructed and operates a flight meal commissary (Building 139) to provide for an extension of the term thereof to October 17, 2003, to include the leasing of an adjacent plot of land of approximately three acres, and to provide for the revision of the existing percentage rental formula, all as outlined above; (2) an agreement with Marriott Corporation amending and supplementing its existing Lease AYA-811 which covers the Building 143 site at Kennedy International Airport to include rights of the Port Authority to increase the percentage rental as outlined above; (3) an agreement with Air La Carte, Inc. amending and supplementing its existing Lease AYA-418 which covers the Building 146 site at Kennedy International Airport to replace the increase in the percentage rental with the right of the Port Authority to increase the percentage rental as outlined above and (4) an agreement with Ogden Foods Travel Services, Inc. (formerly Chef's Orchid Inflight Service) amending and supplementing its existing Lease AY-911 which covers the Building 110 and Building 196 sites at Kennedy International Airport to replace the increase in the percentage rental with the right of the Port Authority to increase the percentage rental as outlined above; and it is further

RESOLVED, that the form of said agreements be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

LaGuardia Airport - Taxiway "CC" West of Runway 4-22 - Project Authorization

It was reported that the Board, at its meeting on September 13, 1979, originally authorized a project encompassing a three-phase program for the construction of new taxiways west of Runway 4-22 at LaGuardia Airport, at an expenditure then estimated at approximately \$16,520,800, including all payments, allowances, and expenses. The construction of Taxiway "CC" was identified as Phase III of the project.

Due to the construction of a new Delta Airlines passenger terminal and the resultant relocation of the facility employee vehicle parking lot to the west side of the airport which required the deactivation of a portion of Taxiway "B", and after consultation with the airlines and the Federal Aviation Administration (FAA), staff deemed it prudent to defer the construction of Taxiway "CC".

Consequently, the Board, at its meeting on April 7, 1982, authorized a change in the scope of the original project authorization, deferring the construction of Taxiway "CC" to a future date when operational requirements warranted its construction, and substituted therefor the construction of Taxiway "BB", from Taxiway "E" to Taxiway "D" and the realignment of Taxiways "D" and "F", including miscellaneous apron extensions. All changes were agreed to by the FAA.

Staff recommends construction of Taxiway "CC" at this time in response to an increase in the difficulty of maneuvering aircraft at the northwest corner of the airport. The problems are greatest during peak operating periods when aircraft queueing on Taxiways "A", "BB" and "O" for runway departures cause serious congestion on the intersecting taxiways and interfere with aircraft exiting from both Runways "22" and "31". In addition, maneuverability is further complicated when it is necessary to stack aircraft which are being delayed from take-off by weather conditions at destination airports.

This project is eligible for \$2.4 million of Federal aid under the A.I.P. guidelines.

It was therefore recommended that the Board authorize a project at LaGuardia Airport for the construction of Taxiway "CC", the expenditure therefor presently being estimated at \$3.6 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes a project at LaGuardia Airport for the construction of Taxiway "CC", the expenditure therefor presently being estimated at \$3.6 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses.

(Board - 3/13/86)

LaGuardia Airport - Lease with Hudson General Corporation for a Common Air Cargo Facility in a Portion of Hangar 7

It was reported to the Board that, at its meeting on May 9, 1985, the Board authorized a five-year lease on approximately one-half of the floor area of Hangar 7 at LaGuardia Airport with Hudson General Corporation, commencing on or about May 15, 1985, at an annual rental of \$109,404, for use as a common air cargo facility for the handling and processing of cargo by Hudson for five participating airlines. The authorization provided that Hudson would convert the premises to a common air cargo facility at its expense and the Port Authority would have the right to terminate the lease in the event that the leased premises are required to accommodate displaced carrier operational functions on the airport, with the Port Authority being obligated, in the event of such termination, to reimburse Hudson its unamortized costs of converting the premises, up to a maximum of \$800,000.

Final negotiations between Hudson and the participating airlines have led to Hudson's restructuring of the rate for cargo handling. Hudson now intends such rate to be on a per-pound fixed rate basis. The start of construction was therefore delayed while Hudson completed the renegotiation of said rate. In order to make the project financially viable under such a rate structure, to keep its rates competitive on the airport and to recover its operating costs, Hudson requested a longer lease term for its presently estimated \$1.5 million investment, as defined in the lease.

Therefore, two five-year options in Hudson are recommended beyond the original five-year term, with the annual rental for the facility to increase to \$146,704 and \$184,005, respectively, in each five-year option period. The Port Authority shall now have an unrestricted right of termination on notice without cause during the originally authorized five-year term and also, in the event Hudson exercises the first five-year option, through the tenth year of the term, with the Port Authority obligated to reimburse Hudson in the event of such termination but only up to \$800,000 based on an amortization period commencing with the completion of construction to and including the date the lease would expire if Hudson exercised both five-year options. Should Hudson decide not to exercise either option to extend the term of the letting, the Port Authority would not have any obligation to reimburse Hudson for its unamortized investment.

Hudson shall now pay the first year's rental for the facility including on-going interest at the rate of 10% in twelve equal installments commencing on May 15, 1986. Finally, in addition to the basic rental for the facility, Hudson would also now pay a percentage rental of 5% on its gross receipts derived from the handling of airline cargo at the premises, effective from and after January 1, 1987.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement of lease with Hudson General Corporation with respect to Hangar 7 at LaGuardia Airport, all in accordance with the terms set forth above.

(Board - 3/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Resolution adopted by the Board at its meeting on May 9, 1985, authorizing the Executive Director to enter into an agreement of lease with Hudson General Corporation with respect to Hangar 7 at LaGuardia Airport, be and the same is hereby amended in accordance with the terms set forth above, including the granting of two five-year options in Hudson to extend the term of the letting thereunder; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Holland Tunnel - Ceiling Replacement - Phase II - Ceiling Installation - Contract HT-110.022 - Additional Authorizations and New Project Authorization

It was reported that the Board, at its meeting on April 11, 1985, authorized a project to replace the ceilings in both the North and South Tubes of the Holland Tunnel at an expenditure estimated at \$78,310,000. In addition, the Board authorized the Executive Director to award Contract HT-110.022, Ceiling Replacement, Phase II, Ceiling Installation, to Morrison-Knudsen Co., Inc., New York, New York, in the estimated amount of \$37,598,600 and to order extra work up to the amount of \$3,760,000. Contract HT-110.022 provides for the installation of a concrete ceiling, predominately precast ceiling panels with a ceramic tile finish, replacement of the tunnel lighting system and installation of fiber optic cables for the closed circuit surveillance system.

Staff has since identified several additional items of work that are necessary for the safe and efficient operation of the tunnel. This work will also augment the tunnel's appearance in light of the new ceiling currently being installed. The items of work include:

1. demolition of the existing roadway drainage system and construction of a new roadway drainage system;
2. construction of temporary shoring for the walls of the fresh air duct beneath the roadway;
3. replacement of the existing doors and frames of the utility niches in the tunnel walls; and
4. replacement of missing and damaged wall tiles.

To minimize the inconvenience to the public caused by additional periods of tunnel closure, staff deems it prudent to perform this work concurrently with the nightly tunnel closures required to perform the ceiling replacement. In addition, this work should be performed at this time because in 1988, subsequent to the completion of HT-110.022, the North Tube of the Lincoln Tunnel is scheduled to be closed nightly for a complete roadway rehabilitation. Accordingly, all major construction work in the Holland Tunnel should be completed prior to the closing of the North Tube of the Lincoln Tunnel.

The construction schedule for the ceiling replacement requires that work be performed in several areas of the Holland Tunnel simultaneously. Additional work in the tunnel would cause interference with the ceiling construction if the operations were not precisely coordinated and would result in additional periods of tunnel closure and delay the start of work in the Lincoln Tunnel. Therefore, in order to permit maximum coordination, staff deems it prudent that the same contractor, Morrison-Knudsen Co., Inc., perform all of the work. Morrison-Knudsen Co., Inc., submitted a proposal for the aforementioned additional items of work in the amount of approximately \$21 million. Subsequent negotiations between staff and Morrison-Knudsen Co., Inc., resulted in a revised proposal in the amount of \$13.3 million for items 1 and 3 above, plus a proposal for items 2 and 4 based upon the cost of the work performed plus 15% for work performed by the contractor and an additional 5% for work performed by a subcontractor, which staff deems to be fair and equitable.

The time for completion of the original contract work and the work under the supplemental agreement will be fixed in the supplemental agreement at December 1, 1987.

(Board - 3/13/86)

It was therefore recommended that the Board:

1. authorize the Executive Director to enter into Supplemental Agreement No. 1 to Contract HT-110.022, Holland Tunnel, Ceiling Replacement, Phase II, Ceiling Installation, with Morrison-Knudsen Co., Inc. to provide for the following work to be performed in the North and South Tubes of the Holland Tunnel:

a. the construction of a new road drainage system and the replacement of the existing doors and frames for the utility niches in the tunnel walls, in the total amount of \$13.3 million;

b. the construction of temporary shoring for the walls of fresh air duct and the replacement of missing and damaged wall tiles, all on a net cost basis currently estimated at roughly \$1.3 million; and

2. authorize a project for the construction of a new roadway drainage system, for the construction of temporary shoring for the walls of the fresh air duct, for the replacement of the existing doors and frames for the utility niches in the tunnel walls, and for the replacement of missing and damaged wall tile, all in the North and South Tubes of the Holland Tunnel at an expenditure presently estimated at \$20.2 million, including payments to contractors, an allowance for extra work in the amount of \$650,000 to be ordered by the Executive Director under Contract HT-110.022 in addition to all prior authorization, an allowance for net cost work, engineering, administrative and financing expenses.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board:

1. authorize the Executive Director to enter into Supplemental Agreement No. 1 to Contract HT-110.022, Holland Tunnel, Ceiling Replacement, Phase II, Ceiling Installation, with Morrison-Knudsen Co., Inc. to provide for the following work to be performed in the North and South Tubes of the Holland Tunnel:

(a) the construction of a new roadway drainage system and the replacement of the existing doors and frames for the utility niches in the tunnel walls, in the total amount of \$13.3 million;

(b) the construction of temporary shoring for the walls of fresh air duct and the replacement of missing and damaged wall tiles, all on a net cost basis currently estimated at roughly \$1.3 million; and the form of the agreement to be subject to the approval of General Counsel or his authorized representative; and

2. authorize a project for the construction of a new roadway drainage system, for the construction of temporary shoring for the walls of the fresh air duct, for the replacement of the existing doors and frames for the utility niches in the tunnel walls, and for the replacement of missing and damaged wall tile, all in the North and South Tubes of the Holland Tunnel at an expenditure presently estimated at \$20.2 million, including payments to contractors, an allowance for extra work in the amount of \$650,000 to be ordered by the Executive Director under Contract HT-110.022 in addition to all prior authorizations, an allowance for net cost work, engineering, administrative and financing expenses.

(Board - 3/13/86)

Port Newark - Kent Steel Corporation/Azco Steel Company - Rehabilitation and Lease of Buildings 102 and 149

It was reported that Kent Steel Corporation and Azco Steel Company, two steel import/export firms, lease Building 304 at Port Newark under a ten-year term lease expiring in 1993. The co-tenants are interested in leasing Buildings 102 and 149 and 54,980 square feet of open area and renovating the buildings for steel storage and office use, respectively. Under the proposed arrangement, Kent/Azco will renovate the buildings and lease them and the open area at an initial annual rent of \$80,400. The annual rent will be increased every two years based on 50% of the percentage increase in the Consumer Price Index since the rent commencement date with a minimum of 3% per year compounded annually. The rent will commence on completion of the renovation or January 1, 1987, whichever is earlier. Twenty permanent jobs will be created by the tenant at the site.

Building 102, a 60-year old building, is not marketable in its present condition. The highest and best use of Building 149, a 4,800 square foot office building, is as a support building for Building 102.

The Port Authority would provide up to \$650,000 for the renovation of the buildings. The co-tenants would spend up to a total of an additional \$200,000 in improvements such as the replacement of the overhead cranes. The tenants will pay an additional monthly rent of \$.0116 for each dollar provided by the Port Authority for the renovation. In addition, the tenants will pay on the rent commencement day, a single payment of additional basic rent computed at the daily rate of \$.0003125 times each payment by the Port Authority to the lessee made during the renovation period, from the day it was made to the day before the rent commencement date.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement of lease with Kent Steel Corporation and Azco Steel Company in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a fifteen-year lease with Kent Steel Corporation and Azco Steel Company for Buildings 102 and 149 and 54,980 square feet of open area, rent to commence on completion of the renovation of the buildings on or about January 1, 1987, under which lease the Port Authority will agree to provide up to \$650,000 for the renovation of Buildings 102 and 149, the agreement of lease to be in accordance with the foregoing; the form of the agreement of lease to be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Port Newark - Berths 53-59 - Universal Maritime Service Corp. - Amendment to Lease

It was reported that the Board, at its meeting on June 12, 1969, authorized the letting of a combination container and breakbulk terminal at Port Newark to Universal Maritime Service Corp. Subsequent Board and Committee authorizations on June 11, 1970, September 14, 1972, June 13, 1973, August 14, 1975 and July 25, 1979 resulted in the expansion of the terminal to 85 acres with 3,058 feet of berth and provision for payment to the tenant to build an expanded 450,000 square foot cargo shed. The lease term expires on October 31, 1999 and has a current annual rental of about \$3,043,000.

The terminal was originally designed to handle not only container ships, but also vessels with breakbulk cargo. The 450,000 square foot shed, built in two phases with a connecting breezeway, was constructed 125 feet from the face of wharf to permit both container and breakbulk cargo operations. Major steamship lines presently using the terminal are completely containerized and the location of a portion of the shed is an obstacle to efficient container operations. Therefore, Universal wishes to demolish the western half of the shed and connecting breezeway. By demolishing it, approximately ten acres of land will be cleared for container handling and 1,600 feet of berth are opened up for improved flow of containers.

Under the proposed agreement, Universal will continue to pay for the demolished portion of the shed and breezeway. Furthermore, the Port Authority will provide up to \$700,000 of the expected \$1.5 million estimated cost for demolition and improvements such as paving, lighting and other related work. Universal will pay an additional rental equivalent to \$115,000 per year from March 1, 1986 to the expiration of the lease bringing the total current annual rental to \$3,158,000. As part of the negotiated arrangement, Universal will give to the Port Authority its interest in one of the three container cranes located at the terminal.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an amendment to the Port Authority's lease agreement with Universal Maritime Service Corp. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an amendment to the lease with Universal Maritime Service Corp. at Port Newark to permit demolition of half a cargo shed on the premises with the Port Authority to provide up to \$700,000 for demolition, paving, lighting and other related work; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Port Newark - Lease with Nu-Car Carriers, Inc.

It was reported that Nu-Car Carriers, Inc., a tenant at Port Newark since 1971, is a major trucking company transporting vehicles for such firms as Toyota, Nissan, Honda and Mazda. The Committee on Operations, at its meeting on March 25, 1981, approved a ten-year lease for approximately three acres of open area with Nu-Car which expires April 30, 1991. Nu-Car, subsequently, added 5.7 acres to this leasehold under a temporary arrangement.

Nu-Car is interested in expanding the scope of their existing terminal at Port Newark. They plan to improve the land and construct a 14,800 square foot maintenance building and will invest approximately \$1.7 million. The tenant will surrender the existing agreement on the premises and enter into a new 20-year lease of the entire leasehold, which is composed of 4.1 acres of paved and fenced area and 4.7 acres of raw land. The initial annual rental will be increased on November 1, 1987 and every two years thereafter based upon 50% of the percentage increase in the Regional Consumer Price Index since October 1985 with a minimum of 3% per year compounded annually. The Port Authority will have the right to terminate the letting after ten years on one year's written notice. On exercising the termination right, the Port Authority will reimburse the tenant for the unamortized portion of the tenant's initial investment in the building. This will enable the Port Authority to recapture the premises.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement of lease with Nu-Car Carriers, Inc., in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease of 20 years commencing April 1, 1986 for 8.8 acres of open area at Port Newark at an initial annual rent of \$165,900 with a simultaneous surrender of an existing lease with Nu-Car Carriers, Inc., with the Port Authority having the right to terminate after ten years; the form of the lease to be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Hoboken Waterfront Development - Authorization to Amend Physical Planning Services Agreement - Cooper, Eckstut Associates

It was reported that, at its meeting on December 8, 1983, the Board authorized the Executive Director to undertake among other things, necessary physical planning for mixed-use waterfront development projects in Hoboken, New Jersey and Hunters Point, Queens, New York at an estimated amount of \$500,000 each.

Under that authorization and after a detailed request for proposal process, the urban design firm of Cooper, Eckstut Associates (CEA) was retained to conduct the urban design and development planning for the Hoboken Project. This retention was unanimously supported by the other land owning participants in the project: the City of Hoboken, New Jersey Transit and Stevens Institute of Technology. CEA was retained in March 1984 and has completed the required work associated with land use, transportation issues and engineering requirements, and has formulated a "preferred option" development plan and related design guidelines which are being used as a basis for (1) agreements with the City of Hoboken, New Jersey Transit and Stevens Institute of Technology; (2) seeking private sector participation and (3) receiving necessary permits.

All work products including a draft Development Plan and Design Guidelines have been completed.

At its meeting on June 13, 1985, the Committee on Operations authorized the Executive Director to enter into an additional agreement with CEA on a time card basis with reimbursement for out-of-pocket expenses to provide assistance in approval and permit processes, developer selection and design review in connection with the Hoboken Waterfront Development Project at a cost not to exceed \$150,000.

CEA was retained to perform the above services and is currently assisting Port Authority staff in presenting the project to the project participants and addressing concerns and issues raised by those entities. CEA is also assisting staff in evaluating alternate phasing options and concepts that will enhance the attractiveness of development opportunities for the private sector and which will be reflected in the request for proposal packages. Due to changes in the City of Hoboken administration which included the election of a new Mayor in June, the creation of a new Waterfront Advisory Committee and several City Council changes in November, CEA was required to perform substantial work beyond that originally expected in order to assist the Port Authority by providing extensive briefings and presentation materials to the new administration on the proposed project. In addition, in late Fall, 1985, the State also announced the findings of a major regional transportation analysis which recommended, in part, a combined light rail transit system and bus way to service waterfront development projects, with Hoboken as a major transportation terminal location. The proposed light rail system became a new element in CEA's scope of services which required additional time and work.

(Board - 3/13/86)

Staff recommends that the Agreement authorized in June 1985 with CEA be amended to provide for continued planning services for approximately the next five to six months, in preparation for final agreements, permits and developer solicitations. These services will permit staff to advance work aimed at seeking project authorization from the Board including authorization for the Executive Director to enter into agreements with project participants and to proceed with Phase I design and construction of the Hoboken Waterfront Development. The services to be provided under the Agreement, as amended, would include such activities as:

a) initiating functional planning services for Phase I of the Project which were not included in the June 1985 authorization. Such work would enable portions of the anticipated public improvements to be carried forward into the design and construct phase at the time of Project Authorization, and would include:

- initiating functional planning for streets, utilities, parks and open spaces;
- coordinating development of Phase I elements so as to be compatible with future phases and to facilitate phased private development;
- developing plans and functional relationships and coordinating the elements of the transportation complex (LRT/NJT Rail/PATH/NJT Bus/Ferry).

b) providing assistance related to proceeding toward final agreements, permits and developer solicitation, and would include:

- responding to proposed modification to the plans and guidelines that are anticipated in the later stages of negotiations with the other three project participants;
- providing assistance related to preparing requests for parcel specific proposals for private development;
- preparing materials for and making key project presentations to the project participants and regulatory agencies.

The amended agreement will contain a provision that for the services covered under this authorization Cooper, Eckstut will be required to meet a goal for Minority Business Enterprise participation of 15% for firms owned and controlled by minorities and 5% for firms owned and controlled by women and in addition CEA will use every good faith effort to meet a goal of an additional Minority Business Enterprise participation of 5% for firms owned and controlled by minorities and or women.

Because of CEA's familiarity with development issues that have developed as the project emerged, their continuing support during the negotiation phase with the project participants would be most helpful to the Port Authority.

(Board - 3/13/86)

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement to amend the 1985 Hoboken Waterfront Development-Physical Planning Services Agreement with Cooper, Eckstut Associates (CEA) to provide for continued planning services for the Hoboken Waterfront Development Project at an additional amount not to exceed \$150,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to enter into an agreement to amend the 1985 Hoboken Waterfront Development-Physical Planning Services Agreement with Cooper, Eckstut Associates (CEA) to provide for continued planning services for the Hoboken Waterfront Development Project at an additional amount not to exceed \$150,000; the form of such Agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 3/13/86)

Engineering Department - Project Management System - Retention of Ira Bitz and Associates, Ltd.

It was reported that the Engineering Department has retained Ira Bitz and Associates, Ltd. of Chevy Chase, Maryland, since 1981 to assist staff in the development and implementation of a formalized project management system. This project management system has resulted in improved operation of the Design Division, establishment of a matrix system throughout the Engineering Department, the development of project procedural manuals and reporting systems, and training for over 500 staff. Ira Bitz and Associates, Ltd. has also assisted in improving the mechanisms for interfacing between the Engineering Department and the Line Departments.

Staff has found that increases in productivity have been attained through employment of the project management system and staff deems it prudent to retain Ira Bitz and Associates, Ltd. to further optimize the project management system.

The professional services to be performed by Ira Bitz and Associates, Ltd. will include advising and assisting in the adaptation of the project management system to automated project management information systems and performing intermittent reviews of the project management system. Also, because of additions to the Engineering Department staff to meet the expanded workload and to replace vacancies created by retirements and movement of staff to other departments, a continuing training program is needed so that new personnel have the benefit of customized training in project management.

It is anticipated that the services required by the Engineering Department will result in an expenditure not to exceed \$50,000 for an approximate one-year period.

It was therefore recommended that the Board authorize the Chief Engineer to enter into an agreement with Ira Bitz and Associates, Ltd. to provide professional services to further optimize the Engineering Department's project management system and to train new project management staff, all at an aggregate amount not to exceed \$50,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Chief Engineer to enter into an agreement with Ira Bitz and Associates, Ltd. to provide professional services to further optimize the Engineering Department's project management system and to train new project management staff, all at an aggregate amount not to exceed \$50,000; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 3/13/86)

Lincoln Tunnel - Easement Agreement with the Township of Weehawken - Retaining Wall - Contract LT-288

It was reported that as part of the original construction, a retaining wall was built by the Port Authority providing the western boundary of the Lincoln Tunnel toll plaza. In the intervening years, the Township of Weehawken has placed surcharge on its property behind this wall, causing an overstress of the wall structure. The overstress condition was discovered by Port Authority engineers in the course of an inspection to determine the source of a water leakage condition on the west side of the toll plaza.

It is planned to relieve the overstress of the wall by removing the surcharge and constructing a secondary retaining wall to assure the safety of Lincoln Tunnel patrons and to support an existing ramp from Park Avenue to the Township's garage.

This work will be performed under Contract LT-288. The contract was publicly advertised and bids were received on October 29, 1985 and Mohawk Constructors, Inc. was the successful low bidder with a bid in the amount of \$319,900, exclusive of extra work and net cost work. On December 12, 1985 the Executive Director authorized award of the contract.

The easement will grant the Port Authority the right to build and maintain the secondary retaining wall and to control the usage of the area immediately behind the wall, for a one-time cost of \$1.

It was therefore recommended that the Board authorize the Executive Director to enter into an easement agreement with the Township of Weehawken, granting the Port Authority the right to construct and maintain a new retaining wall on Township property adjacent to the Lincoln Tunnel toll plaza.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an easement agreement with the Township of Weehawken, granting the Port Authority the right to construct and maintain a new retaining wall on Township property adjacent to the Lincoln Tunnel toll plaza; and it is further

RESOLVED, that the aforesaid agreement be subject to approval as to form by General Counsel or his duly designated representative.

(Board - 3/13/86)

The World Trade Department - Newark Legal and Communications Center - Retention of Construction Management Firm

It was reported that the Board, at its meeting on September 12, 1985, authorized the implementation of the project to construct the Newark Legal and Communications Center (NL&CC). Staff has determined that in order to expeditiously complete the project, the services of a construction management (CM) firm are required during both the design and construction phases of the project. During development of the design of the NL&CC the CM firm's services would include the provision of advice and assistance with respect to materials, building systems and equipment, construction feasibility, alternate design concepts and cost factors, project scheduling, project budgeting and the preparation of drawings and specifications. In addition the CM firm would be required to make recommendations during the design phase of the project that would allow the work to be broken up into smaller contracts, thus enabling more small businesses, particularly Minority Business Enterprises to successfully compete for construction jobs on the project. The Port Authority itself, however, would let all contracts for the project. During the construction period the CM firm would perform all or some of the general conditions work, (e.g., hiring laborers, rubbish removal, hoisting, site security, etc.) and would be responsible for coordinating the work of Port Authority contractors.

The CM firm would be compensated on a monthly fixed fee basis for its services during the design and construction phases of the project, which is expected to run for approximately two years. In addition, the CM firm would be reimbursed on a cost reimbursement basis for general conditions work.

If selected from outside the New York/New Jersey region, the CM firm would be required to establish a regional office in the Port District.

It was therefore recommended that the Board authorize the Executive Director, with the concurrence of the Committee on Construction, to enter into an agreement with a construction management firm to provide for the performance of construction management services and general conditions work during the design and construction phases of the Newark Legal and Communications Center (NL&CC) project.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, with the concurrence of the Committee on Construction, is authorized to enter into an agreement with a construction management (CM) firm to provide for the performance of construction management services and general conditions work during the design and construction phases of the Newark Legal and Communications Center (NL&CC) project; and it is further

RESOLVED, that the form of such agreement be subject to the approval of General Counsel or his designated representative.

(Board - 3/13/86)

Port Authority Employment Relations Panel - Chairman

It was reported that the revised Port Authority Labor Relations Instruction, adopted by the Board on September 29, 1976, and amended on December 9, 1983, among other things, provides for the establishment of an Employment Relations Panel with responsibility for resolving disputes arising from the designation of managerial and confidential and supervisory employees, assisting in resolving negotiating impasses, processing improper labor practice charges and processing petitions for certification or decertification of employee organizations as negotiating representatives of Port Authority employees.

The Labor Relations Instruction further provides for the members of the Panel to be appointed for overlapping three-year terms. The term of the Chairman of the Panel was due to expire on December 31, 1985, and as recognized by the Board at its December 12, 1985 meeting, the Chairman Joseph R. Crowley, Esq., died on December 3, 1985, having served with distinction since February 11, 1982. His successor is to be appointed for a term to expire December 31, 1988, subject to the joint written recommendation of the Chairman of the New Jersey Public Employment Relations Commission (PERC) and of the New York Public Employment Relations Board (PERB).

On March 10, 1986 James W. Mastriani, Chairman of PERC, and Harold R. Newman, Chairman of PERB, after consultation with the representatives of employee organizations, recommended that William M. Weinberg, Professor of Industrial Relations at the Institute of Management and Labor Relations of Rutgers University, be appointed as Chairman of the Panel for the three-year term expiring on December 31, 1988. Phillip Ruffo, Esq. currently serves as New York Member for a term expiring December 31, 1987, and John J. Pearce, Jr., former Executive Director of the New Jersey State Board of Mediation, continues as the New Jersey Member until December 31, 1986.

Members of the Panel, who are subject to removal or dismissal only upon charges and after a hearing before a hearing officer appointed jointly by the Chairman of PERC and PERB, may also appoint hearing officers, mediators, factfinders, attorneys, or others, to assist them in their functions, and to provide for their reimbursement and compensation at rates set pursuant to the Labor Relations Instruction. The panel members themselves are also compensated for each day spent in attendance at meetings or consultation or in the preparation of reports or determinations and are reimbursed for expenses actually incurred by them in the performance of their duties.

It was therefore recommended that the Board appoint William M. Weinberg as Chairman of the Port Authority Employment Relations Panel for a term expiring December 31, 1988, in accordance with the Labor Relations Instruction.

(Board - 3/13/86)

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that William M. Weinberg be and he hereby is appointed Chairman of the Port Authority Employment Relations Panel for a term expiring December 31, 1988.

Whereupon, the meeting was adjourned.

MINUTES of Annual meeting of The Port Authority of New York and New Jersey held (202)
Thursday, April 10, 1986, at the Port Authority offices, One World Trade Center, City, County
and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
Jerry Fitzgerald English
Robert V. Van Fossan
William K. Hutchison
Henry F. Henderson, Jr.

NEW YORK

Robert F. Wagner, Vice-Chairman
William J. Ronan
James G. Hellmuth
Howard Schulman
John G. McGoldrick

Stephen Berger, Executive Director
Doris E. Landre, Secretary
Anthony J. Barber, Director of Tunnels, Bridges and Terminals
A. Paul Blanco, Manager of Financial Accounting, Finance
Henry DeGeneste, Superintendent of Police, Public Safety
Sidney Frigand, Assistant Executive Director/Public Affairs
Louis J. Gambaccini, Assistant Executive Director/Trans-Hudson Transportation
Gene Gill, Director of General Services
Francis A. Gorman, Comptroller
Charles L. Hirsch, Executive Assistant to the Executive Director
Leon Katz, Supervising Information Officer, Public Affairs
Richard R. Kelly, Director of Rail Transportation
James J. Kirk, Port Director
Louis J. LaCapra, Deputy Director, Personnel
Philip LaRocco, Director, Economic Development
Joseph Lesser, Deputy General Counsel
Lillian C. Liburdi, Director of Management and Budget
Katharine B. MacKay, Assistant Executive Director/Administration
Mark Marchese, Assistant Director, Information Services, Public Affairs
Rino M. Monti, Director of Engineering/Chief Engineer
John R. Moran, Assistant Director of Audit
James H. Mullen, Administrative Assistant
James J. O'Malley, Director of Management Information Services
Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
Theresa A. Potente, Assistant Secretary
Martin E. Robins, Director of Planning and Development
Morris Sloane, Deputy Director of Aviation
Victor T. Strom, Director of Public Safety
Guy F. Tozzoli, Director of World Trade
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Director, Finance Department/Chief Financial Officer
Marvin Weiss, Director, Office of Minority Business Development
Marshal L. Wilcox, Jr., Treasurer
Jeffrey R. Breen, Engagement Partner, Touche Ross & Co.
Fred Rohn, Senior Partner, Touche Ross & Co.

The meeting was called to order by the Chairman.

(Board - 4/10/86)

Election of Officers

Chairman Philip D. Kaltenbacher announced that in accordance with the requirements of the By-Laws the annual election of officers was in order and requested Commissioner Van Fossan to take the chair as Acting Chairman.

The Acting Chairman requested Commissioner Ronan, Chairman of the Nominating Committee, to submit the report of that Committee. Commissioner Ronan submitted the following report:

“On behalf of the Nominating Committee, I desire to report that at its meeting held earlier today, in accordance with the provisions of the By-Laws, the Committee, by unanimous action, submits the nominations for election to the office of Chairman of The Port Authority of New York and New Jersey of Commissioner Philip D. Kaltenbacher, and for the office of Vice-Chairman of The Port Authority of New York and New Jersey of Commissioner Robert F. Wagner.

“By unanimous action, the Committee also submits the nominations of Stephen Berger as Executive Director and of Patrick J. Falvey as General Counsel.

“By unanimous action, the Committee also submits the nominations of Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary and Donald R. Lee as Director of the Audit Department.”

Commissioner McGoldrick thereupon moved the adoption of the report of the Nominating Committee. The motion was seconded by Commissioner Hutchison and carried.

On motion of Commissioner McGoldrick seconded by Commissioner Hutchison it was voted that nominations be closed and that the Secretary be directed to cast one ballot for the election of Commissioner Philip D. Kaltenbacher as Chairman, Commissioner Robert F. Wagner as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary and Donald R. Lee as Director of the Audit Department.

The Secretary reported that the ballot had been cast, whereupon Commissioner Van Fossan announced the election of the following: Philip D. Kaltenbacher as Chairman, Robert F. Wagner as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary and Donald R. Lee as Director of the Audit Department.

(Board - 4/10/86)

Tribute to Honorable Alan Sagner

The following resolution was unanimously adopted, expressing the appreciation of the Commissioners of The Port Authority of New York and New Jersey to the Honorable Alan Sagner.

WHEREAS, through the years since his original appointment in 1974 as a Commissioner of The Port Authority of New York and New Jersey by Governor Brendan T. Byrne to succeed Commissioner Philip B. Hofmann who had resigned, and his reappointment by Governor Byrne in 1979 to a full term, the Honorable Alan Sagner has been a loyal and dedicated member of the Board; and

WHEREAS, Commissioner Sagner was elected by his fellow Commissioners to the office of Chairman of The Port Authority of New York and New Jersey in 1977, and served as Chairman until September 1985, and also served as a member and Vice Chairman of the Committee on Construction, a member of the Committee on Port Planning, Vice Chairman of the Committee on Operations and a member of the Committee on Finance; and

WHEREAS, during Commissioner Sagner's tenure as Chairman, the Port Authority embarked on an Industrial Parks Program; executed the modernization and expansion of the Port Authority Bus Terminal; inaugurated a Waterfront Development Program; began construction of the Region's first Teleport; established a Foreign Trade Zone at the Port Newark/Elizabeth Marine Terminal; established XPORT, the Port Authority Trading Company; modernized the Red Hook Terminal; undertook, in partnership with the Newark Economic Development Corporation, the Newark Legal and Communications Center; launched the Fishport; and purchased more than 2,300 buses under the Port Authority's Mass Transportation Program; and

WHEREAS, Commissioner Sagner's dedication to the public good has also been evidenced by his service as Chairman of the Tri-State Regional Planning Commission, Commissioner of Transportation of the State of New Jersey, President of the Board of Trustees of Newark Beth Israel Medical Center, Vice President of the Health and Hospitals Council of Metropolitan New Jersey, Trustee of the New Jersey College of Medicine and Dentistry, President and charter member of the Livingston Rotary Club, and member of the Executive Committee of the National United Jewish Appeal; and

WHEREAS, Commissioner Sagner was totally committed to the achievement of the Port Authority's goals and gave generously of his time as Chairman and brought to the deliberations of the Board his superb executive and entrepreneurial talents as well as the benefit of his extensive experience in business;

NOW THEREFORE, be it

(Board - 4/10/86)

RESOLVED, that the Commissioners of The Port Authority of New York and New Jersey do hereby express to Alan Sagner their appreciation for his generous, talented and effective service to the Port Authority, and their warmest respect and affection for him as a friend and valued colleague; and it is further

RESOLVED, that the Commissioners do hereby direct that this resolution be suitably engraved and presented to Commissioner Alan Sagner as a token of the high esteem and warm friendship in which he will always be held by his fellow Commissioners and the staff.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of March 13, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on April 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on April 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on April 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on April 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 4/10/86)

Report of the Audit Committee

Commissioner John G. McGoldrick, Chairman of the Audit Committee, presented the report of the Audit Committee. The report which follows was ordered spread upon these Minutes of the Board.

“Our By-Laws provide that the Audit Committee shall report from time to time to the Board on the results of its supervisory, auditing and other activities.

“During the past twelve months the Audit Committee has held nine meetings.

“The Committee has reviewed the Audit Department’s quarterly reports of its review of internal functions and external relationships, and the quarterly accounts receivable reports. We have also reviewed, and continue to monitor, unresolved audit findings and recommendations – to assure that the recommendations of the Audit Department are appropriately implemented in a timely manner.

“During the past year we met on four different occasions with representatives of Touche Ross & Co., our independent auditors. We had regular discussions with only the outside auditors present – consistent with the policy that the auditors and the Audit Committee have direct and unrestricted access to each other.

“In October, we reviewed the proposed 1985 audit scope and timetable with the independent auditors. In December, we reviewed internal accounting controls and the results of the interim audit, and discussed in depth the auditors’ management letter recommendations and management’s responses.

“And in February, the Committee reviewed and commented on the draft financial statements and draft notes to the financial statements. We also reviewed that 1986 audit plan which was prepared by our internal financial/audit staff.

“The Audit Committee has been monitoring compliance with the Authority’s financial disclosure filing requirements. We are concerned with both the completeness and the timeliness of the filings, and with the contents of the disclosure statements. We will again this spring review the individual filings of all senior management – as we have the past two years – and will continue to focus on overall compliance with the filing requirements.

“Without going into detail, I would like to note some of the special reviews which the Audit Committee has undertaken this past year:

- electronic data processing procedures and personnel, focusing on security issues
- expense account reporting requirements and compliance, including timeliness of submissions and reasonableness of amounts
- cash advance procedures and controls
- equal opportunity contracts, focusing on the effectiveness of compliance monitoring and reporting

(Board - 4/10/86)

- management analysis, reviewing the development of procedures
- staff use of vehicles
- Port Authority policies concerning gifts and employment of relatives
- construction supervision, including a review of controls and reporting procedures

“We had two special meetings focusing on the interaction of line departments and central management; one meeting was with some senior line department people, and the other was with some central management senior staff. The purpose of the sessions was to focus on the delicate balance between having prudent, effective and adequate controls, and allowing for innovative, flexible and responsive management.

“Finally, because the Board has delegated to the Audit Committee the responsibility of making an annual recommendation concerning the retention of auditors, the Committee focused on the level of performance and degree of responsiveness of the independent auditors retained for fiscal 1985. Today’s agenda includes, as an action item, the retention of Touche Ross & Co., for fiscal year 1986 based upon the Audit Committee’s recommendation.

“I want to recognize the seriousness of purpose with which my fellow Audit Committee members – Commissioners Henderson, Hutchison and Ronan – have addressed our responsibilities. Also, I wish to compliment Stephen Berger, Pat Falvey, Barry Weintrob and Don Lee – and the other staff members with whom we work – for their responsiveness and cooperation.”

(Board - 4/10/86)

Report of Independent Auditors

The Board received a report of Touche Ross & Co., Independent Auditors, as presented by Mr. Jeffrey R. Breen. The report which follows was ordered spread upon these Minutes of the Board.

"We have completed our examination of the consolidated financial statements of The Port Authority of New York and New Jersey, and its subsidiary, Port Authority Trans-Hudson Corporation, for the year ended December 31, 1985. Our opinion dated February 28, 1986, appears on page 27 of the Port Authority's 1985 Annual Report. Our examination was conducted in accordance with generally accepted auditing standards. Our opinion states that the Port Authority's financial statements are fairly presented in conformity with generally accepted accounting principles applied on a consistent basis, except for the change, with which we concur, in the method of accounting for post retirement benefits. Our opinion also states that Schedules A, B, and C are fairly presented in conformity with the requirements of law and the Port Authority's bond resolutions which have been applied on a basis consistent with that of the preceding year, except for the aforementioned change.

"Concurrently with our examination of the annual financial statements, we also performed a study of the Port Authority's system of internal accounting control. Our opinion dated November 27, 1985, on the adequacy of the Port Authority's system of internal accounting control, appears on page 26 of the Annual Report.

"In addition, we issued a report on the Special Reserve Fund in Trust certifying to the Trustee that there were adequate funds in the Trust as of December 31, 1985 to retire the outstanding General and Refunding Bonds as scheduled on March 1, 1986. We also issued net revenue reports in accordance with the lease agreements between the Port Authority and the City of New York and the Port Authority and the City of Newark.

"During the year, we had unrestricted access to the Audit Committee and had several opportunities to meet alone with the Audit Committee to discuss our audit plan, comments and recommendations on internal control and the financial statements.

"During the year, we had several meetings with the Executive Director and Port Authority management to discuss various accounting and financial reporting matters.

"We received the complete cooperation of Port Authority management and employees. There were no restrictions placed on our approach or the scope of our examination. We were given access to all individuals, records, documents and other supporting data which we requested and our inquiries were satisfactorily answered.

"We appreciate the opportunity to appear before you and would be pleased to answer any questions you may have pertaining to the financial statements, our approach to the 1985 audit and the reports which we issued."

(Board - 4/10/86)

1986 Budget - January 1 through May 31, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986 to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). On January 9, 1986, the Board acted to confirm the authority of the Executive Director through February 28, 1986, to make expenditures at a rate not to exceed \$200 million per month and to authorize the Executive Director to implement the annual salary range adjustment. On February 13, 1986, and March 13, 1986 the Board's confirmation of the Executive Director's authority was extended through March 31, 1986, and April 30, 1986, respectively. These actions were taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governor's staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through May 31, 1986.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through May 31, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

(Board - 4/10/86)

Retention of Independent Auditors for 1986

It was reported that under the By-Laws, the Audit Committee has the responsibility to recommend retention of independent accountants for designation by the Board to audit the books and accounts of the Port Authority. Under a policy adopted at its meeting on June 21, 1983, and reaffirmed at its meeting on March 13, 1986, the Audit Committee monitors the independent auditing function and decides annually the question of which firm to recommend to the Board for retention by the Port Authority and for what period of time in light of then current circumstances.

Consistent with that policy, and after a full review and discussion of the policy and the performance of Touche Ross & Co., the Audit Committee recommended that the Board retain Touche Ross & Co. as independent auditors to audit the books and accounts of the Port Authority for the year ending December 31, 1986.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the policy of the Audit Committee, adopted on June 21, 1983, and reaffirmed on March 13, 1986, of maintaining flexibility with regard to the retention of independent auditors be and it hereby is recognized and approved; and it is further

RESOLVED, that Touche Ross & Co. be and it hereby is designated as independent auditors to audit the books and accounts of the Port Authority for the year ending December 31, 1986; and it is further

RESOLVED, that, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above designated auditors and for monitoring the auditors' performance be and it hereby is referred to the Audit Committee.

(Board - 4/10/86)

Port Authority Operating Equipment - Lease Financing Program - Amendment

It was reported that the Board, at its meeting on April 11, 1985, established the Port Authority Operating Equipment-Lease Financing Program pursuant to which the Executive Director was authorized to enter into lease-financing transactions to facilitate the purchase of a portion of the Port Authority's operating equipment, including but not limited to automotive vehicles; telephone, radio and computer equipment; and office furnishings. At its meeting on July 11, 1985, the Board amended the resolution establishing the Program to make clear that the equipment could be used at any of the Port Authority's facilities, including its airports, docks and wharves.

Historically, the Port Authority had used operating funds to finance the purchase of operating equipment. However, since the useful life of such equipment often exceeds one year, a one-time cash payment for these expenditures was felt not to adequately reflect the useful operating life of the equipment. It was also felt at the time that financing the purchase of operating equipment through lease-financing transactions would provide a more accurate allocation of costs in that it would allow the Port Authority to provide for the cost of operating equipment over its estimated useful life.

Pursuant to the aforesaid authorization, a master financing lease was entered into in August 1985 with Daily Tax Free Income Fund Inc., under which the Fund committed to provide the full \$10 million authorized under the Program. Appropriate arrangements were also entered into with Bank of America NT & SA and Bank America Trust Company of New York as authorized at that time. The interest rate was initially set at 60% of Bank of America's Reference Rate of interest with amortization of principal payments on a monthly basis. After the program began, Bank of America NT & SA was instrumental in obtaining an agreement with the Fund which will reduce the interest rate applicable to leased equipment from 60% to 58% of Bank of America's variable Reference Rate of interest, and provide for a revised payment and amortization schedule which will result in additional savings to the Port Authority.

At the outset of the Program in August 1985, \$2.5 million was drawn upon, virtually all of which has been expended. Another \$3.5 million is expected to be drawn down shortly, leaving \$4.0 million. This amount is not adequate for scheduled expenditures for operating equipment presently authorized or to be authorized by the Board, including but not limited to office automation equipment, the purchase of which is being recommended separately for the Board's consideration at today's meeting. These expenditures will necessitate an expansion of the current lease-financing program in order to achieve the additional benefits of financing them in this manner.

It is therefore recommended that the maximum aggregate principal amount allowed to be outstanding at any one time under the Program be increased from \$10 million to \$25 million. In order to be able to take advantage of future proposals on lease-financing with more favorable terms, it is recommended that the Executive Director be authorized to enter into the necessary agreements and take other such actions as may be necessary or desirable in order to effectuate the expanded Program on terms and conditions at least as favorable as those currently in effect.

(Board - 4/10/86)

It is also recommended that the Committee on Finance, Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Chief Financial Officer, Director, Finance Department or Treasurer of the Authority be authorized to take any action which may be necessary or desirable to assure that interest payable pursuant to the Operating Equipment-Lease Financing Program is not subject to Federal income taxes.

It was therefore recommended that the Board authorize:

1. an increase in the aggregate principal amount of lease-financing transactions allowed to be outstanding under the Port Authority Operating Equipment-Lease Financing Program at any one time from \$10 million to \$25 million;

2. the Executive Director on behalf of the Port Authority, to enter into such agreements, including amendments to current agreements, as may be necessary or appropriate with the Bank of America NT & SA, Bank America Trust Company of New York or any other financial services entity, and with the current lessor-investor or other lessor-investors to effectuate additional purchase and lease-financing transactions under the Program as expanded pursuant to recommendation number one above on terms and conditions at least as favorable as the terms currently in effect; and to take such other action as may be necessary or appropriate in connection with such purchase and lease financing; and

3. the Committee on Finance, Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Chief Financial Officer, Director, Finance Department or Treasurer of the Authority to take any action which may be necessary or desirable to assure that interest payable pursuant to the Program is not subject to Federal income taxes.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the aggregate principal amount of lease-financing transactions allowed to be outstanding under the Port Authority Operating Equipment-Lease Financing Program at any one time be and hereby is increased from \$10 million to \$25 million; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized, on behalf of the Port Authority, to enter into such agreements, including amendments to current agreements, as may be necessary or appropriate with the Bank of America NT & SA, Bank America Trust Company of New York or any other financial services entity, and with the current lessor-investor or other lessor-investors to effectuate additional purchase and lease-financing transactions under the Program as expanded on terms and conditions at least as favorable as the terms currently in effect, the form of any such agreement to be subject to the approval of General Counsel or his designated representative; and to take such other action as may be necessary or appropriate in connection with such purchase and lease financing; and it is further

(Board - 4/10/86)

RESOLVED, that the Committee on Finance, Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Chief Financial Officer, Director, Finance Department or Treasurer of the Authority is hereby authorized to take any action which may be necessary or desirable to assure that interest payable pursuant to the Program is not subject to Federal income taxes.

(Board - 4/10/86)

Acquisition of Office Automation Equipment

It was reported that the Port Authority's current office equipment does not provide the organization's professional and clerical staff with the modern tools needed to effectively do their jobs. The word processing system now being used, the mainframe based Advanced Text Management System (ATMS), lacks many key word processing functions commonly available on modern systems, is not reliable, and is difficult to use and learn.

Professional staff utilize a variety of analytic and decision support software products including spreadsheets, report writers and business graphics. Access to these software packages is either via terminals connected to the Port Authority's mainframe or personal computers (PC). These products are used by many Port Authority staff, but their utility is limited since each is a separate software package, and the transfer of data between packages is difficult. While the recently installed PC's address the need for a more distributed, user friendly computing environment, they are standalone devices and most do not currently provide access to the important management information systems and data available on the Port Authority's centralized mainframe computer.

It is proposed that a modern office automation system be acquired from Digital Equipment Corporation and installed at the Port Authority's offices in The World Trade Center and at all major Port Authority facilities. This will provide Port Authority staff with an organization-wide network of secretarial and professional workstations, as well as easy to use, highly integrated software. This office automation system network will incorporate the already installed PC's and provide a high level of compatibility with and communications access to the Port Authority's mainframe computer. It will include a high level of security and will provide authorized Port Authority staff with a modern, user friendly word processing system and a highly integrated selection of office tools, including electronic mail, electronic filing and time management, decision support (e.g., graphics, spreadsheets), information processing, and desk management functions.

The proposed system will increase productivity of professional and clerical staff throughout the Port Authority. Clerical staff will be able to perform many office tasks more quickly and efficiently. It will substantially reduce training time compared to the existing ATMS system and increase the capabilities of staff. The system will increase the effectiveness of Port Authority professional staff who, with easy access to information support and other tools which office automation provides, will be able to reach more informed and timely decisions and present information in more effective ways.

Through the use of electronic mail and filing, the system will allow the Port Authority to speed up the flow of documents, messages and other types of information between staff within The World Trade Center and at different geographical locations, thus shortening review and approval cycles for vital Port Authority projects. These benefits will increase as greater numbers of staff are located at facilities other than The World Trade Center.

(Board - 4/10/86)

Acquisition of the proposed system is consistent with recommendations made in 1982 by Booz-Allen and Hamilton Inc., an independent consulting firm retained to study Port Authority office automation needs from the experience of the Tunnels, Bridges and Terminals Department and the findings of an internal study conducted by the Management Information Services Department in 1984 in which office automation needs were discussed with each Port Authority department. In December 1985 the plan to acquire a new office automation system was also presented to the Port Authority's Management Information Services Council which expressed unreserved support.

Industry sources indicate that many organizations have benefited from installation of modern office automation equipment, and our own experience in the Law Department confirms improvements in productivity after the installation of an NBI office automation system in December 1984.

The office automation system will also provide an expanded infrastructure of terminals needed to support critical new on-line systems including a project management system now being implemented and new general ledger and timekeeping systems now being analyzed.

Installation of the office automation system will be phased in over eighteen months beginning with small configurations of office automation equipment in each Port Authority department followed by a gradual system expansion within each department. For those departments where needs for office automation are most urgent, department-wide configurations will be installed more rapidly. As departments request increased installations of office automation equipment, they will be required to describe the benefits derived from their existing installations and to indicate the expected benefits to be derived from their proposed expansions. These requests will be jointly evaluated by the Management and Budget and Management Information Services Departments.

This authorization will cover the purchase cost of equipment as well as the installation, maintenance and training costs for the first two years. However, the Management Information Services Department and the Management and Budget Department will monitor and track productivity gains attributable to office automation utilizing a pre-established methodology. Prior to the expiration of this authorization, the Management Information Services Department will present a report to the Board on the benefits accruing from office automation. At that time, authorization for continued maintenance, as well as additional equipment will be sought.

The Law Department currently has a word processing system under a previously negotiated lease with NBI Corporation which has proved to be well suited for legal documents. Although the potential replacement of this NBI equipment with an equivalent amount of Digital equipment was not included in the total office automation proposal and selection, as Digital Equipment Corporation's office automation equipment is installed, a decision will be made as to whether purchasing the existing NBI equipment or replacing it with an equivalent amount of Digital Equipment Corporation equipment will best serve the needs of the Law Department. Should the Port Authority exercise its option to purchase the currently installed NBI equipment now under lease, the estimated total price of purchase and maintenance for two years would be \$456,000. This is less than the cost of the Digital replacement equipment due to the cost advantages provided in the NBI lease for purchase conversion, differences in the NBI and Digital configurations and absence of costs for installation, delivery, training and ancillary equipment.

(Board - 4/10/86)

Digital Equipment Corporation is the second largest computer manufacturer in the United States and a leader in office automation systems. Digital's selection followed the issuance by the Port Authority of a publicly advertised Request for Proposals (RFP) in June 1985.

Fourteen proposals were received in response to the RFP from the following:

AT&T, New York, New York
CPT Corporation, New York, New York
Digital Equipment Corporation, New York, New York
Harris Corporation (two proposals), New York, New York
IBM Corporation, New York, New York
ITT Corporation, New York, New York
NBI Corporation, New York, New York
NCR Corporation, New York, New York
NYNEX Business Information Systems, New York, New York
Sears Business Systems, Wayne, New Jersey
Sperry Corporation, New York, New York
Wang Laboratories, Lowell, Massachusetts
Xerox Corporation, New York, New York

Responses were evaluated intensively by a committee comprised of representatives of the Management Information Services, Rail, Aviation, Public Affairs, General Services and Law Departments. The criteria used to evaluate proposals included overall system capabilities such as hardware and software requirements, ease of use of the office automation system, and communications, as well as price. The Digital proposal ranked first in each of the system capability categories when compared to the other finalists, IBM, NBI and NYNEX. Pricing was primarily evaluated based on proposed purchase price and total five-year costs including maintenance.

The committee unanimously recommended Digital Equipment Corporation's system. The committee found that Digital's proposed office automation system offered the best all around combination of word processing, integrated office functions, communications capabilities, compatibility with the current Port Authority computer environment and vendor experience.

It was therefore recommended that the Board authorize the Executive Director to enter into agreements:

1. with Digital Equipment Corporation for the purchase of office automation equipment, maintenance of said equipment for a period of two years, training of Port Authority staff, delivery and installation of the equipment, and a 10% provision for ancillary equipment at an estimated total price of \$12,111,000; and

2. for either (a) the purchase of the NBI word processing equipment currently leased by the Port Authority and installed in the Law Department, including maintenance of said equipment for a period of two years, at an estimated price of \$456,000 or (b) the purchase of office automation equipment to replace the NBI equipment from Digital Equipment Corporation, including maintenance for a period of two years, training, delivery and installation, and a 10% provision for ancillary equipment, at an estimated total price of \$969,000.

(Board - 4/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to enter into agreements: (1) with Digital Equipment Corporation for the purchase of office automation equipment, maintenance of said equipment for a period of two years, training of Port Authority staff, delivery and installation of the equipment, and a 10% provision for ancillary equipment, at an estimated total price of \$12,111,000; and (2) for either (a) the purchase of the NBI word processing equipment currently leased by the Port Authority and installed in the Law Department, including maintenance of said equipment for a period of two years, at an estimated price of \$456,000 or (b) the purchase of office automation equipment to replace the NBI equipment from Digital Equipment Corporation, including maintenance for a period of two years, training, delivery and installation, and a 10% provision for ancillary equipment, at an estimated total price of \$969,000; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 4/10/86)

Kennedy International Airport - International Arrivals Building - Interim Improvement Program - Amendment to Project Authorization - Approval of Award of Contract JFK-110.060A - Authorization to Award Supplemental Agreement No. 1 to Contract JFK-110.060A

It was reported that the Board, at its meeting on January 9, 1986, authorized a project at Kennedy International Airport for the installation of an interline baggage conveyor system at the International Arrivals Building (IAB) at a project cost not to exceed \$7 million. The Board further authorized the Executive Director to award Contract JFK-110.060, International Arrivals Building, Interline Baggage Conveyor System, Miscellaneous Building Alterations, and it further provided that payments under the contract not exceed \$3 million without further authorization. Therefore, bids were solicited from a list of qualified contractors on Contract JFK-110.060, and six bids and a non-responsive proposal were received on March 6, 1986. After analysis of the bids received and an interview with the low bidder, the Chief Engineer determined that there had been a misunderstanding of the compensation provisions of the contract by bidders, that the bids on Contract JFK-110.060 should be rejected, and that new bids on revised Contract JFK-110.060A should be solicited from the same list of contractors. The Executive Director authorized the award of Contract JFK-110.060A to W.J. Barney Corporation, New York, New York, the low bidder, at a compensation to be computed at the net cost of the work, plus 3.75%, plus an additional 20% if the work is performed by a subcontractor.

The interline baggage conveyor system is the first part of a comprehensive program to relieve the congestion experienced by travelers at the IAB and to upgrade the building's amenities in a manner commensurate with Kennedy International Airport's role as the leading gateway airport to the United States.

Additional improvements to be accomplished under the program, authorization for which is herein sought, include a reconfiguration of the East and West Immigration and Naturalization areas to improve the flow of passengers through the areas and a general rehabilitation to make the areas more attractive, replacement of the existing single escalator in the lobby area with two escalators to provide for simultaneous ascent and descent, rehabilitation of the lobby area and installation of new Customs' counters in the Customs Hall. Additionally, certain corridors on the second and third floors which receive heavy use by arriving passengers will be refurbished and new signing and flight arrival and passenger information systems installed. The total cost of these improvements, including the interline baggage conveyor system which was previously authorized, is presently estimated at \$24 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses.

Other improvements which are under consideration include refurbishment of other areas on the second floor, rehabilitation of the observation deck, upgrading of the baggage claim devices and associated modifications to the IAB Customs Hall. Appropriate authorization concerning these improvements will be sought as specific recommendations are developed.

In order to accomplish the work in the West Immigration and Naturalization Service area as expeditiously as possible, it is requested that the Executive Director be authorized to enter into Supplemental Agreement No. 1 to Contract JFK-110.060A with W.J. Barney Corporation at a total expenditure not to exceed \$3.4 million.

The Port Authority's recovery on the new investment is sufficient to recover all project costs including debt service.

(Board - 4/10/86)

It was therefore recommended that the Board:

1. authorize an amendment to the project authorization for the construction of an interline baggage conveyor system at the International Arrivals Building at Kennedy International Airport which expands the project to include other elements of a program of interim improvements to the International Arrivals Building and increases the project authorization from a project cost not to exceed \$7 million to an expenditure not to exceed \$24 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses;

2. approve the action of the Executive Director in rejecting all bids on Contract JFK-110.060 and awarding Contract JFK-110.060A, Interline Baggage System, Building Alterations to W.J. Barney Corporation, New York, New York, at a total compensation not to exceed \$3 million; and

3. authorize the Executive Director in his discretion to enter into Supplemental Agreement 1 to Contract JFK-110.060A with W.J. Barney Corporation, New York, New York, to provide for alterations to the West Immigration and Naturalization Service area at a total compensation not to exceed \$3.4 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board: (1) authorizes an amendment to the project authorization for the construction of an interline baggage conveyor system at the International Arrivals Building at Kennedy International Airport which expands the project to include other elements of a program of interim improvements to the International Arrivals Building and increases the project authorization from a project cost not to exceed \$7 million to an expenditure not to exceed \$24 million including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses; (2) approves the action of the Executive Director in rejecting all bids on Contract JFK-110.060 and awarding Contract JFK-110.060A, Interline Baggage System, Building Alterations to W.J. Barney Corporation, New York, New York, at a total compensation not to exceed \$3 million and (3) authorizes the Executive Director in his discretion to enter into Supplemental Agreement 1 to Contract JFK-110.060A with W.J. Barney Corporation, New York, New York, to provide for alterations to the West Immigration and Naturalization Service area at a total compensation not to exceed \$3.4 million; the form of the Agreement to be subject to the approval of General counsel or his authorized representative.

(Board - 4/10/86)

**Kennedy International Airport - Rehabilitation of Runway 4L-22R and Associated Taxiways -
Contract JFK-480 - Project Authorization and Contract Award**

It was reported that although Runway 4L-22R was extended in the mid 60's and some local repairs performed in the 70's and 80's, this 37-year old runway has not had any major rehabilitation or strengthening work performed on its pavements to compensate for the heavier aircraft it presently handles.

Contract JFK-480 will provide for the strengthening and rehabilitation of Runway 4L-22R as well as its associated taxiways "Z", "ZA", "Y", "G" and "F".

The runway pavement will be thickened an average of ten inches and the taxiways will be thickened an average of seven inches. The contract will also include drainage and lighting improvements to the runway and taxiways.

The contract includes a provision that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The entire contract is eligible for Federal funds under the Airport Improvement Program (AIP).

The contract was publicly advertised and the following bids were received on April 8, 1986:

	Classified Work	Unclassified Work	Estimated Total Amount
Anthony Grace & Sons, Inc. & Edenwald Contracting Co. Inc., a joint venture Whitestone, New York	\$8,281,540	\$4,000,000	\$12,281,540
Willetts Point Contracting Corp. Flushing, New York	8,154,450	4,235,550	12,390,000
ENGINEER'S ESTIMATE			\$12,000,000

Anthony Grace & Sons, Inc. & Edenwald Contracting Co. Inc., a joint venture, submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project at Kennedy International Airport for the rehabilitation of Runway 4L-22R and Associated Taxiways at an expenditure presently estimated at \$16.3 million, including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses; and

(Board - 4/10/86)

2. the Executive Director to award Contract JFK-480, Rehabilitation of Runway 4L-22R and Associated Taxiways, to Anthony Grace & Sons, Inc. & Edenwald Contracting Co. Inc., a joint venture, the low bidder, at its bid price in the estimated total amount of \$12,281,540 plus an authorization of \$1.2 million for extra work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project at Kennedy International Airport for the rehabilitation of Runway 4L-22R and Associated Taxiways at an expenditure presently estimated at \$16.3 million including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses it authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract JFK-480, Rehabilitation of Runway 4L-22R and Associated Taxiways, to Anthony Grace & Sons, Inc. & Edenwald Contracting Co. Inc., a joint venture, the low bidder, at its bid price in the estimated total amount of \$12,281,540, and to order extra work up to the amount of \$1.2 million.

(Board - 4/10/86)

Newark International Airport - Hangar 55 - People Express Airlines, Inc. - Supplement to Lease
Covering Expansion of Premises

It was reported that Hangar 55 was originally designed and constructed in the late 1930's to house and maintain aircraft of the DC-3 size and vintage. The floor-loading capacity and the height of the hangar entrance prohibit the full use of the hangar for today's B737 and B727 sized aircraft. The hangar is currently being used for ramp vehicle maintenance work, handling cargo, and for general storage purposes.

People Express Airlines, Inc. has under lease through June 30, 1987 three of the hangar's six bays and is negotiating for the addition of a fourth bay to the lease. In addition, People finds it necessary to upgrade and expand its two easterly bays (Section C) by approximately 15,000 square feet in order to accommodate its fleet of aircraft. The cost of this expansion effort is presently estimated at \$8.0 million.

It is proposed that the Port Authority pay People Express or its contractors for the construction in an amount not to exceed \$4.5 million and extend the term of the Section C premises to the earlier of June 30, 2002 or fifteen years from the date of completion of construction. Completion of the project is expected in June 1986.

After completion of construction but not later than June 30, 1987, People Express would pay to the Port Authority an additional monthly rental on the expanded portion equivalent to \$.012163 for each dollar paid by the Port Authority to People Express or its contractors, including accruals during the construction period, such rental to be paid over the balance of the lease term. The monthly rental factor as aforesaid is based upon a fifteen-year rental payment period and would be subject to adjustment for any different rental period. This rental is at an amount sufficient to make the Port Authority's recovery on the new investment financially self-sustaining.

The Port Authority would have the right to terminate the lease, without cause, upon 180 days' notice to People Express which notice may be given at any time after the earlier of the fifth anniversary of the completion of construction or July 1, 1992. If the lease is so terminated the Port Authority would pay to People an amount not to exceed \$2.2 million for People's investment in the expansion of the Hangar amortized on a straight line basis over a fifteen-year period from the earlier of the completion of construction or July 1, 1987.

Annual rental on the existing Section C premises, currently at \$82,920 plus Airport Services (1985 tentative of approximately \$120,000), will be adjusted upward in increments of \$.20 per square foot every two years beginning July 1, 1987 to \$192,372 plus Airport Services over the fifteen-year period.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement with People Express Airlines, Inc., all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a Supplemental Agreement to the lease with People Express Airlines, Inc. covering expansion of its Hangar 55 premises at Newark International Airport in accordance with the foregoing; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 4/10/86)

Bathgate Industrial Park - Increase in Project Authorization - Award of Contract BIP-110.021A

It was reported that the Board, at its meeting on March 12, 1981, authorized a project for the development of the Bathgate Industrial Park at an estimated project cost of \$15.7 million, for development of industrial space in seven buildings in the South Bronx. Further, the Board, at its meeting on January 12, 1984, authorized the addition of four buildings on four partial blocks to the Bathgate Industrial Park and an increase of \$5,350,000 in the project authorization.

To date five industrial buildings have been constructed by the Port Authority, all of which are either leased or in the process of being leased. Construction is also underway by the Port Authority on a sixth building, a Federally assisted Business Assistance Center, and it is anticipated that this building will be fully occupied by early 1987. The Port Authority has spent or committed \$20 million of the total \$21,050,000 authorized for the Bathgate Industrial Park.

The proposed building on Block 2913, the seventh at the Park, requires an increase of \$3.7 million to the project authorizations. Additional increases in the project authorization will be requested as development continues. This additional authorization is required because the original authorization anticipated that a developer or general contractor would construct the buildings and the Port Authority would purchase the finished buildings from the developer. This arrangement proved unworkable and the Port Authority assumed the duties of a developer and, along with that, the financial and engineering expense associated with the project.

Contract BIP-110.021A provides for site preparation, the construction of a one-story shell industry building of approximately 70,000 square feet and construction of utility services, perimeter sidewalk and curb, exterior lighting, and paving of the parking lot and truck ramps, all on Block 2913. In addition, the contract provides for the rehabilitation of the Port Authority's Engineer's field office trailer at the Bathgate Industrial Park and for the removal of obstructions encountered during site leveling and dynamic compaction on Block 2913, to be performed on a net cost basis estimated at roughly \$75,000. The bid documents stated that the Port Authority did not intend to award the contract at an estimated total contract price in excess of \$3.8 million. It is anticipated that \$900,000 of this cost will be reimbursed by the New York City Public Development Corporation.

The contract includes a provision that the contractor meet a mandatory goal for Minority Business Enterprise participation of at least 20% for firms owned and controlled by minorities and 5% for firms owned and controlled by women with a total MBE/WBE participation of at least 25%.

The following bids were received on March 20, 1986:

E.K. Construction Co., Inc. Great Neck, New York	\$3,774,420
L.J.E. Construction Corp. Flushing, New York	4,073,333

(Board - 4/10/86)

Ebasco Constructors, Inc. Lyndhurst, New Jersey	\$4,081,266
Acme Skillman Construction Co., Inc. Maspeth, New York	4,464,000
Gelco Builders, Inc. New York, New York	4,478,433
M. Melnick & Co., Inc. Bronx, New York	5,020,120
ENGINEER'S ESTIMATE	\$3,700,000

E.K. Construction Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

The award of Contract BIP-110.021A for the construction of a shell building of approximately 70,000 square feet on Block 2913 is necessary and desirable for the Port Authority to maintain its schedule of construction activity in progressing the development of the Bathgate Industrial Park. Therefore, it is recommended that the Board authorize award of Contract BIP-110.021A to the low bidder, E.K. Construction Co., Inc.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) an increase of \$3.7 million in the authorization for the project costs associated with the development of the Bathgate Industrial Park and (2) the Executive Director to award Contract BIP-110.021A, Site Preparation and Industrial Building on Block 2913, Bathgate Industrial Park, to E.K. Construction Co., Inc., the low bidder, at its bid price in the total estimated amount of \$3,774,420, the Executive Director to order extra work up to the amount of \$380,000, and a provision for net cost work.

(Board - 4/10/86)

The Port Authority Industrial Park at Yonkers - Lease Agreement with Tri Omni, Inc.

It was reported that the Board, at its meeting on November 8, 1984, authorized an industrial development project at the former Otis Elevator plant in the City of Yonkers, New York, and certified the Port Authority Industrial Park at Yonkers as an additional facility of the Port Authority.

Staff has completed an assessment of improvements necessary to Building 2 at the Port Authority Industrial Park at Yonkers and has determined that repairs and renovations totalling \$1.8 million will be required in this building. This represents an increase of \$1.3 million plus \$64,000 in financial expenses over the amount included in the original project authorization primarily due to greater than anticipated health, safety and operational repairs. Similar assessments are being performed for the remaining buildings and additional increases in the project authorization will be requested when and if needed.

Staff has completed negotiations for the letting of approximately 45,000 square feet in Building 2 at the Park to Tri Omni, Inc., a New York Corporation.

Tri Omni manufactures electronic and polarized filters, optics and associated products. Tri Omni and several of its affiliate companies will occupy the building. Among the affiliated companies are Movie Vision, Inc., a Brooklyn Company, Optic Tech Industries, Inc., located in Long Island, and RIN & Co., a company now located in Ensinada, Mexico. It is anticipated that with expansion and relocation of associated companies, Tri Omni will generate approximately 130 jobs over the next three-year period. When Tri Omni initially takes occupancy, it will employ approximately 50 people at the Port Authority Industrial Park at Yonkers.

The Port Authority will lease to Tri Omni Building No. 2 at the Port Authority Industrial Park at Yonkers which is a five story structure of approximately 45,000 square feet. The lease term will be for 25 years and will commence as to the fifth floor on April 1, 1986. The letting will commence as to the other four floors upon notification by the Port Authority to the lessee that certain construction work has been completed by the Port Authority. Construction work cannot be undertaken by the Port Authority with respect to the first and fourth floors until expiration of the respective current tenants' lease terms. The lease of one of the current tenants expires in 1994. Since this tenant is seeking expansion space and Tri Omni wants this space sooner than 1994, staff is currently attempting to relocate this tenant elsewhere in the industrial park.

For the period September 1, 1986 to May 31, 1987 the lessee will pay an annual basic rental for the fifth floor of \$16,875. As to floors 1, 2, 3 and 4 the lessee will be given 90 days from the commencement date of the letting of each floor to perform finishing and preparation work prior to the rental commencement date for such floor, the rental commencement date for the second and third floors not to occur prior to June 1, 1987. Each floor is approximately 9,000 square feet. Effective June 1, 1987 and continuing for the balance of the term of the letting the lessee, for each floor for which rental is payable for the following periods shall pay the following annual basic rental amounts to the Port Authority.

(Board - 4/10/86)

6/1/1987 to 5/31/1988 - \$29,250 per floor
 6/1/1988 to 5/31/1989 - \$38,250 per floor
 6/1/1989 to 5/31/1990 - \$45,000 per floor
 6/1/1990 to 5/31/1991 - \$49,500 per floor
 6/1/1991 to 5/31/1995 - \$54,000 per floor
 6/1/1995 to 5/31/1998 - \$58,500 per floor
 6/1/1998 to 5/31/2001 - \$63,000 per floor
 6/1/2001 to 5/31/2004 - \$72,000 per floor
 6/1/2004 to 5/31/2007 - \$76,000 per floor
 6/1/2007 to 5/31/2011 - \$81,000 per floor

The above annual basic rental amounts include the payment in lieu of tax amounts payable by the Port Authority to the City of Yonkers.

Beginning June 1, 1989 and for the remainder of the lease term, Tri Omni will pay, in addition to the basic rent, either its proportionate share of common facility operating and maintenance expenses (O&Ms) as provided in the lease or the yearly total of a \$1.50 per square foot as said \$1.50 in later years is adjusted based on the Consumer Price Index, specified in the lease, whichever is less. Recovery of O&Ms do not begin until June 1, 1989. Tri Omni will pay its electric charges on a surveyed or metered basis as provided in the lease and will pay for heat at a rate of \$.55 per square foot escalated by the Consumer Price Index specified in the lease. Hot and cold water for sanitary purposes will be furnished by the Port Authority without charge. When Tri Omni takes full possession of the building it will also be responsible for all interior and exterior maintenance to Building 2, except for elevator and structural repairs, which will be the responsibility of the Port Authority.

During the first three years of the term, Tri Omni will have the option to request up to \$500,000 from the Port Authority for equipment; each advance shall be repaid over five years, calculated at the Citibank prime rate adjustable every six months.

Tri Omni has agreed to perform a portion of the renovations and improvements to the building which will be required before the premises can be occupied. Such work will be undertaken by its contractors in compliance with the Port Authority's tenant alteration process. The Port Authority will advance Tri Omni up to \$380,000 for improvements to the interior of the building. In addition, the Port Authority will spend approximately \$1,420,000 for among other things, fire exits, stairwells, replacing windows and upgrading the elevator and elevator shaft. Additional improvements to the interior of the building undertaken by Tri Omni, in excess of the aforesaid \$380,000 will be provided by the Port Authority up to an additional \$650,000. Each advance shall be repaid over the balance of the term of the letting as calculated at the Citibank prime rate (adjustable every six months) plus 1%.

During the construction Tri Omni will make every good faith effort to provide for 20% Minority Business Enterprise (MBE) and 5% Women-owned Business Enterprise (WBE) participation in its construction work and shall require its contractors to likewise make such effort.

It was therefore recommended that the Board authorize an increase in the project authorization for the Port Authority Industrial Park at Yonkers by \$1.3 million plus financial expenses of \$64,000 and that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement of lease with Tri Omni, Inc. in accordance with the foregoing.

(Board - 4/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) an increase in the project authorization for the Port Authority Industrial Park at Yonkers of \$1.3 million plus financial expenses of \$64,000 and (2) the Executive Director to enter into a lease agreement with Tri Omni, Inc. to provide for the letting of approximately 45,000 square feet in Building 2 at the Port Authority Industrial Park at Yonkers for a term of 25 years; and an advance of up to \$500,000 for equipment and \$1,030,000 for leasehold improvements to the premises of which \$380,000 is work to be performed by Tri Omni on behalf of the Port Authority and is included in the \$1.3 million project authorization as noted in No. 1 above; the agreement of lease to be in accordance with the foregoing, and the form of the agreement of lease to be subject to the approval of General Counsel or his designated representative.

(Board - 4/10/86)

The Port Authority Industrial Park at Yonkers - Lease Agreement with American Standard, Inc.

It was reported that the Board, at its meeting on November 8, 1984, authorized an industrial development project at the former Otis Elevator plant in the City of Yonkers, New York, and certified the Port Authority Industrial Park at Yonkers as an additional facility of the Port Authority.

Staff has completed negotiations for the letting of premises at the park to American Standard, Inc., a Delaware corporation, which will locate a large portion of its Westinghouse Air Brake Division in Yonkers, to be used primarily for the manufacture and rehabilitating of rail car air brakes and related transportation equipment.

It is anticipated that this lease will initially generate 20 jobs with expansion potential to generate an additional 20 jobs in the future.

The lease agreement with American Standard will provide among other things, that:

American Standard will lease approximately 14,250 square feet in Building 7 at the Port Authority Industrial Park in Yonkers primarily for the purpose of manufacturing and rehabilitating rail car air brakes and related transportation equipment for an initial five-year term with American Standard to have the right to extend the lease for an additional term of five years.

The term of the letting will commence upon notice by the Port Authority that certain space preparation work, including the installation of an entrance, fire exits, demising walls, electrical, heating and sprinkler modifications, an exhaust fan, painting and cleaning, has been completed. It has been estimated that the cost of this work will be approximately \$85,000.

American Standard will pay the cost of all other work performed under the contract awarded by the Port Authority for the performance of the aforesaid work plus additional work requested by American Standard.

Commencing on the 31st day following the commencement date of the term, American Standard will pay an annual basic rental of \$5.75 per square foot which will increase to \$6.75 in year five. \$1.25 per square foot of the foregoing rental rates represent a partial recovery of payments in lieu of taxes and operating and maintenance costs during the first five years of the term. If American Standard exercises its option to renew, the annual basic rental payable in year six will be \$6 per square foot increasing to \$6.50 per square foot in years seven and eight and to \$7 per square foot in years nine and ten. In addition, during years six through ten, American Standard will pay an operating expense rental based on its pro rata share of the common operating and maintenance expenses of the park and an annual additional basic rental at the rate of \$.94 per square foot in year six increasing annually to \$1.23 per square foot in year ten to cover payments in lieu of taxes.

(Board - 4/19/86)

Should the Port Authority during the first three years of the term enter into negotiations with a prospective tenant covering all or part of adjacent space consisting of 7,125 square feet, then the Port Authority shall so inform American Standard who may, within 30 days of such notice, elect to include all such additional space in the letting at the same annual basic rental rates and upon the same terms and conditions applicable to the premises.

The Port Authority will provide sanitary hot and cold water at no charge and cold water for industrial use to be metered and paid for at Port Authority cost. American Standard will also install meters for the measurement of electric consumption to be paid for at 125% of Port Authority cost. The Port Authority will also provide heat at a cost to American Standard of \$.45 per rentable square foot, such rate being subject to annual increases in accordance with the Consumer Price Index specified in the lease.

American Standard will have the right to assign the agreement to a subsidiary or an affiliate and the additional right to sublet up to one-half of the premises, provided that certain conditions are met, and provided in both instances that the proposed tenant is a suitable industrial development tenant.

During construction American Standard will make every good faith effort to provide for 20% Minority Business Enterprise (MBE) and 5% Women-owned Business Enterprise (WBE) participation in its construction work, and shall require its contractors to likewise make such effort.

It was therefore recommended that the Board authorize the Executive Director on behalf of the Port Authority to enter into a lease agreement with American Standard, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into into an agreement with American Standard, Inc. to provide for the letting of approximately 14,250 square feet in Building 7 at the Port Authority Industrial Park at Yonkers for an initial term of five years with American Standard, Inc. to have the option to add to the premises under the lease, and to extend the term of the letting for an additional five years; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 4/10/86)

Erie Basin-Port Authority Marine Terminal - Fishport - Building 211 Renovations - Contract EBP-110.013 - Authority to Award

It was reported that the Board, at its meeting on December 8, 1983, authorized, in connection with the first phase of the Port Authority Bi-State Fisheries Program, a project for the development of the Port Authority Fishport, a fish harvesting, processing and distribution center located at the Erie Basin Marine Terminal. The award of Contract EBP-110.013 falls within the scope of this authorization.

Contract EBP-110.013 provides for the making of renovations to Building 211 to provide a fish handling and processing facility including cold storage and freezer areas, tenant offices, loading areas, fish holding and sorting coolers, and fish processing areas. The contract will also include renovations to the exterior of the existing 105,000 square foot building, including new siding and roofing.

The contract will include a provision requiring the bidder to use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 2% for firms owned and controlled by women.

The contract will be publicly advertised and bids are scheduled to be received in late April. Board authorization of the award of Contract EBP-110.013 is required at this time in order to facilitate completion of the work prior to tenant occupancy, which is scheduled for late 1986.

It was therefore recommended that the Board authorize the Executive Director, in his discretion, either to award Contract EBP-110.013, Building 211 Renovations, Erie Basin-Port Authority Marine Terminal, Fishport, to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to the amount of 10% of the amount of the bid accepted and to order net cost work, or to reject all bids.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director, in his discretion, either to award Contract EBP-110.013, Building 211 Renovations, Erie Basin-Port Authority Marine Terminal, Fishport, to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to the amount of 10% of the amount of the bid accepted and to order net cost work, or to reject all bids.

(Board - 4/10/86)

Port Newark - VBJ Transportation and Warehousing Corp. - Rehabilitation and Lease of Building 301 - Lease LPN-092

It was reported that VBJ Transportation and Warehousing Corp., through its affiliated company, Van Brunt Port Jersey Warehouse, Inc., operates a public warehouse at Port Newark in Building 197. The tenant wishes to expand its storage business and will lease Building 301 at current rental rates for improved space if the Port Authority provides for its repair and rehabilitation. The building will be used for warehousing, packing and consolidation. The estimated cost of this work, including replacement of overhead doors, repair of loading platforms and levelling the asphalt floor is \$535,000.

Van Brunt will arrange for the rehabilitation and repair work to be performed and the Port Authority will fund it. The lease will commence May 1, 1986 and the tenant will be allowed the month to perform the start-up work. The rent will start June 1, 1986. The lease will provide for rent escalation every two years based on 50% of the percentage increase in the Consumer Price Index from June 1, 1986. The lease, upon execution, will be assigned to Van Brunt Port Jersey Warehouse, Inc., an affiliated company and a tenant in good standing in the Port.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement of lease with VBJ Transportation and Warehousing Corp. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a fifteen-year lease commencing May 1, 1986 with VBJ Transportation and Warehousing Corp. for Building 301 and related open area at an initial rent of \$435,441 and to provide up to \$535,000 for the renovation of Building 301 to be performed by the tenant; the agreement of lease to be in accordance with the foregoing, and the form of the agreement of lease to be subject to the approval of General Counsel or his designated representative.

(Board - 4/10/86)

The World Trade Center - Fund for Regional Development - Agreement with Kenneth D. Laub & Company, Inc.

It was reported that the Board, at its meeting on October 11, 1984, authorized a 20-year lease between the Fund for Regional Development and Dean Witter Reynolds, Inc. covering 24 floors of New York State and Fund space. The firm of Kenneth D. Laub & Company, Inc. had discussions in 1982 with the Port Authority concerning the possible leasing by Dean Witter of a major block of New York State space and Laub maintains that it is entitled to a brokerage commission as a result of the Dean Witter leasing, pursuant to an agreement with the Port Authority as of September 10, 1982. In settlement of that claim, Laub and staff reached agreement on behalf of the Port Authority and on behalf of the Fund, subject to Board approval, for the payment on October 1, 1989 of \$697,031 (half to be paid by the Port Authority on its own behalf and half to be paid by the Port Authority on behalf of the Fund) to Laub in settlement of that claim with respect to the Dean Witter-Fund lease.

As an additional factor in the settlement of the Dean Witter claim, Laub would be given rights to a commission on the first 300,000 square feet of space for two years after it is vacated by New York State or vacated by Dean Witter but not beyond a maximum of seven years from the effective date of the agreement. Laub would be given a full commission for any lease which it produces, a 50% commission if the new tenant is represented by another broker or 75% of a commission if the Port Authority acting on behalf of the Fund directly leases the space. Commissions on leases for State space which Laub produces would be paid by the Port Authority on behalf of the Fund. Laub will have the right to defer to October 1, 1989 any payment falling due before that date including the lump sum payment hereinafter described and to receive simple interest thereon at the Port Authority's annual earnings rate, as defined in the agreement, at the time when Laub would have received payment or when it elected to defer a future payment. If during the period through December 31, 1987 (or through February 28, 1988 at the Port Authority's election) Laub has not become entitled under the agreement to a commission on 300,000 square feet of space, it will have the right by notice to the Port Authority to relinquish further rights to commissions with respect to space let thereafter and receive in place thereof a lump-sum payment equal to the average per square foot commission earned under the agreement up to that date applied to a number of square feet obtained by subtracting from 300,000, or the amount actually made available to Laub whichever is lesser, the number of square feet upon which commission became payable under the agreement prior to that date. Also, if commissions payable under the agreement included payments on leases with terms of less than ten years, which were not produced by the efforts of Laub, the payments on those leases shall be converted for purposes of determining the average to commissions which would have been payable on ten-year leases. Discussions will continue between the Port Authority and the Fund regarding the allocation of the 50% and 75% commissions and the lump sum payment referred to in this paragraph.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority and on behalf of the Fund for Regional Development, to enter into an agreement with Kenneth D. Laub & Company, Inc. in accordance with the foregoing.

(Board - 4/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, acting for itself and on behalf of the Fund for Regional Development, to enter into an agreement with the real estate firm of Kenneth D. Laub & Company, Inc. in settlement of a claim arising from the lease between the Fund for Regional Development and Dean Witter Reynolds, Inc.; the agreement to be in accordance with the foregoing and the form of the agreement to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Commissioner Robert Van Buren

Chairman Kaltenbacher welcomed Commissioner Robert Van Buren to his first Board meeting and expressed the pleasure of his fellow Commissioners at having Commissioner Van Buren join them as a colleague in the work and programs of the Authority.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of April 10, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on May 8, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on May 8, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on May 8, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on May 8, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Audit Committee

The Audit Committee submitted a report, for information, of action taken at its meeting on March 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 5/8/86)

1986 Budget - January 1 through July 31, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986, to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). On January 9, 1986, the Board acted to confirm the authority of the Executive Director through February 28, 1986, to make expenditures at a rate not to exceed \$200 million per month and to authorize the Executive Director to implement the annual salary range adjustment. On February 13, 1986, March 13, 1986, and April 10, 1986, the Board's confirmation of the Executive Director's authority was extended through March 31, 1986, April 30, 1986, and May 31, 1986, respectively. These actions were taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

It was therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through July 31, 1986.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through July 31, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

(Board - 5/8/86)

Agreement of Local Cooperation - Kill Van Kull and Newark Bay Channels Project

It was reported that the Kill Van Kull and Newark Bay Channels comprise a Federally-improved and maintained 35-foot deep waterway between the Anchorage Channel in Upper New York Bay and Port Newark and the Elizabeth-Port Authority Marine Terminal. At the request of the Port Authority, the Congress in 1972 directed the Corps to study the need for a deepening and selective widening of these channels to accommodate the anticipated future growth of deep-draft containerships. This study has been completed and the Fiscal Year 1985 Supplemental Appropriation Act (Public Law 99-88) authorizes Corps construction of a new channel depth of 45 feet with selective widenings.
