

## 9.0 List of Preparers

This Environmental Impact Statement (EIS) has been prepared under the direction and oversight of the U.S. Coast Guard (USCG), an agency within the Department of Homeland Security (DHS), serving as the lead Federal agency for the National Environmental Policy Act (NEPA) process for the Proposed Project. In support to the USCG, a Joint-Venture between The Louis Berger Group, Inc. (Berger) and Parsons Brinckerhoff (PB), as well as several other team members, has prepared all technical studies and has led all document preparation and public involvement activities.

In addition, The Port Authority of New York and New Jersey, supported by its Program Management consultant, URS Corporation, and its engineering consultants, HNTB Corporation and FIGG Engineering Group, have provided environmental, permitting and design support information to the Joint-Venture.

The members of the EIS Joint-Venture who have played key roles in the development of this environmental document are listed below.
