Know Your Rail Signs and Signals

Yellow Circular Advance Warning Signs warn that the road crosses railroad tracks ahead. Slow down, look and listen for a train and be prepared to stop if a train is approaching.

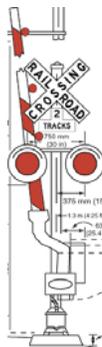

Yellow Diamond-Shaped Parallel Track Signs warn that the road crosses railroad tracks that appear immediately after making either a right or a left turn.

Pavement Markings in advance of the crossing alerts that the road crosses railroad tracks ahead.

Crossbuck Signs mark the crossing and should be considered the same as a YIELD sign. Take extra care at un-signalized crossings (marked only with a Crossbuck). Always expect a train!

Flashing Red Lights warn of an approaching train. When the red lights are flashing, a train is approaching. Stop and wait for the train to pass, only proceed when the lights stop flashing.

If gates are present, they will close the road when a train approaches. **It is illegal to go around the gates!** Going around the gates makes YOU legally liable for any deaths, injuries, or damage to property if a collision occurs.

WHAT TO DO IF YOUR VEHICLE STALLS OR HANGS UP ON THE TRACKS

1. GET OUT IMMEDIATELY!

Evacuate your vehicle. (Trains traveling at 60 mph may take a mile or more to stop).

2. Move away.

Walk **toward the oncoming train and away from the tracks** at a 45-degree angle. (If your vehicle is hit, debris will spread out from the tracks in the same direction the train is moving).

3. Call for help.

When you are safely away from the tracks, find the FRA crossing identification number posted near the crossing (see sample locations below) and call the Port Authority Police at 973-578-2180.

Tell them that a vehicle is on the tracks. Provide the location, crossing number (if posted), and the name of the road that crosses the tracks.
